

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THIS volume is designed to meet the popular demand for a book of reliable and authentic information touching our every day pursuits and requirements. It belongs to a class of publications of a cyclopedic character that are not only a very great *desideratum* but an unquestioned necessity in an age like the present,—marked, as it is, by a constantly expanding spirit of invention, progress, innovation, general enlightenment, and humane achievement, the record of which is found in a wide and diverse literature.

It has been truly said, "Of the making of books, there is no end"; nor is it desirable that there should be. The thing that is desirable is, that the books we are compelled to own should be the best of their class—rich repositories to which we can repair with entire confidence for new knowledge, or the refreshing of that which may have lapsed through some trick of memory. This is especially true, not only as a matter of economy in time and energy, but because of the utter futility of any effort on our part to keep abreast of the knowledge of the times, and the practical issues that concern us, in any other way. When it is remembered that the yearly output of books exceeds 30,000 volumes, and that the reading capacity of the average man is not more than 3,500 in a lifetime, even though he devote the whole of his working hours to the task of reading, the necessity and wisdom of properly and judiciously epitomizing that knowledge which is of most avail in making us into better citizens and more intelligent beings, is only emphasized.

The present work is confined exclusively to those departments of knowledge with which we are most practically and vitally concerned. Its mission is to convey useful and general information to all classes of readers, and incidentally to add something to every one's store of general culture. It is the result of a large expenditure of labor, painstaking care, judicious discrimination, and wide research. The material included has been drawn from numerous sources and authorities, and great care exercised in its collation so as to exclude everything of doubtful authenticity. Obviously the grouping of related facts into Books will be found advantageous for quick reference, as well as in giving a comprehensive view of certain fields of knowledge. The topics in the various Books are not meant to follow any specific order, but have been permitted to fall in line in such fashion as seems most likely to sustain their interest for the general reader. This seeming disorder is, however, fully met by a complete index, both direct and indirect, at the end of the volume.

The points that have been steadily kept in view are, conciseness, authenticity, comprehensiveness, range, and utility; and in these respects it is believed that this volume occupies a niche peculiarly its own.

CANADIAN HOUSE OF PARLIAMENT.

Book I.

Government and Law.

Government and Law.

UNITED STATES OF AMERICA.

Constitution and Government.—A Congress representing the thirteen original colonies declared their independence of Great Britain July 4, 1776, and thereafter each colony was known as a State. As a result of the war with Great Britain, the latter acknowledged the independence of the United States November 30, 1782, and September 3, 1783, a definitive treaty of peace was concluded at Paris. The government of the United States continued under the Congress provided by the Articles of Confederation until March 4, 1789, when a constitution, which had been adopted by representatives of the different States September 17, 1787, went into effect. March 4, 1789, then, is the date of the inception of the present constitutional government of the American Union.

Ten amendments were added to the original Constitution December 15, 1791; the eleventh amendment, January 8, 1798; the twelfth amendment, September 25, 1804; the thirteenth amendment, December 18, 1865; the fourteenth amendment, July 28, 1868; and the fifteenth amendment, March 30, 1870. Amendments proposed by the Congress must be adopted by three fourths of the States, acting through their legislatures.

In the table of States hereafter given, the date of the adoption of the original Constitution by each is stated, and also the dates of the admission of States subsequent to that time, there having been thirty-two States admitted since the adoption of the Constitution, the whole number of States now being forty-five.

By the Constitution, the government of the nation is intrusted to three separate departments, the Executive, the Legislative, and the Judicial. The executive power is vested in a President, who holds his office during the term of four years, and is elected, together with a Vice-President chosen for the same term, in the mode prescribed as follows: "Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of senators and representatives to which the State may be entitled in the Congress; but no senator or representative, or person holding an office of trust or profit under the United States, shall be appointed an elector." The practice is that in every State the electors allotted to the State are chosen by direct vote of the citizens on a general ticket, on the system known in France

as *scrutin de liste*. The Constitution enacts that "the Congress may determine the time of choosing the electors, and the day on which they shall give their votes, which day shall be the same throughout the United States"; and further, that "no person except a natural-born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years, and been fourteen years a resident within the United States."

Executive.—The President is commander-in-chief of the army and navy, and of the militia in the service of the Union. The Vice-President is *ex officio* President of the Senate; and, in case of the death or resignation of the President, he becomes the President for the remainder of the term. The elections for President and Vice-President are at present held in all the States on the Tuesday next after the first Monday in November, every four years; and, on the 4th of March following, the new President-elect assumes office.

By a law approved January 19, 1886, in case of removal, death, resignation, or inability of both the President and Vice-President, the Secretary of State, and after him, in the order of the establishment of their departments, other members of the Cabinet, shall act as President until the disability of the President is removed, or a President shall be elected. On the death of a Vice-President the duties of the office fall to the President *pro tempore* of the Senate, who receives the salary of the Vice-President. The party in the majority usually elects a President *pro tempore* at the beginning of each term of Congress, or reorganization of the Senate, who acts as President of the Senate whenever the Vice-President is absent.

The administrative business of the Government is conducted by eight chief officers, or heads of Departments, denominated "Secretaries," who constitute what is popularly known as the "Cabinet," although there is no legal or constitutional provision for that designation. The Secretaries are chosen by the President, and commissioned by him after confirmation by the Senate. Each Secretary presides over his particular department, and acts under the immediate authority of the President. Each Secretary receives an annual salary of \$8,000, and holds office during the pleasure of the President. The Departments,

in the chronological order of their establishment, and the duties, are as follows:

Secretary of State.—The Department of State is charged with all duties appertaining to correspondence with public ministers, American consuls, and representatives of foreign powers accredited to the United States, and with negotiations of whatever character relating to the foreign affairs of the nation. The Secretary is accorded first rank among the members of the President's Cabinet. He is the custodian of treaties made with foreign states, and of the laws of the United States. He grants and issues passports, and exequaturs to foreign consuls in the United States are issued under his supervision.

Secretary of the Treasury.—The Secretary of the Treasury is charged with the management of the national finances, and prepares plans for the improvement of the revenue and the support of public credit. He controls the plans for public buildings, the coinage and printing of money, and annually submits to Congress estimates of probable revenues and disbursements of the Government.

Secretary of War.—The Secretary of War performs all duties relating to the military service; he has supervision of the United States Military Academy at West Point, of the national cemeteries, and of all matters relating to river and harbor improvements, of insular affairs, the prevention of obstruction to navigation, and the establishment of harbor lines.

The military bureaus of the War Department constitute a part of the military establishment, and have officers of the regular army at their head, while the Secretary and his immediate assistants are civilians as a rule.

Department of Justice.—The Attorney-General represents the United States in matters involving legal questions, and gives advice and opinion, when so required by the President or by the heads of the Executive Departments, on questions of law arising in the administration of their respective offices; he exercises a general superintendence and direction over United States attorneys and marshals in all judicial districts in the States and Territories, and provides special counsel for the United States whenever required by any department of the Government.

Postmaster-General.—The Postmaster-General has the direction and management of the general postal business of the Government; he appoints officers and employees of the Department, except the four Assistant Postmasters-General, who are appointed by the President, by and with the advice and consent of the Senate; appoints all postmasters whose compensation does not exceed \$1,000; makes

postal treaties with foreign governments, by and with the advice and consent of the President, and directs the management of the domestic and foreign mail service.

Secretary of the Navy.—The Secretary of the Navy has the general superintendence of construction, manning, armament, equipment, and employment of vessels of war.

Secretary of the Interior.—The duties of the Secretary of the Interior are varied; he is charged with the supervision of the public business relating to patents, pensions, public lands, and surveys, Indians, education, railroads, Indian reservations, the Territories, the various public parks, and certain hospitals and eleemosynary institutions in the District of Columbia.

Secretary of Agriculture.—The Secretary of Agriculture is charged with the supervision of all public business relating to the agricultural industry, and he exercises advisory supervision over the agricultural experiment stations deriving support from the National Treasury, he also has control of the quarantine stations for imported cattle, of interstate quarantine when rendered necessary by contagious cattle diseases, and of the weather bureau.

Secretary of Commerce and Labor.—The duties of the Secretary of Commerce and Labor are to foster, promote and develop foreign and domestic commerce, the mining, manufacturing, shipping and fishery industries, transportation facilities and the labor interests of the United States. He also has jurisdiction over the coast and geodetic survey, lighthouses, steamboat inspection, immigration and the census.

Legislative.—The whole legislative power is vested by the Constitution in a Congress, consisting of a Senate and House of Representatives. The Senate consists of two members from each State, chosen by the State Legislatures for six years. Senators must be not less than thirty years of age; must have been citizens of the United States for nine years; and be residents in the States for which they are chosen. Besides its legislative functions, the Senate is intrusted with the power of ratifying or rejecting all treaties made by the President with foreign powers, a two-thirds majority of senators present being required for ratification. The Senate is also invested with the power of confirming or rejecting all appointments to office made by the President, and its members constitute a High Court of Impeachment. The judgment in the latter case extends only to removal from office and disqualification. The House of Representatives has the sole power of impeachment.

The House of Representatives is composed

of members elected every second year by the vote of citizens who, according to the laws of their respective States, are qualified to vote. In general such voters are all male citizens over twenty-one years of age. Neither race nor color affects the right of citizens. The franchise is not absolutely universal; residence for at least one year in most States (in Rhode Island and Kentucky two years, in Michigan and Maine three months) is necessary, in some States the payment of taxes, in others registration. On the other hand, many of the Western States admit to the franchise unnaturalized persons who have formally declared their intention to become citizens. Untaxed Indians are excluded from the franchise, in most States convicts, in some States duellists and fraudulent voters; in Massachusetts voters are required to be able to read English, and in Mississippi and South Carolina there are also educational restrictions. Colorado, Idaho, Utah, and Wyoming admit women to the franchise on equal terms with men. The number of members to which each State is entitled is determined by the census taken every ten years. By the Apportionment Act consequent on the census of 1900, the number of representatives is 386, distributed as follows:—

| | | | |
|-------------------------|----|--------------------------|-----|
| Alabama | 9 | Nevada | 1 |
| Arkansas | 7 | New Hampshire | 2 |
| California | 8 | New Jersey | 10 |
| Colorado | 3 | New York | 37 |
| Connecticut | 5 | North Carolina | 10 |
| Delaware | 1 | North Dakota | 2 |
| Florida | 3 | Ohio | 21 |
| Georgia | 11 | Oregon | 2 |
| Idaho | 1 | Pennsylvania | 32 |
| Illinois | 25 | Rhode Island | 2 |
| Indiana | 13 | South Carolina | 7 |
| Iowa | 11 | South Dakota | 2 |
| Kansas | 8 | Tennessee | 10 |
| Kentucky | 11 | Texas | 16 |
| Louisiana | 7 | Utah | 1 |
| Maine | 4 | Vermont | 2 |
| Maryland | 6 | Virginia | 10 |
| Massachusetts | 14 | Washington | 3 |
| Michigan | 12 | West Virginia | 5 |
| Minnesota | 9 | Wisconsin | 11 |
| Mississippi | 8 | Wyoming | 1 |
| Missouri | 16 | | |
| Montana | 1 | Total | 386 |
| Nebraska | 6 | | |

On the basis of the last census there is one representative to every 201,860 inhabitants. The popular vote for President in 1900 was about 14,000,000, or nearly one in five of the entire population. In 1900 there were in the United States 21,329,819 males of voting age—21 years and over, including unnaturalized foreigners.

The next apportionment will be based upon the Federal census of 1910, the results of which census will be reported to the Congress assembling the first Monday in December of that year, the Congress passing an apportionment act providing the requisite number of repre-

sentatives from each State, and notifying the respective States of this action. Each State will then rearrange its congressional districts for the next election, which will take place in November, 1912, and the apportionment then established in accordance with the next enumeration will hold for ten years. The apportionment at the various censuses has been as follows:—

| Under | CENSUS | | APPORTIONMENT | | Whole Number of Representatives |
|-----------------|--------|------------|---------------|---------|---------------------------------|
| | Year | Population | Year | Ratio | |
| Constitution | — | — | 1789 | 30,000 | 65 |
| First Census | 1790 | 3,929,214 | 1793 | 33,000 | 105 |
| Second Census | 1800 | 5,308,483 | 1803 | 33,000 | 141 |
| Third Census | 1810 | 7,239,881 | 1813 | 35,000 | 181 |
| Fourth Census | 1820 | 9,633,822 | 1823 | 40,000 | 213 |
| Fifth Census | 1830 | 12,866,020 | 1833 | 47,700 | 240 |
| Sixth Census | 1840 | 17,069,453 | 1843 | 70,680 | 223 |
| Seventh Census | 1850 | 23,191,876 | 1853 | 98,423 | 233 |
| Eighth Census | 1860 | 31,443,321 | 1863 | 127,381 | 243 |
| Ninth Census | 1870 | 38,558,371 | 1873 | 131,425 | 298 |
| Tenth Census | 1880 | 50,155,783 | 1883 | 151,911 | 325 |
| Eleventh Census | 1890 | 62,622,250 | 1893 | 173,901 | 356 |
| Twelfth Census | 1900 | 76,393,387 | 1903 | 201,860 | 386 |

According to the terms of the Constitution, representatives must not be less than twenty-five years of age, must have been citizens of the United States for seven years, and be residents in the States from which they are chosen. In addition to the representatives from the States, the House admits a "delegate" from each organized Territory, who has the right to speak on any subject and to make motions, but not to vote. The delegates are elected in the same manner as the representatives.

Each of the two houses of Congress is made by the Constitution the "judge of the elections, returns, and qualifications of its own members"; and each of the houses may, with the concurrence of two thirds, expel a member.

The Congress of the United States has the power to propose alterations in the Constitution, by the 5th article of the same. The article orders that the Congress, whenever two thirds of both houses shall deem it necessary, shall propose amendments to the Constitution, or, on the application of the Legislatures of two thirds of all the States, shall call a convention for proposing the amendments, which in either case shall be valid to all intents and purposes as part of the Constitution when ratified by the Legislatures of three fourths of the several States, or by conventions in three fourths thereof, as the one or other mode of ratification may be proposed by Congress.

Slavery was abolished throughout the whole of the United States by the Thirteenth Amendment of the Constitution, adopted Dec. 18, 1865. The vast change in the political and social organization of the Republic made by

this new fundamental law was completed by the fourteenth and fifteenth Amendments of the Constitution, adopted in 1868 and 1870, which gave to the former slaves all the rights and privileges of citizenship.

Under an act of Congress approved Jan. 20, 1874, the salary of a senator, representative, or delegate in Congress is \$5,000 per annum with traveling expenses calculated at the rate of twenty cents per mile, by the most direct route of usual travel, and similar return, once for each session of Congress. There is also an annual allowance of \$125 for stationery, etc., for each member. The salary of the Speaker of the House of Representatives is, under the same Act of Congress, \$8,000 per annum.

No senator or representative can, during the time for which he is elected, be appointed to any civil office under authority of the United States which shall have been created or the emoluments of which shall have been increased during such time; and no person holding any office under the United States can be a member of either house during his continuance in office. No religious test is required as a qualification to any office or public trust under the United States.

The period usually termed "a Congress" in legislative language continues for two years; as, for example, from noon, March 4, 1899, until March 4, 1901, at which latter time the term of the representatives to the Fifty-sixth Congress expires, and the term of the new House of Representatives commences; but a new Congress does not assemble, unless called together by the President in special session, until the first Monday in December following, and the organization of the House, that is, the election of the Speaker and other officers, takes place on the first assembling, whether in special session after the 4th of March of every second year, as stated, or on the first Monday in December after its term begins. While the sessions of the Senate are held contemporaneously with those of the House, its organization may continue from Congress to Congress.

There are usually two sessions of each Congress—the first or long session, which may hold until adjourned by resolution of the two Houses, and the short session, which is the closing one, and which expires on the 4th of March every second year, the new Congress beginning its term the same day.

Neither house of Congress can adjourn for more than three days at any one time without the joint action of both. In case of a disagreement of the two houses as to adjournment, the President has the right to prorogue the Congress.

The Vice-President of the United States, as before stated, is President of the Senate, but he has no vote unless there is a tie. The Senate has the sole power to try all impeachments, and it acts upon the nominations for appointment by the President; it also acts upon treaties submitted to it by the administration. The Senate may be called in extra session for these purposes by the President without the Congress being called together.

All bills for raising revenue must originate in the House of Representatives, but the Senate may propose or concur with amendments to such bills, as on all other bills.

Judiciary.—The judicial system, like the executive and legislative systems, is dual. The Federal Government maintains courts for the trial of civil causes arising out of the admiralty, patent, banking, and other laws of the United States; of certain causes between citizens of different States; and of crimes against the United States. These crimes are few in number, and the criminal jurisdiction of United States courts is comparatively insignificant, extending only to piracy, murder on the high seas, offenses against the postal and revenue laws, and the like. Almost all offenses against the person and against property are dealt with by the State courts; also all civil causes where the parties are residents of the same State, and matters of probate, divorce, and bankruptcy.

In the separate States the lowest courts are those held by Justices of the Peace, or, in towns and cities, by Police Judges. In the counties courts of record are held, some by local county officers, others by District or Circuit Judges, who go from county to county. In these courts there are usually the grand and petty jury. The highest court in each State is the Supreme Court, or Court of Final Appeal, with a Chief Justice and Associate Judges. These judges are usually elected by the people, but sometimes appointed by the Governor, with or without the Senate or Council; they usually hold office for terms of years, but sometimes practically for life or during good behavior. Their salaries vary from \$2,500 to \$7,500.

Of the Federal Courts the lowest are those of the districts, of which there are about sixty, each State forming one or more districts. These courts may try any case of crime against the United States not punishable with death. Above these are nine Circuit Courts, each with a Circuit Judge, with or without the local District Judge; but one or two District Judges may by themselves hold a Circuit Court. The Circuit Court Judges appoint commissioners, whose duty it is to arrest, examine, and commit persons accused of crime against the

United States, and to assist the Circuit and District Judges in taking evidence for the trial of such persons. These duties may, however, be performed by a judge or magistrate of either a State or the Federal Government. Each of the nine Justices of the Supreme Court must hold a Court in one of the nine circuits at least once every two years, and with each may be associated the Circuit or District Judge. The Supreme Court consists of a Chief Justice and eight Associate Judges, appointed by the President with the consent of the Senate. It deals with appeals from inferior courts, and has original jurisdiction in cases affecting foreign ministers and consuls, and those in which a State is a party.

Other courts with criminal jurisdiction are the Court of the District of Columbia and those of the Territories. There is also at Washington a Court of Claims.

States and Territories.—The Union comprises thirteen original States, six States which were admitted without having been organized as Territories dependent on the Union, and twenty-six States which had been Territories. Each State has its own constitution, which must be republican in form, and each constitution derives its authority, not from Congress, but from the population of the State. In the case of the original States the colonial charters were adopted, with more or less modification, as State constitutions; the other States, before entering the Union, had constitutions already made. Admission of States into the Union is granted by special Acts of Congress, either (1) in the form of "enabling Acts," providing for the drafting and ratification of a State constitution by the people, in which case the Territory becomes a State as soon as the conditions are fulfilled, or (2) accepting a constitution already framed and at once granting admission.

Each State is provided with a Legislature of two Houses, a Governor, and other executive officials, and a judicial system. Both Houses of the Legislature are elective, but the Senators (having larger electoral districts) are less numerous than the members of the House of Representatives, while in some States their terms are longer and, in a few, the Senate is only partially renewed at each election. Members of both Houses are paid at the same rate, which varies from \$150 to \$1,500 per session, or from \$1 to \$8 per day during session. The duties of the two Houses are similar, but in many States money bills must be introduced first in the House of Representatives. The Senate has to sit as a court for the trial of officials impeached by the other House, and, besides, has often the power to confirm or re-

ject appointments made by the Governor. In most of the States the sessions are biennial, the Governor having power to summon in extraordinary session, but not to dissolve or adjourn. State Legislatures are competent to deal with all matters not reserved for the Federal Government by the Federal Constitution, or falling within restrictions imposed by the State constitutions. Among their powers are the determinations of the qualifications for the right of suffrage, and the control of all elections to public office, including elections of members of Congress and electors of President and Vice-President; the criminal law, both in its enactment and in its execution, with unimportant exceptions, and the administration of prisons; the civil law, including all matters pertaining to the possession and transfer of, and succession to, property; marriage and divorce, and all other civil relations; the chartering and control of all manufacturing, trading, transportation, and other corporations, subject only to the right of Congress to regulate commerce passing from one State to another; the regulation of labor; education; charities; licensing, including regulation of the liquor traffic; fisheries and game laws. The revenues of the States are derived chiefly from a direct tax upon property, in some cases both real and personal, in others on land and buildings only. The prohibition upon Congress to levy direct taxes save in proportion to population, contained in the National Constitution, leaves this source of revenue to the States exclusively.

The Governor is chosen by direct vote of the people over the whole State. His term of office varies from one year (in 2 States), to four years (in 22 States), and his salary from \$1,500 to \$10,000. His duty is to see to the faithful administration of the law, and he has command of the military forces of the State. His power of appointment to State offices is usually unimportant. He may recommend measures but does not present bills to the Legislature. In some States he presents estimates. In all the States except Delaware, North Carolina, and Rhode Island, the Governor has the power to veto bills, but where this power exists the Legislature, by a two thirds vote, may override the veto.

The officers by whom the administration of State affairs is carried on—the Secretaries, Treasurers, and Auditors, and in some of the States members of boards or commissions—are usually chosen by the people at the general State elections for terms similar to those for which Governors themselves hold office. In some States commissioners are appointed by the Governor.

The territories are : (1) Organized,—Arizona, New Mexico, and Oklahoma. (2) Unorganized,—Alaska and Indian Territory. (3) Federal District,—The District of Columbia. (4) Insular Possessions,—Hawaii, Porto Rico, Guam, Samoan Islands, and the Philippine Islands. Class (1) have powers similar to those of the States, but any of their acts may be modified or annulled by Federal statutes.

The Governor of each of the Territories, except the Indian Territory, is appointed for four years by the President, to whom annual reports are submitted. These Governors have the power of veto over the acts of Territorial Legislatures. The President appoints the Territorial Secretaries and other officials, together with Territorial judges.

Alaska and the Indian Territory have no power of self-government, the former being governed like a British crown colony, by a Governor who is not assisted by a Legislature. In the Indian Territory the native tribes are under the direct control of the Department of the Interior, but the civilized tribes, with the support of the National Government, maintain local governments of their own, with elective Legislatures and executive officers, whose functions are strictly limited to the persons and personal property of their own citizens; that is, the Indians.

The District of Columbia presents an anomalous status. It is the seat of the Federal Government. It is coextensive with and is practically the City of Washington, and embraces an area of 69½ square miles. The District has no municipal legislative body, and its citizens have no right to vote, either in national or municipal affairs. Under an act of 1878 its municipal government is administered by three commissioners, appointed by the President. They constitute a non-partisan board, one being selected from each of the leading political parties, and the third being assigned to duty as a commissioner from the Engineer Corps of the United States army. All legislation relative to the District of Columbia is by the Congress.

All the States and Territories have biennial sessions of their legislatures except Alabama, which has quadrennial sessions, and Georgia, Massachusetts, New Jersey, New York, Rhode Island, and South Carolina, which have annual sessions, beginning in January of each year, with the exception of Georgia, whose Legislature meets in October. The States whose Legislatures met in January, 1906, are Iowa, Kentucky, Maryland, Mississippi, Ohio, and Virginia. Alabama's next session begins in January, 1907, Louisiana's in May, 1906, and Vermont's in October, 1906.

HAWAII.

Constitution and Government.—The Hawaiian or Sandwich Islands, discovered by the Spaniards in 1542, and rediscovered by Captain Cook in 1778, formed during the greater part of the nineteenth century an independent kingdom, whose integrity was recognized by Great Britain, France, the United States, and other governments. In 1893, however, the reigning Queen, Liliuokalani, was deposed, and a provisional government formed; in 1894 a Republic was proclaimed, with a Legislature of two Houses and a President; and in accordance with a resolution of Congress of July 7, 1898, the islands were on August 12, 1898, formally annexed to the United States. Five commissioners were appointed to recommend such legislation concerning the islands as they should deem necessary and proper, and in the beginning of December the report of the Commission with its legislative proposals was transmitted to Congress. The principal bill, providing for the erection of the islands into a Territory, to be styled the Territory of Hawaii, was enacted by the first session of the Fifty-sixth Congress, and was approved by the President, April 30, 1900. All whites, including Portuguese, all persons of African descent, and all descendants of the Hawaiian race, either on the paternal or the maternal side, who were citizens of Hawaii immediately prior to the transfer of the sovereignty to the United States, are declared citizens of the United States. Prior to the transfer all Hawaiians of full age who could speak, read, and write either Hawaiian or English, had the right to vote.

Area and Population.—The total area of the islands is 6,640 square miles: namely, Hawaii, 4,210; Maui, 760; Oahu, 600; Kauai, 590; Molokai, 270; Lanai, 150; Niihau, 97; Kahoolawe, 63 square miles. In 1900 the population was nearly 154,000. Of Hawaiians there were 29,801; part Hawaiians, 7,840; Chinese, 25,750; Caucasians, 28,533; Japanese, 61,129; South Sea Islanders, 410; negroes, 260. The native population (closely allied to the Maories of New Zealand) is rapidly decreasing, while the foreign element is increasing. From 1896 to 1900 there was a decrease of over 1,000 Hawaiians and from 1890 to 1900 of about 4,500. All other nationalities mentioned have increased.

Commerce and Communications.—The lack of coal and metals in Hawaii limits the scope of manufactories. The islands are to a great extent mountainous and volcanic, but the soil is highly fertile and productive. Sugar and rice are the staple productions, while coffee, hides, bananas, and wool are also exported.

The year's output of sugar for 1903 was 387,000 tons. For year ending June 30, 1904, Hawaii's imports from foreign countries amounted to \$3,797,691; from United States \$11,602,080. Exports to foreign countries, \$39,016; to United States \$25,133,533, of which \$24,360,097 was in sugar. Hawaii's principal purchase from United States is machinery.

Six lines of steamships connect Hawaii with United States, Canada, Australia, New Zealand, China, and Japan. Regular steamboat connection exists between the larger islands. The harbor of Honolulu, protected by a coral reef which has been cut through to allow passage for the largest vessels, is one of the best in the Pacific. Honolulu is lighted by electricity and has an electric railway.

The islands have 128 miles of railway, 250 miles of telephone, and between the five largest a system of wireless telegraphy is in operation.

PORTO RICO.

Area, Population, Etc.—The island of Porto Rico has an extent of about 3,668 square miles—35 miles broad and 100 miles long. The population, according to an enumeration made in 1900, was 953,243.

Government.—Porto Rico, acquired by United States by treaty with Spain, Dec. 10, 1898, is governed under the congressional act of April 12, 1900. A governor is appointed by the President. An executive council, consisting of eleven members, six heads of departments, and five who must be natives of Porto Rico, is appointed in the same manner, and constitutes the upper legislative chamber. The lower house consists of 35 members elected by the people. The governor has absolute veto power over the acts of the Legislature. There is a small property qualification and a low educational test for voters.

Geographical Formation.—The island is traversed from east to west by a mountain range, dividing the island into two unequal portions, by far the longest slope being on the north, so that the rivers on that coast are much the longer. From this chain several branches diverge toward the north coast, giving it a rugged appearance. The most of the population is situated on the lowlands at the sea front of the hills. For lack of roads, the interior is accessible only by mule trails or saddle paths, and it is covered with vast forests.

Rivers and brooks are numerous, forty-seven very considerable rivers having been enumerated. They are short and rapid, especially on the Caribbean slopes, which are steep and abrupt. The mountains intercept the north-

east trade winds blowing from the Atlantic and wring their moisture from them, so that the rainfall of the north section is very copious. South of the mountains severe droughts occur and agriculture demands irrigation, but such work is unsystematically carried on.

The northeast coast is broken and forbidding; that of the south safer. The chief port on the north coast is the capital, San Juan. On the west is the important harbor of Mayaguez. On the south side are Guanica, Ponce, and Guayama. The island of Vieques, which lies off the east coast of Porto Rico, is 21 miles long and 6 miles wide.

Climate.—The climate is hot, but much alleviated by the prevailing northeast winds. A temperature as high as 117° Fahrenheit has been recorded, but it seldom exceeds 97° Fahrenheit in the shade during the hottest hours. At night it sinks to 68° or 69°. The rainy season lasts from August to December, and the rainfall is at times so copious north of the mountains as to inundate cultivated fields and produce swamps. The mean annual average rainfall is 60 inches. The prevailing diseases are yellow fever, elephantiasis, tetanus, marsh fever, and dysentery.

Productions.—Porto Rico is unusually fertile, and its dominant industries are agriculture and sugar-making. In elevated regions the vegetation of the temperate zone is not unknown. There are more than 500 varieties of trees found in the forests, and the plains are full of palm, orange, and other trees. The principal crops are sugar, coffee, tobacco, cotton, and maize, but bananas, rice, pineapples, and many other fruits are important products.

The principal minerals found in Porto Rico are gold, carbonates, and sulphides of copper, and magnetic oxide of iron in large quantities. Lignite is found at Utuado and Moca, and also yellow amber. Several varieties of marbles, limestones, and other building stones are deposited on the island, but these resources are very undeveloped. There are salt works at Guanica and Salinac on the south coast, and at Cape Rojo on the west, and these constitute the principal mineral industry in Porto Rico.

Inter-Communication.—Railways are in their infancy, and cart roads are deficient. There are 137 miles of railway, with 170 miles under construction, and 470 miles of telegraph lines. These connect the capital with the principal ports south and west. Submarine cables run from San Juan to St. Thomas and Jamaica.

Cities.—The capital of Porto Rico is San Juan Bautista, founded by Ponce de Leon. It is situated on the small island of Morro, now connected with the mainland by the San

Antonio Bridge. On the western end of the island Ponce de Leon built the Governor's palace, inclosed within the Santa Catalina fortifications, where also are the cathedral, town house, and theater. This portion of the city is now called Pueblo Viejo. It is an Episcopal see subordinate to the Archbishop of Santiago de Cuba. The city is strongly fortified for the defense of the entrance to the outer harbor. The interior harbor is landlocked, capacious, and safe, and is being dredged to a uniform depth of twenty-nine feet. The houses are of stone, usually one story high, and have roof gardens, from which fine marine views may be enjoyed. Almost every house has a garden in its patio or court.

Besides the capital, San Juan, there are some sixty or seventy towns and villages in the island. Of these the most important are Ponce and Mayaguez, each with a smaller population than San Juan, that of Ponce being 27,952, while that of San Juan is 32,048; Aguadilla, on the west coast; Farjardo and Humacao, on the east coast; Guanica and Aroyo, on the south, and Pepino and Cayey, in the interior.

Commerce.—For the fiscal year ending June 30, 1901, the imports of Porto Rico amounted to \$8,814,645, of which 6,861,917 dollars' worth were from United States. Imports for 1902, \$13,209,610, from United States \$10,882,653; for 1903, \$14,449,286, from United States \$12,245,845; for 1904, \$13,169,029, from United States \$11,210,060. The exports for 1901 were \$8,886,571, of which 5,883,892 dollars' worth came to United States; for 1902, \$12,433,956, to United States \$8,378,766; for 1903, \$15,089,079, to United States \$11,051,195; for 1904, \$16,265,903, to United States \$11,722,826.

The principal imports are cotton cloths and provisions. Sugar is the chief article of export, averaging about one half the value of the whole. Coffee is next in importance. Tobacco and cattle are also exported. Next to United States, the trade of Porto Rico is chiefly with France and Spain.

On July 25, 1901, Porto Rico became legally a customs district of the United States and free trade with this country was established.

PHILIPPINE ISLANDS.

Area and Population.—These islands, ceded by Spain to United States, by the treaty signed Dec. 10, 1898, ratified by the Senate Feb. 6, 1899, and by the queen regent of Spain, March 17, number over 3100. The total area is 115,020 square miles. But two islands exceed in area 10,000 square miles,—Luzon with 40,969, and Mindanao with 36,292. Nine islands have each an area between 1,000

square miles and 10,000. There are 20 having areas between 100 and 1,000 square miles, 73 between 10 and 100 square miles, and 262 between 1 and 10 square miles; about 2775 islands are less than 1 square mile each in area.

By census of 1903 the population was 7,635,420; 647,740 were uncivilized. There were 14,271 white, of whom 8,135 were Americans; 42,097 yellow, of whom 41,035 were Chinese, and 921 Japanese. The principal cities are Manila (350,000), Iloilo (11,900), and Cebu (35,243).

Government.—After transfer of the Philippines to the United States, until June, 1901, a military governor had performed all executive duties, both civil and military. In February, 1900, the President appointed 5 civil commissioners who should undertake the provisional government. This commission reorganized the local civil governments as prevailing circumstances required. It established a constitution for the government of the provinces providing that the municipalities of each should elect a governor, subject to the approval of the commission, and that each should have a secretary, a treasurer, a commissioner of public works, and a public prosecutor, all to be appointed by the commission. In June, 1901, civil administration was made distinct from military and Ilon. W. H. Taft was appointed civil governor. The commission was increased from 5 to 8 by addition of three native members, and was organized so that each member is the head of an administrative department. In September, 1901, departments of interior, commerce, police, finance, justice, and public instruction were organized.

The act of July 1, 1902, provided that a census should be taken and that two years after its publication, if peace prevails, a legislative assembly shall be established. This shall be constituted of two chambers, the upper house to be the commission, the lower house to be made up of from 50 to 100 delegates popularly elected, and apportioned among the provinces according to population. A small property qualification, or a low educational test, will be required of voters.

The supreme court of the Philippines consists of 4 American and 3 native justices. The courts next inferior, called Courts of First Instance, are 16 in number and are presided over by natives.

The governor, vice-governor, members of the Philippine commission, heads of administrative departments, and justices of the supreme court are appointed by the President with consent of the Senate.

Financial Condition.—By a congressional act which came into force in June, 1904,

a Mexican dollar (value 50 cents U. S. money) is now guaranteed by gold. The Mexican dollar, at the beginning of the occupation by United States, was the chief currency but its fluctuations made it unsatisfactory unless so guaranteed. There are six banks, The Chinese Bank, The American Bank, Hong Kong and Shanghai Corporation, International Banking Corporation, Banco Español Filipino, and Chartered Bank of India, Australia and China.

Industrial Conditions.—The natural resources of the Philippines are highly favorable to agriculture, but, under Spanish dominion, they remained largely undeveloped. Farming, however, is the chief industry, though, as compared with the total area of the islands, the amount of land under cultivation is very small. Seventy per cent. of the area is under forests, and the spaces of land between villages are almost wholly uncultivated, and are used only for grazing and for their wild products.

Hemp is the chief production, aggregating two thirds the value of the export trade. For five years, beginning with 1900, the average annual export of hemp has been 117,000 tons. Sugar of an inferior quality is produced. Copra, or the dried kernel of the coconut, and tobacco are important crops. Scientific methods of farming, which are now being introduced into the island, have much to accomplish before Philippine agriculture can reach its maximum development. Rotation of crops, irrigation, use of fertilizers, all hitherto practically unknown, will add much to the value of lands already fertile and productive.

It is thought that cattle-raising will become a profitable industry because of the large areas of grazing land adapted for ranches and the favorable climate.

The capital invested in manufactures exceeds \$20,000,000, but this branch of industry also is extremely undeveloped. The manufactures of tobacco and liquors are the most important, and these constitute 38½ per cent. of the value of manufactured products. Philippine textiles have been in some demand in European markets. Indications are that coal and iron exist in quantities sufficient to render the manufacturing of the latter profitable. The forests afford many varieties of valuable products, including gutta percha, India rubber, dye, and medicinal products, and Philippine woods are certain to become second only to agricultural productions as a source of wealth.

Philippine commerce has been much hampered because of inadequate docking facilities in Manila harbor for ocean-going vessels. The Philippine commission, however, appropriated sums for the improvement of the Pasig river,

and the construction, at a cost of \$4,000,000, of an artificial harbor adjoining the entrance of this river. These improvements, completed in 1905, render Manila a great depot for the distribution of American goods, and one of the important harbors of the East.

Education.—Education is under the general direction of the Secretary of Public Instruction, and under his authority is the superintendent for the islands. There are 35 educational districts, each having a superintendent of its own. There are 2,962 schools in the islands, of which 55 per cent. are public, 33 per cent. private, 12 per cent. Roman Catholic. The average is three for each municipality. Two institutions only are devoted to higher education. In August, 1904, 263,000 pupils were enrolled, about four per cent. of the civilized population. One sixth of all children of school age were enrolled, and three fourths of these in the public schools. For 1902, 1903, and 1904, the attendance was from 62½ per cent. to 73 per cent. of the enrollment. Six thousand teachers are employed at an average salary of \$125. Four fifths of these are Filipinos, the remainder chiefly Americans. Instruction in the primary schools is given wholly in English. According to Hon. W. H. Taft, 10,000 Filipino teachers are needed. Two normal schools, one of them in Manila, exist for instruction of these teachers.

Commerce.—The exports of the Philippines from January 1, 1900, to January 1, 1905, were: hemp, averaging 66 per cent. of the total value; sugar, 11 per cent.; copra, 10 per cent.; tobacco, 7 per cent. Coffee and indigo have been for this period of almost no value as exports. The exports for 1902 amounted to \$28,671,904; for 1903, \$32,896,746; for 1904, \$29,149,500. For these three years United States has been the leading consumer of Philippine products, using 11,654,968 dollars' worth in 1904. Great Britain ranks second, using 8,814,850 dollars' worth in 1904. For 1902, 1903, and 1904, the Philippines' imports were, respectively, \$33,342,166, \$33,811,384, and \$29,577,731. Of this trade the share of United States was largest in 1904 alone, in which year its value was \$5,098,820. For 1904 Great Britain's export trade to the Philippines was \$1,341,024. In the two years preceding, this trade exceeded that of United States by an average of about one million dollars. The chief imports are cotton goods and food stuffs. There is but one railway in the islands—from Manila to Dagupan—a distance of 123 miles. It is single track and well built, steel rails being used its entire length, the bridges being of stone or iron, and the station buildings substantial.

There are 720 miles of telegraph in the islands, and Manila has an electric railway 30 miles in length.

Climate.—Mr. Hilder, Assistant Secretary of the National Geographical Society, who spent nine months in the islands, says in the *Forum* that there is considerable variety in the climate, and that for the tropics it is not excessively hot. On the western side of Luzon the hot season is from March till June, May being the hottest month, when the temperature ranges from 80° to 100°. The mean temperature for the month is 84°, 2° above the summer temperature of New Orleans and 9° above the hottest month in Washington. From October to March is a cool, dry season. The northern islands are subject to terrific storms, which never pass south of 9° north latitude.

SAMOAN ISLANDS.

The island of Tutuila and other small Samoan islands came into the possession of the United States, January, 1900. This island has an area of about 54 square miles, with a population of 3,800. Manua and the other islets have a united area of about 25 square miles, with about 5,800 inhabitants. Pago-Pago is the only good harbor.

GUAM (LADRONES).

The island of Guam or Guahan, the largest in the Marianne or Ladrone Archipelago, was ceded by Spain to the United States in 1898, and is of importance to the United States as a coaling station for her navy and as a transit port between America and Asia. The island is about 32 miles long and 100 miles in circumference, and has a population of about 9,000, of whom about 6,000 are in Agaña, the capital. The inhabitants are mostly immigrants or the descendants of immigrants from the Philippines, the original race of the Marianne Islands having become extinct. The recognized language is Spanish, but English is also spoken. On the island there are 18 schools, and nine tenths of the inhabitants can read and write. Guam is thickly wooded, well watered, and fertile, and possesses a roadstead.

REPUBLIC OF CUBA.

Government.—The island had been a Spanish possession ever since its discovery. After long years of bitter oppression, the United States came to the relief of the Cubans, and precipitated the Spanish-American War, which resulted in freeing Cuba from Spanish tyranny. A definite peace treaty was signed by the Peace Commission in Paris, Dec.

10, 1898, and ratified by the Senate, Feb. 6, 1899, and by the Queen Regent of Spain, March 17, 1899, whereby Spain relinquished all claim to the island of Cuba.

The armed interposition of the United States in the struggle against Spanish domination brought the island into close association with the United States Government, and, though Congress affirmed Cuban independence, the island was held in military occupation by the United States forces until the Cuban people were in a position to formulate and organize a government of their own.

Their constitutional assembly met in November, 1900. The delegates to this convention manifested small inclination to enter into any agreement or make any statement regarding the relations which should in the future exist between Cuba and the United States. For this reason on March 2, 1901, by what is known from its author as the "Platt" amendment to the army appropriation bill, Congress advised the convention of certain conditions, compliance with which this government deemed necessary for the welfare of both countries. It was argued that, since Cuba commands the Caribbean Sea, the Gulf of Mexico, and the site of the future interoceanic canal, the United States should, for strategic reasons, own a few coaling and naval stations in Cuba. It was urged, for economic reasons, that the United States should retain the right to prevent revolutions and disorders in order to insure prosperity of Cuban citizens and protect the existing investments of American capital as well as to insure safety of future investments; for political reasons, that Cuba's independence should be guaranteed by this country inasmuch as its policy does not permit any foreign power to dominate, control, or obtain a foothold in this hemisphere or its adjacent territory. The amendment referred to authorized the President to withdraw from the military occupation of Cuba "so soon as a government shall have been established in said island under a constitution which, either as a part thereof or in an ordinance appended thereto, shall define the future relations of the United States with Cuba, substantially as follows":—

1.

That the government of Cuba shall never enter into any treaty or other compact with any foreign power or powers which will impair or tend to impair the independence of Cuba, nor in any manner authorize or permit any foreign power or powers to obtain by colonization or for military or naval purposes or otherwise, lodgment in or control over any portion of said island.

II.

That said government shall not assume or contract any public debt, to pay the interest upon which, and to make reasonable sinking fund provision for the ultimate discharge of which, the ordinary revenues of the island, after defraying the current expenses of government shall be inadequate.

III.

That the government of Cuba consents that the United States may exercise the right to intervene for the preservation of Cuban independence, the maintenance of a government adequate for the protection of life, property, and individual liberty, and for discharging the obligations with respect to Cuba imposed by the treaty of Paris on the United States, now to be assumed and undertaken by the government of Cuba.

IV.

That all acts of the United States in Cuba during its military occupancy thereof are ratified and validated, and all lawful rights acquired thereunder shall be maintained and protected.

V.

That the government will execute, and as far as necessary extend, the plans already devised or other plans to be mutually agreed upon, for the sanitation of the cities of the island, to the end that a recurrence of epidemic and infectious diseases may be prevented, thereby insuring protection to the people and commerce of Cuba, as well as to the commerce of the southern ports of the United States and the people residing therein.

VI.

That the Isle of Pines shall be omitted from the proposed constitutional boundaries of Cuba, the title thereto being left to future adjustment by treaty.

VII.

That to enable the United States to maintain the independence of Cuba, and to protect the people thereof, as well as for its own defense, the government of Cuba will sell or lease to the United States lands necessary for coaling or naval stations at certain specified points, to be agreed upon with the President of the United States.

VIII.

That by way of further assurance the government of Cuba will embody the foregoing provisions in a permanent treaty with the United States.

This amendment was, on June 12, 1900, made a part of the Cuban Constitution by vote of the convention. For naval stations the United

States government selected Guantanamo on the south side and Nipe Bay on the north side of the eastern end of the island, Havana at the western end, and Cienfuegos on the south coast.

On May 20, 1902, the Republic of Cuba was formally inaugurated, and the "stars and stripes" were hauled down from the Government building at Havana and the flag of Cuba took its place.

The Constitution of Cuba, adopted Feb. 21, 1901, provides for a republican form of government, in its essentials much resembling that of United States. The executive power is vested in a President, who must be a native Cuban or a naturalized citizen with a record of at least 10 years' service in the war for independence. He is elected by direct vote for 4 years and by the Constitution is disqualified for more than 2 consecutive terms. He is assisted by a Cabinet, the members of which he appoints.

The legislative power is vested in a Senate and House of Representatives. Senators are elected by an electoral board composed of provincial councilmen and electors. The latter must be twice the number of the former and are chosen by the people. The 6 provinces each have 4 Senators. Representatives are elected by direct vote and serve for 4 years. Their apportionment is according to population, one Representative for every 25,000 inhabitants or for a remainder of more than 12,500. The Congress controls the finances and foreign relations of the island and, generally speaking, has broad powers.

Each province, like one of the United States, carries on its own internal affairs through its governor and council, or assembly, elected by the people. The President, however, has the right to interfere if, on the part of either, abuse of power should occur. Municipalities are governed by mayors and councils popularly elected.

The suffrage is extended to all male Cubans over 21 years of age not mentally incapacitated or convicted of crime, to Spanish residents who have been in Cuba since April 11, 1899, and to all foreigners who have resided in Cuba since Jan. 1, 1899. A 5 years' residence is necessary for those arriving after that date before they may be naturalized.

Area and Population.—The area of Cuba is about 44,000 square miles. The greatest breadth of the island is about 100 miles at the southeast and its least width less than 80 miles, near Havana. The total length is about 780 miles.

According to the census of October, 1899, the population was 1,572,845, which was estimated to have increased to 1,729,549 in 1904.

According to race the population is constituted of 67.9 per cent. whites, and 31.1 per cent. negroes, mixed elements, and Chinese. By the census of 1899, the population included 172,535 foreigners, of whom 129,240 were Spanish and 6,444 were Americans.

The capital, Havana, has 275,000 inhabitants; Santiago de Cuba, 43,090; Matanzas, 30,374; Cienfuegos, 30,038.

Productions and Minerals.—The forests of Cuba are supposed to occupy from 45 to 50 per cent. of the island's area. Their undergrowth is an almost impenetrable jungle of vines and bushes, but they contain much valuable timber. Mahogany, cedar, logwood, redwood, ebony, lignum-vite, are the principal woods. In 1899 less than 4 per cent. of the area of Cuba was under cultivation. The staple products of the island in order of their importance are sugar, of which 795,400 tons were produced in 1902, and 945,700 tons in 1903; and tobacco, of which 34,321,335 pounds were produced in 1902, and 40,977,946 in 1903. Fruits, coffee, cocoa, cereals, and potatoes are also grown.

Cuba is capable of taking high rank in mineral wealth, though gold and silver have not been found in paying quantities. Copper was mined at Cobre by the natives before Columbus discovered the island, and there is strong proof that native copper was carried across to Florida and used by the Florida Indians hundreds of years ago.

The iron mines of Cuba, all of which are located near Santiago, overshadow in importance all other industries on the eastern end of the island, constituting the only industry that made any pretense of withstanding the shock of the Spanish war. American iron companies, with a combined capital of over \$5,000,000, now operate mines in this vicinity and employ from 3,500 to 4,000 men, shipping to the United States about 50,000 tons of iron ore per month, the largest portion of which is used at Bethlehem, Steelton, and Pittsburg, Pa., and Sparrows Point, Md. The ore of these mines is among the richest in the world, yielding from 62 to 67 per cent. of pure iron, and is very free from sulphur and phosphorus. There are numerous undeveloped mines of equal value in this region.

In the Sierra Maestra range, on the southern coast of Cuba, from Santiago west to Manzanillo, within a distance of about 100 miles, are found numerous deposits of manganese, an ore indispensable in the manufacture of steel. As nearly all the manganese used in the United States comes from the Black Sea regions of Europe and a smaller quantity from the northern part of South America, it is but reasonable

to suppose that the products of these near-by mines will be in great demand when the conditions are such that they can be operated with facility.

Commerce and Transportation.—For the fiscal years ending June 30, Cuba's imports for 1901 were worth \$66,583,973; 1902, \$62,135,500; 1903, \$67,077,676. The total exports were, 1901, \$63,278,380; 1902, \$64,948,800; 1903, \$77,849,000. United States is the chief user of Cuban products, buying 62,942,790 dollars' worth in 1903, and 76,983,418 dollars' worth in 1904. This country also supplies Cuba with the largest share of its imports. In 1902 this share was valued at \$26,623,500; in 1903, at \$21,761,638; in 1904, at \$27,377,465. In 1903 to various countries Cuba sold 41,718,686 dollars' worth of sugar and 26,042,319 dollars' worth of tobacco. Next in value of the island's exports were fruits and grains, \$2,899,024, and forest products, \$2,429,071. The principal imports for that year were food-stuffs, \$21,800,580, and textiles and manufactures of the same, \$10,288,512. Machinery and metals are important imports, their values in 1903 being respectively \$3,787,000 and \$3,717,000. Next to United States, Great Britain and Germany are the chief factors in Cuban import trade, while Great Britain and Spain are principal buyers of Cuban goods. According to the Reciprocity Convention of 1903, imports from United States obtain a rebate from the heavy protective duties of Cuba of from 20 to 40 per cent.

In 1903 there were in Cuba 1,479 miles of railway. The lines now connect the principal towns from Pinar del Rio in the west to Santiago de Cuba in the east. The railway center is Havana.

Education.—Before the American occupation, education in Cuba was in a deplorable state, and no public school system worthy of the name was in existence. According to the census of 1899, the proportion of illiteracy among the voting population was: Cubans, 59 per cent., and Spanish, 12 per cent. Prior to the Spanish war the total enrollment in the schools was slightly more than 36,000. With the American occupation the school system was completely reorganized. In 1900, at the invitation of Harvard University, 1,000 Cuban teachers spent the summer at Cambridge receiving instruction, while in 1901, 200 carefully selected Cuban teachers were sent to Harvard. In 1902 the number of public schools was nearly 3,800, and the average monthly enrollment was 160,000 pupils. Primary education is free and compulsory, and secondary and advanced education is under the control of the State. Cuba has a university at Havana.

DECLARATION OF INDEPENDENCE.

In Congress, July 4, 1776. The unanimous Declaration of the Thirteen United States of America.

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed, by their Creator, with certain inalienable rights, that among these are life, liberty, and the pursuit of happiness. That to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed, that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute new government, laying its foundation on such principles, and organizing its powers in such form as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate, that governments long established should not be changed for light and transient causes; and accordingly all experience hath shown that mankind are more disposed to suffer where evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. Such has been the patient sufferance of these colonies; and such is now the necessity which constrains them to alter their former systems of government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny over these states. To prove this, let facts be submitted to a candid world.

He has refused his assent to laws the most wholesome and necessary for the public good.

He has forbidden his governors to pass laws of immediate and pressing importance, unless suspended in their operation till his assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other laws for the accommodation of large districts of people, un-

less these people would relinquish the right of representation in the legislature—a right inestimable to them, and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved representative houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused, for a long time after such dissolutions, to cause others to be elected; whereby the legislative powers, incapable of annihilation, have returned to the people at large, for their exercise, the state remaining, in the meantime, exposed to all the dangers of invasion from without, and convulsions within.

He has endeavored to prevent the population of these states; for that purpose obstructing the laws for naturalization of foreigners, refusing to pass others to encourage their migration hither, and raising conditions of new appropriations of lands.

He has obstructed the administration of justice, by refusing his assent to laws establishing judiciary powers.

He has made judges dependent on his will alone for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of new offices, and sent hither swarms of officers, to harass our people, and eat out their substance.

He has kept among us, in times of peace, standing armies, without the consent of our legislatures.

He has affected to render the military independent of, and superior to, the civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his assent to their acts of pretended legislation,—

For quartering large bodies of armed troops among us:

For protecting them, by a mock trial, from punishment from any murders which they should commit on the inhabitants of these states:

For cutting off our trade with all parts of the world:

For imposing taxes on us without our consent:

For depriving us, in many cases, of the benefits of trial by jury:

For transporting us beyond the seas to be tried for pretended offenses:

For abolishing the free system of English laws in a neighboring province, establishing therein an arbitrary government, and enlarg-

ing its boundaries, so as to render it at once an example and fit instrument for introducing the same absolute rule into these colonies :

For taking away our charters, abolishing our most valuable laws, and altering, fundamentally, the powers of our governments :

For suspending our own legislatures and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated government here, by declaring us out of his protection, and waging war against us.

He has plundered our seas, ravaged our coasts, burnt our towns, and destroyed the lives of our people.

He is, at this time, transporting large armies of foreign mercenaries, to complete the works of death, desolation, and tyranny, already begun with circumstances of cruelty and perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the head of a civilized nation.

He has constrained our fellow-citizens, taken captive on the high seas, to bear arms against their country, to become the executioners of their friends and brethren, or to fall themselves by their hands.

He has excited domestic insurrections among us, and has endeavored to bring on the inhabitants of our frontiers the merciless Indian savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes, and conditions.

In every stage of these oppressions we have petitioned for redress in the most humble terms; our repeated petitions have been answered only by repeated injury. A prince whose character is thus marked by every act which may define a tyrant is unfit to be the ruler of a free people.

Nor have we been wanting in attentions to our British brethren. We have warned them, from time to time, of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity which denounces our separation, and hold them, as we hold the rest of mankind, enemies in war, in peace friends.

We, therefore, the Representatives of the United States of America, in General Congress assembled, appealing to the Supreme Judge of

the world for the rectitude of our intentions, do, in the name, and by authority of the good people of these Colonies, solemnly publish and declare, That these United Colonies are, and of right ought to be, *free and independent States*; that they are absolved from all allegiance to the British crown, and that all political connection between them and the State of Great Britain, is, and ought to be, totally dissolved; and that as *free and independent States*, they have full power to levy war, conclude peace, contract alliances, establish commerce, and to do all other acts and things which *independent States* may of right do. And for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our lives, our fortunes, and our sacred honor.

Attest, CHAS. THOMSON, *Secy.*

A true copy.

JOHN HANCOCK, *Pres'd.*

CONSTITUTION OF THE UNITED STATES OF AMERICA.

(Went into operation first Wednesday in March, 1789.)

Preamble.—We, the people of the United States, in order to form a more perfect union,

establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution for the United States of America.

ARTICLE I.

SECTION I. 1. All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

SECTION II. 1. The House of Representatives shall be composed of members chosen every second year by the people of the several States; and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

2. No person shall be a Representative who shall not have attained to the age of twenty-five years, and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose three; Massachusetts, eight; Rhode Island and Providence Plantations, one; Connecticut, five; New York, six; New Jersey, four; Pennsylvania, eight; Delaware, one; Maryland, six; Virginia, ten; North Carolina, five; South Carolina, five, and Georgia three.

4. When vacancies happen in the representation from any State, the executive authority thereof shall issue writs of election to fill such vacancies.

5. The House of Representatives shall choose their speaker and other officers; and shall have the sole power of impeachment.

SECTION III. 1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof

for six years; and each Senator shall have one vote.

2. Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

3. No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

4. The Vice-President of the United States shall be President of the Senate, but shall have no vote unless they be equally divided.

5. The Senate shall choose their other officers, and also a President pro tempore, in the absence of the Vice-President, or when he shall exercise the office of President of the United States.

6. The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall all be on oath or affirmation. When the President of the United States is tried, the chief-justice shall preside: and no person shall be convicted without the concurrence of two thirds of the members present.

7. Judgment in cases of impeachment shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment, and punishment, according to law.

SECTION IV. 1. The times, places and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to the place of choosing Senators.

2. The Congress shall assemble at least once in every year; and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

SECTION V. 1. Each House shall be the judge of the election, returns, and qualifications of

its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner and under such penalties as each House may provide.

2. Each House may determine the rule of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two thirds, expel a member.

3. Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secrecy; and the yeas and nays of the members of either House on any question shall, at the desire of one fifth of those present, be entered on the journal.

4. Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two houses shall be sitting.

SECTION VI. 1. The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the treasury of the United States. They shall, in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at the sessions of their respective houses, and in going to and returning from the same; and for any speech or debate in either house, they shall not be questioned in any other place.

2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

SECTION VII. 1. All bills for raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments, as on other bills.

2. Every bill which shall have passed the House of Representatives and the Senate shall, before it become a law, be presented to the President of the United States; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration two thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered; and if ap-

proved by two thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment, prevent its return; in which case it shall not be a law.

3. Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the same shall take effect shall be approved by him, or being disapproved by him, shall be re-passed by two thirds of the Senate and the House of Representatives, according to the rules and limitations prescribed in the case of a bill.

SECTION VIII. 1. The Congress shall have power:

To lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

4. To establish a uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post offices and post roads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offenses against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no ap-

appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions.

16. To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dry docks, and other needful buildings.

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

SECTION IX. 1. The migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

3. No bill of attainder or ex post facto law shall be passed.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another, nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties in another.

7. No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account

of the receipts and expenditures of all public money shall be published from time to time.

8. No title of nobility shall be granted by the United States. And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever from any king, prince, or foreign state.

SECTION X. 1. No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, make anything but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any impost or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.

SECTION I. 1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice-President, chosen for the same term, be elected as follows:

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative or person holding an office of trust or profit under the United States shall be appointed an elector.

3. [The electors shall meet in their respective States and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each, which list they shall sign and certify and transmit, sealed, to the seat of the government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Rep-

representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote. A quorum, for this purpose, shall consist of a member or members from two thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice-President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice-President.*

4. The Congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

5. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States.

6. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

7. The President shall, at stated times, receive for his services a compensation, which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

8. Before he enter on the execution of his office he shall take the following oath or affirmation:—

“I do solemnly swear (or affirm) that I will

*This clause is superseded by Article XII., Amendments.

faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States.”

SECTION II. 1. The President shall be Commander-in-Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offenses against the United States except in cases of impeachment.

2. He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two thirds of the Senators present concur; and he shall nominate, and by and with the advice and consent of the Senate shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

3. The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions, which shall expire at the end of their next session.

SECTION III. He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

SECTION IV. The President, Vice-President, and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery, or other high crimes and misdemeanors.

ARTICLE III.

SECTION I. The judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the Supreme and inferior

courts, shall hold their offices during good behavior, and shall at stated times receive for their services a compensation which shall not be diminished during their continuance in office.

SECTION II. 1. The judicial power shall extend to all cases in law and equity arising under this Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers, and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States, between a State and citizens of another State, between citizens of different States, between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign States, citizens, or subjects.

2. In all cases affecting ambassadors, other public ministers, and consuls, and those in which a State shall be party, the Supreme Court shall have original jurisdiction. In all the other cases before mentioned the Supreme Court shall have appellate jurisdiction both as to law and fact, with such exceptions and under such regulations as the Congress shall make.

3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State the trial shall be at such place or places as the Congress may by law have directed.

SECTION III. 1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

2. The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attained.

ARTICLE IV.

SECTION I. Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records and proceedings shall be proved, and the effect thereof.

SECTION II. 1. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

2. A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall on demand of the Executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

3. No person held to service or labor in one State, under the laws thereof, escaping into another shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

SECTION III. 1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress.

2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

SECTION IV. The United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion, and, on application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence.

ARTICLE V.

The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three fourths of the several States, or by conventions in three fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the Ninth Section of the First Article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

1. All debts contracted and engagements entered into before the adoption of this Con-

stitution shall be as valid against the United States under this Constitution as under the Confederation.

2. This Constitution and the laws of the United States which shall be made in pursuance thereof and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

3. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

The ratification of the Conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

Amendments to the Constitution.

ARTICLE I.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

ARTICLE II.

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

ARTICLE IV.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V.

No person shall be held to answer for a capital or other infamous crime unless on a pre-

sentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

ARTICLE VII.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

ARTICLE XI.

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States, by citizens of another State, or by citizens or subjects of any foreign State.

ARTICLE XII.

The electors shall meet in their respective States, and vote by ballot for President and Vice-President, one of whom at least shall not be an inhabitant of the same State with themselves, they shall name in their ballots the

person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which list they shall sign and certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted; the person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

ARTICLE XIII.

1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

2. Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XIV.

1. All persons born or naturalized in the United States, and subject to the jurisdiction

thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male members of such State, being of twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

3. No person shall be a Senator or Representative in Congress, or elector of President and Vice-President, or holding any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid and comfort to the enemies thereof. But Congress may, by a vote of two thirds of each House, remove such disability.

4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

ARTICLE XV.

1. The right of the citizens of the United States to vote shall not be denied or abridged

by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce the provision of this article by appropriate legislation.

Ratification of the Constitution.

The Constitution was ratified by the thirteen original States in the following order:

Delaware, December 7, 1787, unanimously.

Pennsylvania, December 12, 1787, vote 46 to 23.

New Jersey, December 18, 1787, unanimously.

Georgia, January 2, 1788, unanimously.

Connecticut, January 9, 1788, vote 128 to 40.

Massachusetts, February 6, 1788, vote 187 to 168.

Maryland, April 28, 1788, vote 63 to 12.

South Carolina, May 23, 1788, vote 149 to 73.

New Hampshire, June 21, 1788, vote 57 to 46.

Virginia, June 25, 1788, vote 89 to 79.

New York, July 26, 1788, vote 30 to 28.

North Carolina, November 21, 1789, vote 193 to 75.

Rhode Island, May 29, 1790, vote 34 to 32.

Ratification of the Amendments.

I. to X. inclusive were declared in force December 15, 1791.

XI. was declared in force January 8, 1798.

XII., regulating elections, was ratified by all the States except Connecticut, Delaware, Massachusetts, and New Hampshire, which rejected it. It was declared in force September 25, 1804.

XIII. The emancipation amendment was ratified by 31 of the 36 States; rejected by Delaware and Kentucky, not acted on by Texas; conditionally ratified by Alabama and Mississippi. Proclaimed December 18, 1865.

XIV. Reconstruction amendment was ratified by 23 Northern States; rejected by Delaware, Kentucky, Maryland, and 10 Southern States, and not acted on by California. The 10 Southern States subsequently ratified under pressure. Proclaimed July 28, 1868.

XV. Negro citizenship amendment was not acted on by Tennessee, rejected by California, Delaware, Kentucky, Maryland, New Jersey, and Oregon; ratified by the remaining 30 States. New York rescinded its ratification January 5, 1870. Proclaimed March 30, 1870.

COPYRIGHT LAW OF THE UNITED STATES.

1. A printed copy of the title (besides the two copies to be deposited after publication) of the book, map, chart, dramatic or musical

composition, engraving, cut, print, or photograph, or a description of the painting, drawing, chromo, statue, statuary, or model or design for a work of the fine arts, for which copyright is desired, must be sent by mail or otherwise, *prepaid*, addressed "Librarian of Congress, Washington, D. C." This must be done before publication of the book or other article.

The printed title required may be a copy of the title page of such publications as have title pages. In other cases, the title must be printed expressly for copyright entry, with name of claimant of copyright. The style of type is immaterial, and the print of a type-writer will be accepted. But a separate title is required for each entry, and each title must be printed on paper as large as commercial note. The title of a *periodical* must include the date and number.

2. The legal fee for recording each copyright claim is 50 cents, and for a copy of this record (or certificate of copyright) an additional fee of 50 cents is required. The record fee from aliens and non-residents is \$1.

3. On or before the day of publication of each book or other article, two complete copies of the best edition issued must be sent, to perfect the copyright, with the address "Librarian of Congress, Washington, D. C." The postage must be prepaid, or else the publication inclosed in parcels covered by printed Penalty Labels, furnished by the Librarian. In the case of a book, photograph, chromo or lithograph, the two copies deposited shall be printed from type set in the United States, or from plates made therefrom, or from negatives or drawings on stone made in the United States, or from transfers made therefrom.

4. No copyright is valid unless notice is given by inserting in every copy published, on the title page or the page following it, if it be a book; or, if a map, chart, musical composition, print, cut, engraving, photograph, painting, drawing, chromo, statue, statuary, or model or design intended to be perfected as a work of the fine arts, by inscribing upon some portion thereof, or on the substance on which the same is mounted, the following words, viz.: "*Entered according to act of Congress, in the year—, by—, in the office of the Librarian of Congress, at Washington,*" or, at the option of the person entering the copyright, the words: "*Copyright, 18—, by—.*"

The law imposes a penalty of \$100 upon any person who has not obtained copyright who shall insert the notice "*Entered according to act of Congress,*" or "*Copyright,*" etc., or words of the same import, in or upon any book or other article.

5. Any author may reserve the right to translate or dramatize his own work. In this case, notice should be given by printing the words "*Right of translation reserved*," or "*All rights reserved*," below the notice of copyright entry, and notifying the Librarian of Congress of such reservation, to be entered upon the record.

Since the phrase *all rights reserved* refers exclusively to the author's right to dramatize or to translate, it has no bearing upon any publications except original works, and will not be entered upon the record in other cases.

6. The original term of copyright runs for twenty-eight years. *Within six months before* the end of that time, the author or designer, or his widow or children, may secure a renewal for the further term of fourteen years, making forty-two years in all. Applications for renewal must be accompanied by explicit statement of ownership, in the case of the author, or of relationship, in the case of his heirs, and must state definitely the date and place of entry of the original copyright. Advertisement of renewal is to be made within two months of date of renewal certificate, in some newspaper, for four weeks.

7. The time within which any work entered for copyright may be issued from the press is not limited by law, but the courts hold that it should take place within a reasonable time. A copyright may be secured for a projected as well as for a finished work. The law provides for no *caveat*, or notice of interference—only for actual entry of title.

8. A copyright is assignable in law by any instrument of writing, but such assignment must be recorded in the office of the Librarian of Congress within sixty days from its date. The fee for this record and certificate is one dollar, and for a certified copy of any record of assignment one dollar.

9. A copy of the record (or duplicate certificate) of any copyright entry will be furnished, under seal, at the rate of fifty cents each.

10. In the case of books published in more than one volume, or of periodicals published in numbers, or of engravings, photographs, or other articles published with variations, a copyright is to be entered for each volume or part of a book, or number of a periodical, or variety, as to style, title, or inscription, of any other article. But a book published serially in a periodical, under the same general title, requires only one entry. To complete the copyright on such a work, two copies of each serial part, as well as of the complete work (if published separately), must be deposited.

11. To secure a copyright for a painting, statue, or model or design intended to be per-

fectured as a work of the fine arts, so as to prevent infringement by copying, engraving, or vending such design, a definite description must accompany the application for copyright, and a photograph of the same, at least as large as "cabinet size," should be mailed to the Librarian of Congress not later than the day of publication of the work or design.

12. Copyrights cannot be granted upon trade-marks, nor upon mere names of companies or articles, nor upon prints or labels intended to be used with any article of manufacture. If protection for such names or labels is desired, application must be made to the Patent office, where they are registered at a fee of \$6 for labels and \$25 for trade-marks.

13. These provisions apply to citizens of the United States, British Empire, France, Belgium, Switzerland.

14. Every applicant for a copyright should state distinctly the full name and residence of the claimant, and whether the right is claimed as author, designer, or proprietor. No affidavit or formal application is required.

PATENT OFFICE PROCEDURE.

Patents are issued in the name of the United States, and under seal of the Patent Office, to any person who has invented or discovered any new and useful art, machine, manufacture, or composition of matter or any new and useful improvement thereof, not known or used by others in this country before his invention or discovery thereof and not patented or described in any printed publication in this or any foreign country, before his invention or discovery thereof or more than two years prior to his application, and not in public use or on sale in the United States for more than two years prior to his application, unless the same is proved to have been abandoned; and by any person who, by his own industry, genius, efforts, and expense, has invented and produced any new and original design for a manufacture, bust, statue, alto-relievo, or bas-relief; any new and original design for the printing of woolen, silk, cotton, or other fabrics; any new and original impression, ornament, pattern, print, or picture to be printed, painted, cast, or otherwise placed on or worked into any article of manufacture; or any new, useful, and original shape or configuration of any article of manufacture, the same not having been known nor used by others before his invention or production thereof, nor patented nor described in any printed publication, upon payment of the fees required by law and other due proceedings had.

Every patent contains a grant to the patentee, his heirs or assigns, for the term of seven-

teen years, of the exclusive right to make, use, and vend the invention or discovery throughout the United States and the Territories, referring to the specification for the particulars thereof.

If it appear that the inventor, at the time of making his application, believed himself to be the first inventor or discoverer, a patent will not be refused on account of the invention or discovery, or any part thereof, having been known or used in any foreign country before his invention or discovery thereof, if it had not been before patented or described in any printed publication.

Joint inventors are entitled to a joint patent; neither can claim one separately. Independent inventors of distinct and independent improvements in the same machine cannot obtain a joint patent for their separate inventions; nor does the fact that one furnishes the capital and another makes the invention entitle them to make application as joint inventors; but in such case they may become joint patentees.

No person otherwise entitled thereto will be debarred from receiving a patent for his invention or discovery, by reason of its having been first patented or caused to be patented by the inventor or his legal representatives or assigns in a foreign country, unless the application for said foreign patent was filed more than twelve months prior to the filing of the application in this country, in which case no patent shall be granted in this country.

Applications.—Applications for a patent must be made in writing to the Commissioner of Patents. The applicant must also file in the Patent Office a written description of the same, and of the manner and process of making, constructing, compounding, and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected, to make, construct, compound, and use the same; and in case of a machine, he must explain the principle thereof, and the best mode in which he has contemplated applying that principle, so as to distinguish it from other inventions, and particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery. The specification and claim must be signed by the inventor and attested by two witnesses.

When the nature of the case admits of drawings, the applicant must furnish a drawing of the required size, signed by the inventor or his attorney in fact, and attested by two witnesses.

In all cases which admit of representation by model, the applicant, if required by the Patent

Office, shall furnish a model of convenient size to exhibit advantageously the several parts of his invention or discovery.

The applicant shall make oath that he verily believes himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition, or improvement for which he solicits a patent; that he does not know and does not believe that the same was ever before known or used, and shall state of what country he is a citizen and where he resides. In every original application the applicant must distinctly state under oath that the invention has not been patented to himself or to others with his knowledge or consent in this or any foreign country for more than two years prior to his application, or on an application for a patent filed in any foreign country by himself or his legal representatives or assigns more than twelve months prior to his application. If any application for patent has been filed in any foreign country by the applicant in this country or by his legal representatives or assigns, prior to his application in this country, he shall state the country or countries in which such application has been filed, giving the date of such application, and shall also state that no application has been filed in any other country or countries than those mentioned; that to the best of his knowledge and belief the invention has not been in public use or on sale in the United States nor described in any printed publication or patent in this or any foreign country for more than two years prior to his application in this country. Such oath may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any minister, chargé d'affaires, consul, or commercial agent holding commission under the Government of the United States, or before any notary public of the foreign country in which the applicant may be, provided such notary is authorized by the laws of his country to administer oaths.

On the filing of such application and the payment of the fees required by law, if, on examination, it appears that the applicant is justly entitled to a patent under the law, and that the same is sufficiently useful and important, the Commissioner will issue a patent therefor.

Every patent, or any interest therein, shall be assignable in law by an instrument in writing; and the patentee or his assigns or legal representatives may, in like manner, grant and convey an exclusive right under his patent to the whole or any specified part of the United States.

Reissues. A reissue is granted to the original patentee, his legal representatives, or

the assignees of the entire interest, when, by reason of a defective or insufficient specification, or by reason of the patentee claiming as his invention or discovery more than he had a right to claim as new, the original patent is inoperative or invalid, provided the error has arisen from inadvertence, accident, or mistake, and without any fraudulent or deceptive intention. Reissue applications must be made and the specifications sworn to by the inventors, if they be living.

Caveats. A caveat, under the patent law, is a notice given to the office, of the caveator's claim as inventor, in order to prevent the grant of a patent to another for the same alleged invention upon an application filed during the life of a caveat without notice to the caveator.

Any citizen of the United States who has made a new invention or discovery, and desires further time to mature the same, may, on a payment of a fee of ten dollars, file in the Patent Office a caveat setting forth the object and the distinguishing characteristics of the invention, and praying protection of his right until he shall have matured his invention. Such caveat shall be filed in the confidential archives of the office and preserved in secrecy, and shall be operative for the term of one year from the filing thereof. The caveat may be renewed, on request in writing, by the payment of a second fee of ten dollars, and it will continue in force for one year from the payment of such second fee.

The caveat must comprise a specification, oath, and, when the nature of the case admits of it, a drawing, and, like the application, must be limited to a single invention or improvement.

Fees.—Fees must be paid in advance, and are as follows: On filing each original application for a patent, \$15. On issuing each original patent, \$20. In design cases: For three years and six months, \$10; for seven years, \$15; for fourteen years, \$30. On filing each caveat, \$10. On every application for the reissue of a patent, \$30. On filing each disclaimer, \$10. For certified copies of patents and other papers in manuscript, ten cents per hundred words; for certified copies of printed patents, eighty cents. For uncertified printed copies of specifications and drawings of patents, for single copies, or any number of unclassified copies, five cents each; for copies by subclasses, three cents each; by classes, two cents each, and for the entire set of patents issued, in one order, one cent each. For recording every assignment, agreement, power of attorney, or other paper, of three hundred words or under, \$1; of over three hundred and under

one thousand words, \$2; of over one thousand words \$3. For copies of drawings, the reasonable cost of making them. The Patent Office is prepared to furnish positive blue-print photographic copies of any drawing, foreign or domestic, in the possession of the office, in sizes and at rates as follows: Large size, 10x15 inches, twenty-five cents; medium size, 7x11 inches, fifteen cents; small size, 5x8 inches, five cents. An order for small sized copies can be filled only when it relates to the drawings of an application for patent.

The total number of applications filed at the Patent Office in sixty-four years, 1837-'01, was 1,250,981; number of caveats filed, 116,214; issued, 758,523. Receipts to December 31, 1896, \$34,809,331.06; expenditures, \$29,293,672.32; net surplus, \$5,015,658.74. The largest number of patents granted for an article prior to January, 1895, has been for carriages and wagons, 20,000, and for stoves and furnaces, 18,000. The next largest has been for harvesters, 10,000; lamps and gas fittings, 10,000; boots and shoes, 10,000, and packing and storing vessels, 10,000 approximately.

NATURALIZATION LAWS.

The conditions under and the manner in which an alien may be admitted to become a citizen of the United States are prescribed by Sections 2, 165-74 of the Revised Statutes of the United States.

Declaration of Intentions.—The alien must declare upon oath before a circuit or district court of the United States or a district or supreme court of the Territories, or a court of record of any of the States having common law jurisdiction and a seal and clerk, two years at least prior to his admission, that it is, *bona fide*, his intention to become a citizen of the United States, and to renounce forever all allegiance and fidelity to any foreign prince or State; and particularly to the one of which he may be at the time a citizen or subject.

Oath on Application for Admission.—He must at the time of his application to be admitted declare on oath, before some one of the courts above specified, "that he will support the Constitution of the United States, and that he absolutely and entirely renounces and abjures all allegiance and fidelity to every foreign prince, potentate, State, or sovereignty, and particularly by name, to the prince, potentate, State, or sovereignty of which he was before a citizen or subject," which proceedings must be recorded by the clerk of the court.

Conditions for Citizenship.—If it shall appear to the satisfaction of the court to which

the alien has applied that he has made a declaration to become a citizen two years before applying for final papers, and has resided continuously within the United States for at least five years, and within the State or Territory where such court is at the time held one year at least; and that during that time "he has behaved as a man of good moral character, attached to the principles of the Constitution of the United States, and well disposed to the good order and happiness of the same," he will be admitted to citizenship.

Titles of Nobility.—If the applicant has borne any hereditary title or order of nobility he must make an express renunciation of the same at the time of his application.

Soldiers.—Any alien at the age of twenty-one years and upward who has been in the armies of the United States, and has been honorably discharged therefrom, may become a citizen on his petition, without any previous declaration of intention, provided that he has resided in the United States at least one year previous to his application, and is of good moral character. (It is judicially decided that residence of one year in a particular State is not requisite.)

Minors.—Any alien under the age of twenty-one years who has resided in the United States three years next preceding his arriving at that age, and who has continued to reside therein to the time he may make application to be admitted a citizen thereof, may, after he arrives at the age of twenty-one years, and after he has resided five years within the United States, including the three years of his minority, be admitted a citizen; but he must make a declaration on oath and prove to the satisfaction of the court that for two years next preceding it has been his *bona fide* intention to become a citizen.

Children of Naturalized Citizens.—The children of persons who have been duly naturalized, being under the age of twenty-one years at the time of the naturalization of their parents, shall, if dwelling in the United States, be considered as citizens thereof.

Citizens' Children Who Are Born Abroad.—The children of persons who now are or have been citizens of the United States, are, though born out of the limits and jurisdiction of the United States, considered as citizens thereof.

Chinese.—The naturalization of Chinamen is expressly prohibited by Section 14, Chapter 126, Laws of 1882.

Protection Abroad to Naturalized Citizens.—Section 2,000 of the Revised Statutes of the United States declares that "all naturalized citizens of the United States while in foreign

countries are entitled to and shall receive from this Government the same protection of persons and property which is accorded to native-born citizens."

The Right of Suffrage.—The right to vote comes from the State, and is a State gift. Naturalization is a Federal right and is a gift of the Union, not of any one State. In nearly one-half of the Union aliens (who have declared intentions) vote and have the right to vote equally with naturalized or native-born citizens. In the other half only actual citizens may vote. (See Table of Qualifications for Voting in each State, on another page.) The Federal naturalization laws apply to the whole Union alike, and provide that no alien may be naturalized until after five years' residence. Even after five years' residence and due naturalization he is not entitled to vote unless the laws of the State confer the privilege upon him, and he may vote in several States six months after landing, if he has declared his intention, under the United States law, to become a citizen.

PASSPORT REGULATIONS.

RULES governing the granting and issuing of passports in the United States:

By WHOM ISSUED.—No one but the Secretary of State may grant and issue passports in the United States.—Revised Statutes, secs. 4075, 4078.

A citizen of the United States desiring to procure a passport while he is temporarily abroad should apply to the diplomatic representative of the United States in the country where he happens to be; or, in the absence of a diplomatic representative, to the consul general of the United States; or, in the absence of both, to the consul of the United States. The necessary statement may be made before the nearest consular officer of the United States.

To CITIZENS ONLY.—The law forbids the granting of a passport to any person who is not a citizen of the United States.—Revised Statutes, sec. 4076.

A person who has only made the declaration of intention to become a citizen of the United States cannot receive a passport.

APPLICATIONS.—A citizen of the United States in this country in order to procure a passport must make a written application, in the form of an affidavit, to the Secretary of State.

The affidavit must be attested by an officer authorized to administer oaths, and if he has an official seal it must be affixed. If he has no seal, his official character must be authenticated by certificate of the proper legal officer

If the applicant signs by mark, two attesting witnesses to his signature are required.

The applicant is required to state the date and place of his birth, his occupation, and the place of his permanent residence, and to declare that he goes abroad for temporary sojourn and intends to return to the United States with the purpose of residing and performing the duties of citizenship therein.

The applicant must take the oath of allegiance to the Government of the United States.

The application must be accompanied by a description of the person applying, and should state the following particulars, viz.: Age, — years; stature, — feet — inches (English measure); forehead, —; eyes, —; nose, —; mouth, —; chin, —; hair, —; complexion, —; face, —.

The application must be accompanied by a certificate from at least one credible witness that the applicant is the person he represents himself to be, and that the facts stated in the affidavit are true to the best of the witness's knowledge and belief.

NATIVE CITIZENS.—An application containing the information indicated by rule 3 will be sufficient evidence in the case of native citizens.

A PERSON BORN ABROAD WHOSE FATHER WAS A NATIVE OF THE UNITED STATES.—In addition to the statements required by rule 3, his application must show that his father was born in the United States, has resided therein, and was a citizen at the time of the applicant's birth. The Department may require that this affidavit be supported by that of one other citizen acquainted with the facts.

NATURALIZED CITIZENS.—In addition to the statements required by rule 3, a naturalized citizen must transmit his certificate of naturalization, or a duly certified copy of the court record thereof, with his application. It will be returned to him after inspection. He must state in his affidavit when and from what port he emigrated to this country, what ship he sailed in, where he has lived since his arrival in the United States, when and before what court he was naturalized, and that he is the identical person described in the certificate of naturalization. The signature to the application should conform in orthography to the applicant's name as written in the naturalization paper, which the Department follows.

THE WIFE OR WIDOW OF A NATURALIZED CITIZEN.—In addition to the statements required by rule 3, she must transmit for inspection her husband's naturalization certificate, must state that she is the wife or widow of the person described therein, and must set forth the facts of his emigration, naturaliza-

tion, and residence, as required in the rule governing the application of a naturalized citizen.

THE CHILD OF A NATURALIZED CITIZEN CLAIMING CITIZENSHIP THROUGH THE NATURALIZATION OF THE FATHER.—In addition to the statements required by rule 3, the applicant must state that he or she is the son or daughter, as the case may be, of the person described in the naturalization certificate, which must be submitted for inspection, and must set forth the facts of his emigration, naturalization, and residence, as required in the rule governing the application of a naturalized citizen.

EXPIRATION OF PASSPORT.—A passport expires two years from the date of its issuance. A new one will be issued upon a new application, and if the applicant be a naturalized citizen, the old passport will be accepted in lieu of a naturalized certificate, if the application upon which it was issued is found to contain sufficient information as to the emigration, residence, and naturalization of the applicant.

WIFE, CHILDREN, AND SERVANTS.—When an applicant is accompanied by his wife, minor children, or servant, being an American citizen, it will be sufficient to state the fact, giving the respective ages of the children and the citizenship of the servant, when one passport will suffice for all. For any other person in the party a separate passport will be required. A woman's passport may include her minor children and servant under the above-named conditions.

PROFESSIONAL TITLES.—They will not be inserted in passports.

FEE.—By act of Congress approved March 23, 1888, a fee of one dollar is required to be collected for every citizen's passport. That amount in currency or postal money order should accompany each application. Orders should be payable to the Disbursing Clerk of the Department of State. Drafts or checks will not be received.

BLANK FORMS OF APPLICATION.—They will be furnished by the Department to persons who desire to apply for passports, upon their stating whether they are native or naturalized citizens or claim through the naturalization of husband or father. Forms are not furnished, except as samples, to those who make a business of procuring passports.

ADDRESS.—Communications should be addressed to the Department of State, Passport Division, and each communication should give the post office address of the person to whom the answer is to be directed.

REJECTION OF APPLICATION.—The Secretary of State may refuse to issue a passport to

anyone who, he has reason to believe, desires it for an unlawful or improper purpose, or who is unable or unwilling to comply with the rules.

UNITED STATES CIVIL SERVICE.

The purpose of the Civil Service act, as declared in its title, is "to regulate and improve the Civil Service of the United States." It provides for the appointment of three Commissioners, a chief Examiner, a Secretary, and other employees, and makes it the duty of the Commissioners to aid the President as he may request in preparing suitable rules for carrying the act into effect; to make regulations to govern all examinations held under the provisions of the act, and to make investigations and report upon all matters touching the enforcement and effect of the rules and regulations. The address of the Commission is Washington, D. C.

The act requires the rules to provide, as nearly as the conditions of good administration will warrant, for open competitive practical examinations for testing the fitness of applicants for the classified service; for the filling of all vacancies by selections from among those graded highest; for the apportionment of appointments at Washington among the States upon the basis of population; for a period of probation before absolute appointment; that no person in the public service shall be obliged to contribute service or money for political purposes; and that no person in said service has any right to use his official authority or influence to coerce the political action of any person or body.

Extent of the Service.—The number of persons regularly employed in the Executive Civil Service of the United States is about 280,000, of whom 135,482 are classified subject to competitive examination or registration under the Civil Service act and rules. The expenditure for salaries in the Executive Civil Service is more than \$175,000,000 a year.

Divisions of the Service.—The rules require that all that part of the Executive Civil Service of the United States which has been or may hereafter be classified under the Civil Service act shall be arranged in branches as follows: The Departmental Service, the Customs Service, the Postal Service, the Government Printing Service, and the Internal Revenue Service.

The Departmental Service includes all officers and employees who on the one hand are not appointed subject to the consent of the Senate, and on the other hand are above the grade of laborer, and who are serving in or on detail from the Departments, Commissions, and

Offices in the District of Columbia, the Railway Mail Service, the Indian Service, the Pension Agencies, the Steamboat Inspection Service, the Marine Hospital Service, the Light-House Service, the Life-Saving Service, the Revenue Cutter Service, the Mints and Assay offices, the Sub-Treasuries, the Engineer Department at large, the Ordnance Department at large, the Land Office Service, and the force employed under Custodians of Public Buildings, and in the U. S. Penitentiary at Leavenworth, Kan. In addition to these are included all other employees (except laborers and persons whose appointments are subject to the consent of the Senate) whose duties are clerical or medical, or who serve as watchmen, messengers, draughtsmen, engineers, firemen, computers, or as superintendents of construction, superintendents of repairs, or foremen under the Supervising Architect of the Treasury, or who are in any branch of the Treasury Department not enumerated above. The Customs Service includes all officers and employees between the extremes before mentioned who are serving in any customs district. The Postal Service includes all similar officers and employees at free delivery post offices. The Government Printing Service and the Internal Revenue Service cover all like positions in the branches indicated by their designations.

Applications.—Persons seeking to be examined must file an application blank. The blank for the Departmental Service at Washington, Railway Mail Service, the Indian School Service, and the Government Printing Service should be requested directly of the Civil Service Commission at Washington. The blank for the Customs, Postal, or Internal Revenue Service must be requested in writing of the Civil Service Board of Examiners at the office where service is sought. These papers should be returned to the officers from whom they emanated.

Applicants for examination must be citizens of the United States, and of the proper age. No person using intoxicating liquors to excess may be appointed. No discrimination is made on account of sex, color, or political or religious opinions. The limitations of age vary with the different services, but do not apply to any person honorably discharged from the military or naval service of the United States by reason of disability resulting from wounds or sickness incurred in the line of duty.

Examinations.—The applicants to enter the services designated are examined as to their relative capacity and fitness. For ordinary clerical places in the Departmental, Customs, and Internal Revenue Services the examination is confined to orthography, penman-

ship, copying, letter writing, and simple arithmetic. Patent examiners are examined in physics and technics, mathematics, chemistry, and mechanical drawing. Meat inspectors are examined in letter writing, veterinary anatomy and physiology, veterinary pathology, and meat inspection. One of the tests for post office and railway mail clerks is an exercise in reading manuscript addresses. Specimen sets of questions will be furnished by the Commission upon request. Examinations are held twice a year in every State and Territory at fixed times and places. All examinations relate as nearly as possible to the duties to be performed, and, whenever practicable, include experience and practical tests. No applicant is admitted to an examination in any one of the different recognized trades, such as those in the Government Printing Office, unless he has had five years' experience in his trade, one year of which must have been as a journeyman. This information is obtained by personal questions relating to the applicant's experience at his trade and the certificates of persons who have employed him. No one is certified for appointment whose standing in any examination is less than 70 per centum of complete proficiency, except applicants whose claims for military or naval preference under Section 1,754 R. S. have been admitted. These need obtain but 65. The law also prescribes competitive examinations for promotion in the service. A certificate is given to each person examined, stating whether he passed or failed to pass. For positions in the classified service where technical qualifications are needed special examinations are held. In the Departmental Service they are held for the State Department, the Pension, Patent, and Signal Offices, Geological and Coast Surveys, Engineer Department at large, Ordnance Department at large, etc. For places which do not require technical qualifications the number of applicants is usually excessive, and only those who attain high grades have a good chance for appointment.

Excepted Places.—A number of positions are excepted from examination or are subject only to non-competitive examination. In the former class are included the following positions: Private secretaries and confidential clerks (not exceeding two) to the President or to the head of each of the eight Executive Departments; attorneys or assistant attorneys whose main duties are connected with the management of cases in court; one assistant postmaster, or chief assistant to the postmaster, of whatever designation, at each post office, and one cashier for each first-class post office when employed under the roster title of

cashier only; Indians employed in the Indian Service at large, except those employed as superintendents, teachers, teachers of industries, kindergartners, and physicians. In the latter class are included the following employees in the Customs and Internal Revenue Services: One cashier in each customs district, one chief or principal deputy or assistant collector in such district, and one principal deputy collector at each sub-port or station; one employee in each Internal Revenue district who shall act as cashier or chief deputy or assistant collector, as may be determined by the Treasury Department; one deputy collector in each Internal Revenue district where the number of employees in the office of the collector exceeds four, and one deputy collector in each stamp (or branch) office.

Appointments.—Upon the occurrence of a vacancy, the appointment to fill it, if not made by promotion, reduction, transfer, or reinstatement (for all of which provision is made by the Civil Service rules), must be made by selection from the eligibles of highest grade on the appropriate register. In the Executive Departments at Washington and in the Government Printing Office appointments are apportioned among the States and Territories on the basis of population. Every appointment is made for a probationary period of six months. Whenever there are no names of eligibles upon a register for any position in which a vacancy exists, and the public interest requires that it be filled before eligibles can be provided by the Commission, such vacancy may, subject to the approval of the Commission, be filled by appointment without examination and certification until an eligible can be provided by the Commission. The number of women applying for clerical places is greatly in excess of the calls of appointing officers. The positions to which the largest numbers of them are appointed are those of assistant microscopist in the branch offices of the Bureau of Animal Industry at the various stockyards throughout the country, and teachers, matrons, seamstresses, etc., in the Indian Service. A few receive appointments as stenographers and typewriters in the Departmental Service, and a few are appointed to technical and professional places.

Preference Claimants.—Persons who served in the military or naval service of the United States, and were discharged by reason of disabilities resulting from wounds or sickness incurred in the line of duty, are, under the Civil Service rules, given certain preferences. They are released from all maximum age limitations, are eligible for appointment at a grade of 65, while all others are obliged

to obtain a grade of 70, and are certified to appointing officers before all others. Subject to the other conditions of the rules, any person who served in the military or naval service of the United States in the war of the rebellion, and was honorably discharged therefrom, or the widow of any such person, or any army nurse of said war, may be reinstated without regard to the length of time he or she has been separated from the service.

Provisions Concerning Political Discrimination, Assessments, Etc.—

The Civil Service rules provide that no person in the Executive Civil Service shall dismiss, or cause to be dismissed, or make any attempt to procure the dismissal of or in any manner change the official rank or compensation of any other person therein, because of his political or religious opinions or affiliations; that no removal shall be made from any position subject to competitive examination except for just cause and upon written charges filed with the head of the department or other appointing officer, and of which the accused shall have full notice and an opportunity to make defense; and that no person in the Executive Civil Service shall use his official authority or official influence for the purpose of interfering with an election or controlling the result thereof. Such rules also provide that any person in the Executive Civil Service who shall willfully violate any provision of the Civil Service act or rules shall be dismissed from office.

The Civil Service act contains provisions forbidding any person in the service of the United States from levying upon or collecting from persons in the Executive Civil Service contributions to be devoted to political objects, the collection of such contributions by any person in any public building of the United States, or discrimination against persons who do not make such contributions or render political service. A violation of any of the provisions concerning political assessments, or their collection in a public building of the United

States, is declared to be a misdemeanor, punishable by a fine not exceeding five thousand dollars, or by imprisonment for a term not exceeding three years, or by such fine and imprisonment both in the discretion of the court. The act also declares that when rules to carry its provisions into effect shall have been promulgated, "it shall be the duty of all officers of the United States in the departments and offices to which any such rules may relate, to aid, in all proper ways, in carrying said rules, and any modifications thereof, into effect."

Political Activity of Officials.—An executive order of July 14, 1896, which is still in force, warns office-holders that, while individual interest and activity in political affairs are by no means condemned, they must bear in mind that their time and labor are due to the Government, and that they should scrupulously avoid, in their political action as well as in the discharge of their official duty, offending, by obtrusive partisanship, their neighbors who have relations with them as public officials.

The Unclassified Executive Civil Service.—The portion of the Executive Civil Service which is not classified embraces the following: All officers nominated by the President and confirmed by the Senate, including members of the Cabinet, assistant secretaries, certain chiefs of bureaus, etc., in the Executive Departments at Washington, collectors, naval officers, surveyors, and appraisers in the Customs Service, collectors in the Internal Revenue Service, and first, second, and third class postmasters. Other unclassified positions are fourth class postmasters, the employees of the District of Columbia, the employees of the Library of Congress, clerks in post offices not having free delivery, mere laborers and workmen, certain positions having a compensation of less than \$300 a year, and the Consular Service. Examinations for positions in the service last named are non-competitive, and conducted by a board of the Department of State.

PRESIDENTIAL ELECTIONS

There is, properly speaking, no popular vote for President and Vice-President; the people vote for electors, and those chosen in each State meet therein and vote for the candidates for President and Vice-President. The record of any popular vote for electors prior to 1824 is so meager and imperfect that a compilation would be useless. In most of the States, for more than a quarter of a century following the establishment of the government, the State Legislatures "appointed" the Presidential electors, and the people therefore voted only indirectly for them, their choice being expressed by their votes for members of the Legislature. In this tabulation only the aggregate electoral votes for candidates for President and Vice-President in the first nine quadrennial elections appear.

1789. Previous to 1804, each elector voted for two candidates for President. The one who received the largest number of votes was declared President, and the one who received the next largest number of votes was declared Vice-President. The electoral votes for the first President of the United States were: George Washington, 69; John Adams, of Massachusetts, 34; John Jay, of New York, 9; E. H. Harrison, of Maryland, 6; John Rutledge, of South Carolina, 6; John Hancock, of Massachusetts, 4; George Clinton, of New York, 3; Samuel Huntington, of Connecticut, 2; John Milton, of Georgia, 2; James Armstrong, of Georgia, Benjamin Lincoln, of Massachusetts, and Edward Telfair, of Georgia, 1 vote each. Vacancies (votes not cast), 4. George Washington was chosen President and John Adams Vice-President.

1792. George Washington, Federalist, received 132 votes; John Adams, Federalist, 77; George Clinton, of New York, Republican (a), 50; Thomas Jefferson, of Virginia, Republican, 4; Aaron Burr, of New York, Republican, 1 vote. Vacancies, 3. George Washington was chosen President and John Adams Vice-President.

1796. John Adams, Federalist, 71; Thomas Jefferson, Republican, 68; Thomas Pinckney, of South Carolina, Federalist, 59; Aaron Burr, of New York, Republican, 30; Samuel Adams, of Massachusetts, Republican, 15; Oliver Ellsworth, of Connecticut, Independent, 11; George Clinton, of New York, Republican, 7; John Jay, of New York, Federalist, 5; James Iredell, of North Carolina, Federalist, 3; George Washington, of Virginia, John Henry, of Maryland, and S. Johnson, of North Carolina, all Federalists, 2 votes each; Charles Cotesworth Pinckney, of South Carolina, Federalist, 1 vote. John Adams was chosen President and Thomas Jefferson Vice-President.

1800. Thomas Jefferson, Republican, 73; Aaron Burr, Republican, 73; John Adams, Federalist, 65; Charles C. Pinckney, Federalist, 64; John Jay, Federalist, 1 vote. There being a tie for Jefferson and Burr, the choice devolved upon the House of Representatives. Jefferson received the votes of ten States, which, being the largest vote cast for a candidate, elected him President. Burr received the votes of four States, which, being the next largest vote, elected him Vice-President. There were 2 blank votes.

1804. The Constitution of the United States having been amended, the electors at this election voted for a President and a Vice-President, instead of for two candidates for President. The result was as follows: For President, Thomas Jefferson, Republican, 162; Charles C. Pinckney, Federalist, 14. For Vice-President, George Clinton, Republican, 162; Rufus King, of New York, Federalist, 14. Jefferson was chosen President and Clinton Vice-President.

1808. For President, James Madison, of Virginia, Republican, 122; Charles C. Pinckney, of South Carolina, Federalist, 47; George Clinton, of New York, Republican, 6. For Vice-President, George Clinton, Republican, 113; Rufus King, of New York, Federalist, 47; John Langdon, of New Hampshire, 9; James Madison, 8; James Monroe, 3. Vacancy, 1. Madison was chosen President and Clinton Vice-President.

1812. For President, James Madison, Republican, 128; De Witt Clinton, of New York, Federalist, 89. For Vice-President, Elbridge Gerry, of Massachusetts, 131; Jared Ingersoll, of Pennsylvania, Federalist, 86. Vacancy, 1. Madison was chosen President and Gerry Vice-President.

1816. For President, James Monroe, of Virginia, Republican, 183; Rufus King, of New York, Federalist, 34. For Vice-President, Daniel D. Tompkins, of New York, Republican, 183; John Eager Howard, of Maryland, Federalist, 22; James Ross, of Pennsylvania, 5; John Marshall, of Virginia, 4; Robert G. Harper, of Maryland, 3. Vacancies, 4. Monroe was chosen President and Tompkins Vice-President.

1820. For President, James Monroe, of Virginia, Republican, 231; John Q. Adams, of Massachusetts, Republican, 1. For Vice-President, Daniel D. Tompkins, Republican, 218; Richard Stockton, of New Jersey, 8; Daniel Rodney, of Delaware, 4; Robert G. Harper, of Maryland, and Richard Rush, of Pennsylvania, 1 vote each. Vacancies, 3. James Monroe was chosen President and Daniel D. Tompkins Vice-President.

* Elected. (e) Eleven So. States not voting. (f) Three Southern States disfranchised. (g) Horace Greeley died after election, and Democratic electors scattered their vote. (h) There being a dispute over the electoral vote of Florida, Louisiana, Oregon, and South Carolina, they were referred by Congress to an electoral commission composed of eight Republicans and seven Democrats, which, by a strict party vote, awarded 185 electoral votes to Hayes and 184 to Tilden. (i) Free Democrat. (j) Free Silver Prohibition party. (k) In Massachusetts. There was also a Native American ticket in that State, which received 184 votes. (m) Middle of the Road or Anti-Fusion People's party. (n) United Christian party. (o) Union Reform party.

THE GOLD STANDARD ACT OF 1900.

By this act the dollar consisting of twenty-five and eight tenths grains of gold, nine tenths fine, shall be the standard of value, and all forms of money issued or coined shall be maintained at a parity of value with this gold standard. The United States notes and Treasury notes shall be redeemed in gold coin, and a redemption fund of \$150,000,000 of gold coin and bullion is set aside for that purpose only. The following is the text of the section carrying out this provision:—

SEC. 2. That United States notes and Treasury notes issued under the act of July 14, 1890, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed in the first section of this act, and in order to secure the prompt and certain redemption of such notes as herein provided it shall be the duty of the Secretary of the Treasury to set apart in the Treasury a reserve fund of \$150,000,000 in gold coin and bullion, which fund shall be used for such redemption purposes only, and whenever and as often as any of said notes shall be redeemed from said fund it shall be the duty of the Secretary of the Treasury to use said notes so redeemed to restore and maintain such reserve fund in the manner following, to wit:—

First—By exchanging the notes so redeemed for any gold coin in the general fund of the Treasury.

Second—By accepting deposits of gold coin at the Treasury or at any sub-Treasury in exchange for the United States notes so redeemed.

Third—By procuring gold coin by the use of said notes, in accordance with the provisions of Section 3,700 of the Revised Statutes of the United States.

If the Secretary of the Treasury is unable to restore and maintain the gold coin in the reserve fund by the foregoing methods, and the amount of such gold coin and bullion in said fund shall at any time fall below \$100,000,000, then it shall be his duty to restore the same to the maximum sum of \$150,000,000 by borrowing money on the credit of the United States, and for the debt thus incurred to issue and sell coupon or registered bonds of the United States, in such form as he may prescribe, in denominations of \$50 or any multiple thereof, bearing interest at the rate of not exceeding 3 per centum per annum, payable quarterly, such bonds to be payable at the pleasure of the United States after one year from the date of their issue, and to be payable, principal and interest, in gold coin of the present standard value, and to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under state, municipal or local authority; and the gold coin received from the sale of said bonds shall first be covered into the general fund of the Treasury and then exchanged, in the manner hereinbefore provided, for an equal amount of the notes redeemed and held for exchange, and the Secretary of the Treasury may, in his discretion, use said notes in exchange for gold, or to purchase or redeem any bonds of the United States, or for any other lawful purpose the public interests may require, except that they shall not be used to meet deficiencies in the current revenues.

That United States notes when redeemed in accordance with the provisions of this section shall be reissued, but shall be held in the reserve fund until exchanged for gold, as herein provided; and the gold coin and bullion in the reserve fund, together with the redeemed notes held for use as provided in this section, shall at no time exceed the maximum sum of \$150,000,000.

The legal tender quality of the silver dollar and other money coined or issued by the United States is not affected by the act.

The deposit of gold coin with the Treasurer, and the issue of gold certificates therefor, and the coinage of silver bullion in the Treasury into subsidiary silver coin are provided for.

The National Bank law is amended to permit banks to be created with \$25,000 capital in places whose population does not exceed 3,000. Provision is made for the refunding of outstanding bonds at a low rate of interest, and under it bonds bearing 3, 4, and 5 per cent. interest have been refunded for bonds bearing 2 per cent.

Section 10 provides that Section 5,138 of the Revised Statutes is amended so as to read as follows:—

"Section 5,138. No association shall be organized with a less capital than \$100,000, except that banks with a capital of not less than \$50,000 may, with the approval of the Secretary of the Treasury, be organized in any place the population of which does not exceed 6,000 inhabitants, and except that banks with a capital of not less than \$25,000 may, with the sanction of the Secretary of the Treasury, be organized in any place the population of which does not exceed 3,000 inhabitants. No association shall be organized in a city the population of which exceeds 50,000 persons with a capital of less than \$200,000."

Section 12 provides for the issue of circulating notes to banks on deposit of bonds, and for additional deposits when there is a depreciation in the value of bonds. The total amount of notes issued by any National banking association may equal at any time, but shall not exceed, the amount at any such time of its capital stock actually paid in.

Every National banking association shall pay a tax in January and July of one fourth of 1 per cent. on the average amount of such of its notes in circulation as are based on its deposit of 2 per cent. bonds, and such taxes shall be in lieu of the taxes on its notes in circulation imposed by Section 5,214 of the Revised Statutes. Provision for international bimetalism is made in the final section of the act, which is as follows:—

SEC. 14. That the provisions of this act are not intended to preclude the accomplishment of international bimetalism whenever conditions shall make it expedient and practicable to secure the same by concurrent action of the leading commercial nations of the world and at a ratio which shall insure permanence of relative value between gold and silver.

LABOR LEGISLATION.

Anti-Boycotting and Anti-Blacklisting Laws.—The States having laws prohibiting *boycotting* in terms are Colorado, Illinois, and Wisconsin.

The States having laws prohibiting *blacklisting* in terms are Alabama, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Minnesota, Missouri, Montana, Nevada, North Dakota, Oklahoma, Utah, Virginia, and Wisconsin.

The following States have laws which may be fairly construed as prohibiting *boycotting*: Alabama, Connecticut, Florida, Georgia, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New York, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Vermont, and Wisconsin.

The following States have laws which may be fairly construed as prohibiting *blacklisting*: Georgia, Michigan, New Hampshire, New York, Oklahoma, Oregon, Rhode Island, and South Dakota.

In the following States it is unlawful for any employer to exact an agreement, either written or verbal, from an employee not to join or become a member of any labor organization, as a condition of employment: California, Colorado, Idaho, Indiana, Massachusetts, Minnesota, Missouri, New Jersey, New York, Ohio, and Pennsylvania.

Eight-Hour Laws.—CALIFORNIA. — Eight hours of labor constitute a day's work, unless it is otherwise expressly stipulated by the parties to a contract. A stipulation that eight hours of labor constitute a day's work must be made a part of all contracts to which the State or any municipal corporation therein is a party. But in the case of drivers, conductors, and gripmen of street cars for the carriage of passengers, a day's work consists of twelve hours. Employment of minor children for more than eight hours per day is absolutely prohibited, except in vinicultural or horticultural pursuits, or in domestic or household occupations.

COLORADO. Eight hours constitute a day's work for all workmen employed by the State, or any county, township, school district, municipality, or incorporated town.

CONNECTICUT. Eight hours of labor constitute a lawful day's work unless otherwise agreed.

DISTRICT OF COLUMBIA. Eight hours constitute a day's work for all laborers or mechanics employed by or on behalf of the District of Columbia.

IDAHO. Eight hours' actual work constitute a lawful day's work on all State and municipal works.

ILLINOIS. Eight hours are a legal day's work in all mechanical employments, except on farms, and when otherwise agreed; does not apply to service by the day, week, or month, or prevent contracts for longer hours.

INDIANA. Eight hours of labor constitute a legal day's work for all classes of mechanics, workmen, and laborers, excepting those engaged in agricultural and domestic labor. Overwork by agreement and for extra compensation is permitted. The employment of persons under fourteen years of age for more than eight hours per day is absolutely prohibited.

KANSAS. Eight hours constitute a day's work for all laborers, mechanics, or other persons employed by or on behalf of the State or any county, city, township, or other municipality.

NEBRASKA. Eight hours constitute a legal day's work for all classes of mechanics, servants, and laborers, except those engaged in farm or domestic labor.

MISSOURI. Eight hours constitute a legal day's work. The law does not prevent an agreement to work for a longer or a shorter time and does not apply to laborers and farm hands in the service of farmers or others engaged in agriculture.

MONTANA. Eight hours constitute a legal day's work for persons engaged to operate or handle any first-motion or direct-acting hoisting engine, or any geared or indirect-acting hoisting engine at any mine employing fifteen or more men underground when the duties of fireman are performed by the person so engaged; also for any stationary engineer operating a stationary engine developing fifty or more horse power when such engineer has charge or control of a boiler or boilers in addition to his other duties. The law applies only to such steam plants as are in continuous operation or are operated twenty or more hours in each twenty-four hours, and does not apply to persons running any engine more than eight hours in each twenty-four for the purpose of relieving another employee in case of sickness or other unforeseen cause.

NEW JERSEY. Eight hours constitute a day's labor on any day whereon any general or municipal election shall be held.

NEW YORK. Eight hours constitute a day's work for mechanics, workmen, and laborers, except in farm or domestic labor, but overwork for extra pay is permitted. The law applies to those employed by the State or municipality, or by persons contracting for State work.

OHIO. Eight hours shall constitute a day's work in all engagements to labor in any mechanical, manufacturing, or mining business.

unless otherwise expressly stipulated in the contract. But in case of conductors, engineers, firemen, or trainmen of railroads, a day's work consists of ten hours.

PENNSYLVANIA. Eight hours of labor shall be deemed and held to be a legal day's work in all cases of labor and service by the day where there is no agreement or contract to the contrary. This does not apply to farm or agricultural labor by the year, month, or week, to labor in factories, laundries, and renovating establishments, or to labor on street railways.

Eight hours out of the twenty-four shall make and constitute a day's labor in penitentiaries and reformatory institutions receiving support from the State, also for all mechanics, workmen, and laborers in the employ of the State, or of any municipal corporation therein, or otherwise engaged on public works; this shall be deemed to apply to mechanics, workmen, or laborers in the employ of persons contracting with the State or any municipal corporation therein, for the performance of public work.

UTAH. Eight hours constitute a day's work upon all public works and in all underground mines or workings, smelters, and all other institutions for the reduction or refining of ores.

WISCONSIN. In all engagements to labor in any manufacturing or mechanical business, where there is no express contract to the contrary, a day's work shall consist of eight hours; but the law does not apply to contracts for labor by the week, month, or year. In all manufactories, workshops, or other places used for mechanical or manufacturing purposes, the time of labor of children under the age of eighteen, and of women employed therein, shall not exceed eight hours in the day.

WYOMING. Eight hours' actual work constitute a legal day's work in all mines and public works.

UNITED STATES. Eight hours shall constitute a day's work for all laborers, workmen, and mechanics who may be employed by or on behalf of the United States.

PENSION LAWS.

Any loyal person who has been disabled in the military or naval service of the United States, or in its marine corps, shall, upon making due proof of the fact, be placed on the list of invalid pensioners of the United States. No claim for pension on the part of a State militiaman, or non-enlisted person, on account of disability from wounds received in battle with rebels or Indians, shall be valid unless prosecuted to a successful issue prior to July 4, 1874.

The first step to be taken by an applicant for a pension is to file a declaration before a court of record, or before some officer thereof having custody of its seal, setting forth the ground upon which he claims a pension. Blank forms of declaration are furnished upon request at Commissioner of Pensions office. The identity of the applicant must be shown by the testimony of two credible witnesses, who must appear with him before the officer by whom the declaration may be taken. A pensioner who may deem himself entitled to an increase of pension should file a declaration on a blank form furnished for the purpose, setting forth the ground upon which he claims such increase. A declaration for increase of pension may be taken before any officer duly authorized to administer oaths.

Under the pension law of 1890 the soldier who is wholly incapacitated from earning a living receives the sum of \$12 a month, whether the disability was contracted in the service or not; for a lesser degree of disability, \$10, \$8, or \$6.

All invalid pensions granted under the general law will terminate at re-enlistment, or when the disabilities for which they were allowed shall have ceased.

A widow's pension will end at her re-marriage, and not be renewable should she again become a widow.

Pensions allowed to dependent mothers and sisters end at re-marriage or when dependence ceases. Pensions allowed to dependent fathers end when the dependence ceases.

The name of any pensioner shall be stricken from the roll upon his or her failure to claim a pension for three years after the same shall have become due.

To entitle a widow or children to pension, the death of the soldier does not need to have been the result of injury received or disease contracted under such circumstances as would have entitled him to an invalid pension had he been disabled.

A widow is entitled to a pension of \$8 per month, no matter whether the death of the soldier was due to army service or not. In addition to this rate, she will be allowed \$2 per month for each child of the officer or soldier under the age of sixteen years.

In the application of widows and children for pensions, they are not required to prove that death of husband resulted from the injury or disease on account of which his pension was granted; but, if the husband had not established his claim for an invalid pension, the widow shall prove origin and cause of the fatal disease. Widows will be required to prove their marriage to the person on account

of whose service and death the claim is made; also proof of dates of birth of children by copy of record.

A mother claiming a pension must prove the cause and date of the death of her son; her relationship; that he left no widow or minor child or children surviving; and that, if living, she would be dependent upon him for support.

A father claiming pension on account of the death of his son, upon whom he was dependent for support, must prove facts similar to those required of a mother.

The claim on behalf of minor brothers and sisters should be made by a guardian duly appointed.

In the administration of the pension laws, no distinction is made between brothers and sisters of the half blood and those of the whole blood. Evidence in a claim for pension cannot be verified before an officer who is engaged in the prosecution of such claim.

In claims for increase of pension, a fee of \$2 will be allowed. All letters of inquiry relative

to claims pending in Pension Office should give the number of the claim.

No sum of money due, or to become due, to any pensioner, shall be liable to attachment, levy or seizure, under any legal or equitable process.

No agent, or attorney, or other person, shall demand or receive any other compensation for his services in prosecuting a claim for pension or bounty-land than such as the Commissioner of Pensions shall direct to be paid to him, not exceeding \$25.

Every officer, or enlisted or hired man, who has lost a limb, or the use of a limb, in the military or naval service of the United States, is entitled to receive, once every three years, an artificial limb or apparatus, or commutation therefor. The period of three years is reckoned from the filing of first application after March 2, 1891. The commutation allowed in case of the amputation of a leg is \$75; in all other cases, \$50. Applications for artificial limbs should be transmitted through the proper pension agent to the surgeon-general of the army.

RATES OF PENSION PER MONTH.

| Disabilities. | From July 4, 1864. | From June 6, 1866. | From June 4, 1872. | From June 4, 1874. | From Feb. 28, 1877. | From June 17, 1878. | From Mar. 3, 1879. | From Mar. 3, 1883. | From Aug. 4, 1886. | From Mar. 2, 1903. | From Apr. 8, 1904. |
|--|--------------------|--------------------|--------------------|--------------------|---------------------|---------------------|--------------------|--------------------|--------------------|--------------------|--------------------|

| Total deafness(e)..... | | | 13.00 | | | | | | | | |

(a) Present rate from Feb. 12, 1889, has been \$100. (b) Was \$20 from Mar. 3, 1865, until June 4, 1872. (c) Was \$37.50 from Mar. 3, 1885, to Aug. 4, 1886. (d) Present rate from July 14, 1892, \$50. (e) Raised to \$30 from Aug. 27, 1888, and from Jan. 15, 1903, to \$40, the present rate.

United States Custom Regulations as to Baggage.—The following articles are exempt from duty: Wearing apparel and other personal effects (not merchandise), professional books, implements, instruments and tools of trade.

To ascertain what articles ought to be exempted as the wearing apparel and other personal baggage, and the tools or implements of a mechanical trade only, of persons who arrive in the United States, due entry thereof, as of other merchandise, but separate and distinct from that of any other merchandise imported from a foreign port, shall be made with the Collector of the district in which the articles are intended to be landed by the owner thereof or his agent, expressing the persons by whom or for whom such entry is made, and particularizing the several packages and their contents, with their marks and numbers; and the persons who shall make the entry shall take and subscribe an oath before the Collector, declaring that the entry subscribed by him, and to which the oath is annexed, contains, to the best of his knowledge and belief, a just and true account of the contents of the several packages mentioned in the entry, specifying the name of the vessel, of her master, and of the port from which she has arrived; and that such packages contain no merchandise whatever, other than wearing apparel, personal baggage, or, as the case may be, tools of trade, specifying it; that they are all the property of a person named who has arrived, or is shortly expected to arrive, in the United States, and are not, directly or indirectly, imported for any other, or intended for sale.

Whenever any article subject to duty is found in the baggage of any person arriving in the United States which was not, at the time of making entry for such baggage, mentioned to the Collector before whom such entry was made, by the person making entry, such article shall be forfeited, and the person in whose baggage it is found shall be liable to a penalty of triple the value of such article.

"Professional books, implements, and tools of trade, occupation, or employment," are understood to embrace such books or instruments as would naturally belong to a surgeon, physician, engineer, or scientific person returning to this country.

Jewelry that has been worn or is in use as a personal ornament may be admitted free of duty.

Duty must be demanded on all watches but one, brought into the United States by a single passenger. If all the watches are old, the passenger may choose the one to be treated as

personal effects. If some are old and some new, the new are to be included among those treated as subject to duty.

The United States Supreme Court has decided that the free list includes (1) wearing apparel owned by the passenger, and in a condition to be worn at once without further manufacture; (2) brought with him as a passenger, and intended for the use or wear of himself or his family who accompanied him as passengers, and not for sale or purchased or imported for other persons, or to be given away; (3) suitable for the season of the year which was immediately approaching at the time of arrival; (4) not exceeding in quantity, or quality, or value of what the passenger was in the habit of ordinarily providing for himself and his family at that time, and keeping on hand for his and their reasonable wants, in view of their means and habits in life, even though such articles had not been actually worn.

The Law of Finding.—The law of finding, though not prescribed by statute, is well defined by precedent. It may be stated thus: The finder has a clear title against the whole world except the owner. The proprietor of a hotel or a shop has no right to demand the property or premises. Such proprietor may make regulations in regard to lost property which will bind their employees, but they cannot bind the public. The law of finding was declared by the King's bench, England, over 100 years ago, in a case in which the facts were these:—

A person found a wallet containing a sum of money on a shop floor. He handed the wallet and contents to the shopkeeper to be returned to the owner. After three years, during which the owner did not call for his property, the finder demanded the wallet and the money from the shopkeeper. The latter refused to deliver them up on the ground that they were found on the premises. The former then sued the shopkeeper, and it was held as above set forth, that against all the world but the owner, the title of the finder is perfect. And the finder has been held to stand in the place of the owner, so that he was permitted to prevail in an action against a person who found an article which the plaintiff had originally found, but subsequently lost. The police have no special rights in regard to articles lost, unless those rights are conferred by statute. Receivers of articles found are trustees for the owner or finder. They have no power in the absence of special statute to keep an article against the finder, any more than the finder has to retain an article against the owner.

QUALIFICATIONS FOR VOTING IN EACH STATE OF THE UNION.

In all the States except Colorado, Idaho, Utah, and Wyoming the right to vote at general elections is restricted to males of 21 years of age and upward. (See also "New York," next page.) Women are entitled to vote at school elections in several States. They are entitled by law to full suffrage in the States of Colorado, Idaho, Utah, and Wyoming.

| STATES. | Requirements as to Citizenship. | Previous Residence Required. | | | | Persons Excluded from Suffrage. |
|-----------------|---|------------------------------|------------|----------|--------------|--|
| | | In State. | In County. | In Town. | In Precinct. | |
| Alabama* | Citizen of United States or alien who has declared intention. | 2 years. | 1 year. | 3 mos. | 3 mos. | Convicted of treason or other felonies, idiots, or insane. |
| Arizona Ter* | Citizen of United States or alien who has declared intention (a). | 1 year. | 30 days. | | 30 days. | Idiot, insane, felon. |

| Utah* | Citizen of the United States, male or female. | 1 year.. | 4 mos.. | | 60 days. | Idiots, insane, convicted of treason or crime against elective franchise, unless pardoned. |
| Vermont* | Citizen of the United States..... | 1 year.. | 3 mos.. | 3 mos.. | 3 mos.. | Those who have not obtained the approbation of the local board of civil authority. |
| Virginia* | See note at foot of page..... | 2 years. | 1 year.. | 1 year.. | 30 days. | Idiots, lunatics, paupers (f)(g). |
| Washington* | Citizen of the United States and all residents of Territory prior to Statehood (b). | 1 year.. | 90 days. | 30 days. | 30 days. | Idiots, lunatics, convicted of infamous crimes, Indians not taxed. |
| West Virginia* | Citizen of the State..... | 1 year.. | 60 days. | 10 days. | (d) | Paupers, idiots, lunatics, convicted of treason, felony, or bribery at elections. |
| Wisconsin* | Citizen of United States or alien who has declared intention, and civilized Indian. † (b). | 1 year.. | 10 days. | 10 days. | 10 days. | Under guardianship, insane, convicted of crime or treason, betting on elections. |
| Wyoming* | Citizen of the United States, male or female. | 1 year.. | 60 days. | 10 days. | 10 days. | Idiots, insane, felons, unable to read State Constitution in the English language. |

*Australian Ballot law or a modification of it in force. †Or a person unable to read the Constitution in English and to write his name. (a)Or citizens of Mexico who shall have elected to become citizens under the treaties of 1848 and 1854. Poll-tax must be paid for current year. (b)Clergymen are qualified after six months' residence in precinct. (c)Also public embezzlers, persons guilty of bribery, or dishonorably discharged soldiers from the United States service, unless reinstated. (d)Those able to read and write, or who own \$300 worth of property assessed in their name, or whose father or grandfather was entitled to vote on January 1, 1867. (e)Also soldiers, sailors, and marines in U. S. service. (f)No soldier, seaman, or marine deemed a resident because stationed in the State. (g)The Australian system sometimes prevails in municipal primaries in Georgia, but same is made applicable by rule of party ordering primary and not by the law. ‡Indian must have severed tribal relations. §One year's residence in the United States prior to election required. (b) Women can vote in school elections. (z) Owners of real estate, one year. (c) Ministers in charge of an organized church and teachers of public schools are entitled to vote after six months' residence in the State. (d) Actual residence in the precinct or district required. (e) Who has paid six months before election any poll-tax then due, and can read and write any section of the State Constitution, or can show that he owns, and has paid all taxes due the previous year on, property in the State assessed at \$300 or more. (f) Or convicted of bribery, embezzlement of public funds, treason, forgery, perjury, felony, and petty larceny, duels and abettors, unless pardoned by Legislature. (g) Or persons *non compos mentis*, convicted of bribery or infamous crime, until restored to right to vote, under guardianship. (h) Also persons excused from paying taxes at their own request, and those unable to read the State Constitution in English, or write. (k) Inhabitation not residence. (l) Thirty days in election district.

In New York.—Woman otherwise qualified but for sex may vote at village elections or town meetings to raise money by tax or assessment if she owns property in village or town. Elector of town not entitled to vote on proposition for raising of money or incurring town liability unless he or his wife own property in town assessed on last assessment roll.

In Virginia.—Voting qualifications. All persons who six months before the election have paid their State poll-taxes for the three preceding years. Also any person who served in time of war in the army or navy of the United States, of the Confederate States, or of any State of the United States or of the Confederate States.

Residents of the District of Columbia never had the right to vote therein for national officers, or on other matters of national concern, after the territory embraced in it was ceded to the United States and became the seat of the general government.

Residents of the District of Columbia never had the right to vote therein for national officers, or on other matters of national concern, after it became the seat of the general government. But from 1802 to June 20, 1874, the citizens of Washington, and from January 1, 1790, to said date, the citizens of Georgetown were entitled to vote on municipal subjects and for certain municipal officers; the citizens of the portion of the District outside of Washington and Georgetown were entitled to the same privilege from April 20, 1871, to June 20, 1874, but that suffrage was abolished in the District of Columbia and was rescinded June 20, 1874, by the act of Congress of that date.

Territorial Governors are appointed by the President.

FEDERAL BANKRUPTCY ACT.

The States of the Union have insolvency laws, under which debtors conforming to the provisions of law can secure a release from debts owed in the State. Only the Federal Government can enact laws under which debtors can be discharged from their debts wherever they are owed. Among the duties of Congress is that of providing a uniform system of bankruptcy. Under this power Con-

gress has passed four bankruptcy acts, the first in the year 1800, which law by its own terms was limited to five years, but it was repealed, nevertheless, in 1803. In 1841, the second bankruptcy act was passed, and was repealed in March, 1843. The third bankruptcy act was approved March 2, 1867, and repealed in 1878. The fourth bankruptcy act was approved July 1, 1898, and, in brief, this act constitutes the district courts of the United

States in the several States, the Supreme Court of the District of Columbia, the district courts of the several Territories, and the United States courts in the Indian Territory and the district of Alaska courts of bankruptcy. The law defines acts of bankruptcy as follows:—

Acts of bankruptcy by a person shall consist of his having (1) conveyed, transferred, concealed, or removed, or permitted to be concealed or removed, any part of his property with intent to hinder, delay, or defraud his creditors, or any of them; or (2) transferred, while insolvent, any portion of his property to one or more of his creditors with intent to prefer such creditors over his other creditors; or (3) suffered or permitted, while insolvent, any creditor to obtain a preference through legal proceedings, and not having at least five days before a sale or final disposition of any property affected by such preference vacated or discharged such preference; or (4) made a general assignment for the benefit of his creditors; or (5) admitted in writing his inability to pay his debts and his willingness to be adjudged a bankrupt on that ground.

The following described persons may become bankrupts:—

Any person who owes debts, except a corporation, shall be entitled to the benefits of this act as a voluntary bankrupt.

Any natural person, except a wage-earner or a person engaged chiefly in farming or the tillage of the soil, any unincorporated company, and any corporation engaged principally in manufacturing, trading, printing, publishing, or mercantile pursuits, owing debts to the amount of one thousand dollars or over, may be adjudged an involuntary bankrupt upon default or an impartial trial, and shall be subject to the provisions and entitled to the benefits of this act. Private bankers, but not national banks or banks incorporated under State or Territorial laws, may be adjudged involuntary bankrupts.

The act does not affect the allowance to bankrupts of the exemptions which are prescribed by State laws in force at the time of the filing of a petition in the State wherein they have had their domicile for six months or the greater portion thereof immediately preceding the filing of a petition. The law creates two offices — referees and trustees.

The act went into full force and effect upon its passage, that is, July 1, 1898, but no petition for voluntary bankruptcy could be filed within one month of that date, and no petition for involuntary bankruptcy within four months thereof. Proceedings commenced under State insolvency laws before the passage of the act were not affected by it.

THE LAW OF TRADE-MARKS.

Any person, firm, or corporation can obtain protection for any lawful trade-mark by complying with the following:—

1. By causing to be recorded in the Patent Office the name, residence, and place of business of persons desiring the trade-mark.
2. The class of merchandise and description of the same.
3. A description of the trade-mark itself with facsimiles.
4. The length of time that the said mark has already been used.
5. By payment of the required fee — \$6.00 for labels and \$25 for trade-marks.
6. By complying with such regulations as may be prescribed by the Commissioner of Patents.
7. A lawful trade-mark must consist of some arbitrary word (not the name of a person or place), indicating or not the use or nature of the thing to which it is applied; of some designated symbol, or of both word and symbol.

INTERSTATE COMMERCE LAW.

The Interstate Commerce Act is a law passed by Congress in 1887 for the regulation of rates and the management of interstate commerce. It applies to carriers engaged in the transportation of passengers or property wholly by railroad or partly by railroad and partly by water, from one State, Territory, or District of the United States to any other State, Territory, or District, or to or from a foreign country. It provides for the appointment of a board of five commissioners, empowered to inquire into the management of the carriers and determine the reasonableness of their rates. A carrier whose line is entirely within a State is subject to the act so far as it makes or accepts through rates on interstate commerce.

Among other things the act requires that all charges shall be just and reasonable; that charges for a shorter distance shall not exceed those for a longer distance on the same line in the same direction, when the circumstances and conditions are similar; that there shall be no unjust discrimination as between persons or classes of traffic or localities, in the charges made, or in the service rendered; that the rates charged for transportation shall be printed, filed with the Commission, and kept for public inspection at the several stations, and that the carriers shall annually make a complete exhibit of their business to the Commission.

The act makes exceptions from its provisions of the carriage of property for the United States or for any State or municipal govern-

ment, or for charitable purposes, or to or from fairs and expositions, and it allows of the issuing of mileage, excursion, or commutation tickets, and admits of the giving of reduced rates to ministers of religion and free transportation to the officers and employees of the carrier, and to the principal officers of other carriers.

BUSINESS LAW AND FORMS.

Agency.—"Whatever business a man may do, he may employ another man to do for him." An agency may exist by *Implication*, *Verbally*, or by *Writings*.

By *implication* when the acts and words lead people in general to believe that the agency exists.

Verbally, whenever there is only the verbal agreement between the parties. A verbal agency permits the agent to make a contract even in cases where the contract must be in writing.

By *writings*, as notes, memoranda or formal instruments under seal.

The authority conveyed must be equal to the deed to be performed. The instrument of agency must be under seal when the conveyance requires a seal. When the business to be transacted does not require a seal, the instrument of agency need not be under seal.

Kinds.—General agents; special agents; professional agents.

A *general agent* is empowered to transact all the business of a particular kind. He may bind his principal, generally, with innocent parties so long as he keeps within the apparent scope of his authority, even if he exceeds *private* instructions.

A *special agent* is one invested with limited powers for the performance of some especial business. He cannot bind his principal whenever he exceeds his authority. Who deals with a special agent, deals at his peril, when the agent passes the limit of his power.

Professional agents, as attorneys, brokers, captains, auctioneers, factors, etc., are usually licensed by competent authority to transact a particular kind of business.

They are invested with ample power and the law holds them responsible for the proper performance of their duties.

Liabilities of Principal.—Private instructions to a general agent do not avoid the principal's liability to innocent parties. A principal is responsible for fraud on the part of the agent, if permitted while transacting his business. A principal is not bound by the acts of a special agent who exceeds his authority. A principal is not generally liable for the willful wrong done by his agent.

Forms of Powers of Attorney.—*Know all men by these presents:* That I, A. B., of, have made, constituted, and appointed, and by these presents do make, constitute, and appoint B. C., of, my true and lawful attorney, for me and in my name and stead (state purpose for which issued), giving and granting to my said attorney, by these presents, full power and authority to do and perform all and every act and thing necessary to be done in and about the premises, as fully to all intents and purposes as I might or could do if personally present, hereby ratifying and confirming all that my said attorney shall lawfully do or cause to be done by virtue hereof.

In witness whereof, I have hereunto set my hand and seal, this day of, A. D. 189 . .

A. B. [L. s.]

Sealed and delivered in the presence of B. C.

Married women, lunatics, and minors, in general, are disqualified from appointing agents, but a married woman in the State of New York, if over twenty-one years, may appoint an agent the same as though unmarried. A minor may authorize an agent to perform an act that is to his advantage, but not that is to his prejudice.

Deeds.—The grantor is the person who makes the conveyance and the grantee is the person who receives the conveyance.

A deed, being a contract, has the same essentials. In most States married women may convey real estate which they own in their own right. A partner cannot convey real estate belonging to the firm unless empowered by special authority from the partners to do so.

Consideration.—A sufficient consideration is necessary to a valid deed. (See consideration under contracts.)

Subject-matter.—The description of the land and its boundaries should be extremely accurate. The usual words of the transfer are "give, grant, sell, and convey," though any others conveying the same idea could be used. Land sold without reserving any crops at that time growing on it, conveys the crops or everything attached to the land. When a building is sold it conveys everything that belongs to it. The words "heirs and assigns" are necessary in some States to convey an unconditional title.

Forms of Deeds.—Deed with full covenants. (New York Laws of 1890.)

This indenture, made the . . day of . . . , in the year . . . , between A. B., of . . . (give occupation and residence), of the first part, and C. D., of . . . (occupation and residence), of the second part.

Witnesseth: That the said party of the first part, in consideration of dollars, lawful money of the United States, paid by the party of the second part, doth hereby grant and release unto the said party of the second part, his heirs and assigns forever (here describe property), together with the appurtenances and all the estate and rights of the party of the first part in and to the said premises.

To have and to hold the above granted premises unto the said party of the second part, his heirs and assigns forever.

And the said party of the first part, doth covenant with said party of the second part, as follows:—

First. That the party of the first part is seized of the said premises in fee simple, and has good right to convey the same.

Second. That the party of the second part shall quietly enjoy the said premises.

Third. That the said premises are free from incumbrance.

Fourth. That the party of the first part will execute or procure any further necessary assurance of the title to said premises.

Fifth. That the party of the first part will forever warrant the title of said premises.

In witness whereof, the said party of the first part hath hereunto set his hand and seal the day and year first above written. A. B.

In the presence of, [L. s.]

B. C.

Acknowledgment for the above.

STATE OF NEW YORK, } ss.:
County of }

On this . . day of , in the year , before me, the subscriber, personally came A. B. (and C. B., his wife), to me known to be the person (or persons) described in and who executed the within instrument, and (severally) acknowledged that he (or they) executed the same.

J. A.,

(Give official title.)

NEW YORK.—“Every conveyance unless recorded is void against a subsequent purchaser in good faith, whose conveyance shall be first duly recorded. To entitle a conveyance to be recorded it must be acknowledged by the party or parties executing the same, or shall be proved by a subscribing witness.” “The acknowledgment of married women may be made, taken, and certified in the same manner as if they were sole.”

OHIO.—All deeds, mortgages, etc., executed within the State of Ohio must be signed by the grantor and acknowledged before two attesting witnesses, and the said grantor must also acknowledge the same before a judge of the court of record of that State or some other competent authority.

STATE OF OHIO, }
County of , } ss.:

Be it remembered that on this . . day of , 189. . , before me, the subscriber, a (give official title), in and for the said county, came A. B., and C. B., his wife, the grantors in the foregoing instrument, and acknowledged the signing thereof to be their voluntary act and deed for the uses and purposes therein mentioned. And the said C. B., wife of the said A. B., being examined by me separate and apart from her said husband, and the contents of the said instrument being by me made known and explained to her as the statute directs, declared that she did voluntarily sign and acknowledge the same and that she is still satisfied therewith as her act and deed.

In testimony whereof I have hereunto set my hand and affixed my official seal, the day [L. s.] and year last above written.

(Signature and title.)

The following States require no separate examination in acknowledgments by husband and wife: Connecticut, the Dakotas, Illinois, Indiana, Iowa, Kansas, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Mexico, New York, Wisconsin, Wyoming, and Washington.

The following States require a separate examination: Delaware, District of Columbia, Florida, Idaho, Kentucky, Nevada, New Jersey, North Carolina, Pennsylvania, Ohio, Rhode Island, South Carolina, Tennessee, and Texas.

Common Carriers.—A common carrier is one who, for a compensation, carries the goods of anyone offering them for transportation as a regular business.

Carrier's Obligations.—He must take all goods offered, unless of a dangerous kind. He must charge one person no higher rates than another. He must take such care of the goods as a prudent man would of his own. He must carry them by the usual route and make a proper delivery of them. He must place the goods in a proper place and give notice of their arrival.

Carrier's Liabilities.—In common law they are liable for all losses “except those occasioned by the act of God or the acts of the public enemy.” He is responsible for losses by theft, robbery, etc.

Railroad companies are responsible as carriers to parties sending goods by express over their lines, irrespective of the said parties' contract with the express company.

A carrier's liability begins as soon as he has accepted the goods. It ends as soon as he has carried them to their destination and has deposited them there.

The notices on their receipts whereby they seek to avoid all responsibility, are "no evidence of assent on the part of the owner," and the liability cannot be avoided that way. He may avoid almost anything by making a special contract.

He might avoid liability by notice if he could prove that the shipper had read his notice or was familiar with its terms, though there is some question about this in New York at least.

Carriers of Passengers.—They are bound to make use of all ordinary methods for the safety of their passengers. They must employ proper vehicles and competent servants. In general, they are bound to run trains on their advertised time. They are liable to passengers for the misconduct of their servants. If any person is injured through their negligence, they are liable not only for the damage that person has received, but for *prospective* damage as well. He is an insurer of his passengers' baggage. He is liable for such baggage as his passengers carry for their own personal use. He cannot avoid liability by notices, as a notice is no evidence of the assent of the owner of the baggage. The carrier may avoid liability to some extent by a special contract.

They must take each person who tenders the price of transportation and wishes to be carried. They are not obliged to take disorderly or persons of doubtful character, or those afflicted with some contagious disease. They are not responsible to their passengers for accidents where all skill and diligence has been employed. Passengers are required to submit to all reasonable rules and regulations, to show their tickets whenever asked, and to surrender their tickets whenever required.

Currency.—The National Bank Act fixes the capital required to establish a National Bank as follows: Towns of less than 6,000 inhabitants, a capital of not less than \$50,000; towns of from 6,000 to 50,000, a capital of not less than \$100,000; in towns of over 50,000, at least \$200,000 will be required.

Each bank must deposit with the Treasurer at Washington, government bonds to the extent of at least one third its capital, as security for the notes of the bank. The government then issues to the bank ninety per cent. in notes, which, when properly filled and signed, constitute the circulation of the bank.

Such banks are required to keep on hand at least twenty-five per cent. in legal tender of its circulation and deposits.

The notes of such banks are secured to the holders, but depositors run the same risk of loss as with other banks.

Checks.—A check is an order to a bank to pay the holder a certain sum of money on presentation and without days of grace.

A check, as in the case of a promissory note, may or may not be negotiable, according to the way it is drawn.

A check given is no payment of a debt unless paid when presented.

Payment of a check may be stopped at any time before it is presented if notice is given the bank.

Every indorser of a check is liable to each following indorser as in the case of promissory notes, but for no longer time than he would have been held had he been the maker of the check.

Certificates of Deposit partake of the nature of certified checks and are used when money is deposited for a short time and no regular bank account opened.

When wishing to draw your money in person, draw the check payable to "Self" or "Cash."

Write the amount of the check both in words and figures, taking care that no blank spaces are left that could be filled to "raise" the amount of the check.

Indorsements.—The *left-hand end* of a check is the *top*.

Write the indorsement across the back, a short distance from the top.

If your name has been improperly spelled in the body of the check, indorse it exactly as written therein, then below write your name properly.

If titles are used in the body of the check, they must appear with the name in the indorsement.

In drawing a check payable to one not known at the bank you can avoid the necessity of identification by having him indorse it in your presence and you write under it, "Above indorsement correct" and sign your name.

Checks that are to be deposited are usually indorsed, "For deposit," or "For deposit to the credit of," and such indorsements may be made by clerks, and the checks deposited to the credit of their firm. For further reference see indorsements of promissory notes.

Notes.—A promissory note is an unconditional promise in writing, to pay a certain person a certain sum of money at a certain future time. The essentials are that it be certainly paid, not out of any particular fund, nor dependent upon any contingency; that it be for the payment of money only.

Five important points of a negotiable promissory note are: (1) That the date of payment be specified. (2) That the amount be plainly stated. (3) That it be paid only in

lawful money. (4) That the promise be without conditions. (5) That it contain the words "order" or "bearer," or other words showing the intention to make it negotiable.

Indorsement: A note is indorsed when anything relating to it is written upon the back. The writer of the name is called the *indorser*, and the person for whose benefit it is written is the *indorsee*.

There are five kinds of indorsements: (1) *In full*. (2) *In blank*. (3) *Conditional*. (4) *Qualified*. (5) *Restrictive*.

1. *In full*: When the name of the indorsee is mentioned, when none but he can demand payment. If he wishes to transfer it he must add his own indorsement in writing. This is the usual form and shows through what hands it passes.

2. *In blank*: Indorsement in blank consists of the indorser's name alone. It is then payable to bearer, and is transferred by simple delivery from hand to hand. The indorser in full or in blank is obligated to any subsequent holder if the maker does not pay it, and the indorser is given due notice of such failure.

3. *Conditional*: When the payment is made conditional upon some uncertain event.

4. *Qualified*: When the usual form is departed from and the indorser restrains, limits, or enlarges his liability as such.

An indorsement "without recourse to me" transfers the title and releases the indorser from any liability. The exact words used do not matter if they show the intention to avoid responsibility.

When acting for another party the words "agent," "attorney," or their equivalent will release, if added to the indorsement, the said agent from personal responsibility.

5. *Restrictive*: When the indorsement restrains the negotiability to some certain person as, "Pay to John Doe only," or "Pay John Doe for my account."

Transfer.—An indorsement to *bearer* is transferred by delivery; or, if indorsed *in blank*, it can be done in the same way by the indorsee, though drawn payable to *order*.

1. *Before maturity* an innocent purchaser can enforce the collection of a note, even if it be found to have been lost, stolen, or obtained by fraud. Five things are necessary: (1) That he obtained it in good faith. (2) That he was not aware of any defect in the title of the one from whom he obtained it. (3) That it be negotiable. (4) That it was obtained for value. (5) That it was obtained *before maturity*. Should he be aware of any defect in the title at the time of obtaining it, he takes it subject to any defense that could be legally brought against it at first.

2. *After maturity*: A note may still be negotiable, but the purchaser now takes it subject to any defense originally existing.

Demand.—No demand is necessary to hold the maker. For the purpose of holding those *conditionally* liable, a demand must be made first on those *primarily* liable.

1. Notes should be presented for payment by the holder or his authorized agent.

2. Demand should be made on the maker, or, in his absence, on his authorized agent.

3. To hold indorser, the demand must be made on the very day of maturity, no sooner, no later.

4. If no place of payment is specified in the note, it must be presented at the residence or place of business of the maker, and *during regular business hours*. A personal demand is not necessary when the place of payment is specified. It is sufficient if the note be sent there in due time.

Law of Place.—When given in one State and payable in another, it will be governed by the laws of the State where payable, in the matter of interest, if the rate is not mentioned. The "law merchant" is, that the maker is bound by the laws of the place where made; the indorser by the law where indorsed; demand, days of grace, etc., by the laws where payable.

Payment.—Possession is presumptive evidence of title on paper drawn or indorsed, payable to bearer, and payment may be made to the one presenting it. Before paying, the maker should be careful that any indorsements are genuine, and that the title is properly transferred. Payment by an indorser satisfies only so far as the subsequent indorsers are concerned, for the note is not discharged until paid by the maker. After an indorser has paid a dishonored note, he may put it in circulation again.

The holder takes his title from the *first* indorser if made in blank or is a general indorsement, and the maker is protected in making payment to him.

Non-payment.—If the only parties concerned are the *original ones*, demand need not be made at maturity. The whole object of demand, protest, and notice of non-payment is to hold the indorsers or others *conditionally* liable.

Protest.—A protest is a formal statement made by a notary public, giving a copy or description of the note, stating that payment has been demanded and refused, giving reason of refusal, if any, and the purpose and object of the protest. The protest must be made by the notary *personally*, and duly signed and sealed.

Notice.—1. Notice should be given by the holder or some suitable person authorized to act for him. The notary may do this.

2. Notices must be served on all whom the holder wishes to make responsible for the payment. He may notify all prior parties, or only the immediate indorser, as he may wish. Each indorser should protect his own interests by notifying all parties responsible to him. Indorsers are liable, in order of their respective indorsements, to each subsequent indorser.

3. Due diligence must be exercised in giving the notice. It is best to give it the same day, but if the dishonor occurs Saturday or immediately preceding a holiday, it will be in time if given the succeeding secular day. Certain obstacles, as war, prevalence of a contagious disease, floods, or act of Providence, will be accepted as legal excuses for want of notice.

4. Any place will do, if given personally. Notice in writing may be left at the place of business or at the house of the person to be notified. When the person resides at a distance he may be notified by a letter properly addressed and mailed to the office where he receives his letters.

5. The notice may be either verbal or written, and any form that clearly conveys the idea intended will be sufficient. The note should be clearly described. It is well described when its maker, payee, date, amount, and time and place of payment are named.

Personal notice must be given when the holder and person to be notified live in the same place, unless the laws of the State do not require it. In New York and many other States written notice properly addressed and mailed is sufficient.

Notice of Protest.

\$587.00.

SECOND NATIONAL BANK, Utica, N. Y.,

June 23, 1894.

Take notice that the promissory note made by C. M. Taylor for \$587 and interest, dated October 2, 1893, payable to your order at this bank, payable this day and indorsed by you, is protested for nonpayment, and the holder, J. B. Morrow, looks to you for the payment thereof, payment of the same having this day been demanded and refused.

Respectfully yours,

H. K. LONG,
Notary Public.

To J. L. BROWNE.

The indorser may waive demand of payment, notice of protest, etc., at the time of the indorsement, or even at any time before maturity. The following is the usual form: "I hereby waive demand, protest, and notice of dishonor." (Signed) _____.

Guaranty.—Guaranties are of two kinds, guaranty of payment and guaranty of collection.

1. Guaranty of payment absolutely guarantees that the note shall be paid at maturity.

2. Guaranty of collection holds the guarantor after the holder has failed to collect of the maker.

The general rule is that the guarantor is not entitled to demand and notice of protest. The following is the usual form. "For value received I hereby guaranty the payment (or collection) of the within note. (Signed)

JOHN F. HERRICK.

Defenses.—1. Want of consideration, if total, is a perfect defense. If it is only a partial failure it will defeat recovery only to that extent.

2. Obtained through fear or compulsion. The threats and duress must be such as would cause a person of ordinary firmness of mind to apprehend danger to himself, reputation, or property.

3. Fraud. Fraud vitiates all contracts.

4. Obtained by finding or theft. This is no defense against a *bona fide* and innocent purchaser who obtains the note *before* maturity and gives a valuable consideration for it.

5. Illegal consideration. A note illegal on its face gives warning to all. A note showing on its face that it called for more than the legal rate of interest would be subject to such defense.

Notes given for "debts of honor" are void between original parties, but if indorsed and negotiated, the first indorser would be holden.

Presumptions.—1. The law presumes that the negotiable paper was given for a consideration, whether expressed or not. The contrary must be proven to constitute a defense.

2. The holder is presumed to be the owner.

3. Indorsements and transfers are presumed to be made before the paper became due.

4. The law presumes the holder to have acquired the paper in the usual course of business.

5. It is conclusively presumed that the paper means precisely what it says and parol evidence will not be allowed to offset it.

A note given by a lunatic, an intoxicated person or a minor, is void.

A note given by one who cannot write should be witnessed by an uninterested person.

A person receiving a note, knowing it to be defective, has no better title than the person from whom he purchased.

A note as a gift, being without consideration, is voidable.

If the holder of a note extends the time of payment to the maker, his action releases all persons conditionally liable.

In a note containing "*we promise*," or "*we jointly promise*," the liability is a joint one, and all must be sued; "*we or either of us promise*," or "*we jointly and severally promise*," here the liability is both joint and several and either or all the parties may be sued.

In a note containing "*I promise*" and signed by two or more persons, each signer is obligated for the whole amount, and either or all may be sued.

After becoming of age a minor may ratify a note given during his minority.

Forms of Notes.

A Note Negotiable Without Indorsement.

\$250. ST. LOUIS, June 8, 1899.
Thirty days after date I promise to pay J. H. Ames, or bearer, Two Hundred and Fifty Dollars, at the Third National Bank in St. Louis, for value received.
CHARLES CARNE.

A Note Negotiable Only by Indorsement.

\$200. CHICAGO, Nov. 26, 1899.
Three months after date I promise to pay John H. Woltering, or order, Two Hundred Dollars, value received.
J. T. NORTON.

A Note Not Negotiable.

\$200. ST. LOUIS, Nov. 17, 1899.
Ninety days after date I promise to pay Charles C. Collins Two Hundred Dollars, value received.
SAMUEL ATKINSON.

WALTER D. CURTIS.

A Partnership Note.

No. — BOSTON, MASS., Nov. 26, 1899.
One month after date, without grace, we promise to pay to the order of ourselves Two Hundred and Fifty Dollars, at any bank in Boston.
JOHNSON & Co.,
209 Temple Place.

A Note Payable by Installments.

\$3,000. PHILADELPHIA, PA., April 20, 1899.
For value received, I promise to pay Smith & Brown, or order, Three Thousand Dollars, in the manner following, viz.: One thousand dollars in one year, one thousand dollars in two years, and one thousand dollars in three years, with interest on all said sums, payable semi-annually, without defalcation or discount.
HUGH FAULKNER,
120 Chestnut St.

Sealed Note.

\$5,000. CLEVELAND, O., May 8, 1899.
For value received, I promise to pay Smith & Edgar, or order, Five Thousand Dollars, in three years from the date hereof, with interest, payable semi-annually, without defalcation or discount. And in case of default of my payment of the interest or principal aforesaid with punctuality, I hereby empower any attorney-at-law, to be appointed by said Smith & Edgar, or their assigns, to appear in any court which said Smith & Edgar, or their assigns, may select, and commence and prosecute a suit against me on said note, to confess judgment for all and every part of the interest or principal on said note, in the payment of which I may be delinquent.

Witness my hand and seal, this 8th day of June, A. D. 1899.

JOHN DREW. [SEAL.]
Attest, GEORGE WHITE.

Judgment Note.

\$425.00.
For value received, I promise to pay to John Doe, or order, Four Hundred Twenty-five and 25-100 dollars (\$425.25), three months after date; and I here nominate, constitute, and appoint the said John Doe, or any attorney-at-law of this State, my true and lawful attorney, for me and in my name to appear at any court of record of this State, at any time after the above promissory note becomes due, and to waive all processes and serv-

ices thereof, and to confess judgment in favor of the holder herein, for the sum that may be due and owing hereon, with interest and costs and waiving all errors.

In Witness Whereof, I have hereunto set my hand and seal at Williamsport, Pa., this first day of June, 1899. [SEAL.] RICHARD ROM.

Forms of Guaranty.

Guaranty of a Note.

For value received, I guarantee the due payment of a promissory note, dated October 8, 1883, whereby John Paxson promises to pay George Andrews Eighty Dollars in three months.

St. Louis, Oct. 10, 1883.

PETER FABER.

General Guaranty.

I hereby guarantee payment to any person who shall accept and retain this instrument as a guaranty, for all goods which he may from time to time supply to Eugene Parsons, not exceeding at any time the sum of Five Hundred Dollars, this to be a continuing guaranty till specially revoked. Notice to be given me within ten days after its acceptance.

St. Louis, Sept. 8, 1883.

DARBY CONGER.

Extension of Time.

In consideration that George Andrews gives to John Paxson additional time to the extent of one month for payment of the indebtedness due him from said John Paxson guaranteed by me, I hereby continue my guaranty for due payment thereof.

January 8, 1884.

PETER FABER.

Guaranty of Fidelity.

In consideration of the performance of the agreements and covenants specified in the within agreement by M. M., with my son, A. A., I do hereby bind myself to said M. M. for the true and faithful observation and performance of all the matters and things by said A. A. agreed and covenanted therein, and that he shall well and truly serve said M. M.

Witness my hand this — day of —, A.D. —.

P. A.

Contracts.—A contract is "an agreement for a suitable consideration to do or not to do a certain thing."

The essentials of a contract are: 1. *The Parties*; 2. *Consideration*; 3. *Subject-matter*; 4. *Assent*; 5. *Time*. These are essential and the other elements are those that give to the contract its particular character.

1. *The Parties*.—The parties must be competent. A contract with a minor is not binding upon him for anything except necessities, though he may hold the other party to a strict accounting. What constitute necessities would depend upon the age, the rank, and fortune of the minor.

2. *Consideration*.—No contract is valid without a sufficient consideration. Consideration may be divided; as (A) VALUABLE; (B) GOOD; (C) INSUFFICIENT.

(A) VALUABLE CONSIDERATION is usually expressed by money or is convertible into money.

(B) A GOOD CONSIDERATION is founded on love, affection or gratitude. It will be accepted as consideration for a contract already performed, but is not good for contracts to be performed some time in the future. As a gift already made but not holding for one promised.

(C) INSUFFICIENT CONSIDERATION may be classed, as (D) GRATUITOUS; (E) ILLEGAL; (F) IMPOSSIBLE; (G) MORAL.

GRATUITOUS.—A contract based on a promise wholly gratuitous is void for want of consideration. Examples: Public subscriptions, charities, etc.

ILLEGAL.—A contract with an illegal consideration is void. A contract to commit, conceal, or compound a crime is void. Either party may avoid the contract where the consideration is illegal.

IMPOSSIBLE.—If the consideration is impossible the contract is void. The law compels no one to perform impossibilities. That the consideration was difficult would not be an excuse.

MORAL.—A moral obligation, alone, is not a sufficient consideration. A person is not legally obligated to pay for services already rendered a relative, even though he promise to do so after the services are performed. Had the person promised before the service was performed, the case would be different. The position of a parent and minor child would be an exception.

3. *Subject-matter*.—All contracts the subject-matter of which is illegal, immoral, or impolitic are void.

Contracts in restraint of trade are void even though given for a valuable consideration. A contract not to carry on a lawful business

anywhere, whether the time be limited or not, is invalid. An agreement in partial restraint of trade, if confined within reasonable bounds, or to certain persons and given for a sufficient consideration, would be valid.

A doctor might sell his practice and agree not to practice within a certain number of miles of the place. If given for a valuable consideration, the contract would be valid. The court would decide the reasonableness of the limitation.

Contracts in general restraint of marriage are void, because against public policy. A contract not to marry a particular person would be valid. A contract not to marry until of a suitable or reasonable age is valid. The condition that a widow shall forfeit certain portions of her deceased husband's estate if she marry again may be valid, if she accepted it under those conditions.

Fraud vitiates any contract if the innocent party so wishes, otherwise the other party may be held. A contract that operates as a fraud on third parties is void. Examples: Fraudulent assignments; fraudulent sales; perversion of insolvent laws.

"Fraud consists in the employment of any kind of cunning, deception, artifice, or concealment to cheat, circumvent, or deceive another in a business matter." If both parties are equally guilty, neither has usually any redress at law. If one party is more innocent, the reverse is true. The innocent party may many times hold the other if he chooses, or himself refuse to be bound by the contract. The guilty party cannot avoid the contract on account of his own fraud if the contract is already executed.

4. *Assent*.—There can be no contract valid and binding, unless the parties assent to the same thing and in the same sense. There must be a proposition by one party and an acceptance by the other.

If the proposition and acceptance are made by mail, the contract is presumed to be completed as soon as the acceptance is mailed, and even a telegram countermanding it before the letter was received need not necessarily be allowed to avoid it.

5. *Time*.—Time enters into the contract as an essential element and is either expressed or implied. Something to be done between two certain days is not performed if done on either of those days. If the day for performance falls upon Sunday, the performing party has the privilege of performing on the next secular day.

Statute of Frauds.—By the "Statute of Frauds," which has been adopted by most States, certain contracts must be in writing. The following are those adopted by New York

and most other States: "Every contract for the leasing of a longer period than one year, or for the sale of any lands, or any interest in lands, shall be void, unless the contract or some note or memorandum thereof, expressing the consideration, be in writing and be subscribed by the party by whom the lease or sale is made." Annual crops resulting from cultivation, if the price is less than fifty dollars, do not come within the meaning of the statute; as corn, wheat, oats, potatoes, etc.

In the following cases every agreement shall be void unless such agreement, or some note or memorandum thereof, be in writing and subscribed by the party to be charged therewith:

1. Every agreement that, by its terms, is not to be performed within one year from the making thereof.

2. Every special promise to answer for the debt, default, or miscarriage of another.

3. Every agreement, promise, or undertaking, made upon consideration of marriage, except mutual promises to marry.

4. Every contract for the sale of any chattels, goods, or things in action, for the price of fifty dollars or more shall be void unless,

"First, A note or memorandum of such contract be made in writing and subscribed by the parties to be charged thereby; or,

"Second, Unless the buyer shall accept and receive part of such goods or the evidences, or some of them, of such things in action; or,

"Third, Unless the buyer shall, at the time, pay some part of the purchase money."

In addition to being written, there must be a consideration in the contracts, as above, either express or implied.

"A party to a contract is not bound until he yields a full, free, and intelligent assent of its terms." "An offer made may be retracted any time before its acceptance."

A competent party making contract with a minor cannot hold the minor, except as before noted, but the minor can sue and recover for the nonperformance of the other party.

Contracts required to be in writing by the "Statute of Frauds," hold only the party signing if but one signs. The other has it at his option.

Damages.— "Perform your contract or pay damages." The law cannot compel the performance of a contract; it only knows a money remedy for nonperformance. In a contract for personal service which cannot well be filled by another, the sickness of the promising party will excuse nonperformance.

A court of equity may compel the performance of certain agreements: as the conveyance of real estate.

Construction.—The following rules are observed in the interpretation of contracts:

1. **INTENTION.**—The first care is to give effect to the intention of the parties so far as the intention was mutual and legal.

2. **MEANING OF TERMS.**—The terms of a contract are to be interpreted according to their usual meaning, if that seems to satisfy the intention of the parties. Technical words are interpreted according to their use in the profession, or the trade to which they belong.

Interpretation.—Certain contracts are expounded according to the usage or custom of trade when needed to explain the meaning of peculiar terms. The law of place would also enter as a factor; if the custom of the place where the contract was made differed from other places, that would give a different meaning to its terms.

The interpretation is made upon the *whole* contract and not upon its parts. The object of the parties is to be gathered from the *whole* instrument, and one clause will be interpreted by another.

Wherever one portion cannot be reconciled with the obvious intention of the parties, it will be expunged. "Effect will be given to the whole intention."

Forms of Contracts.—*A General Release.*

Know all men by these presents: That I, A. B., of, in consideration of, and other good and valuable considerations to me in hand paid by A. C., of, have remised, released and forever discharged, and by these presents do, for me, my heirs, executors and administrators, remise, release, and forever discharge said A. C., his heirs, executors, and administrators, of and from all and all manner of actions, suits, debts, dues, sums of money, accounts, reckonings, bonds, bills, specialties, covenants, contracts, controversies, agreements, promises, variances, damages, judgments, executions, claims and demands whatsoever, in law or equity, which against the said A. B. I ever had, now have, or which I, my heirs, my executors and administrators hereafter can, shall, or may have, for, upon or by reason of any matter, cause or thing whatsoever (or by reason of), from the beginning of the world to the day of the date of these presents.

In witness whereof, I have hereunto set my hand and seal, this day of A. D. 189 . . .

(Signed) A. B. [L. s.]
Signed and delivered in the presence of
D. E.

Memorandum of Sale.—It is agreed by and between A. B. and B. E., of, etc., that said

A. B., in consideration of two hundred bushels of wheat, sold to him this day by the said B. E., free of all charges or expenses, whatsoever, at, on or before, shall and will pay or cause to be paid to the said B. E., or his assigns, upon such delivery, the sum of dollars.

And the said B. E., in consideration of the agreement aforesaid of the said A. B., doth promise and agree, on or before the said, at his own expense, to send in and deliver to the said A. B., or his assigns, the said two hundred bushels of wheat so sold to him as aforesaid, and the said B. E. shall and will warrant the same to be good, clean, and merchantable grain.

In witness whereof, the said parties have hereunto set their hands the day and year first above written.

In presence of A. B.
C. D. B. E.

Lease of House.—I, of, hereby lease to of, for the term of, to commence on the dwelling house (describe it) with its appurtenances, for the yearly rent of, to be paid

Said, agrees to pay said, said rents at the times above specified and to surrender the premises at the expiration of the term, in as good condition as reasonable use will allow, fire and unavoidable accidents excepted.

In witness whereof, the said parties have hereunto set their hands this of, A. D. 189 . . .

(Signed) — — —
(Signed) — — —

General Form of Contract.—Memorandum of an agreement made this day of, in the year 189 . . ., between A. B., of, as first party, and B. C., of, as second party,

Witnesseth: That the said first party hereby agrees to, etc., (Here insert first party's obligations.)

In consideration of the above being faithfully kept and performed by the said first party, the said second party, etc. (Here insert second party's obligations.)

In witness whereof, we have hereunto set our hands and seals the day and year first above written.

In the presence of A. B.
C. D. B. C.

A seal on an instrument is usually conclusive proof that it was given for a consideration,

but the laws of New York permit evidence to be submitted on rebuttal of this presumption.

Partnerships.—"A partnership is a contract between two or more competent persons for joining together their money, goods, labor and skill, or any or all of them, under an understanding that there shall be a communion of profit between them, and for the purpose of carrying on a legal trade, business, or adventure.—STORY.

Partners: Any person of sound mind and able to conduct ordinary business may enter into a partnership. An infant may be a partner, but in general he could incur no liability and might disaffirm the contract at any time. Married women can be partners only in such States as have removed their disabilities.

Partners are grouped as follows:—

Ostensible, those whose names are known and appear as partners; **nominal,** those who appear to the world as partners, but who have really no interest in the business.

Nominal partners are responsible to all creditors who gave the firm credit because of their apparent connection with it.

Dormant partners are those who do not appear to the world as partners, but are actually interested in the business. They are liable to creditors of the business. **Special** partners are those who supply a certain amount of capital, and on complying with certain requirements are not liable for debts of the firm above the amount they invest.

Relations of Partners: Mutual respect, confidence in the honesty, skill, judgment, and good business instinct of each other must be the basis of each partnership. On this account, if the partnership suffers through the neglect of any partner, he is liable to the others. He is liable in damages to the other partners for any breach of partnership contract.

No partner has any right to engage in any private business that will in any way operate to the detriment of the partnership.

The powers of all partners in ordinary cases are equal and neither can exclude the other from a share in the management of the business or from the possession of partnership property.

A partnership can only exist by voluntary contract, and no third party can be introduced into the firm without unanimous consent.

Powers of Partners: The acts of one partner bind all the rest. Each partner has power to transact any and all necessary business for the partnership. The frauds of one partner bind the firm, though the others have no knowledge of his action. The partner should transact all

business in the name of the firm, otherwise he alone is liable. He has no power to bind the partnership outside the transaction of the regular business of the firm. The fraud of a partner will not bind the partnership if the third party is aware of the fraud or that the partner is exceeding his authority. Each partner is liable to third parties for partnership debts to the extent of his whole private property.

Subject-matter: By this is meant the business in which they have engaged. The essence of the contract is, that the partners are *jointly* concerned in the profits and losses, or at least the profits of some legitimate business. If the contract does not specify the manner of division, they will be supposed to be divided equally.

Articles of Co-partnership.—If the business is extensive, or the relations to continue for a great length of time, formal articles should be adopted. Any form that clearly sets forth the nature of the business, the investments of each partner, the division of the profits and losses, the powers and duties of each partner, the commencement and termination of the partnership, will answer the purpose. The partnership commences at once if no other time is specified. The laws of New York prohibit the use of fictitious names in the firm name. "& Co." cannot there be used unless it represent an actual partner. If no time is expressed for termination, the partnership is presumed to be "at will" only, and may be dissolved at any time.

Dissolution.—This may take place by acts of the parties, by judicial decree, by operation of law.

A partnership may be dissolved at any time by mutual consent. If the partnership is for any specified time it may be dissolved by one partner refusing to act with the other, or by his assigning his share to a third party. Such assignment does not constitute the third party a partner without the consent of all the others. A partnership for a certain time expires when that period is passed.

The partnership could be dissolved by judicial decree at any time for good and sufficient reasons, as unfitness or inability of a partner developed after the commencement of the partnership, or should the business be impracticable or when founded in error.

The law would operate to dissolve the partnership if one partner became insane, idiotic, or in any way incapable of performing his duties.

All right, title and interest of any partner may be sold under execution against him. The bankruptcy of one partner would dissolve

the partnership unless provided for by special agreement.

After dissolution no power remains to create new obligations, and a partner could not renew a partnership note, or even indorse one to pay a prior debt of the firm. Unless provided for, to the contrary, each partner has power to collect accounts and to settle up the affairs of the business.

A notice of dissolution to all persons dealing with the firm is necessary when the retiring partner wishes to avoid further liability for debts incurred by the partnership. The retiring partner is already liable for all prior debts. To avoid responsibility, notice must be given to each person who has had dealings with the partnership. A notice published in the local paper will do for all subsequent creditors.

Wills.—No particular form of a will is required. Any words that clearly convey the idea of the testator are sufficient.

Kinds.—Unwritten or nuncupative and written. All wills must be written, except those of soldiers and sailors when in actual service, or in some States they may be allowed in extreme cases when a necessity. The parties to a will are the testator or person making the will, the donee or person benefited by the will, and the executor or person empowered to see that the provisions of the will are carried out.

Testator.—The testator must be competent. In New York, males of 18 years of age and females of 16 years of age may dispose of personal property. A married woman cannot make a valid will without the consent of her husband, except in those States where their disabilities have been removed. The testator must possess mind and memory enough to fully understand the nature and consequences of his action.

Donee.—The donees are the persons benefiting by the will.

They are called devisees when the gift is of real estate, and legatees when the gift is one of personal property.

Any person in general, capable of acquiring property by his own exertion, may be a donee. Corporations cannot take by will unless empowered to do so by their charters.

Executor.—Any person capable of making a will may be an executor.

He must see that the deceased is buried in a suitable manner; he must file a bond, offer the will for probate, make the return and inventory, collect the property, pay the debts and distribute the remainder according to the terms of the will. He must render an account of all, and file with the probate office.

Subject-matter.—Little form is necessary for disposing of personal property. A will might be accepted for disposing of personal property when parts relating to real estate would not be valid.

By common law the testator must be possessed of real estate he devises at the time the will is made. By the laws of Vermont, Massachusetts, New York, Pennsylvania and Virginia, he may devise any that he is possessed of at the time of his death, if that was evidently his intention. The laws of Maine, Ohio, Illinois, and Connecticut are similar.

Execution.—The will must be signed by the testator, or by some person acting for him at his request. When he signs or acknowledges the will he must declare it to be his last will.

It is best to have three witnesses, though some of the States require but two. The New England States and some of the Southern States require three; the Middle and Western States in general require two; Louisiana requires four witnesses. The witnesses must write their names and addresses as witnesses. New York prescribes a fine of fifty dollars for their failure to do so.

The testator must sign or acknowledge his signature in the presence of these witnesses. A codicil to be valid must be witnessed with the same formalities as the will.

A subsequent will revokes the preceding one. All witnesses should be disinterested parties.

The following States have particular provisions in their statutes concerning wills:—

NEW YORK.—No person having a husband, wife, child, or parent, shall devise more than one half of his or her estate to any charitable, literary, scientific, or kindred institution. Should a testator marry after making a will disposing of the whole of his estate, and there should be born an issue of such marriage, unless provision shall have been made for such issue, by settlement, or unless the will provides for such issue, or shows an intention not to provide for such issue, the will shall be revoked and no other evidence shall be submitted in rebuttal.

A child born after the making of a will, and not provided for by will or settlement, shall succeed to such portion of the estate as would have fallen to it had the parent died intestate.

A bequest to a witness renders the will void only so far as the witness and his bequest is concerned. He is a competent witness still.

COLORADO.—A married man cannot by will deprive his wife of more than one half his estate. A married woman cannot deprive her husband of more than one half her estate without his consent in writing.

CONNECTICUT.—No bequest can be given to

a subscribing witness, and a subsequent marriage or birth of a child revokes the will unless specially provided for therein.

DISTRICT OF COLUMBIA.—Bequests to any minister, teacher, or religious sect or denomination, unless made at least one month before the testator's death, are void.

IOWA.—Disposition of homestead or other privileged property to wife and family is void.

KANSAS.—A married person cannot, without the consent of the husband or wife, dispose of more than one half of his or her property.

MAINE.—A posthumous child shares the same as though there was no will, unless otherwise provided for.

MASSACHUSETTS.—A bequest to a subscribing witness is void, or to the husband or wife of such witness, unless there are three other witnesses.

NEW HAMPSHIRE.—Bequest to subscribing witness void without there are three other subscribing witnesses.

NEW JERSEY.—Same as Maine.

PENNSYLVANIA.—Bequest to a charity within one month of testator's death is void.

Short Form for a Will.—I, James Dickson, of the city of Chicago, in the county of Cook, and State of Illinois, being of sound mind and memory and understanding, do make my last will and testament in manner and form following:—

First. I give and bequeath to my daughters Mary and Jane two thousand dollars each after they have attained the age of twenty years.

Second. I give and bequeath to my wife Susan all my household furniture, and all the rest of my personal property, after paying from the same the legacies already named, to be hers forever: but if there should not be at my decease sufficient personal property to pay the aforesaid legacies, then so much of my real estate shall be sold as will raise sufficient money to pay the same.

Third. I also give, devise, and bequeath to my wife Susan all the rest and residue of my real estate as long as she shall remain unmarried, and my widow; but on her decease or marriage, the remainder thereof I give and devise to my said children and their heirs, respectively, to be divided in equal shares between them.

I appoint my wife Susan sole executrix of this my last will and testament.

In testimony whereof, I hereunto set my hand and seal, and publish and decree this to be my last will and testament, in the presence of the witnesses named below, this eighth day of March, in the year of our Lord one thousand eight hundred and ninety-three.

JAMES DICKSON. [L. s.]

Signed, sealed, declared and published by the said James Dickson as and for his last will and testament, in the presence of us, who, at his request and in his presence, and in presence of each other, have subscribed our names as witnesses hereto.

JOHN SMITH, residing at Chicago in Cook County.

PETER JONES, residing at Chicago in Cook County.

Another Form of Will. *Know all men by these presents:* That I, Joseph Atkinson, of Media, in the county of Chester, and State of Pennsylvania, merchant, considering the uncertainty of this life, and being of sound mind and memory, do make, and declare, and publish, this my last will and testament.

First. I give and bequeath unto my beloved wife Mary the use, improvement and income of my dwelling house, warehouses, lands, and their appurtenances, situate in Nelson township, Chester county, State of Pennsylvania, to have and to hold the same to her for and during her natural life.

Second. I give and bequeath to my son Robert two thousand dollars, to be paid to him by my executor, hereinafter named, within six months after my decease; and I also give, devise, and bequeath to my said son Robert the reversion or remainder of my dwelling house, warehouses, lands and their appurtenances, situate in Nelson township, Chester county, State of Pennsylvania, and all profit, income, and advantage that may result therefrom, from and after the decease of my beloved wife Mary.

Third. I give, devise, and bequeath to my beloved wife Mary all the residue of my estate, real, personal, or mixed, of which I shall be seized or possessed, or to which I shall be entitled at the time of my decease; to have and to hold the same to her and her executors and administrators and assigns forever.

Fourth. I do nominate and appoint my brother James Atkinson to be the executor of this, my last will and testament.

In testimony whereof, I have to this, my last will and testament, contained on two sheets of paper, and to each sheet thereof, subscribed my name and set my seal; and to this, the last sheet thereof, I have here subscribed my name and affixed my seal, this eighteenth day of May, in the year of our Lord one thousand eight hundred and ninety-three.

JAMES ATKINSON. [L. s.]

Signed, sealed, declared and published by the said James Atkinson, as and for his last will and testament, in presence of us, who, at his request and in his presence, and in presence of

each other, have subscribed our names as witnesses hereto.

THOMAS MAY, residing at Media, Pa.
JOHN NOLAN, " " " "
HENRY MANN, " " " "

Codicil to a Will.—Whereas, I, Richard Roe, of the city of Pittsburgh, in the county of Allegheny and State of Pennsylvania, have made my last will and testament, in writing, bearing date the fourteenth day of February, in the year of our Lord one thousand eight hundred and ninety-three, in and by which I have given to the Pennsylvania Institution for Deaf Mutes, in the city of Philadelphia, the sum of one thousand dollars.

Now, therefore, I do, by this my writing, which I hereby declare to be a codicil to my said last will and testament, and to be taken as a part thereof, order and declare that my will is that only the sum of five hundred dollars shall be paid to the said Pennsylvania Institution for Deaf Mutes as the full amount bequeathed to the said institution, and that the residue of the said legacy be given to the person who shall be acting as treasurer at the time of my decease of the Baptist Publication Society, located in the city of Philadelphia, to be expended by the society in such manner as the officers of the said society may deem best for the interests of said society; and, lastly, it is my desire that this codicil be annexed to and made a part of my last will and testament as aforesaid, to all intents and purposes.

In testimony whereof, etc. (as in form of will).

MISCELLANEOUS FORMS.

Mortgage of Lands by Husband and Wife.—This Indenture, made the — day of —, in the year of our Lord one thousand eight hundred and —, between F. F., of the city of New York, merchant, and J. his wife, of the first part, and L. M., of said city, merchant, of the second part, *witneseth*: That the said parties of the first part, for and in consideration of the sum of —, lawful money of the United States, to them in hand paid, the receipt whereof is hereby acknowledged, have granted, bargained, sold, aliened, released, conveyed, and confirmed, and by these presents do grant, bargain, sell, alien, release, convey, and confirm, unto the said party of the second part, and to his assigns forever, all that certain lot, etc.; together with all and singular the hereditaments and appurtenances thereunto belonging, or in any wise appertaining, and the reversion and reversions, remainder and remainders, rents, issues, and profits thereof; and also all the estate, right, title, interest, dower, possession, claim, and demand

whatsoever, of the said parties of the first part, of, in, and to the same, and every part thereof, with the appurtenances: To have and to hold the said hereby granted premises, with the appurtenances, unto the said party of the second part, his heirs and assigns, to his and their only proper use, benefit, and behoof forever. Provided always, and these presents are upon this condition, that if the said parties of the first part, their heirs, executors, administrators, or assigns, shall pay unto the said party of the second part, his executors, administrators, or assigns, the sum of —, on or before the — day of —, which will be in the year —, with interest, according to the condition of a bond of the said F. F., to the said L. M., bearing even date herewith, then these presents shall become void, and the estate hereby granted shall cease and utterly determine. But if default shall be made in the payment of the said sum of money, or the interest, or of any part thereof, at the time hereinbefore specified for the payment thereof, the said parties of the first part, in such case, do hereby authorize and fully empower the said party of the second part, his executors, administrators, and assigns, to sell the said hereby granted premises at public auction, and convey the same to the purchaser, in fee simple, agreeably to the act in such case made and provided, and out of the moneys arising from such sale, to retain the principal and interest which shall then be due on the said bond, together with all costs and charges, and pay the overplus (if any) to the said F. F., party of the first part, his heirs, executors, administrators, or assigns.

In witness whereof, the parties to these presents have hereunto set their hands and seals, the day and year first above written.

Sealed and delivered in
the presence of
John Smith.

FRANCIS FOREST. [L. s.]

JULIA FOREST. [L. s.]

Articles of Copartnership.—Articles of copartnership made and concluded this — day of —, in the year one thousand eight hundred and sixty, by and between A. B., bookseller, of the first part, and C. D., bookseller, of the second part, both of —, in the county of —.

Whereas, it is the intention of the said parties to form a copartnership, for the purpose of carrying on the retail business of booksellers and stationers, for which purpose they have agreed on the following terms and articles of agreement, to the faithful performance of which they mutually bind and engage themselves each to the other, his executors and administrators.

First. The style of the said copartnership shall be "— and company"; and it shall continue for the term of — years from the above date, except in case of the death of either of the said parties within the said term.

Second. The said A. B. and C. D. are the proprietors of the stock, a schedule of which is contained in their stock book, in the proportion of two thirds to the said A. B., and of one third to the said C. D.; and the said parties shall continue to be owners of their joint stock in the same proportions; and in case of any addition being made to the same by mutual consent, the said A. B. shall advance two thirds, and the said C. D. one third of the cost thereof.

Third. All profits which may accrue to the said partnership shall be divided, and all losses happening to the said firm, whether from bad debts, depreciation of goods, or any other cause or accident, and all expenses of the business, shall be borne by the said parties in the aforesaid proportions of their interest in the said stock.

Fourth. The said C. D. shall devote and give all his time and attention to the business of the said firm as a salesman, and generally to the care and superintendence of the store; and the said A. B. shall devote so much of his time as may be requisite, in advising, overseeing, and directing the importation of books and other articles necessary to the said business.

Fifth. All the purchases, sales, transactions, and accounts of the said firm shall be kept in regular books, which shall be always open to the inspection of both parties and their legal representatives respectively. An account of stock shall be taken, and an account between the said parties shall be settled, as often as once in every year, and as much oftener as either partner may desire and in writing request.

Sixth. Neither of the said parties shall subscribe any bond, sign or indorse any note of hand, accept, sign, or indorse any draft or bill of exchange, or assume any other liability, verbal or written, either in his own name or in the name of the firm, for the accommodation of any other person or persons whatsoever, without the consent in writing of the other party; nor shall either party lend any of the funds of the copartnership without such consent of the other partner.

Seventh. No importation, or large purchase of books or other things, shall be made, nor any transaction out of the usual course of the retail business shall be undertaken by either of the partners, without previous consultation with, and the approbation of, the other partner.

Eighth. Neither party shall withdraw from the joint stock, at any time, more than his share of the profits of the business then earned, nor shall either party be entitled to interest on his share of the capital; but if, at the expiration of the year, a balance of profits be found due to either partner, he shall be at liberty to withdraw the said balance, or to leave it in the business, provided the other partner consent thereto, and in that case he shall be allowed interest on the said balance.

Ninth. At the expiration of the aforesaid term, or earlier dissolution of this copartnership, if the said parties or their legal representatives cannot agree in the division of the stock then on hand, the whole copartnership effects, except the debts due to the firm, shall be sold at public auction, at which both parties shall be at liberty to bid and purchase like other individuals, and the proceeds shall be divided, after payment of the debts of the firm, in the proportions aforesaid.

Tenth. For the purpose of securing the performance of the foregoing agreements, it is agreed that either party, in case of any violation of them or either of them by the other, shall have the right to dissolve this copartnership forthwith, on his becoming informed of such violation.

In witness whereof, we have hereunto set our hands and seals, the day and year first above written.

Sealed and delivered

in presence of

JOHN SMITH,

FRANK ROBINSON.

A. B. [L. s.]

C. D. [L. s.]

Agreement to Continue the Partnership; to be Indorsed on the Back of the Original Articles.—

Whereas, the partnership evidenced by the within-written articles has this day expired by the limitations contained therein [or, will expire on the — day of — next], it is hereby agreed, that the same shall be continued on the same terms, and with all the provisions and restrictions therein contained, for the further term of — years from this date [or from the — day of — next].

In witness, &c. [as in General Form].

Assignment of a Lease.—Know all men by these presents, that I, the within-named A. B., the lessee, for and in consideration of the sum of one thousand dollars, to me in hand paid by C. D., of, &c., at and before the sealing and delivery hereof (the receipt whereof I do hereby acknowledge), have granted, assigned, and set over, and by these presents do grant, assign, and set over, unto the said C. D., his executors, administrators, and assigns the within indenture of lease, and

all that messuage, &c., thereby demised, with the appurtenances; and also all my estate, right, title, term of years yet to come, claim, and demand whatsoever, of, in, to, or out of the same. To have and to hold the said messuage, &c., unto the said C. D., his executors, administrators, and assigns, for the residue of the term within mentioned, under the yearly rent and covenants within reserved and contained, on my part and behalf to be done, kept, and performed.

In testimony whereof, I have hereunto set my hand and seal, this tenth day of May, one thousand eight hundred and sixty.

Executed and delivered }
in the presence of } A. B. [SEAL]

Assignment of a Mortgage.—Know all men by these presents, that I, A. B., the mortgagee within named, for and in consideration of the sum of sixteen hundred dollars, to me paid by C. D., of, &c., at and before the sealing and delivery hereof (the receipt whereof is hereby acknowledged), have granted, bargained, sold, assigned, and set over, and by these presents do grant, bargain, sell, assign, and set over, unto the said C. D., his heirs, executors, administrators, and assigns, the within deed of mortgage, and all my right and title to that messuage, &c., therein mentioned and described, together with the original debt for which the said mortgage was given, and all evidence thereof, and all the rights and appurtenances thereunto belonging. To have and to hold all and singular the premises hereby granted and assigned, or mentioned, or intended so to be, unto the said C. D., his heirs and assigns, forever; subject, nevertheless, to the right and equity of redemption of the within named E. F., his heirs and assigns (if any they have), in the same.

In testimony, &c. [*as in General Form of Assignment*].

Assignment of a Patent.—Whereas, letters patent, bearing date — day of —, in the year —, were granted and issued by the government of the United States, under the seal thereof, to A. B., of the town of —, in the county of —, in the State of —, for [here state the nature of the invention in general terms, as in the patent], a more particular and full description whereof is annexed to the said letters patent in a schedule; by which letters patent the full and exclusive right and liberty of making and using the said invention, and of vending the same to others to be used, was granted to the said A. B., his heirs, executors, and administrators, or assigns, for the term of fourteen years from the said date:

Now, know all men by these presents, that I, the said A. B., for and in consideration of

the sum of — dollars, to me in hand paid (the receipt whereof is hereby acknowledged), have granted, assigned, and set over, and by these presents do grant, assign, and set over, unto C. D., of the town of —, in the county of —, and State of —, his executors, administrators, and assigns, forever, the said letters patent, and all my right, title, and interest in and to the said invention, so granted unto me: To have and to hold the said letters patent and invention, with all benefit, profit, and advantage thereof, unto the said C. D., his executors, administrators, and assigns, in as full, ample, and beneficial a manner, to all intents and purposes, as I, the said A. B., by virtue of the said letters patent, may or might have or hold the same, if this assignment had not been made, for and during all the rest and residue of the said term of fourteen years.

In testimony, &c. [*as in General Form of Assignment*].

Assignment of a Policy of Insurance.—Know all men by these presents, that I, the within named A. B., for and in consideration of the sum of —, to me paid by C. D., of, etc. (the receipt whereof is hereby acknowledged), have granted, sold, assigned, transferred, and set over, and by these presents I do absolutely grant, sell, assign, transfer, and set over to him, the said C. D., all my right, property, interest, claim, and demand in and to the within policy of insurance, which have already arisen, or which may hereafter arise thereon, with full power to use my name so far as may be necessary to enable him fully to avail himself of the interest herein assigned, or hereby intended to be assigned. The conveyance herein made, and the powers hereby given, are for myself and my legal representatives to said C. D. and his legal representatives.

In testimony, etc. [*as in General Form of Assignment*].

Assignment of Demand for Wages or Debt.—In consideration of \$100 to me in hand paid by M. D., of the city of —, the receipt whereof is hereby acknowledged, I, L. C., of the same place, have sold, and by these presents do sell, assign, transfer, and set over, unto the said M. D., a certain debt due from N. E., amounting to the sum of \$150, for work, labor, and services, by me performed for the said N. E. (or for goods sold and delivered to the said N. E.), with full power to sue for, collect, and discharge, or sell and assign the same in my name or otherwise, but at his own cost and charges; and I do hereby covenant that the said sum of \$150 is justly due as aforesaid, and that I have not done and

will not do any act to hinder or prevent the collection of the same by the said M. D.

Witness my hand, this April 10th, 1863.

L. C.

Assignment of Account Indorsed thereon.—In consideration of \$1, value received, I hereby

sell and assign to M. D. the within account which is justly due from the within named N. E., and I hereby authorize the said M. D. to collect the same.

Troy, April 10th, 1863.

L. C.

Inns and Innkeepers.—An Inn is a public house for the lodging and entertainment of travelers for compensation, and the person who conducts such house is called an innkeeper. To enable him to obtain his compensation the law invests an innkeeper with peculiar privileges, giving him a lien upon the personal property brought into the inn by the guest, and on the other hand holds him to a strict degree of responsibility to the guest if the goods are lost or stolen.

The essential character of an inn is, that it is open for all who may desire to visit it; hence, a mere private boarding house, or lodging house, cannot, in any proper sense, be regarded as an inn; nor will a coffeehouse or restaurant come within the term. A person who entertains travelers occasionally, although he may receive compensation, is not an innkeeper, nor liable as such, provided he does not hold himself out in that character.

An Innkeeper is bound to receive all travelers and wayfaring persons who may apply to him, and to provide entertainment for them, if he can accommodate them, unless they are drunk, or disorderly, or afflicted with contagious diseases. If a person be disorderly he may not only refuse to receive him, but even after he has received him may eject him from the house.

He is further bound to exercise a high degree of care over the person and property of his guests, and is held to a strict responsibility for all loss or damage which may occur through his negligence. This responsibility extends not only to his own acts, and the acts of his servants, but also to the acts of his other guests. The liability of an innkeeper commences from the time the goods are brought into the inn or delivered to any of the innkeeper's servants; and a delivery into the personal custody of the innkeeper is not necessary

in order to make him responsible. He is not liable for what are termed the acts of God, or the public enemy; nor for property destroyed without his negligence by accidental fire; and, generally, the innkeeper will be exonerated if the negligence of the guest occasion the loss in such a way that the loss would not have happened if the guest had used the ordinary care that a prudent man may be reasonably expected to have taken under the circumstances.

The strict liability of an innkeeper has been much modified by statute, particularly in regard to money and valuables, and where the innkeeper provides, in the office or some other convenient place in the hotel, an iron safe for the keeping of money, jewels, etc., and notifies his guests of that fact, and the guest neglects to avail himself of the opportunity thus afforded, the innkeeper will not be liable for the losses sustained by the guest by theft or otherwise.

A *Guest*, in the restricted and legal sense, is the only person who is entitled to the privilege of protection, and to entitle him to this he must have the character of a traveler, a mere sojourner or temporary lodger, in distinction from one who engages for a fixed period, and at a certain agreed rate; but if a party be in fact a wayfarer, and his visit is only transient, it matters not how long he remains, provided he retains this character. Thus, regular boarders by the week or month are not guests, nor are they entitled to the privileges of guests, and on the other hand, in the absence of an enacted statute, the landlord is not, as to them, an innkeeper, and as such entitled to a lien on their effects for his compensation.

The Law of the Road.—*General Principles.*—To prevent collisions, and to secure the safety and convenience of travelers meeting and passing each other upon the highway, a code of rules has been adopted which constitutes what is called the law of the road. These rules, originally established by custom, have, in many instances, been re-enacted and declared by statute, and are of general and uniform observance in all parts of the United States. In general, they apply to private ways, as well as public roads, and, indeed, extend to all places appropriated, either by law or in fact, for the purposes of travel.

The fundamental rule, applicable alike to all who use a traveled way, is, that every person must exercise reasonable care, adapted to the place and circumstances, to prevent collision and avoid accidents, and to this all other rules are subsidiary. No one will be entitled to redress for an injury sustained on the highway where his own negligence contributed to such injury, nor will the fact that a fellow-traveler fails to observe the law in the

use of the road absolve another who is in the right from the duty of exercising ordinary care to avoid injury to himself or to prevent injury to the party who is in the wrong. At the same time, a person lawfully using a public highway has a right to assume that a fellow-traveler will observe the law and exercise ordinary care and prudence, and to govern his own conduct in determining his use of the road accordingly. This assumption he may rely on, not to justify carelessness on his own part, but to warrant him in pursuing his business in a convenient manner.

Vehicles.—It is a primary rule that vehicles meeting on a highway must bear or keep to the right. This, however, applies only to passing vehicles, for a person having before him the entire road free from carriages or other obstructions, and having no notice of any carriage behind him, is at liberty to travel upon any part of the way as suits his convenience or pleasure, and no blame can be imputed to him. But while a traveler may well occupy any part of the road if no other is using any portion of it, he must, upon all occasions of the meeting of another, reasonably turn to the right; and in all cases of a crowded condition of a thoroughfare must keep to the right of the center or traveled part of the way. A driver may, indeed, pass on the left side of the road, or across it, for the purpose of stopping at a house, a store, or other object on that side; but he must not interfere or obstruct another lawfully passing on that side; and if he does, he acts at his peril, and must answer for the consequences of his violation of duty. In such case he must pass before or wait until the person on that side of the way has passed on.

When two drivers are moving in the same direction, the one in advance is entitled to the road, provided he does not obstruct it, and is not bound to turn out for the other if there is room for the latter to pass on either side; if, however, there is not sufficient room to pass, the foremost traveler should yield an equal share of the road, on request made, if that is practicable. If it is not practicable, then they must defer passing until they reach more favorable grounds. If the leading traveler then refuses to comply with the request to permit the other to pass him, he will be answerable for such refusal. Ordinarily, when a driver attempts to pass another on a public road, he does so at his peril, and will be held responsible for all damages which he causes to the one whom he attempts to pass, and whose right to the proper use of the road is as great as his, unless the latter is guilty of such recklessness, or even gross carelessness, as would bring disaster upon himself.

The rule requiring persons meeting upon the highway to keep to the right is not imperative, however, and where a driver cannot safely turn to the right on meeting another vehicle, the law will absolve him from negligence in not attempting impossibilities; but where it is not practicable to pass to the right, either of the travelers should stop a reasonable time until the other passes; nor will the rule apply in the winter season, when the depth of snow renders it difficult or impossible to ascertain where the center of the road is. In such cases the center of the road is the beaten or traveled track, without reference to the worked part of the road. Again, the rule does not apply when one vehicle is passing along one street and another is passing into said street from a cross street.

A traveler is bound to keep his harness and carriage in good condition, and is liable for any damage that may result from a failure to do so; he must not drive at an immoderate rate of speed, and must yield the road to a heavier or loaded vehicle.

Equestrians are not governed by the same stringent rules that apply to drivers of vehicles, and usually all that is required of them is to exercise prudent care under the existing circumstances. They need not turn out in any particular direction on meeting another horseman or a vehicle, but in crowded thoroughfares must keep to the proper side in passing, and must yield the traveled part of the road to a wagon.

Pedestrians have a right to use the carriage-way as well as the sidewalk, and drivers must exercise reasonable care to avoid injuring them, but a foot passenger in crossing the street of a city has no prior right of way over a passing vehicle; both are bound to act with prudence to avoid an accident, and it is as much the duty of the pedestrian to look out for passing vehicles as it is for the driver to see that he does not run over any one; nor does the rule requiring vehicles to keep to the right apply to carriages and foot passengers, for, as regards a foot passenger, a carriage may go on either side.

Landlord and Tenant.—*The relation of landlord and tenant* exists by virtue of a contract for the use or occupation of lands or tenements, either for a definite period, for life, or at will. It is usually created by express contract, but its existence will be implied by law whenever there is an ownership of land on the one hand and an occupation of it by permission on the other. In every such case it will be presumed that the occupant intends to compensate the owner for such use. While the relation may be inferred from a variety of

circumstances, the most obvious acknowledgment is the payment of rent. If a tenant under an express contract hold over after the termination of his term, the landlord may consider him as a tenant, and, indeed, is so understood, unless he takes some steps to eject him. If the landlord receives rent from him, or by any other act admits the tenancy, a new leasing begins, and can only be terminated by a proper notice to quit.

The rights and obligations of the parties are usually considered as having commenced from the date of the lease, if there be one, and no other time has been designated as the commencement of the tenancy, or, if there be no date from the delivery of the papers, and if there be no writings, from the time the tenant entered into possession.

The Landlord is bound to protect the possession of his tenant, and to defend him against every one asserting a paramount right. Nor can the landlord do any act himself calculated to disturb the enjoyment of the tenant. He must, unless otherwise agreed, pay all taxes and assessments on the property, and all other charges of his own creation; and if the tenant, in order to protect himself in the enjoyment of the land, is compelled to make a payment which should have been made by the landlord, he may call upon his landlord to reimburse him, or deduct the amount from the rent.

The landlord has no right of possession during the continuance of the lease, nor indeed any substantial rights in the property further than such as may be necessary to protect his reversionary interests. He may go upon the premises peaceably and during reasonable hours, for the purpose of viewing same and ascertaining whether waste or injury has been committed, and may make such repairs as are necessary to prevent waste; but he is under no obligation to make any repairs, nor does he guarantee that the premises are reasonably fit for the purposes for which they were taken. Nor can the tenant make any repairs at the expense of the landlord in the absence of a special agreement.

The Tenant is entitled to all the rights incident to possession, and to the use of all the privileges appendant to the land, and, on the other hand, is personally liable for any misuse or obstruction he may erect. He must use the premises in such a manner that no substantial injury shall be done them, and that they may revert to the landlord at the end of the term unimpaired by any negligent or willful conduct on his part. He must keep the premises in fair repair at his own expense, but is not bound to rebuild structures which have accidentally become ruinous during his

occupation; nor is he answerable for incidental wear and tear, nor accidental fire, or flood.

He must further punctually pay the rent reserved, or if none have been specifically reserved, then such reasonable compensation as the premises are fairly worth. In the absence of special agreement he must pay only for the time he has had the beneficial enjoyment, but if he has agreed to pay for an entire term, as a rule nothing short of an eviction will excuse him from such payment. If he is evicted by a third person, or if the landlord annoys him by the erection of a nuisance, or renders the premises untenable, or makes his occupation so uncomfortable as to justify his removal, he will be discharged from the payment of rent.

The rights and liabilities of the relation are not confined to the immediate parties, but attach to all persons to whom the estate is transferred, or who may succeed to the possession of the premises. A landlord may not violate his tenant's rights by a sale of the property, nor can the tenant avoid his responsibility by assigning his term. The purchaser of the property becomes, in one case, the landlord, with all his rights and remedies, while in the other the assignee of the tenant assumes all the responsibilities of the latter, but the original lessee is not thereby discharged from his obligations.

The Tenancy may be terminated in a variety of ways. If for a definite time, or conditioned on the happening of a certain event, it expires by its own limitation, and usually, when depending upon the express conditions of a lease, no notice to quit is necessary. If from year to year, or at will, a notice is always necessary. This must be in writing, and explicitly require the tenant to surrender up the premises. It must be served upon the tenant and afford the statutory notice in regard to time. A breach of any of the covenants of the lease will forfeit the tenant's rights, and when a tenancy has been terminated, by whatever cause, the landlord's right to re-enter becomes absolute.

EXEMPTION LAWS.

Alabama.—A homestead not exceeding 160 acres of land, or a lot in a city, town or village, with a dwelling house thereon, not exceeding the value of \$2,000. Personal property to the value of \$1,000. May be selected by the debtor. Waiver of exemption is not valid unless joined in by the wife.

Arkansas.—For single person, personal property in addition to wearing apparel \$200. For head of a family, personal property to the value of \$500.

For a head of a family outside of any town or city, 160 acres of land not to exceed \$2,500 in value or not less than 80 acres without regard to value.

In city or town, not exceeding one acre of the value of \$2,500, or not less than one fourth of an acre without regard to value.

Arizona.—The homestead of a married person or head of a family in the country, not exceeding 160 acres.

with improvements, not to exceed \$2,500. Personal property of married person, \$500 besides wearing apparel, and of a person unmarried, \$200 and wearing apparel.

California.—The homestead on which debtor resides, to the value of \$5,000, if he is the head of a family; if not, to the value of \$1,000. Personal property exempt includes chairs, tables, desks and books, \$200; necessary household and kitchen furniture, sewing machines, stoves, beds, etc.; provisions for family for three months, three cows, four hogs, two horses, oxen or mules; seed, grain, and vegetables for sowing, not above \$200 in value; tools and implements of husbandry of the debtor, not exceeding the value of \$1,000; the necessary instruments of a surgeon, physician, surveyor, or dentist together with their professional library and necessary office furniture; the professional library of attorneys, judges, ministers of the gospel, editors, school teachers and music teachers and their necessary office furniture; miner's cabin, not exceeding \$500 of value, with all tools and gear necessary for his business, not exceeding \$500. Two horses or mules with harness, and the miner's claim worked by him, and not exceeding \$1,000 in value, are also exempt.

Colorado.—A homestead consisting of house and lot in town or city, or a farm of any number of acres, in value not exceeding \$2,000, is exempt if occupied by a householder and head of a family, provided it has been entered on record as a homestead and so specified in the title. Personal property, including wearing apparel of the debtor and his family, pictures, schoolbooks, library, etc., and household furniture, not exceeding \$100; provisions for six months, tools, implements or stock in trade, \$200; one cow and calf, ten sheep and necessary food for six months; working animals up to \$200; the library and implements of a professional man up to \$300. The head of a family may select personal property to the value of \$1,000; others, to the value of \$300.

Connecticut.—There is no homestead exemption. Personal property is exempt as follows: Libraries not above \$500 in value; a cow worth \$150; ten sheep, not over \$50 in value; two hogs, and 200 pounds of pork. Implements of trade, the horse, harness and buggy of a practicing physician, and the boat, not exceeding \$200 in value, of a person engaged in fishing, and used for that purpose, are also exempt.

North and South Dakota.—A homestead consisting of not more than 160 acres, with buildings and appurtenances thereon, and personal property defined by statute, aggregating in value not to exceed \$1,500, is exempted to a householder. A firm can claim but one exemption, not a several exemption for each partner. Tools and implements of a mechanic to the value of \$200, books and instruments of a professional man to the value of \$600, are also exempt from seizure.

Delaware.—Family pictures, family Bible, and library; lot in burial ground and pew in church; family wearing apparel and tools and implements necessary to carry on business, the whole not exceeding \$75 in value, are exempt from attachment. In addition to the above the head of a family may claim \$200 of personal property. In Newcastle county wages of laborers are also exempt. No homestead law.

District of Columbia.—Family wearing apparel; household furniture to the amount of \$300; provisions and fuel for three months; tools or instruments necessary to carry on any trade, to the value of \$200; library and implements of a professional man or artist not above \$300; family pictures and library to the value of \$400, and a farmer's team and other utensils to the value of \$100, are exempt from attachment or sale on execution, except for servants' or laborers' wages. There is no homestead exemption.

Florida.—A homestead of 160 acres of land, together with improvements, in the country, or a residence and one-half acre of ground in a village or city, is exempted to the head of a family. Also personal property to the value of \$1,000. No property is exempt from sale for taxes or for obligations contracted for its purchase or for the erection of improvements thereon. The wages of every laborer who is the head of a family are also exempt under any process of law.

Georgia.—Each head of a family, or guardian, or trustee of a family of minor children, and every aged or infirm person, or person having the care and support of dependent females of any age, who is not the head of a family, is entitled to realty or personality, or both, to the value in the aggregate of \$1,600. Said property shall be exempt from levy and sale by virtue of any process whatever, under the laws of this State, except for taxes,

purchase-money, of the homestead, labor done thereon, or material furnished therefor, or for the removal of incumbrances.

Idaho.—A homestead worth \$5,000 is exempted to a householder who is head of a family; either husband or wife may select the homestead. Personal property is also exempted to the value of \$300. Exemption does not extend to purchase-money or to mortgages on the property.

Illinois.—A homestead valued at \$1,000 is exempted to every householder who has a family; such exemption not covering liabilities for purchase-money or improvement of the homestead. After the death of a householder his family are entitled to the exemption so long as the survivor occupies it, or until the youngest child is twenty-one years of age. There are also exempted to every person wearing apparel, schoolbooks, family pictures and family Bible, and \$100 worth of other property selected by the debtor. In addition to this, \$300 worth may be selected by the debtor if a head of a family; but such selection cannot be made from any money or wages due; no exemption is allowed when the debts for the wages of laborer or servant; \$50 of wages is exempt to every head of a family if residing with the same.

Indiana.—There is no homestead exemption; any resident householder has exempted real or personal property, or both, to the amount of \$600 on any debt founded on contract since May 31, 1879. On debts founded on contracts made previous to that date, exemption is \$300. Exemption does not, in any event, affect liens for labor, purchase-money or taxes.

Iowa.—A homestead in country of 40 acres, or in town or city of one-half acre, with improvements and buildings to the aggregate value of \$500, is exempted to the head of every family. If less than \$500 in value, it may be increased to that amount. It is not exempted from execution for the purchase-money thereof, or for debts contracted prior to its acquirement. Upon the death of either husband or wife the homestead passes to the survivor. Professional men are allowed their libraries, instruments, etc., and a team and wagon; printers retain their presses and type to the value of \$1,200. The head of a family may claim wearing apparel, tools, a gun, his library and furniture to the extent of \$200 in value. The personal earnings of the debtor for ninety days preceding the execution, certain stock, with food for them for six months, a pew in church and a lot in a burying ground are also exempt. Non-residents and unmarried persons, not being heads of families, can only claim their ordinary wearing apparel and trunk necessary to carry the same to the value of \$75.

Kansas.—An independent fortune is exempted in this State. A homestead of 160 acres of farming land, or of one acre within an incorporated town or city, with buildings and improvements thereon, with no limit to value. The head of every family is allowed personal property as follows: The family library, schoolbooks and family Bible; family pictures and musical instruments in use; pew in church and lot in burial ground; all wearing apparel of the family, bedsteads and bedding, one cooking stove and appendages, and all other cooking utensils, and all other stoves and appendages necessary for the use of the debtor and his family; one sewing machine, spinning wheel and all other implements of industry, and all other household furniture not herein enumerated, not exceeding \$500 in value; two cows, ten hogs, one yoke of oxen and one horse or mule, or in lieu of one yoke of oxen and one horse or mule, a span of mules or horses; twenty sheep and their wool; food for the support of the stock for one year; one wagon, two plows, drag and other farming utensils not exceeding in value \$300; grain, meat, vegetables, groceries, fuel, etc., for the family for one year; the tools and implements of any mechanic, miner or other workman, kept for the purpose of carrying on his business, together with stock in trade not exceeding \$400 in value; library, instruments and office furniture of any professional man. Residents, not the head of a family, have tools, implements and stock in trade up to \$400. No personal property is exempt for the wages of any clerk, mechanic, laborer, or servant. A man on the homestead may be created by husband and wife joining in the mortgage.

Kentucky.—To bona-fide housekeepers with a family are exempted from execution and attachment for debt: A homestead to the value of \$1,000; two work beasts, or one work beast and one yoke of oxen; two cows and calves; one wagon or cart; two plows and gear; five

head of sheep; provisions for family and provender for stock for one year; the tools and stock of a mechanic who is a housekeeper and has a family, not exceeding \$200 in value; libraries or instruments of professional men, which may vary in value from one to seven hundred dollars; the wages of a laboring man to the amount of fifty dollars, except for house rent and necessities.

Louisiana.—A homestead of 160 acres of land, with buildings and improvements thereon, is exempted to the head of a family, if owned and occupied as a residence, together with personal property, the whole not to exceed \$2,000; all wearing apparel, implements, stock, etc., with provisions and supplies necessary for the plantation for one year. If the wife own separate property in her own right to the value of \$2,000 there is no exemption.

Maine.—Homestead \$500, or any lot purchased from State as a homestead; \$50 furniture; \$150 library; \$300 team; \$50 poultry; \$100 sewing machine; \$10 lumber; cow and heifer, ten sheep and lambs, plow, wagon, mowing machine, a two-ton boat, the flax, raw and manufactured, from one acre of ground, wearing apparel, provisions, fuel, seed, grain, provender for stock, and tools. After the debtor's death his family has the benefit of the exemptions.

Maryland.—Besides wearing apparel, books, and tools used for earning a living, there is exempt other property to the value of \$100. No homestead.

Massachusetts.—Homestead, \$800 (must be recorded as such); furniture, \$300; sewing machine, \$100; library, \$50; tools and implements, \$100; stock in trade, \$100; boats and outfit, \$100; one cow; one hog and six sheep, and wages under \$20.

Michigan.—Forty acres of land, with improvements, in the country, or house and lot worth \$1,500 in town; furniture, \$250; library, \$150; two cows, five hogs, ten sheep, team, tools, provisions, and fuel. No exemptions from execution for purchase money.

Minnesota.—Eighty acres with improvements, in country, or lot with dwelling on it, in town. Household property, \$500; wagon, plows and farming implements, \$300; three cows, ten hogs, twenty sheep, yoke of cattle and a horse, or, instead, a pair of horses; one year's provisions, fuel, feed for stock and seed grain. A miner's or mechanic's tools and stock in trade to \$400; the library and instruments of a professional man. Wages under \$50 of a laboring man, earned within the last ninety days, and where the debtor is publisher of a newspaper, his complete outfit to value \$2,000, and stock \$400.

Mississippi.—To householding head of family, 160 acres of land and improvements in country, or house and lot in town, either to value of \$2,000. Tools and farming implements necessary for two male laborers; library and instruments of professional man to value of \$250; two horses or mules or a yoke of oxen, two cows and calves, five hogs, five sheep; wagon, \$100; personal property, \$250; one sewing machine; provisions and provender; wages of a laborer, \$100.

Missouri.—To head of family one hundred and sixty acres in the country to the value of \$1,500, a lot (thirty rods) in small town to same value, or lot (eighteen rods) in city having 40,000 inhabitants, to value of \$3,000. Personal property, \$300. One month's wages.

Montana.—House and a quarter acre lot in town, or a farm of eighty acres, neither to exceed \$2,500 in value. Personal property to the value of \$1,400. No exemptions are good against a mortgage, a mechanics' lien or a claim for purchase-money.

Nebraska.—Dwelling and 160 acres of land in country, or two adjoining lots in town, value \$2,000. If he has no real property, the debtor may retain personal property to value \$500. Clothing, furniture, provisions, animals, tools, and other things as per statute, and sixty days' wages of laborer. Exemptions are not good against mechanics' lien, mortgage, or purchase-money.

Nevada.—Homestead, \$5,000; tools, implements, and other personal property, as per statute; miner's cabin, \$500.

New Hampshire.—Homestead, \$500; \$100 furniture; \$100 tools; \$200 books; \$500 fuel and provisions; sewing machine, cook stove, bedding and clothing, one hog, six sheep, one yoke of oxen or one horse, and four tons of hay.

New Jersey.—Homestead \$1,500, and \$300 household property.

New Mexico.—Homestead, \$100; \$10 furniture; \$250 tools; \$25 provisions.

New York.—Homestead, \$1,000; \$250 furniture,

tools, team and other personal property; sixty days' wages.

North Carolina.—A homestead to the value of \$1,000, and personal property worth \$500. No exemption is good against taxes, purchase-money, or mechanics' liens.

Ohio.—Homestead is exempt to the value of \$1,000; if appraised to a higher value a partition is made, or an appropriate rental is charged. Clothing and necessary furniture are exempted; tools and farming implements to value \$100; \$50 worth of provisions and three months' wages; one horse or yoke of cattle, harness and wagon; one cow, two hogs, six sheep, and sixty days' provender, or, instead, \$65 in household property. A professional man's books, \$100. When resident debtor, being head of a family, has no homestead, he may retain personal property to the value of \$500, besides other exempted property.

Oklahoma.—Exemption to head of a family outside of city or town not to exceed 160 acres; and in a city or town not more than one acre; in addition thereto, certain personal effects and equipment appertaining to the various vocations. These exemptions do not apply to corporations for profit, to a non-resident, or a debtor who is in the act of removing his family from the territory, or who has absconded, taking with him his family.

To a single person: Wearing apparel, tools, apparatus and books belonging to a trade or profession; one horse, saddle and bridle or one yoke of oxen; current wages for personal service. In certain classes of debts all exemptions are invalid.

Oregon.—Musical instruments, books and pictures, \$75; household effects, \$300; clothing, \$100, and clothing to each member of the family, \$50; team, tools, instruments, library or whatever is needed in the trade or profession of debtor, \$400; ten sheep, two cows, five hogs, three months' provisions and six months' provender. No exemption is good against a claim for purchase-money. No homestead.

Pennsylvania.—Clothing, books, sewing machine and \$300 worth of other property. Right may be waived. No homestead.

Rhode Island.—Furniture and supplies for family, \$300; tools, \$200; library, \$300; wages, \$10; clothing; one cow and one hog; debts secured by negotiable paper. No homestead.

South Carolina.—Homestead, \$1,000; this right cannot be waived. Furniture, wagons, livestock and tools, to value of \$500. Homestead exemption cannot hold against an execution for the purchase-money, a lien for improvements or for taxes. Any person not the head of a family may have one third of his annual earnings exempted.

Tennessee.—Only the head of a family can have the benefit of exemptions; \$1,000 homestead and a variety of personal property designated by statute, prominent items being horses, mules, oxen, cows, calves, wagon, tools, lumber, grain, provisions, beds, bedding, furniture, and \$30 wages.

Texas.—Two hundred acres of land with improvements in the country, or city property to value at time of being designated as homestead (regardless of the value of after improvements) of \$5,000. Furniture, farming implements, tools, books, five cows and calves, two yoke of cattle, two horses and wagon, a carriage or buggy, twenty hogs, twenty sheep, provision, provender and many other articles. The exemption of the homestead is not good against taxes, purchase-money or mechanics' lien; but in this last case the contract must have been signed by both husband and wife. On the death of a husband, the widow and children may have one year's support out of the estate, and if the property be not in such shape as to be exempted by law, enough may be sold to raise an allowance for homestead to value of \$5,000 and other property \$500. Any person not the head of a family may have exempted clothing, books, horse, bridle and saddle.

Utah.—Homestead, \$1,000; personal property to head of the family, \$700, and to each member \$250. Not good against purchase-money, mechanics' lien or a mortgage.

Vermont.—Homestead, \$500; growing crop, clothing, furniture, sewing machine, tools, one cow, ten sheep, one hog, three hives of bees, poultry, one yoke of oxen or two horses, fuel, provisions and provender; also the instruments and library of a professional man, \$200.

Virginia.—The head of a family who is a householder has a homestead exemption to the value of \$2,000, which may be in real or personal property, both or either. Also clothing, sewing machine, furniture and animals;

books, \$100; tools, \$100. The value of the exemptions outside of the homestead is varied according to the number in family, and ranges from \$50 to \$500.

West Virginia.—Homestead, \$1,000, where the property has been granted or devised for the purpose, to the head of a family, or where he has devoted such property to that purpose by having it so recorded. Also personal property to value of \$200. Tools to mechanic, \$50.

Washington.—Homestead (must be actually occupied) to the value of \$1,000; clothing, books, bedding and household goods, to value of \$1,500; one small boat to value of \$50; two cows, five hogs, bees, poultry, fuel, and provisions. To a farmer, two horses, or two yoke of oxen, and farming implements to value of \$300. To professional man, library worth \$500, office furniture and fuel. To lighterman, his boats, to value of \$250. To drayman, his team.

Wisconsin.—Forty acres in the country, or one quarter of an acre in town, with the dwelling thereon. Clothing, household furniture, \$200; books, two cows, ten hogs, ten sheep, one horse and yoke of cattle, or a pair of horses and mules, farming tools, one year's provisions and provender. To a mechanic, tools, \$200; professional man, his library, \$200; a publisher or printer, his outfit for \$1,500. To any head of a family, sixty days' earnings. No exemption good against a mechanic's lien or claim for purchase-money.

Wyoming.—House and lot in town or one hundred and sixty acres of land in the country, either to value of \$1,500. Tools, team and stock in trade of mechanic, miner, or other person, \$300. Benefit of exemption can only be claimed by a *bona fide* resident householder.

Ontario.—The exemptions from execution are, speaking generally: the beds and bedding in ordinary use by the debtor and his family; necessary wearing apparel and a list of domestic utensils necessarily incident to living, not to exceed in value the sum of \$150; necessary provender for 30 days not to exceed in value the sum of \$40; a cow, six sheep, four hogs, and twelve hens, in all not to exceed the value of \$75; tools and implements ordinarily used in the debtor's occupation to the value of \$100 or the debtor may elect to receive the proceeds of the sale of such tools up to \$100.

Under the Free Grants and Homestead Act, there is an exemption from liability for any debt incurred before the issue of the patent and for twenty years from date of location, except where the land itself is mortgaged or pledged or for the payment of taxes.

Quebec.—The exemptions from execution are: beds, bedding and bedsteads in ordinary use by debtor and his family; necessary wearing apparel; one stove and pipes and a number of smaller articles; all necessary fuel, meat, vegetables, fish, flour not more than sufficient for ordinary consumption of debtor and family for thirty days and not exceeding in value \$40; one cow, four sheep, two hogs and food therefor for thirty days; tools and implements or chattels ordinarily used in debtor's occupation. No real estate.

New Brunswick.—Wearing apparel; bedding, kitchen utensils; tools of trade to the value of \$100 are exempted.

Nova Scotia.—Necessary wearing apparel; beds, bedding and bedsteads of debtor and his family; household utensils not exceeding in value \$20; food enough for thirty days' consumption and not exceeding in value \$40; one cow, two sheep, and hay and food therefor for thirty days; tools or chattels ordinarily used in the debtor's occupation to the value of \$30. No real estate.

Prince Edward Island.—Necessary wearing apparel and bedding for the debtor and his family; tools and instruments of his trade or calling; \$16.20 in money and his last cow are exempted from execution out of Supreme Court. Wearing apparel and bedding of debtor and his family; the tools and implements of his trade; one cook stove and one cow, in all amounting in value to \$50, are exempt from process out of county court.

Manitoba.—Household goods to the value of \$500; tools, agricultural implements and necessities used by the debtor in his trade, occupation or profession, to the value of \$500; homestead to the extent of 160 acres being the residence of the debtor, the buildings and improvements thereon; or the town residence of the debtor to the value of \$1,500, provided that no real or personal property shall be exempt from seizure or sale under execution for the purchase price of the same. A debtor cannot waive his exemption from seizure and sale under execution.

Northwest Territories.—Necessary clothing of

the defendant and his family; furniture and household furnishings belonging to defendant and his family to the value of \$500; also certain personalty exclusive of the foregoing and homestead not exceeding 160 acres; house and buildings occupied by the defendant, also the lot or lots on which same is situate according to the registered plan, to the extent of \$1,500; defendant is entitled to his choice from a greater number of articles from the same class.

British Columbia.—Personal property of debtor to the value of \$500 is exempt from execution. No goods or personalty, however, is exempt from seizure in respect to debts contracted in regard to the identical goods. The stock in trade of a merchant is not exempt from seizure although under \$500 and they can be sold to satisfy a judgment. Registered homesteads are exempt from execution to the value of \$2,500.

MARRIAGE AND DIVORCE LAWS.

Marriage Licenses.—Required in all the States and Territories except New Mexico, New Jersey, New York, North Dakota, Oklahoma, and South Carolina.

Marriage, Prohibition of.—Marriages between whites and persons of negro descent are prohibited and punishable in Alabama, Arizona, Arkansas, California, Colorado, Delaware, District of Columbia, Florida, Georgia, Idaho, Indiana, Kentucky, Maryland, Mississippi, Missouri, Nebraska, Nevada, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Virginia, W. Virginia, Michigan.

Marriages between whites and Indians are void in Arizona, Nevada, North Carolina, Oregon, and South Carolina.

Marriages between whites and Chinese are void in Arizona, Nevada, Oregon, and Utah.

The marriage of first cousins is forbidden in Arizona, Arkansas, Illinois, Indiana, Kansas, Missouri, Montana, Nevada, New Hampshire, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Washington, and Wyoming, and in some of them is declared incestuous and void, and marriage with step-relatives is forbidden in all the States, except California, Colorado, Florida, Georgia, Idaho, Louisiana, Minnesota, Nebraska, New Mexico, New York, North Carolina, Oregon, Utah, and Wisconsin.

Marriage, Age to Contract, Without Consent of Parents.—In all the States which have laws on this subject 21 years is the age for males, and for females 21 years in Connecticut, Florida, Illinois, Kentucky, Louisiana, Ohio, Pennsylvania, Rhode Island, South Dakota, Virginia, West Virginia, and Wyoming, and 18 in all the other States having laws, except Maryland, in which it is 16 years.

Marriages, Voidable.—Marriages are voidable in nearly all the States when contracted under the age of consent to cohabit.

Divorce Laws.

Alabama.—Divorce may be obtained for the following causes: Impotency, adultery, desertion for two years, habitual drunkenness, imprisonment for two years and continued cruelty. An allowance must be made by the court, out of the husband's estate, for the

support of the wife pending suit; also an allowance when the decree is made. The custody of minor children may be given to either parent, in the discretion of the court.

Arizona.—Divorce may be granted for the violation of the marriage vow; physical incapacity; willful desertion for six months; habitual drunkenness; conviction for felony; cruelty; failure by husband to provide for six months.

Arkansas.—Divorce may be granted for impotency, bigamy, adultery, conviction of felony, habitual drunkenness, willful desertion for one year, cruel and barbarous treatment. Plaintiff must reside in the State one year before bringing suit. Court may allow alimony to the wife.

California.—Divorces are granted for adultery, extreme cruelty, conviction of felony, willful desertion, neglect or habitual intemperance continued for one year. No divorce can be granted by default.

Colorado.—Divorces may be granted for adultery, impotency, bigamy, willful desertion for one year, habitual drunkenness for two years, extreme cruelty or conviction for felony or infamous crime. One year's residence in the State is required before bringing suit, except where the offense was committed in the State or while one or both of the parties resided there.

Connecticut.—Absolute divorce may be granted by the Superior Court for adultery, fraud, duress or force in obtaining the marriage, willful desertion for three years, seven years' absence without being heard of, habitual intemperance, intolerable cruelty, sentence to imprisonment for life, the commission of any crime punishable by imprisonment in the State penitentiary and any such misconduct as permanently destroys the happiness of the petitioner and defeats the purposes of the marriage relation. Three years' residence in the State is necessary before filing a petition. Either party may marry again after divorce, and the court may change the wife's name and make order for alimony and custody of the children.

North and South Dakota.—Divorce may be granted for violation of the marriage vow; willful desertion; conviction for felony; cruelty and physical incapacity.

Delaware.—Divorce may be granted by the Superior Court for adultery, impotency at the time of marriage, habitual drunkenness, extreme cruelty, desertion for three years or conviction of crime sufficient to constitute a felony. In the case of marriage by fraud or for want of age, the wife being less than sixteen, the husband being less than eighteen, at the time of marriage, absolute divorce or divorce from bed and board may be granted, at the discretion of the court. The wife receives all her real estate and such other allowance and alimony as the court may decree where the husband is proved to be in fault. Willful neglect of the husband to provide the necessities of life also forms sufficient grounds for divorce.

District of Columbia.—Divorce may be granted for violation of the marriage vow; physical incapacity; willful desertion for two years; habitual drunkenness; conviction for felony; cruelty; insanity or idiocy at time of marriage.

Florida.—Applicants for divorce must have resided two years within the State. Absolute divorces may be granted only by the Circuit Courts. Adultery, impotency, bigamy, extreme cruelty, habitual intemperance or desertion for one year are sufficient causes. Alimony may be granted to the wife by the courts, and provision for a division of property when a decree is granted.

Georgia.—Grounds for total divorce are as follows: Marriage within the prohibited degrees of affinity or consanguinity; mental or physical incapacity at the time of marriage, force, menace, duress or fraud in obtaining it; adultery, willful desertion by either party for three years; cruel treatment by, or habitual intoxication of either party; or sentence to the penitentiary for two years or over for any offense involving moral turpitude. No total divorce may be granted except by the concurrent verdict of two juries, rendered at different times of court; and when a divorce is granted, the jury rendering the final verdict determines the rights and disabilities of the parties.

Idaho.—Divorce may be granted for violation of the marriage vow; willful desertion for one year; habitual drunkenness; conviction for felony; cruelty; failure of husband to provide for one year; insanity and confinement in an asylum six years.

Illinois.—Divorce may be granted, where complainant has been a resident of the State for one year, for impotency, bigamy, adultery, desertion or drunkenness for

two years, attempt upon the life of the other by poison or other means showing malice, extreme cruelty, conviction of felony or other infamous crime. If no defense is interposed, decree may be granted on testimony of complainant alone; but examination of witnesses must be had in open court, and the judge is required to be satisfied that all proper means have been taken to notify defendant. When decree is granted, the court may restore the wife's maiden name. During pendency of suit, the court may require the husband to pay such sum as may enable the wife to maintain or defend the suit, and alimony when declared just and equitable.

Indiana.—Petitioners for divorce must be *bona fide* residents of the State for two years, and of the county at the time of, and for at least six months prior to, filing the petition; the oath of two resident freeholders being required to this fact. Decrees may issue by the Superior or Circuit Court for the following causes: Impotency at marriage; adultery (where connivance or collusion is not proven); habitual cruelty or habitual drunkenness by either party; abandonment for two years; failure by the husband to provide for the family for a period of two years, and conviction of either party of an infamous crime at any time subsequent to marriage.

Iowa.—Divorce may be granted by the District or Circuit Court of the county in which plaintiff resides. Plaintiff must declare under oath that he or she has resided in the State for one year next preceding the filing of the petition, unless defendant is resident, and received personal service of the writ. A decree may issue against the husband for adultery, willful desertion for two years, conviction of felony subsequent to marriage, habitual drunkenness and continued ill-treatment. The husband may obtain a decree for like causes, and also when the wife at the time of marriage was pregnant by another. Bigamy or impotency at the time of marriage is also a sufficient cause to annul.

Kansas.—To obtain a decree of divorce, plaintiff must have resided in the State one year, and must bring suit in the county of residence. Decrees are granted in the Circuit Court on the following grounds: Adultery, impotency fraudulent contract, extreme cruelty, habitual drunkenness, gross neglect, abandonment for one year or conviction of felony.

Kentucky.—Before a petition can be presented for a decree of divorce, one year's continuous residence in the State is required. Jury trials are not permitted, and decrees are granted by courts having equitable jurisdiction. An absolute divorce may be granted to the party not in fault on the ground of adultery, impotency, etc., separation for five years, condemnation for felony subsequent to the marriage, force, duress or fraud in obtaining the marriage, or uniting with any religious society which requires a renunciation of the marriage contract. Habitual neglect or maltreatment on the part of the husband, or where the husband is a confirmed drunkard, may give the wife a divorce; and where the wife is proven unchaste, or pregnant by another man at the time of marriage, the husband is entitled to divorce. The parties are free to marry again, and their personal property is restored.

Louisiana.—Sentence of either party to imprisonment in the penitentiary is sufficient ground for divorce. A decree may also be obtained by either party for adultery, habitual intemperance or cruel treatment of such nature as to render living together insupportable.

Maine.—The Supreme Judicial Court grants divorce for impotency, adultery, or for three years' willful desertion. Alimony may be allowed and dower if the husband be to blame.

Maryland.—Absolute, for adultery, three years' abandonment, or ante-nuptial misconduct of wife. Partial, for cruelty, abandonment, and desertion. Alimony and restoration of wife's property.

Massachusetts.—Unfaithfulness, incapacity, three years' desertion, cruelty, drunkenness, neglect to provide, sentence to five years' imprisonment and joining a sect which disavows marriage, are grounds for absolute divorce. Alimony is allowed, and where the husband is at fault the wife's personal property is restored.

Michigan.—Absolute divorce may be granted for incapacity at time of marriage, adultery, two years' continuous desertion, drunkenness or three years' sentence to imprisonment. A life sentence dissolves the marriage without any proceedings in court. Divorce from bed and board for cruelty and neglect to provide. Separation of property, dower, and alimony as per statute.

Minnesota.—Absolute divorce for unfaithfulness, in-

capacity, three years' abandonment, one year's drunkenness, cruel treatment or sentence to State's prison. Limited divorce for abuse, desertion or failure to support. Plaintiff, except where breach of faith occurred in the State, must have been one year a resident. The court may order alimony and custody of the children, and the wife regains possession of her real estate, unless decree has been obtained on account of her bad conduct.

Mississippi.—After one year's residence in the State, divorce may be obtained for impotency, adultery, bigamy, cruelty, two years' abandonment or imprisonment in the penitentiary. Alimony is allowed when the wife is the injured party, and the court awards the custody of minor children.

Missouri.—Grounds: Impotency at time of marriage, unfaithfulness, bigamy, conviction of crime, drunkenness, cruelty, and one year's desertion. Petitioner must have been one year a resident of the State. Trial without jury.

Montana.—Divorce may be granted for violation of the marriage vow; physical incapacity; willful desertion one year; habitual drunkenness; conviction for felony; cruelty.

Nebraska.—Unless the marriage took place in the State, and the plaintiff has since continuously resided therein, a residence in the county of six months next preceding the application is necessary. Divorce is granted on the grounds of impotency at the time of marriage, adultery, two years' desertion, drunkenness, cruelty, three years' sentence to imprisonment, or failure on the part of husband to support wife. The court may order alimony, and where a decree is granted on account of the husband's bad conduct the wife takes dower.

Nevada.—Plaintiff must have resided six months in the county. Grounds of divorce are physical incompetency at time of marriage, adultery, one year's desertion, drunkenness, cruelty, conviction of crime, and failure on part of husband to support.

New Hampshire.—Divorces are granted by the Superior Court for physical incompetency, adultery, drunkenness, cruelty, three years' desertion, one year's sentence to prison or adherence to a religious sect that condemns marriage.

New Jersey.—Absolute for adultery, bigamy, two years' abandonment and intolerable cruelty. Applicant must reside in the State, unless the marriage or the alleged misconduct occurred here.

New Mexico.—Divorce may be granted for violation of the marriage vow; habitual drunkenness; cruelty; failure of husband to provide.

New York.—Only for adultery will an absolute divorce be granted. Partial divorce is ordered for cruelty, desertion and neglect. Marriages are annulled for fraud or force, idiosyncrasy, lunacy or impotency at the time of marriage, or for bigamy.

North Carolina.—Only for impotency or adultery can absolute divorce be obtained. Partial divorce is granted for cruelty, desertion, or drunkenness.

Ohio.—Divorce is granted for unfaithfulness, bigamy, incapacity, cruelty, drunkenness, deception, three years' neglect and abandonment, or imprisonment in a penitentiary. Alimony may be granted; and if the decree is obtained on account of the husband's ill conduct, the wife has her separate property and her maiden name restored.

Oklahoma.—Divorce may be granted for violation of the marriage vow; physical incapacity; willful desertion one year; habitual drunkenness; conviction of felony; cruelty.

Oregon.—Plaintiff must have been a resident for one year before bringing suit. Grounds are impotency, adultery, two years' drunkenness, three years' abandonment, cruelty, conviction of felony. Plaintiff gaining the suit has a right to one third of the real estate belonging to defendant; and if a successful plaintiff be the wife, she may have a maintenance awarded her.

Pennsylvania.—Plaintiff must have been a resident of the State for one year next preceding the application. Grounds: Deception or force in procuring the marriage, impotency, adultery, bigamy, cruelty and two years' abandonment, and two years' sentence to imprisonment. Divorce will not be granted on the ground of adultery if proved to have been condoned. Even after a divorce, defendant is not allowed to marry a co-respondent. A wife may obtain partial divorce and alimony for ill treatment.

Rhode Island.—Divorce is granted for impotency, adultery, cruelty, drunkenness, neglect to support, five

years' abandonment, conviction of murder or arson, presumption of death from long absence, or for defect in marriage rendering it void. Divorce may only be decreed by Supreme Court. Alimony may be ordered, and restoration of wife's separate property.

South Carolina.—Has no divorce laws.

Tennessee.—The applicant must have been a resident of the State for two years next preceding the petition. Grounds: physical incapacity at time of marriage, bigamy, adultery, two years' abandonment, conviction of crime, imprisonment in penitentiary, drunkenness, ante-nuptial immorality of wife, attempt of either party upon the life of the other. Limited divorce may be granted for cruelty, desertion, or failure to provide.

Texas.—Applicant must be really an inhabitant of the State and a resident of the county for six months previous to filing petition; grounds: adultery, three years' desertion, unendurable cruelty.

Utah.—Divorce may be granted for violation of the marriage vow; willful desertion one year; habitual drunkenness; conviction for felony; cruelty; failure of husband to provide; parties cannot live in peace and union.

Vermont.—Divorce is granted for adultery, cruelty, three years' abandonment, three years' imprisonment in penitentiary or seven years' absence without being heard of. The wife may obtain divorce where the husband, being able, fails to support.

Virginia.—Grounds: Impotency, adultery, sentence to penitentiary, guilt of either of infamous crime before marriage, the other being ignorant, notorious immorality of wife before marriage, five years' abandonment. Partial divorce for cruelty or desertion. Alimony and maintenance of children are decreed, and the care of the children is given to either party at the discretion of the court.

West Virginia.—Divorce is granted for mental or physical defect at time of marriage, unfaithfulness, three years' abandonment, sentence to penitentiary, conviction of crime before marriage, or notorious immorality of either before marriage, the other party being ignorant. Partial divorce may be obtained for cruelty or desertion. Alimony and custody of children is decreed by the court.

Washington.—Divorce may be granted for violation of the marriage vow; physical incapacity; willful desertion one year; conviction for felony; cruelty; fraud and fraudulent contract; indignities as render life burdensome; insanity lasting ten years.

Wisconsin.—Unless the parties had been married and since remained in the State, the applicant must have been for one year a resident before filing a petition. Absolute divorce is granted for impotency, adultery, one year's abandonment, five years' separation, three years' sentence to penitentiary, cruelty and drunkenness. Partial divorce for desertion, cruelty, drunkenness, or failure to provide. The court may decree alimony, and the wife regain her separate property.

Wyoming.—Divorce may be granted for violation of the marriage vow; physical incapacity; willful desertion one year; habitual drunkenness; conviction for felony; cruelty; failure of husband to provide one year; indignities as render life burdensome; vagrancy of husband.

PROPERTY RIGHTS OF MARRIED WOMEN.

Alabama.—Married women may hold all property, real and personal, acquired before and after marriage, as a separate estate not liable for the husband's debts, and it may be devised or bequeathed as by a single woman. This separate estate is liable for debts contracted by the woman before marriage, and for contracts after marriage for articles of comfort and support of family. The wife is entitled to dower of one half of husband's real estate, if he leave no lineal descendants, one third if there are any, provided she has no separate estate; if her separate estate is less than the dower interest would be, she is entitled to as much as would make it equal. Women attain their legal majority at twenty-one, but may marry without consent of their parents at eighteen.

Arizona.—Married women may carry on business and be sued in their own names. All property acquired before marriage, and all afterwards acquired, by gift, grant, devise or inheritance, is separate estate, liable for her own but not for her husband's debts. She may control it as I dispose of it in all respects like a single woman.

Arkansas.—Married women have absolute and unqualified right in property of every kind and are not liable for debts or contracts of the husband. But a schedule under oath, and verified by some other reputable person, must be made by the husband and wife, and filed in the recorder's office of the county where the property is, and of the county where they reside. The wife may control her property, may carry on business on her sole and separate account, may sue and be sued, may make a will and may insure her husband's life for her benefit. The widow is entitled to one third part of the estate, unless legally relinquished by her.

California.—All property acquired in any manner before marriage, or afterwards by gift, grant, inheritance or devise, is wife's separate property, controlled by her and not liable for debts of the husband. The husband's property similarly acquired is not liable for debts of the wife. All property acquired after marriage by husband or wife, except as above, shall be common property, but under the husband's control. Dower and curtesy are abolished, but the survivor takes half the common property after payment of debts and expenses of administration. A married woman may dispose of her separate estate by will without the consent of her husband and may insure her husband's life for her benefit.

Colorado.—Married women are treated in all respects, as to their property rights, as if they were single. A wife may carry on trade or business, sue or be sued, contract debts, transfer real estate, and in all ways bind her separate property, without the husband's joining. She may make a will, but cannot bequeath more than half her property away from her husband without his consent in writing. The husband cannot by will deprive his wife of over one half of his property. Dower is abolished. The husband is liable for debts of the wife contracted before marriage to the extent of the property he may receive through her, but no further.

Connecticut.—Previous to the year 1877, the husband acquired a right to the use of all the real estate of the wife during her life and if he had a child by her and survived her, then during his own life as tenant by curtesy. By the Act of May 20th, 1877, the rights of married women are materially enlarged. Any woman married after that date retains her real estate as if unmarried. She may make contracts, convey real estate, and sue or be sued in regard to any property owned by her at the time of marriage, or afterwards acquired. The estate is liable for her debts, and, jointly with her husband, for debts contracted for joint benefit of both or household expenses. The separate earnings of a wife are her sole property. Dower exists only in real estate of which the husband is possessed at the time of his decease.

North and South Dakota.—Married women may transact business in all respects the same as if unmarried. Neither husband nor wife has any interest in the separate estate of the other. The earnings and accumulations of the wife are her separate property and not liable for the husband's debts nor even for household debts contracted by her as her husband's agent. Her separate property is, however, liable for her own debts, contracted before or after marriage, if such debts are contracted on her own responsibility.

Delaware.—Married women, married since 1873, retain all real and personal property held at marriage, or since acquired from any person other than the husband, as their separate estate, and not subject to the disposal of the husband or liable for his debts. They may receive wages for personal labor, sue or be sued in respect to their own property as if unmarried; and the rents, issues, and profits of their separate estate are not controlled by the husband. The widow is entitled to one third dower of all the lands and tenements whereof the husband was seized at any time during her marriage, unless she shall have relinquished such right for and during the term of her natural life. She may be an administratrix, and the husband's life may be insured for her benefit if premium does not exceed \$150.

District of Columbia.—Married women may bequeath, devise, or convey property or interest therein in the same manner as if unmarried. Real or personal property belonging to the wife at marriage or afterwards acquired is separate estate. She may sue and be sued in all matters pertaining to her property, and the husband is not liable for any contracts made by her in respect to her personal estate.

Florida.—Married women retain all real or personal property owned at marriage or acquired thereafter, and are not liable for the husband's debts. In order that if

shall be free from his debts, the property must be inventoried and recorded within six months after marriage or subsequent acquirement of the property. The wife may sell and convey all real estate inherited by her the same as if she were unmarried; but her husband must join in all sales, transfers, and conveyances of her property, both real and personal. She is entitled to dower in a life estate in one third of all the real estate of which her husband was seized and possessed at his death or at any time during his life, unless she has relinquished the same; also an absolute one third of his personality.

Georgia.—Married women retain as a separate estate all property in their possession at the time of marriage, or afterwards acquired and are not liable for any debts, defaults, or contracts of the husband. By consent of her husband advertised for four weeks she may become a free trader, in which event she is liable the same as if unmarried. The wife may not bind her estate by any contract of suretyship, either in behalf of her husband or any other person. The widow takes dower in one third of all the lands of which her husband was seized at his death; and wife and children, after the husband's death, are entitled to one year's support from his property, all other claims yielding to this.

Idaho.—All property, both real and personal, owned at marriage or afterwards acquired, by either wife or husband, remains a separate estate. All property acquired after marriage is held in common. Separate property of the wife should be inventoried with the county recorder; the husband has control of it during marriage, but cannot create a lien or encumbrance unless joined by the wife, who is examined separately. If the husband mismanages, or commits waste, the District Court may, on application of the wife, appoint a trustee to manage her separate property. Upon the death of husband or wife, half the common property goes to survivor; if no direct descendants, all goes to survivor.

Illinois.—Married women may own in their own right realty and personality, may sue and be sued, contract and incur liabilities, the same as if unmarried; but they may not enter into or carry on any partnership business without consent of the husband, unless abandoned by him or he is incapable of giving assent. Beyond the necessities, the husband is not liable for debts of the wife, except in cases where he would be jointly liable if the marriage did not exist. The estate of both is liable for family expenses, but the wife's separate earnings are her own. A surviving wife or husband takes one third of all the realty of the deceased, unless relinquished in due form. The husband and wife are put upon the same footing as to dower, and the estate of curtesy is abolished.

Indiana.—Married women retain all realty and personality owned by them at marriage, or afterwards acquired, and are not liable for the husband's debts. The husband is liable for debts of the wife contracted before marriage only to the extent of the personal property he may receive from or through her, or derive from sale or rent of her lands. She may sell personal property, but she may not convey or encumber her real estate unless the husband joins. Suits against her separate estate should be brought in the name of both. A widow takes one third of her deceased husband's real estate in fee simple, free from all demands of creditors, where the estate does not exceed \$10,000; where the estate is over \$10,000 and under \$20,000, she takes one fourth; and one fifth if it exceeds \$20,000. She also takes one third of the personality after payment of debts, and in all cases takes \$500, without accounting, and may occupy the dwelling and forty acres of land for one year, rent free.

Iowa.—Married women may own in their own right real and personal property acquired by descent, gift, or purchase, may sell, convey, and devise the same, may sue and be sued, make contracts and buy goods in their own name. Wife or husband are not liable for the debts of the other before marriage, or for separate debts incurred afterwards. The wife's earnings are her own, and her note is good against her own estate. Women attain majority at eighteen, or earlier, upon marriage; a female of fourteen may marry. The surviving wife or husband is entitled to one third of the real estate of the deceased, free from all claims of creditors. If they leave no children, survivor takes one half, parents the other half.

Kansas.—Married women have the same property rights as men, and may make contracts, carry on business, sue and be sued, and sell or convey real estate pre-

cisely as their husbands; their earnings or profits are their own. A note or indorsement made by a married woman will bind her property the same as if unmarried. Homestead is absolute property of widow and children, and neither wife nor husband may bequeath more than half their property without written consent of the other. If either die intestate and without children, the entire property goes to the survivor.

Kentucky.—Married women may hold real or personal property as a separate estate free from the control of the husband or liability for his debts. By petition to the Circuit Court, in which the husband must join, she may acquire the right to transact business in her own name. Unless dower be barred, forfeited, or relinquished, she takes one-third of the real estate and one-half of the personal property.

Louisiana.—Married women may hold and control both real and personal property owned at time of marriage; all property or revenues of separate property acquired by either husband or wife after marriage is held in common, and is divided equally between them at dissolution of the marriage either by death or divorce. The wife may carry on a separate business, but her husband will be bound by her contracts, so long as the community of property exists; she cannot sue without the concurrence of her husband, and she cannot bind herself or her property for his debts. There is no right of dower to the wife.

Maine.—A married woman holds real and personal property, acquired in any way except from the husband, the same as if single. She may make contracts, sue and be sued, and do business in her own name; and her property may be taken to satisfy judgments against her. Her property is liable only for her own debts. She joins husband in a deed selling his property to relinquish dower. He joins with her in selling hers only when such property comes from him. A wife, being abandoned by her husband, may be allowed to take and use his personal property. Dower, life estate in one third of all husband's real property owned during coverture; one half if no children. He has same interest in deceased wife's estate.

Maryland.—Property acquired by a married woman is her own, controlled by herself, and is free from her husband's debts. She conveys by joint deed with the husband, but devises and bequeaths the same as if single. She may be sued with her husband on joint contracts made by them, and the property of both is equally liable. Dower one third, if they have children; one half, if none.

Massachusetts.—The property of a married woman is managed by herself, and is not liable for her husband's debts. She may make contracts, sue and be sued, and do business in her own name, provided a certificate is filed by her or her husband in the office of the town clerk. Contracts and conveyances between husband and wife are not allowed. Her conveyances of real estate are subject to husband's tenancy by curtesy. A wife cannot make a will affecting her husband's right to one half of the personal property or his tenancy by curtesy in her real estate, without his written consent. Dower as by common law.

Michigan.—Married women own and control property the same as if single. A wife may do business in her own name and make contracts, even with her husband. Her separate property is liable for wrongs committed by her. Widow has dower, but there is for the surviving husband no right of tenancy by curtesy.

Minnesota.—A married woman holds property in her own name. She may make contracts, and her property is liable only for her own debts. She cannot sell or convey real estate further than a mortgage for purchase-money or a three years' lease, without her husband joining her. Contracts between husband and wife are void. The surviving husband or wife keeps the homestead for life.

Mississippi.—A married woman holds property acquired in any manner, and the revenues therefrom, for her own use and free from control or liability of her husband. She may convey and encumber the same as if single, but husband joins in conveyance. She may devise and bequeath. Deed from husband to wife is void as to creditors at time of making it. A wife may not encumber her estate by mortgage or otherwise for her husband's debts; she may do business on her own account the same as if single, and is then liable for her contracts, housekeeping and family expenses. She joins her husband in conveyance of homestead, but not in that of his other property. Dower in property of which the husband dies seized.

Missouri.—A married woman controls her own property, and holds it through a trustee, free from liability for her husband's debts. She may make contracts, sign notes, and do business in her own name. She may make a will. She joins her husband in his conveyances to release dower. Her dower is one third for life of all lands owned by husband.

Montana.—A list of married woman's property filed and recorded saves it from being liable for the husband's debts, except necessities for herself and children under eighteen. A married woman may become a sole trader by recording her intention. If she invests more than \$10,000 in business she must make oath that the surplus did not come from her husband. The husband is not liable for debts contracted by her in business. She is also responsible for the maintenance of her children. A surviving husband or wife takes one half of deceased's property, if no children; one third if there are.

Nebraska.—A married woman holds her separate property free from the disposal of her husband and from liability for his debts. She may bargain, sell, make contracts, do business, sue and be sued, all so far as her separate estate may warrant; but she cannot become surety for another, not even being allowed to bind herself for her husband's debts. Property coming to the wife from the husband is not privileged as her separate property. Dower, use for life of one third of real estate owned by husband during coverture.

Nevada.—The separate property of a married woman which is controlled by herself is such as she may have owned before marriage or acquired afterwards by gift, devise, or descent. All property acquired otherwise, by either husband or wife, is common property, and under the absolute control of the husband. On the death of the husband the widow receives one half of the common property.

New Hampshire.—A married woman holds property owned before marriage or acquired afterwards, except what may come from the husband, for her own use. She may sell, convey and encumber, devise and bequeath, do business, give notes, sue and be sued. Her contracts are binding, excepting that there can be no contracts or conveyances between husband and wife, nor can the wife become security for her husband. Wife is entitled to dower.

New Jersey.—The property owned before marriage, and such as she may acquire afterwards by gift, descent, or bequest, is the sole property of a married woman and is not liable for the husband's debts. She may make contracts, but cannot sell or encumber her real estate without consent of husband. She cannot indorse notes or become security. She joins husband in his conveyances and mortgages. Dower and curtesy.

New Mexico.—The separate property of a married woman is what she owned previous to marriage, or what she may inherit. All that she acquires afterwards, and the revenues of her separate estate, go into the common property. The husband has control and management of her separate estate and the common property. There is no dower, but on decease of a husband the wife's private property is first deducted; then she receives one half of the common property, after all debts are paid. If there be no children she has a right to all the common property.

New York.—Married women may have real and personal property, buy and sell, and do business in their own names. A married woman is liable for debts contracted in her own trade or business, or when an agreement or contract has been made for the benefit of her separate property, when, by the terms of such instrument, her separate property is to be charged with the liability. Dower.

North Carolina.—A married woman's separate property is not liable for her husband's debts. She may devise and bequeath, but must have husband's consent to convey. Unless she be a free trader, she can make no contract other than for personal or family necessities or for payment of ante-nuptial debts, without the consent of her husband. She becomes a free trader, the husband assenting, by filing her intention. Common law dower and one year's subsistence.

Ohio.—The property of a married woman is not liable for her husband's debts; beyond a three years' lease or a contract for the improvement of her real estate, she cannot sell or encumber it without the consent of her husband. If a married woman engages in trade, her separate property is liable for the debts she may then contract, and she may sue and be sued the same as if single. A deserted wife must procure an order from

court, by which she shall have all property rights as a femme sole. Dower in all real estate owned by husband during coverture.

Oklahoma.—Neither husband nor wife has any interest in the property of the other. Either may enter into any engagement or transaction with the other, or with any other person, respecting property which either might, if married, subject, between them, to rules which control the actions of persons occupying confidential relations. The wife may, without consent of husband, convey her separate property. Woman retains the same legal existence and personality after marriage as before, and receives the same protection of her rights as does her husband. She may hold and transfer real and personal property; may buy and sell goods, give notes or other obligations, and sue and be sued, same as if unmarried.

Oregon.—A married woman holds her property free from the control or debts of her husband. She may make contracts, buy and sell, and give notes, and her own property will be liable. The husband joins in her conveyances. She may make a will, but it must not interfere with her husband's rights of curtesy.

Pennsylvania.—The property of a married woman is held as her separate estate, but is chargeable for family necessities ordered by her. A wife cannot make a contract or conveyance without her husband joining her. By obtaining leave from the court she may have the benefit of her own earnings. She may make a will, saving the husband's right by curtesy. She may deposit money in bank and write checks against it in her own name. Dower, one third of all real estate owned by husband during coverture.

Rhode Island.—A married woman's property is held by trustees for her separate use free from her husband's debts. She cannot make contracts or do business. She may make a will subject to husband's right by curtesy.

South Carolina.—The property of a married woman cannot be seized for her husband's debts. A married woman can bequeath, devise, and encumber her separate property. She can buy in her own name, and have conveyances made to her, and make contracts, the same as if she were single. A gift from husband to wife is not good against a creditor's claim. Dower rights.

Tennessee.—A married woman has her separate property free from the husband's control and from liability for his debts. She may encumber, convey, or devise her separate property without being joined by her husband in the deed. Widow has dower in one third of husband's real estate, and a child's share in his personality. The husband dying intestate, leaving no heirs, the wife inherits all his property.

Texas.—The property owned by husband or wife before marriage, and what either may acquire afterwards, by gift, devise, or descent, is community property. The husband controls the common property and the wife's separate estate. The common property is liable for the debts of either, and the husband may dispose of it. At the death of either, the survivor takes one half and the children the other half of the common property. The husband joins wife in conveyance of her separate property. She joins him in conveyance of homestead. A married woman cannot do business in her own name, but she may become security for her husband by mortgaging her separate estate.

Utah.—A married woman's separate property is held, managed, controlled, and disposed of by herself. A wife may carry on business, sue and be sued, give notes and make contracts the same as if single.

Vermont.—The property of a married woman is held separate, and is not liable for her husband's debts. In conveyance of the wife's real estate the husband must join in deed. A married woman may make a will. Widow has dower in one third the real estate of which the husband died seized.

Virginia.—A married woman holds the property owned by her previous to marriage, and what she may afterwards acquire, as sole trader, free from the control of her husband, and from liability for his debts. She may make a will subject to husband's rights by curtesy. Common law dower.

West Virginia.—The property of a married woman, however acquired, except from the husband, is held for her sole and separate use. Husband must join in conveyances of real estate. Dower.

Washington.—The property owned before marriage by husband or wife, and all acquired afterwards by gift, devise, or descent to either, is separate property. All otherwise acquired is common property, subject to control of the husband. He also controls the separate

property of the wife, but cannot sell or convey it without her joining in the deed. To save the separate property of the wife from attachment for husband's debts, there must be an inventory of it on record.

Wisconsin.—A married woman has all property rights the same as if single. She may buy and sell, lend and borrow, make conveyances, and have real estate conveyed to her, and all such business may be transacted between her and her husband as between strangers. She may sue alone, but in being sued she must be joined to husband. Dower, life interest in one third of all husband's realty held during the marriage. Husband has wife's realty for life.

Wyoming.—A married woman may carry on business, make contracts, keep her own earnings, hold property, real or personal, receive the rents in her own name, sue and be sued, make a will, free from any control or interference of her husband, the same as if she were single. Her property is not liable for the debts of her husband. Women in this State have the right to vote and hold office.

Canada.—In the provinces of the Dominion, generally, a married woman holds all her property and earnings, free from the control of her husband. It is liable for her debts before marriage, and her husband is not. She may manage it and bequeath it. She is entitled to dower, but there is no tenancy by curtesy. In the province of Quebec the law is modified by the French law. There all the personal property and gains of both parties are put together, and form the community property, which the husband administers. Each can bequeath only his or her interest, and the heirs of each inherit the interest of each.

THE BRITISH EMPIRE.

The constitution of Great Britain, unlike that of the United States or France, is largely unwritten. Customs, institutions, and usages which have prevailed so long that they are recognized to be binding, constitute, in great measure, the principles of government. What is written is expressed in no one instrument and is the product of no single period. Agreements between sovereign and subjects, acts of Parliament enacted at various times through hundreds of years, embody the nation's written law. The Magna Charta of 1215 and the Bill of Rights of 1689 alike contribute a share to the British Constitution.

The legislative power is vested in the House of Lords and the House of Commons. The latter however, made up of representatives of the people, is the sovereign power in English government. The House of Lords has equal share in law making. But should the House of Commons desire the passage of some act affecting the organic law, that is, the constitution, it is legally able to compel the Lords to do its will. For should they refuse to accept such legislation the Commons may have the Crown appoint to the House of Lords enough new members who are in favor of the proposed law to insure its passage. This method of packing the House of Lords is not now employed, for rather than submit to it the members prefer to acquiesce in the legislation demanded. Thus the Commons have power at any time to revise or amend the constitution. And in fact, whatever the measure, provided it has been approved by the people at the

general election of members of the House of Commons, in no case does the House of Lords reject it. Nevertheless the House of Lords is very useful and powerful as a check upon hasty or ill considered legislation.

The term of Parliament is seven years. It is required by law to meet every three years, but, since the practice is to vote money for the government for a year only, it meets annually, the session lasting from the middle of February until about the end of August. The sovereign summons each session about thirty-five days before its opening. The session is terminated by a prorogation issued by the Crown, while Parliament is dissolved either by expiration of the term or by the sovereign, acting upon the advice of his ministry. As no Parliament has lasted seven years, the latter is the method employed. The existence of the House of Commons is terminated by the dissolution, which, however, does not affect the Lords, with the exception of the Scottish peers, who are elected for the term only. Parliament is not now, as formerly, dissolved by the death of the sovereign.

The House of Lords is made up of peers who hold their seats (1) by hereditary right. This class, by far the largest, consists of those peers whose ancestors were summoned by the sovereign to sit in Parliament subsequent to 1295, or who have themselves received a patent of nobility. The peers are members also (2) by appointment of the sovereign—these are four judicial members called Lords of Appeal in Ordinary; (3) by virtue of office—English Bishops; (4) by election for life—Irish Peers; (5) by election for the term of Parliament—Scottish Peers.

In 1904 the "roll" had 594 names.

The House of Commons consists of 676 members,—495 chosen in England, 103 in Ireland, and 72 in Scotland. The members represent three classes of constituencies—counties, towns, and universities. Members are distributed according to population. Generally speaking, the rule is that an election district shall have 54,000 inhabitants, but the exceptions are that towns of more than 15,000 and less than 50,000 may send one member, and those of 50,000 and less than 165,000 may send two members, and that some of the universities may send members though they have small constituencies. The counties send 377 members, the towns or Parliamentary boroughs 284, the universities 9. In counties, and boroughs with county privileges, property qualifications exist for voters, and about one sixth the population are voters as compared with one fifth in United States.

By the Reform Bill of 1832, the number of

English county constituencies was increased from 52 to 82; 56 boroughs, containing a population of less than 2,000 each, were totally disfranchised, and 81 other boroughs, of less than 4,000 each, were required to send one representative instead of two. On the other hand, 22 new boroughs acquired the right to return two members, and 24 to return one member. In Scotland the town members were increased from 15 to 23—making 53 in all, while the Irish representatives were increased from 100 to 103.

All financial measures must have their origin in the House of Commons. The constitution places no limit on its powers but no one Parliament can bind its successors.

The administration of the government is vested nominally in the Crown, but a committee of ministers constitute the real executive department. This Cabinet is formed from the party which has the majority in the House of Commons. After an election the king asks the acknowledged leader of the majority party in the House to accept the premiership. If he accepts, as is usual, after consulting with the other party leaders he chooses, from among those members of Parliament of his own political party, his colleagues who are to assist him in the government, and they are appointed by the sovereign. Thus the administration becomes that of the majority party of the nation. Should the ministry be defeated in the House on any measure of importance or should the Commons vote lack of confidence in them they resign at once and a new cabinet is formed. Each minister is the head of an executive department. Among the powers of the Crown, exercised through the ministry, are the negotiation of treaties, declaration of war, administration of foreign affairs, and the appointment of diplomatic officers.

The number of Cabinet officers varies according to the importance of the issues before the government. In the following list the first eleven are always members of the Cabinet:—

1. *Prime Minister and (usually) First Lord of the Treasury.*
2. *Lord High Chancellor.*
3. *Lord Privy Seal.*
4. *Lord President of the Council and President of the Board of Education.*
5. *Chancellor of the Exchequer.*
6. *Secretary of State for Home Affairs.*
7. *Secretary of State for Foreign Affairs.*
8. *Secretary of State for The Colonies.*
9. *Secretary of State for India.*
10. *Secretary of State for War.*
11. *First Lord of the Admiralty.*
12. *Lord Chancellor of Ireland.*

13. *President of Local Government Board.*

14. *President of Board of Trade.*

15. *Chief Secretary to the Lord Lieutenant of Ireland.*

16. *Secretary for Scotland.*

17. *President of Board of Agriculture and Fisheries.*

18. *Postmaster General.*

Local Government.—England and Wales.—In each county the Crown is represented by a Lord Lieutenant, who is generally also *custos rotulorum*, or keeper of the records. He usually nominates persons whom he considers fit and proper persons to be justices of the peace for his county, to be appointed by the Lord Chancellor. His duties, however, are almost nominal. There is also a sheriff, who represents the executive of the Crown, an under-sheriff, a clerk of the peace, coroners, who are appointed and paid by the County Councils, and other officers. The licensing of persons to sell intoxicating liquors, and the administration of the criminal law—except that which deals with some of the graver offenses—is in the hands of the magistrates. For the purposes of local government, England and Wales are divided into sixty-two administrative counties, including the county of London, which differ slightly in area from the geographical counties.

For each administrative county there is a popularly-elected Council, called a County Council, who co-opt a prescribed number of aldermen, either from their own body or from outside it. Aldermen are elected for six years, half of them retiring every third year. A councillor is elected for three years. The jurisdiction of the County Councils extend to (1) making of county and police rates; (2) borrowing money; (3) supervision of county treasurer; (4) management of county halls and other buildings; (5) licensing of houses for music and dancing, and of race courses; (6) maintenance and management of pauper lunatic asylums; (7) maintenance of reformatory and industrial schools; (8) management of bridges and main roads; (9) regulation of fees of inspectors, analysts, and other officers; (10) control of officers paid out of the county rate; (11) coroner's salary, fees, and district; (12) Parliamentary polling districts and registration; (13) contagious diseases of animals, and various other matters. The control of the county police is vested in a standing joint committee, composed of an equal number of magistrates and members of the County Council. The London police are, however, under the control of the Home Secretary.

The administrative counties, with the exception of the County of London, are subdivided into "County Districts," which are either Urban or Rural, as the case may be. Generally speaking, an urban district comprises a town or a small area more or less closely populated, and a rural district takes in several country parishes. Women may be elected to District Councils, but may not sit on County Councils; and the chairman of a District Council is, unless a woman, a magistrate for the county by virtue of his office. The District Councils administer the Public Health and Highway Acts, and also exercise some powers formerly exercised by the justices out of session.

In every civil parish in a "rural district" there is a Parish Meeting, at which every parochial elector may attend and vote. In such parishes of over 300 inhabitants there is in addition a Parish Council. To these latter bodies have been transferred all the civil powers of the old Vestries, including the election of overseers, and in addition very considerable powers over charities, allotments, and other public matters. Where there is no Parish Council some of these powers, including the appointment of the overseers, are exercised by the Parish Meeting. Urban District Councils can, by petitioning the Local Government Board—which is the supreme Local Government authority—obtain part or all of the powers of a Parish Council. Only Parish Meetings may have power to adopt the Public Libraries Acts, the Baths and Washhouses Acts, the Lighting and Watching Acts, the Burials Acts, and the Public Improvements Acts.

Under the London Government Act of 1899 the whole of the administrative county of London, exclusive of the city, has been divided into boroughs 23 in number,

each with a mayor, councillors and aldermen. The first election was held on November 1, 1900, and the Borough Councils have, with some additions and some limitations, taken over the powers and duties, property and liabilities of the vestries, which ceased to exist on the first day of the first meeting of the new councils.

In all the great towns, including "county boroughs," local business is administered by a municipal Corporation, which derives its authority from a charter granted by the Crown. In 1835 the municipalities of the country were completely reorganized. A municipal Corporation consists of the mayor, aldermen, and burgesses, and acts through a Council elected by the burgesses—practically by the ratepayers. The councillors serve for three years, one third retiring annually; the aldermen are elected by the Council, and the mayor, who serves for one year, also by the Council. A municipal Corporation has practically all the powers of an urban district council, in addition to the privilege of electing a mayor and corporation, and in some cases municipal boroughs have a separate commission of the peace and maintain their own police force.

Scotland.—By the Local Government (Scotland) Act, 1894, a Local Government Board for Scotland was constituted, its President being the Secretary for Scotland. The Local Government Act, which was passed for Scotland in 1889, followed in its main outlines the English Act of the previous year. The powers of local administration in counties formerly exercised by the Commissioners of Supply and Road Trustees were either wholly or in part transferred to the new Councils, which took over their duties and responsibilities in 1890. The Act of 1894 provided that a Parish Council should be established in every parish to take the place of the Parochial Boards, and to exercise powers similar to those of the Parish councils in England. Such towns, having over 1,500 inhabitants, may be constituted urban sanitary districts.

The Isle of Man and the Channel Islands are not bound by Acts of the Imperial Parliament unless specially mentioned. The Isle of Man is administered in accordance with its own laws by the Court of Tynwald, consisting of the Governor, appointed by the crown; the Council for public affairs, composed chiefly of ecclesiastical and judicial dignitaries appointed by the Crown, and the House of Keys, a representative assembly of 24 members chosen on a property qualification for seven years by the six "sheedings" or local subdivisions, and the four municipalities. The Channel Islands are administered according to their own laws and customs, each by a Lieutenant Governor, with judicial and other functions, and a "States," Assembly, partly elective. Jersey has a separate legal existence; Guernsey, Alderney, and Sark have a Lieutenant Governor in common, but otherwise their governments are separate.

Justice.—**England and Wales.**—The principal courts having criminal jurisdiction are the petty sessional courts, the general or quarter sessions, the courts of oyer and terminer and jail delivery, more popularly known as "assizes," and the Central Criminal Court. Two or more justices of the peace sitting in a petty sessional courthouse, the Lord Mayor or any alderman of the City of London, or any metropolitan or borough police magistrate or other stipendiary magistrate sitting in a courthouse, constitute a petty sessional court. The courts of quarter sessions are held four times a year by the justices of the county. Similar courts can be held at other times, and are then called "general sessions." Two justices constitute a court, but usually a larger number attend. Certain boroughs have a court of quarter sessions, with similar jurisdiction to the county justices in quarter sessions assembled, in which the recorder of the borough is the judge. The assize courts are held four times a year in various towns throughout the country by "commissioners" nominated by the Crown. These commissioners are generally judges of the Queen's Bench Division of the High Court of Justice, but sometimes Queen's Counsel of good standing are appointed. The trial takes place before a single commissioner. The Central Criminal Court is the court of oyer and terminer and jail delivery for the City of London and a large surrounding district. The sessions of this court are held at least twelve times a year, and more often, if necessary. The Recorder and the Common Sergeant, and, if the number of the prisoners makes it necessary, the judge of the City of London Court, sit on the first two days, after which they are joined by the judges of the High Court on the rota, for whom the more serious cases are reserved. A

petty sessional court deals summarily with minor offenses. Cases of a more serious nature are usually investigated by a petty sessional court before being tried at the sessions or the assizes. To every session, assize, and to every sitting of the Central Criminal Court, the sheriff cites 24 of the chief inhabitants of the district, of whom not less than 12 and not more than 23 are sworn and constitute a grand jury. The grand jury examines the bill of indictment against the accused person, hears the evidence of witnesses for the prosecution, and if they think a *prima facie* case for trial is made out they indorse the bill "a true bill." All criminal trials, except those which come before a court of summary jurisdiction, take place before a judge and a petty jury of twelve men. Except on some highly technical point of procedure there is no appeal in criminal cases. No man can be tried again for the same crime after a petty jury has found him "not guilty." On a conviction the judge can, if he think fit, reserve a question of law (but not of fact) for the Court for Crown Cases Reserved. This Court is formed by five or more judges of the High Court, and can reverse, amend, or affirm the judgment. The only other method of securing the revision of a sentence is by the royal prerogative, exercised on the advice of the Home Secretary, by which a sentence can be modified or annulled. Nominally all the judges are appointed by the King, but in practice the Lord Chancellor (who is a Cabinet minister, ex officio president of the House of Lords, and goes out with the ministry) and the Lord Chief Justice are appointed on the recommendation of the Prime Minister, and all the other judges on the recommendation of the Lord Chancellor.

Scotland.—The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges of the Court of Session, and sits more or less frequently as the number of cases before it may require, in Edinburgh or in the circuit towns. One judge can, and usually does, try cases, but two or more preside in cases of difficulty or importance. It is the only competent court in cases of treason, murder, robbery, rape, fire-raising, forcement of messengers, and generally in all cases in which a higher punishment than imprisonment is by statute directed to be inflicted; and it has moreover an inherent jurisdiction to punish all criminal acts, both those already established by common law or statute, and such as have never previously come before the courts and are not within any statute.

The sheriff of each county is the proper criminal judge in all crimes occurring within the county which infer only an arbitrary punishment, and if the case is tried with a jury the High Court has no power of review on the merits. Even in cases indicted to the High Court the accused is, under the Criminal Procedure (Scotland) Act of 1887, regularly asked to plead in the sheriff court, and minor objections to the indictment can be wholly or in part disposed of there. Borough magistrates and justices of the peace have jurisdiction in petty cases occurring within the burgh or county, and in a number of minor offenses under various statutes.

Ireland.—In Ireland persons charged with crime are first brought before the petty sessions court, which must consist of at least two ordinary justices of the peace, one of whom may be a stipendiary—commonly called a resident magistrate. Then if the charge be trifling it may be disposed of, the prisoner, if convicted, having a right of appeal to the quarter sessions or recorder's court (according as it is in a borough or in the county), provided he is fined more than twenty shillings or sentenced to a longer imprisonment than one month (Petty Sessions Act, sec. 24). If the charge be of a more serious character it must either be dismissed or sent for trial to the quarter sessions or recorder's court, or to the assizes, as in England. There is this difference, however, between quarter sessions in Ireland and in England: in England they are presided over by an unpaid chairman, who need not be a lawyer, and who is elected by his fellow justices of the peace for the county; while in Ireland they are presided over by a paid official, who must be a barrister, whose decision on points of law binds the court, who is appointed by the Crown, and who is also judge of the civil bill court of the county, which corresponds to the English county court. The assizes are presided over by one of the common law judges of the High Court of Justice. In the quarter sessions, recorder's court, and assizes the trial is by jury in all cases save appeals from petty sessions.

CANADA.

Constitution and Government.—As originally constituted the Dominion of Canada was composed of the Provinces of Canada—Upper and Lower—Nova Scotia, and New Brunswick. They were united under the provisions of an Act of the Imperial Parliament

passed in March, 1867, known as "The British North America Act 1867," which came into operation on the 1st July, 1867, by royal proclamation. The Act provides that the Constitution of the Dominion shall be "similar in principle to that of the United Kingdom"; that the executive authority shall

be vested in the Sovereign of Great Britain and Ireland, and carried on in her name by a **Governor General and Privy Council**; and that the legislative power shall be exercised by a Parliament of two Houses, called the "Senate" and the "House of Commons." Provision was made in the Act for the admission of British Columbia, Prince Edward Island, the North-West Territories, and Newfoundland into the Dominion; Newfoundland alone has not availed itself of such provision. In 1869 the extensive region known as the North-West Territories was added to the Dominion by purchase from the Hudson's Bay Company; the province of Manitoba was set apart out of a portion of it, and admitted into the confederation on the 15th July, 1870. On 20th July, 1871, the province of British Columbia, and on the 1st July, 1873, the province of Prince Edward Island, respectively entered the confederation.

The members of the Senate of the Parliament of the Dominion are nominated for life, by summons of the Governor General under the Great Seal of Canada. By the terms of the Constitution, there are now 81 Senators—namely, 24 from the Province of Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Manitoba, 3 from British Columbia, 4 from Prince Edward Island, and two from the Territories. Each senator must be 30 years of age, a born or naturalized subject, and reside in, and be possessed of property, real or personal, of the value of 4,000 dollars within, the province for which he is appointed. The House of Commons of the Dominion is elected by the people, for five years, unless sooner dissolved, at the rate at present of one representative for every 22,688, the arrangement being that the province of Quebec shall always have 65 members, and the other provinces proportionally according to their populations at each decennial census. On the basis of the census of the Dominion taken in April, 1901, and in accordance with a redistribution bill passed in 1903, the House of Commons consists of 215 members—86 for Ontario, 65 for Quebec, 18 for Nova Scotia, 13 for New Brunswick, 10 for Manitoba, 7 for British Columbia, 5 for Prince Edward Island, 10 for the North-West Territories, and 1 for Yukon Territory.

The members of the House of Commons are elected by constituencies, the electors of which are supplied by franchises under the control of the several provincial assemblies, an Act having been passed to that effect in the session of 1898. The qualifications for voting at provincial elections vary in the several provinces. Voting is by ballot.

The Speaker of the House of Commons has a salary of 4,000 dollars per annum, and each member an allowance of 10 dollars per diem, up to the end of 30 days, and for a session lasting longer than this period the sum of 1,000 dollars, with, in every case, 10 cents per mile for traveling expenses. The sum of 8 dollars per diem is deducted for every day's absence of a member, unless the same is caused by illness. There is the same allowance for the members of the Senate of the Dominion.

Dominion Executive Officers.—

Governor General.

Premier and President of Privy Council.

Minister of Public Works.

Minister of Customs.

Minister of Militia and Defense.

Minister of Agriculture.

Minister of Finance.

Minister of Justice.

Minister of Marine and Fisheries.

Minister of the Interior.

Minister of Railways and Canals.

Minister without Portfolio.

Secretary of State.

Postmaster-General.

Rulers since 1867.—

Lord Monck, Governor General. 1867-1868.

Lord Lisgar, Governor General. 1868-1872.

Earl Dufferin, Governor General. 1872-1878.

Marquis of Lorne, Governor General. 1878-1883.

Marquis of Lansdowne, Governor General. 1883-1888.

Baron Stanley of Preston, Governor General. 1888-1893.

Earl of Aberdeen, Governor General. 1893-1898.

Earl of Minto, Governor General. 1898-1904.

Earl Grey, Governor General. 1904-

Each of the ministers has a salary, fixed by statute, of 7,000 dollars, or 1,400*l.* a year, with the exception of the recognized Prime Minister, who has 8,000 dollars, or 1,600*l.*, and the Ministers of Customs and Inland Revenue, who have each 5,000 dollars a year. The body of ministers is officially known as the "King's Privy Council of Canada." The Governor General has a salary of 10,000*l.* per annum.

Provincial Government.—The nine provinces forming the Dominion have each a separate Parliament and administration, with a Lieutenant Governor at the head of the executive. They have full powers to regulate their own local affairs and dispose of their revenues, provided only they do not interfere with the action and policy of the central administration. The Lieutenant Governors are appointed by the Governor General. Quebec and Nova Scotia have each two Chambers (a Legislative Council and a Legislative Assembly) and a responsible Ministry. In New Brunswick, Ontario, Manitoba, British Columbia, and Prince Edward Island there is only one Chamber (the Legislative Assembly) and a responsible Ministry. The members of the Legis-

lative Council of Nova Scotia number 21, and Quebec 24. The membership of the Legislative Assemblies are: Prince Edward Island 30, Nova Scotia 38, New Brunswick 41, Quebec 73, Ontario 94, Manitoba 40, British Columbia 33, and the North-West Territories 26. The North-West Territories are presided over by a Lieutenant Governor and a Legislative Assembly. The Executive Council consists (since October 1, 1897) of the Lieutenant Governor and five members, elected, as such, by the people.

Instruction.—All the provinces of the Dominion have one or more universities, and several colleges which prepare for university degrees. There are in all about 16 degree-granting bodies in the Dominion, with about 24 colleges, including denominational, medical and other special institutions. From special official statistics of these institutions it may be estimated that they are attended by about 13,000 students, and their total annual expenditure is upwards of \$700,000, while the estimated value of their endowments, buildings, land, etc., is over \$16,000,000.

The expenditure for the year on public and high schools, including Government grants, was over \$10,000,000. The supervision of education is under the control of the Governments of the several provinces, and the systems in use vary somewhat, but are all based on the principle of free education, the funds being supplied in nearly all the provinces by Government grants and local taxation. In British Columbia and the North-West Territories the schools are supported wholly by Government. Education is more or less compulsory in all the provinces, but the law is not very strictly enforced. In Ontario, Quebec, and the North-West Territories there are separate schools for Roman Catholics; in the other provinces the schools are unsectarian. Separate schools in Manitoba were abolished by a Provincial Act passed in 1890.

Justice.—There is a Supreme Court in Ottawa, having appellate, civil, and criminal jurisdiction in and throughout Canada. There is also an exchequer court, which is also a colonial court of admiralty, with powers as provided in the Imperial "Colonial Courts of Admiralty Act, 1890." There is a Superior Court in each province; county courts, with limited jurisdiction, in most of the provinces; all the judges in these courts being appointed by the Governor General. Police magistrates and justices of the peace are appointed by the Provincial Governments.

Religion.—There is no State Church in the whole of British North America. The Church of England is governed by twenty bishops, with about 1,000 clergy; the Roman Catholic Church by one cardinal, seven archbishops, twenty-three bishops, and about 1,500 clergy; and the Presbyterian Church in Canada, with about 1,000 ministers—formed in 1875 by the union of two formerly distinct bodies—by presbyteries, synods, and an annual assembly as in the Scotch Church, with 2,368 churches and stations. The Methodists have 1,700 and the Baptists about 500 ministers. All these bodies have one or more divinity schools. The number of members of each religious creed in the Dominion was as follows at the census of April 6, 1891:—

| | | | |
|----------------------|-----------|---------------------------|-----------|
| Roman Catholics..... | 1,992,017 | Congregationalists..... | 28,157 |
| Presbyterians..... | 755,328 | Miscellaneous creeds..... | 106,739 |
| Anglicans..... | 646,059 | No creed stated..... | *89,365 |
| Methodists..... | 847,765 | | |
| Baptists..... | 303,839 | Total..... | 4,833,239 |
| Lutherans..... | 63,982 | | |

* Including Pagans.

The following shows the numbers of the leading denominations in the several provinces according to the census of 1891:—

| PROVINCE. | Roman Catholic. | Church of England. | Presbyterian. | Methodist. | Baptist. |
|--------------------------|-----------------|--------------------|---------------|------------|----------|
| Ontario..... | 358,300 | 385,999 | 453,147 | 654,033 | 106,447 |
| Quebec..... | 1,291,709 | 75,472 | 62,673 | 39,544 | 7,301 |
| Nova Scotia..... | 122,452 | 64,410 | 108,952 | 54,195 | 83,122 |
| New Brunswick..... | 115,961 | 43,095 | 40,639 | 35,504 | 79,349 |
| Manitoba..... | 20,571 | 30,852 | 39,001 | 28,437 | 16,112 |
| British Columbia..... | 20,843 | 23,619 | 15,284 | 14,298 | 8,998 |
| Prince Edw'd Island..... | 47,837 | 6,646 | 33,072 | 13,596 | 6,265 |
| The Territories..... | 14,344 | 16,966 | 12,558 | 8,158 | 1,555 |

Production and Industry.—Agriculture.—Of the total area of Canada in 1891, there were 28,537,242 acres of improved land, out of 60,287,730 acres of occupied land. Of the improved lands, 19,904,826 acres were under crop, being 4,792,542 acres more than were under crop in 1881. The acreage under pasture in 1891 was 15,284,788 acres, an increase of 8,899,226 acres since 1881. The acreage under wheat in 1891 was 2,723,861 acres, an increase of 381,506 acres in ten years. The average yield of 1891 per acre was 15.4 bushels, an increase of 1.6 bushels per acre over the yield of 1881. There is a central experimental farm near Ottawa, and others in several of the provinces. In 1895 there were 196 ranches in the N.-W. Territories, covering an area of 904,18" acres.

Forestry.—The timber wealth of Canada is very large, and timbering one of its most important industries. The forest area is estimated at 1,248,798 square miles. The forest products of 1891 were valued at 80,071,415 dollars, of which 27,207,547 dollars were exported. The census returns show an aggregate of 2,045,073,072 cubic feet as the total cut of the year. The forest products exported to the United Kingdom in 1897 amounted in value to 14,973,292 dollars out of a total of 32,937,976 dollars. The recently introduced wood pulp industry is increasing rapidly, the exportable surplus being 741,960 dollars in 1897, chiefly going to Great Britain and the United States. The Crown forests belong to the Provincial Governments, except in Manitoba, the N.-W. Territories, and the Railway Belt (forty miles wide) in British Columbia, where they belong to the Dominion.

Fisheries.—The total value of the produce of the fisheries of Canada in 1896 was 20,407,424 dollars; in 1895, 20,186,298 dollars. The values of the principal catches in 1896 were: cod, 3,610,979 dollars; salmon, 4,009,679 dollars; herring, 2,909,744 dollars; lobsters, 2,205,762 dollars; and mackerel, 727,743 dollars. In 1896, according to provinces, the values were: Nova Scotia, 6,070,896 dollars; British Columbia, 4,183,999; New Brunswick, 4,799,433; Quebec, 2,025,754; Ontario, 1,606,674; Prince Edward Island, 976,126; Manitoba and N.-W. Territories, 745,543.

Mining.—Nova Scotia, British Columbia, Quebec, N. and W. Ontario, and part of the N.-W. Territories, are the chief mining districts of Canada. The total value of the mineral produce of Canada was, in 1897, 28,779,173 dollars; in 1896, 22,609,825 dollars. The principal product is coal, of which, in 1896, 3,745,716 tons were raised, valued at 7,226,462 dollars; in 1897, 3,876,201 tons, valued at 7,442,204 dollars. Among the other minerals produced in 1897 were gold, 6,190,000 dollars; nickel, 1,400,000 dollars; asbestos, 324,700 dollars; petroleum, 1,011,646 dollars; copper, 1,501,660 dollars; silver, 3,322,000 dollars; lead, 1,356,850 dollars; iron ore, 178,719 dollars. It is estimated that the coal-bearing area of the N.-W. Territories extends over 65,000 square miles.

Capital.—The capital of Canada was transferred in 1841 from Kingston to Montreal, and in 1842 serious riots arose resulting in the burning of the Parliament Houses on the 26th of April, over the question of compensation for those who had suffered losses during the recent rebellion. The riots were in reality caused by the hostility of the British and French inhabitants. One of the results was the establishment of two seats of government, one at Toronto and the other at Ottawa, Parliament sitting four years in each city alternately. Ottawa later on was made the capital of Canada and eventually of the Dominion.

Naturalization.—No question of naturalization arises in connection with the emigration of British subjects to Canada. Settling in the Dominion makes no more change in this respect than a removal from York, Glasgow, Swansea, or Dublin to London, and a new arrival has all the privileges of a Canadian born fellow subject. For foreigners the Canadian naturalization laws are marked by a spirit of liberality, and such persons can transact any business and hold real estate without being naturalized. By residing three years and taking the oath of allegiance they become naturalized British subjects. The oath is one of simple allegiance and does not require any offensive renunciations. Naturalization confers political and all other rights.

Money and Credit.—The Bank Acts of Canada impose stringent conditions as to capital, notes in circulation, limit of dividend, returns to the Dominion Government, and other points in all chartered and incorporated banks. In making payments every bank is compelled if required to pay a certain proportion in Dominion Government notes, and must hold not less than 40 per cent. of its cash reserve in Dominion Government notes. In 1897 there were 37 incorporated banks

making returns to the Government, with 575 branches all over the Dominion.

Post-office savings banks under charge of the Government have been in operation in Canada since 1868; there are also Government savings banks, under the management of the Finance Department, in the Maritime Provinces, Manitoba, and British Columbia. In 1897 there were 779 offices of the former and 28 of the latter. In 1897 the post-office savings banks had 135,737 depositors and \$2,380,829 dollars on deposit.

Internal Communications. Canada has a system of canal, river, and lake navigation over 2,700 miles in length, and vessels from the lake ports reach the Atlantic without breaking bulk. Up to 1897, 71,750,000 dollars had been spent on canals for construction alone. In 1896, 25,622 vessels, of 4,677,826 tons, passed through the Canadian canals, carrying 151,342 passengers and 3,413,674 tons of freight, chiefly grain, timber, and coal.

The Dominion of Canada had a network of railways of a total length of 16,687 miles completed at the end of June, 1897, being an increase of 300 miles over that of 1896. The number of miles in operation was 16,530. The Canadian Pacific Railway main line from Montreal to Vancouver is 2,906 miles in length. By means of this railway and a line of Pacific steamers subsidized by the Imperial and Dominion Governments, Montreal and Yokohama have been brought within 14 days of one another. There is a monthly steam service between Australia and British Columbia, for which the Dominion Government gives 25,000 a year and the Australian 12,000 a year.

The number of electric railways in Canada in 1897 was 26, with a mileage of 535; the number of passengers carried during the year was 83,811,306; the total paid up capital was 18,727,355 dollars, and the bonded debt, 9,894,423 dollars.

On June 30, 1897, there was 9,191 post offices in the Dominion. During the year ended on the foregoing date the number of letters sent through the post office was 123,830,000, of post cards 26,140,000, of newspapers, books, etc. 26,640,000, and of parcels 369,570. Newspapers sent from the office of publication are carried free. Their number in 1897 was estimated at upwards of 74,519,976. The letters and post cards posted amounted to 28.58 per head, and the other articles to 19.54 per head. Revenue, 4,311,243 dollars; expenditure, 4,897,783 dollars. A uniform rate of postage of three cents has been established over the whole Dominion. The number of money order offices in Canada in 1897 was 1,349 and of orders issued 1,162,209, their value having been 13,681,860 dollars.

There were 29,318 miles (2,786 being Government) of telegraph lines in Canada in 1897 and 70,761 miles of wire, with 2,572 offices, and the number of messages sent, as nearly as could be ascertained, 4,313,925. There were in 1894, 44,000 miles of telephone wire, and 33,500 sets of instruments; 72,500,000 messages were sent. The returns for 1897 do not vary greatly from those of 1894.

Area, Population, and Seats of Government of the Provinces.

| PROVINCES. | Area, Square Miles.* | Population, 1891. | Seats of Government. |

ARGENTINE REPUBLIC.

The Constitution of the Argentine Republic, formerly known by the name of "Provincias Unidas del Río de la Plata," bears date May 15, 1853, with modifications in 1860, when Buenos Ayres joined the confederacy. By its provisions, the executive power is left to a President, elected for six years by representatives of the fourteen provinces, equal to double the number of senators and deputies combined; while the legislative authority is vested in a National Congress, consisting of a Senate and a House of Deputies, the former numbering 80, two from the capital and from each province, elected by a special body of electors in the capital, and by the legislatures in the provinces; and the latter 133 members elected by the people. By the constitution as revised in 1898, there should be one deputy for every 33,000 inhabitants. A deputy must be 25 years of age, and have been a citizen for four years. The deputies are elected for four years, but one half of the House must retire every two years. Senators must be 30 years of age, have been citizens for six years, and have an annual income of 12,000 dollars. One third of the Senate is renewed every three years. The two chambers meet annually from May 1 to September 30. The members of both the Senate and the House of Deputies are paid for their services, each receiving 12,000 pesos per annum. A Vice-President, elected in the

same manner and at the same time as the President, fills the office of Chairman of the Senate, but has otherwise no political power. The President is commander-in-chief of the troops, and appoints to all civil, military, and judicial offices, and has the right of presentation to bishoprics; he is responsible with the ministry for the acts of the executive; both President and Vice-President must be Roman Catholics, Argentine by birth, and cannot be re-elected.

The Ministry, appointed by and acting under the orders of the President, consists of eight Secretaries of State — namely, of the Interior, Foreign Affairs, Finance, War, Justice, Agriculture, Marine, and Public Works.

The President has a salary of 72,000 dollars, the Vice-President of 36,000 dollars, and each of the five ministers of 16,800 dollars per annum.

Local Government.—The Constitution, with certain small exceptions, is identical with that of the United States. Such matters as affect the Republic as a whole are under the superintendence of the Central Government. The governors of the various provinces are invested with very extensive powers, and in their constitutional functions are independent of the central executive. They are not appointed by the President of the Republic, but elected by the people of each province for a term of three years and four years. The provinces elect their own legislatures, and have complete control over their own affairs; they can contract loans (internal and external) under their sole and exclusive responsibility.

Religion and Instruction.—Although the Constitution recognizes the Roman Catholic religion as that of the State, all other creeds are tolerated. There are 1 archbishop and five suffragan bishops. For the instruction of the clergy there are 5 seminaries. In 1888 civil marriage was established in the Republic.

Primary education is free, secular, and compulsory for children from 6 to 14 years of age. The elementary schools are supported in the capital and each province by the taxes established in their Education Acts, aided by large subsidies from the general Government.

There are also 35 normal schools with 2,011 pupils. There are 3 universities, at Cordova, Buenos Ayres, and La Plata, comprising faculties of law, medicine, and engineering, with a total of 3,000 students; a school of mines (39 students), 1 college of agriculture, a naval and military school. There is a well-equipped national observatory at Cordova, and another at La Plata, museums at Buenos Ayres and La Plata, and a meteorological bureau.

Justice.—Justice is exercised by a Supreme Court of five judges and an attorney-general, which is also a court of appeal, and by a number of inferior and local courts, trial by jury being established by the Constitution for criminal cases. Each State has its own judicial system.

AUSTRIA-HUNGARY.

Austria and Hungary, or, as in international relations they are officially called, the Austro-Hungarian monarchy, consists of two States,—the Austrian Empire and the Hungarian Kingdom. The relation between the two States in its present form was fully regulated by the so-called Compromise of 1867. According to this agreement the two States are perfectly independent of each other, possessing each its own constitution, its legislative power, and its executive departments for most branches of State affairs. There is, however, a close polit-

ical connection between them through the identity of the Sovereign and the community of certain departments of state affairs.

The common head of the monarchy is the Emperor (Kaiser) of Austria and King (Király) of Hungary. The crown is hereditary in the Habsburg-Lothringen dynasty, passing by right of primogeniture and lineal succession to males and (on failure of males) to females. The monarch must be a member of the Roman Catholic Church. He is styled "His Imperial and Royal Apostolic Majesty," being "Emperor of Austria, King of Bohemia, etc., and Apostolic King of Hungary."

Affairs common to the two States are:—(1) Foreign affairs; (2) military and naval affairs, but excluding legislation concerning the army; (3) finance relating to common affairs, but each State provides separately for the assessment, collection, and transmission of its contribution. The two States, moreover, form one commercial territory, having the same system of coinage and of weights and measures, a joint bank of issue, and the same commercial (as well as political) representation abroad, while the monopolies and taxes connected with industrial production (salt, tobacco, spirits, beer, sugar, and mineral oil) are the same in both. This commercial union, unlike the political connection, which has a permanent character, depends on a compromise renewable every ten years.

Legislative power relating to common affairs is exercised by the Parliaments of both States, but the voting of money to be applied to common purposes, and the control of the official action of the common ministries, belong to the so-called Delegations. Of these there are two, each consisting of 60 members, of whom 20 are chosen from each of the Upper Houses (the Austrian Herrenhaus and the Hungarian Fürstentag), and 40 from each of the Lower Houses (the Austrian Abgeordnetenhaus and the Hungarian Képviselőház). The members are appointed for one year. The Delegations are summoned annually by the Emperor, alternately at Vienna and Budapest. They deliberate independently of each other, their decisions being communicated reciprocally in writing; and if, after three such interchanges, they do not agree, then all the delegates (or an equal number of members from each Delegation) meet together, and, without discussion, settle the matter by vote. The three ministries or executive departments for common affairs are:—

1. *The Common Ministry of Foreign Affairs and of the Imperial House.*
2. *The Common Ministry of War.*
3. *The Common Ministry of Finance.*

To these departments must be added :—
The Common Court of Public Accounts.

The ministers are responsible for the discharge of their official functions to the Delegations.

Religion.—In Austria the relation of the State to the religious bodies is regulated by the statutes of December 21, 1867, and of May 25, 1878. In these the leading principle is religious liberty, the independence of the Church as regards the State, saving the rights of the sovereign arising from ecclesiastical dignity. Full liberty of faith and conscience is secured, and the enjoyment of civil and political rights is independent of religious profession. Every religious body, legally recognized, has the right of ordinary public worship, the management of its own affairs, and the undisturbed possession of its premises, endowments, and funds for the purposes of worship, instruction, or charity. Recognized religious bodies in Austria are: The Roman Catholic, Old Catholic, Greek-Oriental, Evangelical (Augsburg or Lutheran, and Helvetian or Reformed), the Evangelical Brotherhood, the Gregorian-Armenian, and the Jewish. The Minister for Ecclesiastical Affairs will grant legal recognition to any religious bodies if their doctrine, worship, constitution, and designation contain nothing illegal or immoral.

In Hungary there is perfect equality among all legally recognized religions. These are: The Roman and Greek Catholic, the Evangelical (Augsburg and Helvetian), the Greek-Oriental, the Gregorian-Armenian, the Unitarian, and the Jewish. Each has the independent administration of its own affairs.

Justice.—In Austria the ordinary judicial authorities are:—

(1) The Supreme Court of Justice and Court of Cassation (Oberste Gerichts- und Kassationshof) in Vienna. (2) The 9 higher provincial courts (Oberlandesgerichte). (3) The 71 provincial and district courts (Landes- und Kreisgerichte), and, in connection with these, the jury courts (Geschworenengerichte). (4) The 945 county courts (Bezirksgerichte). Of these the third and fourth groups are courts of first instance; the second group consists of courts of second instance. Courts of first instance act as courts of inquiry and have summary jurisdiction. Courts of second instance are courts of appeal from the lower courts, and have the supervision of the criminal courts in their jurisdiction. The jury courts try certain cases where severe penalties are involved, political offenses, and press offenses. The county courts exercise jurisdiction in cases of misdemeanor in the counties, and co-operate in preliminary proceedings regarding crime.

There are in all for Austria 71 provincial and 937 county or district courts.

There exist also special courts for commercial, revenue, military, and other matters.

In case of conflict between different authorities the Imperial Court (Reichsgerichte) in Vienna has power to decide.

In Hungary the ordinary judicial authorities are:—

The Royal Court (kir. kuria) in Budapest and the Supreme Court of Justice (Table of Septemvirs) in Zagráb (Agram), of the highest instance in all civil and criminal matters; 12 Royal Tables (királyi táblák) of second instance. As courts of first instance, 76 courts (törvényszékek) with collegiate judgeships; 458 county courts (járásbíróságok) with single judges; 15 jury courts (sajtóbíróságok) for press offenses, besides an army special court.

Instruction.—Public education in Hungary comprises the following grades: (1) Infant schools; (2) elementary schools; (3) middle or secondary schools, gymnasia and realschools (in Croatia and Slavonia, realschools); (4) preparatory and training institutions for infant-school nurses and male and female teachers; (5) academies (high schools) of law; (6) institutions for religious education; (7) universities; (8) polytechnicum (technical high school). The schools for special subjects, such as agricultural, industrial, commercial, mining, and military schools, are for the greater part administered by the competent ministries, while the philanthropic and artistic schools are placed under the authority of the Ministry of Public Instruction.

Compulsory school attendance was established by law in 1868, for children of six to twelve years, and repetition courses for children of twelve to fifteen years; the industrial law of 1872 requires special courses for ap-

prentices; and by the law of 1891, children from three to six years of age may be sent to infant schools, unless otherwise provided for.

Every parish or commune is bound to maintain an infant school.

The educational organization of Austria comprises:— (1) Elementary schools; (2) gymnasia and realschools; (3) universities and colleges; (4) technical high schools; and (5) schools for special subjects.

The erection of elementary schools is incumbent on the school districts. Compulsory attendance begins with the completion of the sixth year, and continues in Austria generally, till the completion of the fourteenth.

In Austria there are eight universities maintained by the State, each comprising four faculties, viz.: theology, law, medicine, philosophy.

| Universities. | Professors, etc. | Students | Universities. | Professors, etc. | Students |
|-----------------|------------------|----------|---------------|------------------|----------|
| Vienna | 540 | 6,611 | Cracow | 177 | 1,523 |
| Prague (German) | 144 | 1,308 | Lemberg | 149 | 1,640 |
| Bohemian | 209 | 2,184 | Innsbruck | 94 | 1,019 |
| Graz | 166 | 1,510 | Czernowitz | 50 | 669 |
| | | | Total | 1,529 | 17,451 |

In addition to the universities there are in Austria 48 theological colleges, viz.: 44 Roman Catholic, 1 Greek Catholic, 1 Armenian Catholic, 1 Greek Oriental, and 1 Protestant, with a total of 2,068 students.

There are six Government technical high schools for various branches of engineering and technical chemistry, and a high school for agriculture in Vienna.

BELGIUM.

According to the Constitution of 1831 Belgium is "a constitutional, representative, and hereditary monarchy." The legislative power is vested in the King, the Senate, and the Chamber of Representatives. The royal succession is in the direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. The King's person is declared sacred; and his ministers are held responsible for the acts of the Government. No act of the King can have effect unless countersigned by one of his ministers, who thus becomes responsible for it. The King convokes, prorogues, and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under eighteen years of age, which is declared to be the age of majority, the two Chambers meet together for the purpose of nominating a regent during the minority.

According to the law amending the constitution, promulgated 7th September, 1893, the Senate consists of members elected for eight years, partly directly, and partly indirectly. The number of Senators elected directly is proportioned to the population of each province, and is equal to half the number of members of the Chamber of Representatives. The

constituent body is similar to that which elects deputies to the Chamber, except that the minimum age of electors is fixed at thirty years. In 1901-02 the number of electors was 1,255,899, disposing of 2,046,872 votes. Senators elected indirectly are chosen by the provincial councils, two for each province with less than 500,000 inhabitants; three for each with a population up to 1,000,000; and four for each with over 1,000,000. No one, during two years preceding the election, must have been a member of the council appointing him. All senators must be at least forty years of age, and those elected directly must pay not less than 1,200 francs in direct taxes, or own immovable property in Belgium yielding an income of 12,000 francs. In provinces, however, where the number eligible for the Senate would be less than one in 5,000 of population, the list is extended to this proportion by admission of the most highly taxed. Sons of the King or, failing these, Belgian princes of the reigning branch of the Royal Family are by right senators at the age of eighteen, but have no voice in the deliberations till the age of twenty-five years.

The members of the Chamber of Representatives are elected directly. Their number is proportioned to the population, and cannot exceed one for every 40,000 inhabitants. They sit for four years, one half retiring every two years, except that after a dissolution a general election takes place. Every citizen over twenty-five years of age, domiciled for not less than one year in the same commune, and not legally disqualified, has a vote. Every citizen over thirty-five years of age, married or widower, with legitimate issue, and paying at least 5 francs a year in house tax, has a supplementary vote, as has also every citizen over twenty-five years of age owning immovable property to the value of 2,000 francs, or having a corresponding income from such property, or who for two years has derived at least 100 francs a year from Belgian funds either directly or through the Savings Bank. Two supplementary votes are given to citizens over twenty-five years of age who have received a diploma or certificate of higher instruction, or who fill or have filled offices or engaged in private professional practice, implying at least average higher instruction. No person has more than three votes; failure to vote is a misdemeanor, punishable by law. There were in 1896-97, 1,401,951 electors possessing, in all, 2,141,041 votes. Deputies must be not less than twenty-five years of age, and resident in Belgium. Each deputy has an annual indemnity of 4,000 francs (160*l.*), and a free pass over Govern-

ment railways between his home and the place of Session.

The Senate and Chamber meet annually in the month of November, and must sit for at least forty days; but the King has the power of convoking them on extraordinary occasions, and of dissolving them either simultaneously or separately. In the latter case a new election must take place within forty days, and a meeting of the Chambers within two months. An adjournment cannot be made for a period exceeding one month without the consent of the Chambers. Money bills and bills relating to the contingent for the army originate in the Chamber of Representatives.

The Executive Government consists of eight departments, under the following Ministers:—

President of the Council.

Minister of Railways.

Minister of War.

Minister of Finance.

Minister of Foreign Affairs.

Minister of Justice.

Minister of Interior and Public Instruction.

Minister of Agriculture and Public Works.

Minister of Industry and Labor.

Besides the above responsible heads of departments, there are a number of "Ministres d'Etat," without portfolio, who form a Privy Council called together on special occasion by the sovereign. The acting ministers, as such, do not form part of the Privy Council.

Local Government.—The provinces and communes (2,618 in 1902) of Belgium have a large amount of autonomous government. The provincial and communal electors are the same as those who elect the senators directly. Communal electors must have been domiciled at least three years in the commune, and a supplementary vote is given to owners of real property yielding an income of at least 150 francs. No one has more than 4 votes. In communes with over 20,000 inhabitants there are councillors elected directly, by single vote, by citizens enrolled on the communal electoral lists, and possessing the qualifications requisite for electors to the Councils of Industry and Labor; half the councillors are appointed by the workmen electors, and half by the electors who are industrial heads (*chefs d'industrie*). In communal elections vote by ballot is suppressed, except when there is merely a single mandate to be conferred. Candidates obtaining an absolute majority are declared elected; others have seats allocated in accordance with the system of "Proportional Representation." In the year 1901-02 there were 1,255,899 provincial and 1,146,482 communal electors. To be eligible to the Provincial or Communal Council, persons must be twenty-five years of age and domiciled in the province or commune. Half the Provincial Council is renewed every four years, and it meets fifteen days each year. There is a permanent deputation of six members elected, which is presided over by the Governor of the province. All provincial and communal interests, including local finances, are under the care of the Council, as far as they are not provided for in the general administration. The Communal Councils are elected for eight years, half being renewed every four years. In each commune there is a college composed of the burgomaster, president, and a certain number of aldermen, corresponding to the permanent deputation of the Provincial Council, and both are the organs of the central administration.

Religion.—The Roman Catholic religion is professed by nearly the entire population of Belgium. The Protestants number only 10,000, while the Jews number about 4,000. The State does not interfere in any way

with the internal affairs of either Catholic or Protestant Churches. Full religious liberty is granted by the Constitution, and part of the income of the ministers of all denominations is paid from the national treasury.

Instruction.—There are four universities in the kingdom, three of them with four "facultés," or branches of study, and one Louvain, nursery of the clergy, with five; Ghent and Liège are State universities, Brussels and Louvain free.

Attached to the universities are various special schools of engineering, arts, manufactures, mining, etc.

Besides the above public schools there are many private or free schools—about 80 colleges, 65 middle-class schools for boys, 150 institutions for girls, besides many infant, primary, and adult schools, mostly under ecclesiastical care.

Justice.—Judges are appointed for life by the King from lists prepared by the Senate and by the Court. There is one Court of Cassation for the whole kingdom. There are three Courts of Appeal, and there are Assize Courts for criminal cases. The country is divided into 26 judicial arrondissements or districts, in each of which is a Court of first instance. In each canton there is a justice of the peace, a police court, and a judge of the peace; there are 222 such cantons. There are, besides, special military, commercial, and other tribunals. There is trial by jury in all criminal and political cases. The Gendarmerie (2,991) and the Garde Olivique are utilized for the maintenance of internal order.

BRAZIL.

In 1807 the royal family of Portugal fled to Brazil; in 1815 the colony was declared "a kingdom"; and the Portuguese Court having returned to Europe in 1821, a National Congress assembled at Rio de Janeiro, and on May 13, 1822, Dom Pedro, eldest son of King Joao VI. of Portugal, was chosen "Perpetual Defender" of Brazil. He proclaimed the independence of the country on September 7, 1822, and was chosen "Constitutional Emperor and Perpetual Defender" on October 12 following. In 1831 he abdicated the crown in favor of his only son, Dom Pedro II., who reigned as Emperor until November 15, 1889, when by a revolution he was dethroned, and he and his family exiled, and Brazil declared a Republic under the title of the United States of Brazil.

General Deodoro Fonseca was the first President. On November 23, 1891, he resigned, and Vice-President Peixoto took his place. Dissatisfaction, occasioned principally by military interference in the States, led to a rising in Rio Grande do Sul, and to a naval revolt in the Bay of Rio de Janeiro. The rising in the South terminated in August, 1895, and the naval revolt was suppressed in March, 1894.

According to the constitution adopted by the National Congress in February, 1891, the Brazilian nation is constituted as the United States of Brazil. Each of the old Provinces forms a State, administered at its own expense without interference from the Federal Government save for defense, for the maintenance of order, and for the execution of the Federal laws. Fiscal arrangements in such matters as import duties, stamps, rates of postage, and bank note circulation belong to the Union;

but export duties are the property of the various States.

The legislative authority is exercised by the National Congress with the sanction of the President of the Republic. Congress consists of the Chamber of Deputies and the Senate. It meets annually on the 3d of May, without being convoked, unless another day be fixed by law, and sits four months, but may be prorogued or convoked extraordinarily. No member of Congress, after his election, can contract with the executive power or accept any commission or paid office, except such as are diplomatic or military or imposed by law. If, in ordinary circumstances, the acceptance of diplomatic or military office would cause the loss of the legislative services of a member, the permission of the Chamber is required. Nor can any member of Congress take part in the administration of any company which receives a subsidy from the Federal Government. Deputies and Senators are paid, and neither can be Ministers of State, and retain at the same time their seats in Congress. Deputies must have been Brazilian citizens for four years. Senators must be over thirty-five years of age and must have been citizens for six years.

The Chamber of Deputies consists of 212 members elected for three years by direct vote (providing for the representation of the minority), in a proportion not greater than one to every 70,000 of population as shown by a decennial census, but so that no State will have less than four representatives. It has the initiative in legislation relating to taxation.

Senators, 63 in number, are chosen by direct vote, three for each state, and for the Federal district, for nine years, and the Senate is renewed to the extent of one third every three years. The Vice-President of the Republic is President of the Senate.

The executive authority is exercised by the President of the Republic. He must be a native of Brazil, over thirty-five years of age. His term of office is four years, and he is not eligible for the succeeding term. The President and the Vice-President are elected by the people directly, by an absolute majority of votes. The election is held on the 1st of March in the last year of each presidential period in accordance with forms prescribed by law. No candidate must be related by blood or marriage, in the first or second degree, to the actual President or Vice-President, or to either who has ceased to be so within six months.

The President has the nomination and dismissal of ministers, supreme command of the army and navy, and, within certain limits, the

power to declare war and make peace. He (with the consent of Congress) appoints the members of the Supreme Federal Tribunal and the diplomatic ministers. No minister can appear in Congress, but must communicate by letter, or in conference with commissions of the Chambers. Ministers are not responsible to Congress or the Tribunals for advice given to the President of the Republic.

The franchise extends to all citizens not under twelve years of age, duly enrolled, except beggars, "illiterates," soldiers actually serving, and members of monastic orders, etc., under vows of obedience.

There are six Secretaries of State at the head of the following Departments:—

1, Finance; 2, Justice, Interior and Public instructions; 3, War; 4, Marine; 5, Foreign Affairs; 6, Industry, Communications and Public Works.

In 1885 a bill was passed for the gradual extinction of slavery, and on May 13, 1888, an act was passed repealing all former acts on the subject, and abolishing slavery from the day of the promulgation of the law.

Local Government.—According to the new Constitution each State must be organized under the republican form of government, and must have its administrative, legislative, and judicial authorities distinct and independent. The governors and members of the legislatures must be elective; the magistrates must not be elective nor removable from office save by judicial sentence. The Federal executive cannot intervene directly in the local government of the States. In cases of obstinate infringement of the Federal Constitution by State authorities the only resource of the central power is an appeal to the Supreme Tribunal of Federal District. The Federal District is administered by a council elected by the citizens of the District, the municipal executive authority being exercised by a Prefect appointed for four years by the President of the Republic. There are in Brazil 892 municipalities and 1,886 parishes.

Religion.—The established religion under the Empire was the Roman Catholic, but under the Republic the connection between Church and State has been abolished, and absolute equality declared among all forms of religion. The Federal Government continues to provide for the salaries and maintenance of the existing functionaries of the Catholic Church. The population in 1890 contained 14,179,615 Catholics; 143,746 Protestants; 3,300 of other faiths; and 7,257 of no religious profession.

Brazil constitutes an ecclesiastical province, with a metropolitan archbishopric, the seat of which is at Bahia, 11 suffragan bishops, 12 vicars-general, and 2,000 curates. For the private instruction of the clergy there are 11 seminaries.

Instruction.—Public instruction is divided into three distinct forms or classes—namely, primary; secondary, or preparatory; and scientific, or superior. The higher education is controlled by the central Government. There are two schools of medicine, four of law, four military and one naval school, a school of mines, and a polytechnic. In 1890 these schools had, in all, 2,916 pupils. There are, besides, the Lyceum of Arts and Trades with 2,277 pupils, and five other special schools with 575 pupils. Connected with the observatory at Rio is a school for astronomy and engineering. The two establishments for secondary education, called jointly the *Gymnasio Nacional* (old Pedro II. college), confer a degree, and are controlled by Federal Government. The States Governments are allowed to found gymnasia with similar organization and privileges, and to a certain extent control this branch of instruction. All other secondary schools are private. Examinations are always official. Primary instruction in the Federal Dis-

trict is under the charge of the municipality, and in the States under the municipal and State authorities. According to the Constitution education is, at all stages, under lay management, and primary education is gratuitous. The central department complain that they can get no data from the States on public instruction. It seems that education is nowhere compulsory in Brazil. In 1889 there were, it was officially stated, 7,500 public and private primary schools, attended by 300,000 pupils in all. The number of illiterates is returned at 8,365,997, or 84 per cent. of the population.

Justice.—There is a supreme tribunal of Justice at Rio de Janeiro; and a court of appeal in the capital of each State. There are courts of first and second instance, both in civil and criminal cases. Judges are appointed for life. There are also municipal magistrates and justices of the peace, who are elected, and whose chief function is to settle cases by arbitration.

CHILE.

The Republic of Chile threw off allegiance to the Crown of Spain by the declaration of independence of September 18, 1810, finally freeing itself from the yoke of Spain in 1818. The Constitution voted by the representatives of the nation in 1833, with a few subsequent amendments, establishes three powers in the State—the legislative, the executive, and the judicial. The legislative power is vested in the National Congress, consisting of two assemblies, called the Senate and the Chamber of Deputies. The Senate is composed of members, elected for the term of six years, in the proportion of one Senator for every three Deputies; while the Chamber of Deputies, composed of members chosen for a period of three years, consists of one representative for every 30,000 of the population, or a fraction not less than 15,000; both bodies are chosen by the same electors—the Chamber directly by departments, and the Senate directly by provinces on the cumulative system of voting. Electors must be 21 years of age, and be able to read and write. In 1887 there were 134,119 registered electors, or 1 to 18 of the population. In the election of deputies in March, 1888, 89,977 citizens voted, or 67 per cent. of those who had the right to vote. Deputies must have an income of 100*l.* a year, and Senators 400*l.* The executive is exercised by the President of the Republic, elected for a term of five years, by indirect vote, the people nominating, by ballot, delegates who appoint the President. A retiring President is not re-eligible. In legislation the President has a modified veto; a bill returned to the Chambers with the President's objections may, by a two-thirds vote of the members present (a majority of the members being present), be sustained and become law. The day of a Presidential election is June 25 of the last of the five years of a Presidency, and the inauguration takes place on September 18 of the same year.

The salary of the President is fixed at 18,000 pesos, with 12,000 pesos for expenses.

The President is assisted in his executive

functions by a Council of State, and a Cabinet or Ministry, divided into seven departments, under six Ministers, viz.: Of the Interior; of Foreign Affairs; of Worship and Colonization; of Justice and Public Instruction; of Finance; of War and Marine; of Industry and Public Works. The Council of State consists of five members nominated by the President, and six members chosen by the Congress.

Local Government.—For the purposes of local government the Republic is divided into Provinces, presided over by *Intendents*; and the Provinces into Departments, with *Gobernadores* as chief officers. The Departments constitute one or more municipal districts each with a council or municipality of 9 members, inhabitants popularly elected for three years. The police of Santiago and of the capitals of departments is organized and regulated by the President of the Republic at the charge of the national treasury.

Religion.—The Roman Catholic religion is maintained by the State, but according to the Constitution all religions are respected and protected. There is one archbishop and three bishops. For 1898 the amount of subsidies to the clergy and for building and other purposes was 678,888 pesos. Civil marriage is the only form acknowledged by law.

Instruction.—Education is gratuitous and at the cost of the State, but is not compulsory. It is divided into superior or professional, medium or secondary, and primary or elementary instruction. Professional and secondary instruction is provided in the University and the National Institute of Santiago, and in the lycées and colleges established in the capitals of provinces, and in some departments. In the University the branches included are law, physical and mathematical sciences, medicine, and fine arts. The number of students inscribed for the study of these branches in 1897 was 774. The number of students at the National Institute in 1897 was 1,278. There are 2 lycées for girls in Santiago maintained by Government. There are, besides, provincial colleges, normal, agricultural, and other special schools. At the seats of the bishops there are seminaries under ecclesiastics where instruction is given similar to that in the Government colleges. There were, in 1897, 1,321 public primary schools, with 109,058 pupils, and an average attendance of 65,507, and 2,298 teachers. There were also 411 private schools, with an attendance of 18,052. The National Library contains over 86,000 volumes of printed books, and 24,045 manuscripts. Other educational institutions are the Pedagogic Institute, the National Conservatory of Music, the National Observatory, School of Arts and Trades, Institute for Deaf Mutes, and public museums. In 1897 the cost of higher instruction to the State was 2,000,000 pesos; the cost of maintaining the elementary schools was 1,920,200 pesos; and the total cost of instruction supplied by the State, including buildings, pensions, books, etc., in 1897, was 5,633,021 pesos.

Justice.—There are, in addition to a High Court of Justice in the capital, six Courts of Appeal, Courts of First Instance in the departmental capitals, and subordinate courts in the districts.

CHINA.

The laws of the Chinese Empire are laid down in the Ta-ts'ing-hwei-tien, or "Collected Regulations of the Ts'ing dynasty," which prescribe the government of the State to be based upon the government of the family.

The supreme direction of the Empire is vested in the Chün Chi Ch'ü, the Privy Council, or Grand Council. The administration is under the supreme direction of the Nei-ko or Cabinet, comprising four members, two of Manchu and two of Chinese origin, besides two assistants from the Han-lin, or Great Col-

lege, who have to see that nothing is done contrary to the civil and religious laws of the Empire, contained in the Ta-ts'ing-hwei-tien and in the sacred books of Confucius. These members are denominated "Ta-hsiao-shih," or Ministers of State. Under their orders are the Papu, or eight boards of government, each of which is presided over by a Manchu and a Chinese. These boards are: (1) the board of civil appointments, which takes cognizance of the conduct and administration of all civil officers; (2) the board of revenues, regulating all financial affairs; (3) the board of rites and ceremonies, which enforces the laws and customs to be observed by the people; (4) the military board; (5) the board of public works; (6) the high tribunal of criminal jurisdiction; (7) the Wai-Wu-Pu; (8) the board of commerce.

Independent of the Government, and theoretically above the central administration, is the Tu-ch'a-yuen, or board of public censors. It consists of from 40 to 50 members, under two presidents, the one of Manchu and the other of Chinese birth. By the ancient custom of the Empire, all the members of this board are privileged to present any remonstrance to the sovereign. One censor must be present at the meetings of each of the Government boards.

The Tsungli Yamên, or Foreign Office, which was created by a decree of January 19, 1861, was superseded by the Wai-Wu-Pu, created by imperial decree in 1901. It controls not merely the matters with foreign nations, but also those institutions in which foreigners form part of the working staff, such as the Maritime Customs, and Peking University.

The present sovereign, reigning under the style of Kwangsii, is the ninth Emperor of China of the Manchu dynasty of Ts'ing, which overthrew the native dynasty of Ming, in the year 1644. There exists no law of hereditary succession to the throne, but it is left to each sovereign to appoint his successor from among the members of his family of a younger generation than his own. The late Emperor, dying suddenly in the eighteenth year of his age, did not designate a successor, and it was in consequence of arrangements directed by the Empress Dowager, widow of the Emperor Hien-Fêng, predecessor and father of T'ung-chi, in concert with Prince Ch'un, that the infant son of the latter was made the nominal occupant of the throne. Having become of age the young Emperor nominally assumed government in March, 1887. In February, 1889, he undertook the full control, but on September 22, 1898, an Imperial edict was issued:

announcing that the Emperor had resigned power to the Empress Dowager, who has since retained the direction of affairs.

Local Government.—Each of the 18 provinces is ruled by a Governor or Governor General, who is responsible to the Emperor for the entire administration, political, judicial, military, and fiscal. He is assisted by a council and various other officials, such as the Treasurer, the sub-Commissioner, and the Literary Chancellor. Each province is subdivided into departments ruled by prefects, and each department into districts, each with a district ruler. Two or more departments are sometimes united into a *tau*, the ruler of which is called a *tsudat*. Each town and village has also its governing body, and among the various rulers there is regular gradation of rank, each being responsible to his immediate superior. Political office in the general administration of the Empire is less sought after than the position of viceroy or governor in the provinces, where the opportunities of acquiring wealth, not from official salaries but from gifts, etc., are abundant.

Religion.—Three religions are acknowledged by the Chinese as indigenous and adopted; viz., Confucianism, Buddhism, and Taoism.

The Emperor is considered the sole high priest of the Empire, and can alone, with his immediate representatives and ministers, perform the great religious ceremonies. No ecclesiastical hierarchy is maintained at the public expense, nor any priesthood attached to the Confucian religion. The Confucian is the State religion, if the respect paid to the memory of the great teacher can be called religion at all. But distinct and totally separate from the stated periodic observances of respect offered to the memory of Confucius as the Holy Man of old, and totally unconnected therewith, there is the distinct worship of Heaven (T'ien), in which the Emperor, as the "sole high priest," worships and sacrifices to "Heaven" every year at the time of the winter solstice, at the Altar of Heaven in Peking. With the exception of the practice of ancestral worship, which is everywhere observed throughout the Empire, and was fully commended by Confucius, Confucianism has little outward ceremonial. The study and contemplation and attempted performance of the moral precepts of the ancients constitute the duties of a Confucianist. Buddhism and Taoism present a very gorgeous and elaborate ritual in China. Taoism—originally a pure philosophy—having abjectly copied Buddhist ceremonial on the arrival of Buddhism 1,800 years ago. Large numbers of the Chinese in Middle and Southern China profess and practice all three religions. The bulk of the people, however, are Buddhists. There are probably about thirty million Mahometans, chiefly in the northeast and southwest. Roman Catholicism has long had a footing in China, and is estimated to have about 1,000,000 adherents, with 25 bishoprics besides those of Manchuria, Tibet, Mongolia, and Corea. Other Christian societies have stations in many parts of the country, the number of Protestant adherents being estimated at 150,000. Most of the aboriginal hill tribes are still nature worshipers, and ethnically are distinct from the prevailing Mongoloid population.

Instruction.—Education of a certain type is very general, but still there are vast masses of adult countrymen in China who can neither read nor write. There is a special literary class who alone know the literature of their country, to the study of which they devote their lives. There are boarding schools and day schools for boys and young men, the latter being held in the entrance halls of temples and in the spare chambers of guilds, and in all the important cities there are colleges for training candidates for degrees. Examinations, mainly confined to moral philosophy and literature, are held in the prefectorial cities of each province twice in three years for the lower degree necessary as a passport to the public service, but of the six or seven thousand candidates who come forward, not more than sixty can be admitted to the degree by the Literary Chancellor. For the higher degree, examinations are held in each provincial capital once in three years, and the successful candidates are subjected to a third and fourth examination, those who finally emerge being divided into four classes to wait for appointments to offices of different grades. There are, however, other means (e.g. military service) by which such appointments may be obtained. In 1887, for the first time, mathematics were admitted with the Chinese classics among the subjects

of examination, and schools for the propagation of Western science and literature are now on the increase. The "Tung Wán Kwan," or College of Foreign Knowledge, at Peking, is a Government institution, where the English, French, German, Japanese, and Russian languages, and mathematics, chemistry, physiology, etc., are taught by European, Japanese, and American professors, while the Chinese education of the pupils is entrusted to Chinese teachers. There are, besides, numerous Catholic and Protestant mission schools and colleges at Shanghai and other ports, where the English language and lower branches of Western science are taught. The Chinese Government has of late years established naval and military colleges and torpedo schools in connection with the different arsenals at Tientsin, Nanking, Shanghai, and Foochow, in which foreign instructors are engaged to teach such young Chinese as intend to make their career in the army or navy of their country Western modes of warfare, besides Western languages and literature. Ten Chinese newspapers are published at Shanghai, and the success they have achieved has led to the establishment of others at some of the other treaty ports.

FRANCE.

Since the overthrow of Napoleon III., on September 4, 1870, France has been under a Republican form of government, confirmed on February 25, and June 16, 1875, by an organic law (*Constitution Wallon*), which has been partially modified in June, 1879, August, 1884, June, 1885, and July, 1889. It vests the legislative power in the Chamber of Deputies and the Senate, and the executive in the President of the Republic and the Ministry.

The President is elected for seven years, by a majority of votes, by the Senate and Chamber of Deputies united in a National Assembly, or Congress. He promulgates the laws voted by both Chambers, and ensures their execution. He selects a Ministry from the Chamber, appoints to all civil and military posts, has the right of individual pardon, and is responsible only in case of high treason. The President concludes treaties with foreign Powers, but cannot declare war without the previous assent of both Chambers. Every act of the President has to be countersigned by a Minister. With the consent of the Senate he can dissolve the Chamber of Deputies. In case of vacancy, the two Chambers united immediately elect a new President.

The Ministers or Secretaries of State, the number of whom varies, are usually, but not necessarily, members of the Senate or Chamber of Deputies. The President of the Council (Premier) chooses his colleagues in concert with the President of the Republic. Each Minister has the direction of one of the great administrative departments, and each is responsible to the Chambers for his acts, while the Ministry as a whole is responsible for the general policy of the Government.

The Ministry is constituted as follows:—

President of the Council and Minister of the Interior.

Minister of Finance.

Minister of Foreign Affairs.

Minister of War.

Minister of Marine.

Minister of Colonies.

Minister of Public Instruction and Worship.

Minister of Justice.

Minister of Commerce, Industry, and Posts and Telegraphs.

Minister of Agriculture.

Minister of Public Works.

The Chamber of Deputies is elected for four years, by universal suffrage, and each citizen 21 years old, not actually in military service, who can prove a six months' residence in any one town or commune, and not otherwise disqualified, has the right of vote. Deputies must be citizens and not under 25 years of age. The manner of election of Deputies has been modified several times since 1871. The *scrutin de liste*, under which each elector votes for as many Deputies as the entire department has to elect, was introduced in 1871. In 1876 it was replaced by the *scrutin d'arrondissement*, under which each department is divided into a number of *arrondissements*, each elector voting for one Deputy only; in 1885, there was a return to the *scrutin de liste*, and in 1889 the uninominal vote was reintroduced. In 1889 it was enacted that each candidate is bound to make, within the fortnight which precedes the elections, a declaration as to his being a candidate for a given constituency, and for one constituency only—all votes which eventually may be given for him in other constituencies being reckoned as void. Multiple elections and elections of persons previously condemned by the law courts are thus rendered impossible. The Chamber verifies the powers of its members. In each constituency the votes are cast up and the Deputy proclaimed elected by a commission of Councilors-General appointed by the Prefect of the department.

The Chamber is now composed of 584 Deputies; each *arrondissement* elects one Deputy, and if its population is in excess of 100,000, it is divided into two or more constituencies. There were 10,863,421 inscribed electors in 1901.

The Senate is composed of 300 members, elected for nine years from citizens 40 years old, one third retiring every three years. The election of the Senators is indirect, and is made by an electoral body composed (1) of delegates chosen by the Municipal Council of each commune in proportion to the population; and (2) of the Senators, Deputies, Councilors-General, and District Councilors of the department. Besides the 225 Departmental Senators elected in this way, there were, according to the law of 1875, 75 Senators elected for life by the united two Chambers; but by

the Senate Bill of 1884 it was enacted that vacancies arising among the Life Senatorships would be filled by the election of ordinary nine-years Senators, the department which should have the right to the vacant seat to be determined by lot. The Princes of deposed dynasties are precluded from sitting in either House.

The Senate and Chamber of Deputies assemble every year on the second Tuesday in January, unless a previous summons is made by the President of the Republic, and they must remain in session at least five months out of the twelve. The President is bound to convoke them if the demand is made by one half of the number of members composing each Chamber. The President can adjourn the Chambers, but the adjournment cannot exceed the term of a month, nor occur more than twice in the same session.

Bills may be presented either in the Chamber or Senate by the Government, or on the initiative of private members. In the first case they are remitted to the bureaux for examination; in the second, they are first submitted to a commission of parliamentary initiative. Financial laws must be first presented to and voted by the Chamber of Deputies.

The President and the Ministers may be impeached by the Chamber of high treason, in which case the Senate acts as a High Court of Justice. The same function is vested in the Senate for all other cases of high treason.

Senators and Deputies are paid 9,000 francs (£360) a year; and the Presidents of the two Chambers receive, in addition, 72,000 francs (£2,840) for the expense of entertainment. Members of both Chambers travel free on all railways by means of a small annual payment. The dotation of the President of the Republic is 600,000 francs, with a further allowance of 600,000 francs for his expenses.

France has, besides, a special institution under the name of *Conseil d'Etat*, which was introduced by Napoleon I., and has been maintained since. It is presided over by the Minister of Justice or (in his absence) by a vice-president, and is composed of Councilors, Masters of Requests (*Maîtres de Requêtes*), and Auditors, all appointed by the President of the Republic. Its duty is to give opinion upon such questions, chiefly those connected with administration, as may be submitted to it by the Government. It is judge in the last resort in administrative suits, and it prepares the rules for the public administration.

Local Government.—For administrative purposes France is divided into 86 departments, or 87 if the "territory of Belfort" (a remnant of the department of Haut-Rhin) be considered as a separate department. Since 1848 the three departments of Algeria are also treated,

for most purposes, as part of France proper. The department has representatives of all the Ministries, and is placed under a Prefect, nominated by Government, and having wide and undefined functions. He is assisted by a Prefectural Council, an administrative body, whose advice he may take without being bound to follow it. The Prefect is a representative of the Executive, and, as such, supervises the execution of the laws, issues police regulations, supplies information on matters which concern the department, nominates subordinate officials, and has under his control all officials of the State. There is a sub-Prefect in every *arrondissement*, except capitals of departments and the department of the Seine.

The unit of local Government is the *commune*, the size and population of which vary very much. There are 38,192 communes, and new ones cannot be created otherwise than by law. Most of them (31,690) have less than 1,500 inhabitants, and 18,471 have even less than 500; while 124 communes only have more than 20,000 inhabitants. The local affairs of the commune are under a Municipal Council, composed of from 10 to 36 members, elected by universal suffrage, and by the *scrutin de liste* for 4 years by Frenchmen after 21 years and 6 months' residence; but each act of the Council must receive the approval of the Prefect, while many must be submitted to the Council General, or even to the President of the Republic, before becoming lawful. Even the commune's quota of direct taxation is settled by persons (*répertoireurs*) chosen by the Prefect from among the lists of candidates drawn up by the Municipal Council.

Each Municipal Council elects a Mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the Prefect.

In Paris the Municipal Council is composed of 80 members: each of the 20 *arrondissements* into which the city is subdivided has its own Mayor. The place of the Mayor of Paris is taken by the Prefect of the Seine, and, in part, by the Prefect of Police. Lyons has an elected Mayor, but the control of the police is vested in the Prefect of the department of the Rhone.

The next unit is the *canton* (2 908 in France), which is composed of an average of 12 communes, although some of the largest communes are, on the contrary, divided into several cantons. It is a seat of a justice of the peace, but is not an administrative unit.

The district, or *arrondissement* (362 in France), has an elected *conseil d'arrondissement*, with as many members as there are *cantons*, its chief function being to allot among the communes their respective parts in the direct taxes assigned to each *arrondissement* by the Council General. That body stands under the control of the sub-Prefect. A varying number of *arrondissements* form a department, which has its *conseil général* renewed by universal suffrage.

Religion.—All religions are equal by law, and any sect which numbers 100,000 adherents is entitled to a grant; but at present only the Roman Catholics, Protestants, and Jews have State allowances.

Instruction.—Public education in France is entirely under the supervision of the Government. The highest schools, or "facultés de l'Etat," are now often designated by the name of universities. There are 15 "facultés des lettres," one in each academy (except Chambéry) at Paris, Aix, Besançon, Bordeaux, Caen, Clermont, Dijon, Lille, Grenoble, Lyon, Montpellier, Nancy, Poitiers, Rennes, and Toulouse. At all of these, except Aix, are also "facultés des sciences" besides one at Marseilles (instead of Aix, belonging to the same academy). There are also 2 "facultés" of Protestant theology, 13 "facultés de droit," and 7 "facultés de médecine et pharmacie," 19 superior or preparatory schools of pharmacy, and 8 schools of law, science, or letters. In January, 1898, there were 137 students of Protestant theology; 9,371 of law; 7,426 of medicine; 3,544 of sciences; 3,464 of letters; and 4,681 at superior and preparatory schools of pharmacy, etc.; total, 28,543 students. To the support of the "facultés" the sum of 12,496,911 francs was set down in the budget of 1899. The Roman Catholic theological "facultés" were suppressed in 1885. Catholic "facultés" or "écoles libres" exist on certain conditions as private establishments. The "Collège de France," "Muséum d'histoire naturelle," "Ecole pratique des hautes études," "Ecole des chartes," etc., are public establishments for highest education. The "Ecole libre des Sciences politiques" is a private establishment.

There are many other public establishments for spe-

cial training. For military and naval education: Ecole Supérieure de Guerre, Ecole Polytechnique, Ecole Spéciale Militaire de St. Cyr, Ecole Supérieure de la Marine, Ecole Navale de Brest, etc.; for civil services and industry: Ecole des Mines, Ecole des Ponts et Chaussées, Ecole Centrale des Arts et Manufactures, Ecole Supérieure des Hautes Etudes commerciales, Conservatoire des Arts et Métiers.

Elementary schools existed before the Revolution in the towns and in many of the rural parishes of France, but little was done for the advancement of education till near the first quarter of this century. In 1833 a law was passed requiring every commune to maintain at least one primary school, every town one higher primary school, and every department one primary normal school. A law of 1850 obliged every commune with a population of 800 (extended in 1867 to communes with a population of 500) to have a school for girls. Since 1878 elementary education has advanced rapidly; many schools have been built, the number of teachers and pupils has increased (until 1898), and the standard of education has been raised. In 1881 primary instruction was made free, and in 1882, obligatory for children from 6 to 13 years of age. In 1886 the system of education was reorganized, and it was ordained that all public schools should be under the charge of laymen. In 1892 there were only 50 communes which had no primary school, public or private.

Justice.—The Courts of First Instance in France are those of the Justices of Peace who try civil cases and act also as judges of Police Courts, where all petty offenses are disposed of. In criminal cases the Police Correctional Courts pronounce upon all graver cases of misdemeanour (*délits*), including cases involving imprisonment up to 5 years. They have no jury, and consist of 3 judges belonging to the civil tribunals. In all general cases, the preliminary inquiry is made in secrecy by an examining magistrate (*Juge d'instruction*), who, acting under the public ministry (*Procureur*), may dismiss the case or send it for trial. The Court of Assizes is assisted by 12 jurors, who decide by simple majority on the fact with respect to crimes involving a severe penalty. The highest courts are the 26 Courts of Appeal, composed each of one President and 4 Councillors for all criminal cases which have been tried without a jury, and by one Court of Cassation which sits at Paris, and is composed of a first President, 3 Presidents of Sections, and 45 Councillors, for all criminal cases tried by jury.

For civil cases there is, under the Justice of Peace, in each *arrondissement*, a civil tribunal of first instance, then the Appeal Courts and Courts of Cassation. For commercial cases there are Tribunals of Commerce and Councils of experts (*prud'hommes*).

All Judges are nominated by the President of the Republic. They can be removed only by a decision of the Court of Cassation constituted as the *Conseil Supérieur* of the magistracy.

GERMAN EMPIRE.

The present German Empire is essentially different from the Holy Roman Empire which came to an end in 1806. But though Austria, the most important factor in the earlier Empire, is not a member of the present, a brief historical summary, including both, is for convenience inserted here. The imperial throne, after the extinction of the Carolingian line, was filled by election, though with a tendency towards the hereditary principle of succession. At first the Emperor was chosen by the vote of all the Princes and Peers of the Reich; but the mode came to be changed in the fourteenth century, when a limited number of Princes, fixed at seven for a time, and afterwards enlarged to eight (nine from 1692 to 1777), assumed the privilege of disposing of the crown, and, their right being acknowledged, were called Electors. With the overthrow of the old Empire by the Emperor Napoleon, in 1806, the Electoral dignity virtually ceased, although the title of Elector was retained sixty years longer by the sovereigns of Hesse-Cassel, the last of them dethroned in 1866 by Prussia. The election of Wilhelm I., King of Prussia, as the German Emperor (1871) was by vote of the Reichstag of the North German Confederation, on the initiative of all the reigning Princes of Germany. The imperial dignity is hereditary in the House of Hohenzollern, and follows the law of primogeniture.

The Constitution of the Empire bears date April 16, 1871. By its terms, all the States of Germany "form an eternal union for the protection of the realm and the care of the welfare of the German people." The supreme direction of the military and political affairs of the Empire is vested in the King of Prussia, who, in

this capacity, bears the title of *Deutscher Kaiser*. According to Art. 11 of the Constitution, "the Emperor represents the Empire internationally," and can declare war, if defensive, and make peace, as well as enter into treaties with other nations, and appoint and receive ambassadors. But when treaties relate to matters regulated by imperial legislation, and when war is not merely defensive, the Kaiser must have the consent of the Bundesrath, or Federal Council, in which body, together with the Reichstag, or Diet of the realm, are vested the legislative functions of the Empire. The Emperor has no veto on laws passed by these bodies. The Bundesrath represents the individual States of Germany, and the Reichstag the German nation. The 58 members of the Bundesrath are appointed by the Governments of the individual States for each session, while the members of the Reichstag, 397 in number (about one for every 131,604 inhabitants), are elected by universal suffrage and ballot for the term of five years. By the law of March 19, 1888, which came into force in 1890, the duration of the legislative period is five years.

Both the Bundesrath and the Reichstag meet in annual session, convoked by the Emperor. The Emperor has the right to prorogue and dissolve, after a vote by the Bundesrath, the Reichstag. Without consent of the Reichstag the prorogation may not exceed thirty days; while in case of dissolution new elections must take place within sixty days, and a new session must open within ninety days. All laws for the Empire must receive the votes of an absolute majority of the Bundesrath and the Reichstag. The Bundesrath is presided over by the Reichskanzler, or Chancellor of the Empire, and the President of the Reichstag is elected by the deputies.

The laws of the Empire, passed by the Bundesrath and the Reichstag, to take effect must be promulgated by the Emperor, and the promulgation, like all other official acts of the Emperor, requires the counter-signature of the Chancellor of the Empire. All the members of the Bundesrath have the right to be present at the deliberations of the Reichstag.

The following are the imperial authorities or Secretaries of State: they do not form a Ministry or Cabinet, but act independently of each other, under the general supervision of the Chancellor.

1. *Chancellor of the Empire.*
2. *Ministry for Foreign Affairs.*
3. *Imperial Home Office and "Representative of the Chancellor."*
4. *Imperial Admiralty.*
5. *Imperial Ministry of Justice.*
6. *Imperial Treasury.*

7. Imperial Post Office.
8. Imperial Railways.
9. Imperial Exchequer.
10. Imperial Invalid Fund.
11. Imperial Bank.
12. Imperial Debt Commission.
13. Imperial Court Martial.

Acting under the direction of the Chancellor of the Empire, the Bundesrath represents also a supreme administrative and consultative board, and as such has twelve standing committees—namely, for army and fortifications; for naval matters; tariff, excise, and taxes; trade and commerce; railways, posts, and telegraphs; civil and criminal law; financial accounts; foreign affairs; for Alsace-Lorraine; for the Constitution; for the standing orders; and for railway tariffs. Each committee consists of representatives of at least four States of the Empire; but the foreign affairs committee includes only the representatives of Bavaria, Saxony, Württemberg, and two other representatives to be elected every year.

Religion.—The Constitution provides for entire liberty of conscience and for complete social equality among all religious confessions. The relation between Church and State varies in different parts of the Empire. The order of the Jesuits is interdicted in all parts of Germany, and all convents and religious orders, except those engaged in nursing the sick and purely contemplative orders, have been suppressed. There are five Roman Catholic archbishops, and twenty bishops. The "Old Catholics" have a bishop at Bonn.

The various creeds were distributed as follows at the last religious census, 1900:—

| Creed | Numbers | Per cent. of Pop. |
|----------------------|------------|-------------------|
| Evangelicals..... | 35,231,104 | 62.5 |
| Roman Catholics.... | 20,327,913 | 36.1 |
| Other Christians.... | 203,793 | 0.4 |
| Jews..... | 586,948 | 1.0 |
| Others..... | 17,635 | .03 |

Instruction.—Education is general and compulsory throughout Germany. The laws of Prussia, which provide for the establishment of elementary schools (*Volksschulen*), supported from the local rates, in every town and village, and compel all parents to send their children to these or other schools, have been adopted, with slight modifications, in all the States of the Empire. The school age is from six to fourteen. The system of secondary education is also practically homogeneous. Above the elementary schools rank the middle schools of the towns, the *Bürgerschulen* and *Höhere Bürgerschulen*, which fit their pupils for business life. Children of the working classes may continue their education at the *Fortbildungsschulen* or continuation schools, which are open in the evening or other convenient time. The *Gymnasia* are the most fully developed classical schools, preparing pupils in a nine years' course for the universities and the learned professions. The *Progymnasia* differ from these only in not having the highest classes. In the *Realgymnasia*, Latin, but not Greek, is taught, and what are usually termed "modern subjects" have more time devoted to them. *Realprogymnasia* have a similar course, but have no class corresponding to the highest class in the preceding. In the *Oberrealschulen* and *Realschulen* Latin is wholly displaced in favor of modern languages. In 1903, 1,122 secondary schools (including 56 private schools), also 185 public *Lehrer-Seminare* and 32 public *Fachschulen*, total 1,340 institutions, possessed the right of granting certificates to pupils, entitling them to serve in the army as one-year volunteers. The teachers in German schools are required to hold a Government certificate, and to have undergone a year's probation. Higher

schools for girls are called *Höhere Töchterschulen*. Besides these there are numerous *Gewerbeschulen* or technical schools, *Polytechnia*, normal schools, seminaries, and the universities.

There are 21 universities in the German Empire, besides the Lyceum Hosianum at Braunsberg (13 teachers and about forty students), which has only faculties of theology (Roman Catholic) and philosophy.

The following table gives the number of teachers for the summer half-year, 1903, and the number of students for the winter half-year, 1903-4.

| Universities. | Professors and Teachers. | Students. | | | | |
|-----------------|--------------------------|-----------|---------------|----------|------------|-------|
| | | Theology | Jurisprudence | Medicine | Philosophy | Total |
| Berlin..... | 372 | 441 | 1,984 | 1,360 | 2,150 | 5,935 |
| Bonn..... | 147 | 304 | 409 | 264 | 684 | 1,671 |
| Breslau..... | 164 | 324 | 443 | 345 | 365 | 1,497 |
| Erlangen..... | 68 | 240 | 182 | 434 | 112 | 1,068 |
| Freiburg..... | 115 | 218 | 249 | 392 | 214 | 1,073 |
| Gießen..... | 72 | 58 | 236 | 224 | 156 | 674 |
| Göttingen..... | 123 | 157 | 336 | 236 | 445 | 1,174 |
| Greifswald..... | 91 | 209 | 167 | 293 | 87 | 756 |
| Halle..... | 144 | 411 | 346 | 355 | 564 | 1,696 |
| Heidelberg..... | 147 | 54 | 340 | 203 | 487 | 1,084 |
| Jena..... | 96 | 35 | 153 | 198 | 241 | 632 |
| Kiel..... | 102 | 61 | 125 | 263 | 131 | 580 |
| Königsberg..... | 113 | 67 | 211 | 235 | 171 | 684 |
| Leipzig..... | 208 | 348 | 1,032 | 724 | 1,173 | 3,277 |
| Marburg..... | 100 | 110 | 229 | 249 | 320 | 908 |
| München..... | 180 | 152 | 1,145 | 1,306 | 1,124 | 3,817 |
| Münster..... | 48 | 315 | ... | ... | 211 | 526 |
| Rostock..... | 49 | 30 | 119 | 106 | 196 | 451 |
| Strassburg..... | 137 | 62 | 335 | 329 | 320 | 1,066 |
| Tübingen..... | 96 | 400 | 441 | 255 | 121 | 1,226 |
| Würzburg..... | 101 | 146 | 249 | 742 | 288 | 1,425 |

In Freiburg, München, Münster, and Würzburg, the faculties of theology are Roman Catholic; four are mixed, both Protestant and Roman Catholic—Bonn, Breslau, Strassburg, and Tübingen; thirteen are Protestant.

Justice.—In terms of Judicature Acts in 1877 and 1879 a uniform system of law courts was adopted throughout the Empire not later than January 1, 1879, though with the exception of the *Reichsgericht*, all courts are directly subject to the Government of the special State in which they exercise jurisdiction, and not to the Imperial Government. The appointment of the judges is also a State and not an Imperial function. The Empire enjoys uniform codes of commercial and criminal law, and the civil code of August 18, 1896, came into force on January 1, 1900.

The lowest courts of first instance are the *Amtsgerichte*, each with a single judge, competent to try petty civil and criminal cases. There was on January 1, 1903, 1,933 *Amtsgerichte* in the Empire, or one for every 29,160 inhabitants. The *Landgerichte* exercise a revising jurisdiction over the *Amtsgerichte*, and also a more extensive original jurisdiction in both civil and criminal cases, divorce cases, etc. In the criminal chamber five judges sit, and a majority of four votes is required for a conviction. Jury courts (*Schwurgerichte*) are also held periodically, in which three judges preside; the jury are twelve in number. There are 173 *Landgerichte* in the Empire, or one for every 325,882 of the population. The first court of second instance is the *Oberlandesgericht*. In its criminal senate, which also has an original jurisdiction in serious cases, the number of the judges is seven. There are twenty-eight such courts in the Empire. The total number of judges on the bench in all the courts above mentioned is 8,397. In Bavaria alone there is an *Oberste Landesgericht*, with twenty-two judges, with a revising jurisdiction over the Bavarian *Oberlandesgerichte*. The supreme court is the *Reichsgericht*, which sits at Leipzig. The judges, ninety-two in number, are appointed by the Emperor on the advice of the Bundesrath. The court exercises an appellate jurisdiction over all inferior courts, and also an original jurisdiction in cases of treason. It has four criminal and six civil senates.

Foreign Dependencies.—Germany has declared her protection over various areas or spheres of influence in Africa, in China, and in the Western Pacific. The following is a list of the various foreign regions at present (1905) under the protection or influence of Germany, the estimates given being necessarily vague:—

| | Date of Acquisition. | Method of Government. | Estimated Area, Sq. Miles. | Estimated Population. |
|---------------------------------|----------------------|-----------------------------|----------------------------|-----------------------|
| IN AFRICA:— | | | | |
| Togoland..... | 1884 | Imperial Commissioner..... | 33,000 | 2,500,000 |
| Kamerun..... | 1884 | Imperial Governor..... | 191,130 | 3,500,000 |
| German South-West Africa..... | 1884-90 | Imperial Commissioner..... | 222,450 | 200,000 |
| German East Africa..... | 1885-90 | Imperial Governor..... | 384,180 | 4,000,000 |
| Total African Possessions..... | 1884-90 | | 930,760 | 10,200,000 |
| IN ASIA:— | | | | |
| Kiauchau Bay..... | 1897 | Imperial Governor..... | 120* | 60,000* |
| IN THE PACIFIC:— | | | | |
| Kaiser Wilhelm's Land..... | 1885-86 | } New Guinea Company..... { | 70,000 | 110,000 |
| Bismarck Archipelago..... | 1885 | | 20,000 | 188,000 |
| Solomon Islands..... | 1886 | | 9,000 | 86,000 |
| Marshall Islands, etc..... | 1886 | | 150 | 13,000 |
| Total Pacific Possessions..... | 1884-86 | | 99,270 | 400,000 |
| Total Foreign Dependencies..... | 1884-97 | | 1,030,030 | 10,660,000 |

* Exclusive of the Bay with an area of about 200 square miles, and the neutral zone with an area of about 2,500 square miles, and population of 1,200,000.

GREECE.

Greece, a province of the Turkish Empire since the commencement of the 16th century, gained its independence in the insurrection of 1821-29, and by the Protocol of London, of February 3, 1830, was declared a kingdom, under the protection of Great Britain, France, and Russia. Prince Leopold of Saxe-Coburg having declined the crown of Greece, on the ground that the boundaries proposed were insufficient, and especially excluded the island of Crete, it was offered to, and accepted by, Prince Otto of Bavaria, who ascended the throne January 25, 1833, being under the age of eighteen. He was expelled from the Kingdom, after a reign of 29 years, in October, 1862, which event was followed by the election, under the directing guidance of the three protecting Powers, of the present sovereign.

The King, according to Art. 49 of the Constitution of 1864, attains his majority upon completing his eighteenth year. Before he ascends the throne, he must take the oath to the Constitution in the presence of the ministers, the sacred synod, the deputies then in the metropolis, and the higher officials of the realm. Within two months at the most the King must convoke the Legislature. If the successor to the throne is either a minor or absent at the time of the King's decease, and no Regent has been appointed, the Legislative Chamber has to assemble of its own accord within ten days after the occurrence of that event. The constitutional royal authority in this case has to be exercised by the ministerial council, until the choice of a Regent, or the arrival of the successor to the throne. The present sovereign is allowed, by special exception, to adhere to the religion in which he was educated, the Protestant Lutheran faith, but his heirs and

successors must be members of the Greek Orthodox Church.

The Constitution of Greece, adopted October 29, 1864, vests the whole legislative power in a single chamber, called the Boulé, consisting of 235 representatives, elected by manhood suffrage for the term of four years. Representatives must be at least 30 years of age, and electors 21. The elections take place by ballot, and each candidate must be put in nomination by the requisition of at least one thirtieth of the voters of an electoral district. At the election of 1881 there were 460,163 voters on the list, being 1 voter in every 4.3 of the population; the number who voted was 306,957, or 66 per cent. of the voters. The Boulé must meet annually for not less than three, nor more than six, months. No sitting is valid unless at least one half of the members of the Assembly are present, and no bill can pass into law without an absolute majority of members. Every measure, before being adopted, must be discussed and voted, article by article, thrice, and on three separate days. But the Legislative Assembly has no power to alter the Constitution itself; particular provisions may be reviewed after the lapse of ten years, with the exception of "fundamental principles." The Chamber of Deputies, unless specially convoked at an earlier date, for extraordinary occasions, meets on November 1 (old style) of every year. The deputies are paid 2,000 old drachmai (equal to 1,800 new drachmai, or 72l.) each per session; for an extra session the allowance varies according to its length from 20l. to 72l.

The Ministry is as follows:—

President of the Council and Minister of Interior.

Minister of Foreign Affairs.

Minister of Worship and Instruction.

Minister of Marine.

Minister of War.

Minister of Finance.

Minister of Justice.

The Ministers of Finance and Justice are not members of the Cabinet.

Religion.—The great majority of the inhabitants of the Kingdom are adherents of the Greek Orthodox Church. Before the census of 1889 there were 1,902,800 belonging to the Greek Orthodox Church; 14,677 other Christians, mainly Roman Catholics; 5,792 Jews; and 24,165 Mohammedans. By the terms of the Constitution of 1864, the Greek Orthodox Church is declared the religion of the State, but complete toleration and liberty of worship is guaranteed to all other sects. Nominally, the Greek clergy owe allegiance to the Patriarch of Constantinople, though he now exercises no governing authority; he is elected by the votes of the bishops and optimates subject to the Sultan; his jurisdiction extends over Thrace and other countries, including Bosnia, as well as the greater part of Asia Minor. The real ecclesiastical authority, formerly exercised by him in Greece, was annulled by the resolutions of a National Synod, held at Nauplia in 1833, which vested the government of the Orthodox Church, within the limits of the Kingdom, in a permanent council, called the Holy Synod, consisting of the Metropolitan of Athens and four archbishops and bishops, who must during their year of office reside at the seat of the executive. The Orthodox Church has nine archbishops and eight bishops in Northern Greece; six archbishops and six bishops in the Peloponnese; one archbishop and five bishops in the islands of the Greek Archipelago; and five archbishops and ten bishops in the Ionian Islands. There are 161 monasteries and nunneries, with 2,620 monks and 485 nuns.

Instruction.—All children between the ages of five and twelve years must attend school, but the law is not well enforced in country districts. Of the army recruits 30 per cent. are illiterate, and 15 per cent. can read only.

There are (1892) 2,745 primary schools, 295 secondary schools, and a university. The total number of teachers is 3,680, and of pupils, 139,385, of whom 22,100 are females. There are 2 agricultural schools in Greece with, together, 51 pupils. In 1896 an industrial and commercial school, with 40 teachers, was opened at Piræus to give instruction in the industries relating to wine, spirits, beer, soap, perfumes, dairy-keeping, cattle and silk worm rearing, and in the duties of commercial clerks. In 1895 the University of Athens had 2,987 students, of whom 967 studied medicine, 1,327 law, 616 philosophy, 51 theology, 124 chemistry. Of the total number 604 were from abroad, chiefly from Turkey.

ITALY.

The present Constitution of Italy is an expansion of the "Statuto fondamentale del Regno," granted on March 4, 1848, by King Charles Albert to his Sardinian subjects. According to this charter, the executive power of the State belongs exclusively to the Sovereign, and is exercised by him through responsible ministers; while the legislative authority rests conjointly in the King and Parliament, the latter consisting of two Chambers—an upper one, the Senato, and a lower one, called the "Camera dei Deputati." The Senate is composed of the princes of the royal house who are of age, and of an unlimited number of members, above forty years old, who are nominated by the King for life; a condition of the nomination being that the person should either fill a high office, or have acquired fame in science, literature, or any other pursuit tending to the

benefit of the nation, or, finally, should pay taxes to the annual amount of 3,000 lire, or 120*l*. In 1904 there were 324 senators. By the electoral law of March 28, 1895, electors for deputies to the Lower House are all citizens over twenty-one years of age who can read and write and who possess one or other of the following qualifications: they must have reached a certain standard in elementary education; or must pay not less than 19.80 lire in direct (including provincial) taxation; or, if peasant farmers, must pay annually at least 500 lire of rent, or be managers, with a share in the profits, of farms on which direct (including provincial) taxes of not less than 80 lire are paid; or, being occupants of lodgings, shops, etc., in towns, pay an annual rent ranging from 150 lire in communes of 2,500 inhabitants to 400 lire in communes of 150,000 inhabitants. Non-commissioned officers and men in the army have no vote while under arms. Members of academies, professors, persons who have served their country under arms for two years, and numerous other classes are qualified to vote by their position. The number of deputies is 508, or 1 to every 64,894 of the population (census 1901). In 1904 the number of enrolled electors was 2,541,327, exclusive of the electors temporarily disfranchised on account of military service (26,056 in 1898). At the general election in November, 1900, the number of those who voted was 1,593,886, or 62.7 per cent. of those who had the right to vote. For electoral purposes the whole of the Kingdom is divided into 508 electoral colleges or districts, and these again into several sections. No deputy can be returned to Parliament unless he has obtained a number of votes greater than one sixth of the total number of inscribed electors, and than half the votes given. A deputy must be thirty years old, and have the requisites demanded by the electoral law. Incapable of being elected are all salaried Government officials, as well as all persons ordained for the priesthood and filling clerical charges, or receiving pay from the State. Officers in the army and navy, ministers, under-secretaries of State, and various other classes of functionaries high in office, may be elected, but their number must never be more than forty, not including the ministers and the under-secretaries of State. Neither senators nor deputies receive any salary or other indemnity, but are allowed to travel free throughout Italy by rail or steamer.

The duration of Parliament is five years; but the King has the power to dissolve the Lower House at any time, being bound only to order new elections, and convoke a new meeting within four months. It is incumbent upon

the executive to call the Parliament together annually. Each of the Chambers has the right of introducing new bills, the same as the Government; but all money bills must originate in the House of Deputies. The ministers have the right to attend the debates of both the Upper and the Lower House; but they have no vote unless they are members. The sittings of both chambers are public; and no sitting is valid unless an absolute majority of the members are present.

The executive power is exercised, under the King, by a ministry divided into 11 departments, as follows:

1. *President of the Council and Minister of Interior.*
2. *Minister of Foreign Affairs.*
3. *Minister of the Treasury.*
4. *Minister of Finance.*
5. *Minister of Justice and of Ecclesiastical Affairs.*
6. *Minister of War.*
7. *Minister of Marine.*
8. *Minister of Commerce, Industry, and Agriculture.*
9. *Minister of Public Instruction.*
10. *Minister of Public Works.*
11. *Minister of Posts and Telegraphs.*

Local Government.—The two principal elective local administrative bodies are the communal councils and the provincial councils. According to the law of May 4, 1898, each commune has a communal council, a municipal council, and a syndic. Both the communal councils and the municipal councils vary according to population, the members of the latter being selected by the former from among themselves. The syndic is the head of the communal administration, and is a Government official; he is elected by the communal council from among its own members, by secret vote. Each province has a provincial council and a provincial commission, the members varying according to population. The council elects its president and other officials. The provincial commission is elected by the council from its own members. It conducts the business of the province when the latter is not sitting. Both communal and provincial councils are elected for six years, one half being renewed every three years. The communal council meets twice and the provincial once a year in ordinary session, though they may be convened for extraordinary purposes. All communal electors are eligible to the council except those having an official or pecuniary interest in the commune. Persons not resident in the province, or having no solid interest in it, or who do not pay taxes on movable property, as well as officials in any way interested in the province, are ineligible to the provincial councils. Electors must be Italian citizens, twenty-one years of age, and able to read and write, be on the Parliamentary electoral list, or pay a direct annual contribution to the commune, of any nature, or comply with other conditions of a very simple character.

Religion.—The Roman Catholic Church is, nominally, the ruling State religion of Italy; but many Acts of the Legislature, passed since the establishment of the Kingdom, and more especially since the suppression of the Supreme Pontiff's temporal government, have subordinated the power of the Church and clergy to the authority of the civil government, and secured freedom of worship to the adherents of all recognized religions. However, scarcely any other positive creed as yet exists but Roman Catholicism. At the census of 1901, of the total population about 65,596 were Protestants and 35,600 Jews. Of the Protestants, 22,500 belonged to the Waldensian Church of Piedmont; about 10,000 to the

other evangelical Italian Churches, and 30,000 to foreign Protestant bodies.

Under the Roman Pontiff, the Catholic episcopal hierarchy in Italy consists of 49 archbishoprics and 220 bishoprics besides the 6 cardinal bishoprics near Rome. Of these prelates, 76 are immediately subject to the Apostolic See, 12 being archbishoprics. Thus there are altogether 37 metropolitan sees, the average number of suffragan sees to each metropolitan being about 4. Every archbishop or bishop is appointed by the Pope, on the advice of a council of Cardinals; but the royal *crescatum* is necessary for his installation. The number of secular clergy in 1901 was 68,884.

The immense wealth of the Italian clergy has greatly dwindled since the year 1870, when the Siccardi bill, abolishing external ecclesiastical jurisdiction and clerical privileges, passed the Sardinian Chambers. This law was extended, in 1861, over the whole Kingdom, and had the effect of rapidly diminishing the numbers as well as the incomes of the clergy.

In 1865, there were in Italy 2,382 religious houses, of which 1,506 were for men and 876 for women. The number of religious persons was 28,991, of whom 14,807 were men and 14,184 women. The mendicant orders numbered 8,229 persons, comprised in the above mentioned total. A law for the entire suppression of all religious houses throughout the Kingdom was adopted by the Italian Parliament in 1866. This law provided a small pension to all religious persons who had taken regular vows before January 18, 1864. Several monasteries were temporarily set aside for such monks, friars, or nuns as might wish to continue their conventual life, the inmates, when come down to a certain number, to be drafted off to another house, and so again, until all finally died out. All collegiate chapters were likewise dissolved. The lands and goods of these suppressed bodies were appropriated by the State.

See and Church of Rome.—The "Statuto fondamentale del Regno" enacts, in its first article, that "the Catholic, Apostolic, and Roman religion is the sole religion of the State." By the Royal decree of October 9, 1870, which declared that "Rome and the Roman Provinces shall constitute an integral part of the Kingdom of Italy," the Pope or Roman Pontiff was acknowledged supreme head of the Church, preserving his former rank and dignity as a sovereign prince. Furthermore, by a bill that became law May 13, 1871, there was guaranteed to His Holiness and his successors forever, besides possession of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire or 129,000*l.*, which allowance (whose arrears would in 1899 amount to 53,525,000 lire, or 3,741,000*l.*) still remains unclaimed and unpaid.

Supreme Pontiff.—Pius X. was born at Riese, near Venice, June 2, 1856. Studied at Treviso and Padua; ordained priest, 1880; chancellor of the diocese, 1875; vicar-capitular, 1877; Bishop of Mantua, 1884; Cardinal and Patriarch of Venice, 1893. He is of modest and simple life. He was elected Pope on August 4, 1903, after six fruitless ballots had been taken, by 65 out of 61 votes. He is not only deeply religious and a wise administrator but a thorough and deep scholar and a friend of art. He took the name of Pius in order to continue the protest of his two predecessors against the occupation of the papal States by the Italian Government.

The election of a Pope ordinarily is by *scrutiny*. Each Cardinal in conclave writes on a ticket his own name with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the altar of the conclave chapel; and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed from the electing body; the tickets are compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds of the votes in his favor he is declared elected. Should none have received the needed number of votes, another process is gone through, viz., *acces*—so called because any Cardinal may accede to the choice of another by filling up another ticket made for that purpose. The present Pontiff, Pius X., was chosen almost unanimously. He is regarded as the 264th Pope (or thereabouts) from St. Peter.

The rise of the Roman Pontificate, as an avowed temporal sovereignty, dates from the year 753, when Pepin, King of the Franks, gave to Pope Stefano III. the Exarchate and Pentapolis (or Romagna), conquered from the Lombards, to which Charles the Great added part of Tuscany and Sabina; and three centuries later Countess

Matilda of Tuscany bequeathed to the Holy See her ample territories. Rome, however, with the Roman duchy, came practically under the Pope's civil dominion in the days of Gregorio the Great (590-604). In 1860 the whole Pontifical State comprised an area of about 16,000 square miles, with a population of 3,125,000 souls; thenceforth, until 1870, about 5,000 square miles and 692,000 souls.

The Bishop of Rome, or Pope, by Roman Catholics accounted Vicar of Jesus Christ upon earth, and, in that office, Successor of St. Peter, is the absolute and irresponsible ruler of the Roman Catholic Church, regarded as the whole Christian Church here below. His *ex cathedra* definitions on matters of faith or morals are held to be infallible, and against his judgments there is no appeal. Every baptized person is held to be spiritually subject to him, and his jurisdiction over such to be immediate. The Roman Pontiff has for advisers and coadjutors the Sacred College of Cardinals consisting, when complete, of seventy members, namely, six cardinal-bishops, fifty cardinal-priests, and fourteen cardinal-deacons, but hardly ever comprising the full number. In January 1899 the Sacred College consisted of six cardinal-bishops, forty-five cardinal-priests, and five cardinal-deacons.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are now twenty sacred Congregations, viz.: Inquisition or Holy Office, Consistorial, Apostolic Visitation, Bishops and Regulars, Council, Residence of Bishops, State of Regulars, Ecclesiastical Immunity, Propaganda, Propaganda for Eastern Rite, Index, Sacred Rites, Ceremonial, Regular Discipline, Indulgences and Sacred Relics Examination of Bishops, Fabric of St. Peter's, Laetana, Extraordinary Ecclesiastical Affairs, Studies.

Instruction.—The State regulates public instruction, and maintains, either entirely or in conjunction with the communes and provinces, public schools of every grade. Every teacher in a public institution maintained by the State, or by any other public body, must have the qualifications required by law; and in all public institutions not belonging to the State, the same programme must be followed, and the same rules observed. No private person can keep a school without having obtained the authorization of the State.

Justice.—In Italy, justice in penal matters is administered in the first instance by the Pretori, by the penal Tribunals, and by the Courts of Assize; on appeal, by the penal Tribunals, and by the Courts of Appeal. The highest court is the Court of Cassation, which confines itself to inquiring whether the forms prescribed by law have been observed.

The Pretori have jurisdiction concerning all delicts (delitti) punishable by imprisonment not exceeding three months, or banishment not exceeding one year, or by fine not exceeding 1,000 lire and all misdemeanors (contravvenzioni). The penal Tribunals have jurisdiction in the first instance in offenses (delitti) (excepting offenses for which the Code establishes a *minimum* of five years) punishable by imprisonment from ten months to ten years, or by fine exceeding 1,000 lire. The Courts of Assize, which in most cases have juries, have jurisdiction in all proceedings concerning serious offenses (delitti) punishable by imprisonment for life (ergastolo) or by imprisonment from ten to twenty-four years, or by minimum imprisonment exceeding five years. They have exclusive jurisdiction concerning offenses against the internal and external security of the State, and all press offenses. Appeal is allowed to the penal Tribunals from the sentences of the Pretori, and to the Courts of Appeal from those of the penal Tribunals. The Court of Cassation has power to annul, for illegality, sentences passed by the inferior Courts, and to decide questions of jurisdiction or competency.

Italy is divided, for the administration of justice, into twenty appeal court districts, each of which is subdivided into tribunal districts, 162 in all, and these again into mandamenti, each with its own magistracy (Pretura), 1,548 in all.

JAPAN.

Prior to 1868 the Japanese Government, though nominally administered by the Emperor, was controlled by the Shogunate. In the feudal period of Japan the Shoguns were the

commanders-in-chief of the army. In 1861 one of them began to usurp the political authority of the Emperor. His successors encroached more and more upon the royal power and continued to hold the country under military rule until 1868, when the military class, or Samurai, put an end to the dual form of government by abolishing the Shogunate and establishing the present Emperor as the real sovereign. At the same time, upon the initiative of the Emperor and the Samurai, began the progress in western civilization, which is the marvel of recent history, and which has placed Japan among the foremost modern powers.

On Feb. 11, 1889, a constitution, by which Japan became a limited monarchy in place of an absolutism, was promulgated.

The ruler of to-day is said by the Japanese to be the 121st in direct and unbroken line of descent from Jimmu, 660 B.C., the founder of the empire. By the Imperial House Law of Feb. 11, 1889, only the male descendants succeed to the throne and in case of failure of direct descendants the nearest male relative of the Emperor succeeds. By the constitution, the Emperor exercises the executive powers with the advice and assistance of a cabinet of ministers who are appointed by himself and are responsible to him. He can declare war, make peace, and conclude treaties, is commander-in-chief of the army and navy, and determines the organization and peace standing of both. The Emperor opens, closes, and prorogues the Imperial Diet and dissolves the House of Representatives. He "combines in himself the rights of sovereignty," and therefore exercises the legislative power with the consent of the Imperial Diet.

The Diet is made up of the House of Peers and the House of Representatives, and meets yearly. Every law must have the consent of Parliament and it has control of finances and the administration of justice. It remains in session three months unless prolonged by imperial order. Both houses may originate legislation but it must have the sanction of the Emperor. Each has the right to petition the Emperor on any subject.

The House of Peers, consisting of 864 members in 1904, is composed of: (1) princes of the royal family of 25 years of age or over—they become members for life; (2) princes and marquises of 25 years of age and over—also members for life; (3) a certain number, not to exceed one fifth of three other classes of peers—counts, viscounts, and barons,—these members are elected by their own order for 7 years; (4) persons not peers who have achieved distinction in service of the state or as scholars; (5) persons over 30 years of age in

each Fu and Ken (the 3 cities and 43 prefectures into which Japan is divided for administrative purposes) who are among the 15 largest tax payers, elected by the 15 and appointed by the Emperor for life. The President and Vice-President of the House of Peers are nominated by the Emperor from among the members, and President and Vice-President of the House of Representatives are nominated by the Emperor from among three candidates elected by the House.

The House of Representatives in 1904 had 369 members, or one for about 126,000 inhabitants. Voters for members must be at least 25 years of age, must have resided in the district one year and pay \$7.50 per year of direct taxes. The annual Budget, which requires the consent of Parliament, must receive the approval of the Representatives first.

The Cabinet consists of the Prime Minister as president and nine heads of departments, namely:—

The Minister of Foreign Affairs.

The Minister of Home Affairs.

The Minister of Finance.

The Minister of the Army.

The Minister of the Navy.

The Minister of Justice.

The Minister of Education.

The Minister of Agriculture and Commerce.

The Minister of Communications.

The Ministers are responsible not to Parliament, as is the English Cabinet, but to the Emperor. All laws and Imperial ordinances which relate to the affairs of state require the countersignature of a minister.

The Privy Council deliberate upon important matters of state when they have been consulted by the Emperor.

Marquis Ito, who drafted the Japanese Constitution, was influenced by his visit to Germany, where he met Count Bismarck, to pattern the instrument after that of Prussia. A believer in the divine right of the Mikado to the throne, he naturally based the constitution on the conception that the monarch is the sovereign power of the state. While in England the House of Commons is a perpetual constituent assembly for revising the constitution, amendments to that of Japan may be initiated only by the Emperor. Party government in Japan is comparatively undeveloped, especially when the party system of England is considered. Nevertheless the person whom the crown orders to form the cabinet is usually recognized to be in sympathy with the majority in the two Houses. And it may be said that the national tendency is toward responsibility of the ministers to Parliament alone and, in general, toward a more democratic form of government.

At the head of local administration in the provinces are the governors, one of them residing in each of the 46 districts (3 Fuses and 43 Kens) into which Japan is divided. In 1879, city and prefectural assemblies were created, based on the principle of election; their power is confined to fixing the estimates of the local rates, subject to the confirmation of the governors, and finally of the Minister of the Interior. Eligible to the assembly are all male citizens 25 years of age, resident in the district at least three consecutive years, and paying land tax of more than \$5 annually. The franchise is conferred on all male citizens of 20 years residing in the district, and paying more than \$2.50 land tax. Annually, or in every other year, governors are summoned to the Department of the Interior to deliberate upon matters of local administration. Each district is subdivided into cities (*ku*), and counties (*gun*), each with its chief magistrate (*chō*), who manages local affairs. The Island of Hokkaidō (Yezo) has a governor and a special organization.

To further carry out the principle of decentralization and self-government a system of local administration in *shi* (municipality), *cho* (town), and *son* (village) was established by Imperial Rescript, April 17, 1888, which came into effect April 1, 1889, and is to be applied gradually according to the circumstances and requirements of these localities.

Religion.—By the Constitution absolute freedom of religious belief and practice is secured, so long as it is not prejudicial to peace and order. The chief forms of religion are—(1) Shintoism, with 12 sects; (2) Buddhism, with 12 sects and 32 creeds. There is no State religion, and no State support. The principal Shinto temples are, however, maintained by State or local authorities. In 1902—Shinto temples, 190,764; priests, 83,471; students, 1,225. Buddhist temples, 71,821; priests, 63,275; students, 9,286. There are also numerous Roman Catholics, adherents of the Greek Church, and Protestants.

Instruction.—Elementary education is compulsory. The number of children of school age (6-14) on March 31, 1903, was 7,366,604. The following are the educational statistics for 1903:—

| INSTITUTES. | Number. | Teaching Staff. | Students and Pupils. |
|-----------------------------|---------|-----------------|----------------------|
| Elementary schools | 27,156 | 109,118 | 5,135,487 |
| Lower middle schools. | 259 | 4,735 | 95,724 |
| High schools | 8 | 323 | 5,074 |
| High girls' schools | 81 | 1,216 | 22,008 |
| Normal schools | 57 | 1,031 | 19,194 |
| Tech'l and special schools. | 934 | 5,180 | 95,125 |
| Various schools | 1676 | 5,647 | 107,232 |
| University schools | 2 | 389 | 4,763 |
| Kindergarten schools. | 264 | 730 | 24,259 |

The University consists of a University Hall, Colleges of Law, Science, Medicine, Literature, Engineering, and Agriculture. It is supported by Government. The bulk of the elementary and higher schools are also supported by Government and by local rates. One of the normal schools is for high school teachers.

In 1903 there were 67 libraries in Japan, with 821,670 volumes. In 1902, 22,960 books of various kinds, and 1,328 periodicals, monthly, weekly, daily, were published. Of the periodicals 409,429,523 copies were issued.

MEXICO.

The present Constitution of Mexico bears date of February 5, 1857, with subsequent modifications down to May, 1904. By its terms Mexico is declared a federative republic, divided into States—19 at the outset, but at present 27 in number, with 3 territories and the Federal District—each of which has a right to manage its own local affairs, while the whole are bound together in one body politic by fundamental and constitutional laws. The powers of the supreme Government are divided into three branches, the legislative, executive, and judicial. The legislative power is vested in a Congress consisting of a House of Representatives and a Senate, and the executive in a President. Representatives elected by the suffrage of all respectable male adults, at the rate of one member for 40,000 inhabitants, hold their places for two years. The qualifications requisite are, to be twenty-five years of age, and a resident in the State. The Senate consists of fifty-six members, two for each State, of at least thirty years of age, who are returned in the same manner as the deputies. The members of both Houses receive salaries of 3,000 dollars a year. The President is elected by electors popularly chosen in a general election, holds office for four years, and, according to an amendment of the Constitution in 1887, may be elected for consecutive terms. By the decree of May 6, 1904, which modified Art. 72A of the Constitution, the office of Vice-President was formally instituted, his election to take place in the same manner and at the same time as that of the President. The Vice-President is *ex officio* President of the Senate, with a voice in the discussions, but without a vote. His term of office is the same as that of the President. Failing the President through absence or otherwise, the Vice-President shall discharge the functions of the President either temporarily or to the end of the period for which he was elected, as the circumstances may require. Failing both, Congress shall call for new elections to be held at once. Congress has to meet annually from April 1 to May 30, and from September 16 to December 15, and a permanent committee of both Houses sits during the recesses.

The administration is carried on, under the direction of the President and a Council, by seven Secretaries of State, heads of the Departments of:—1, Foreign Affairs; 2, Interior; 3, Justice and Public Instruction; 4, Fomento, Colonization and Industry; 5, Communications and Public Works; 6, Financial and Public Credit; 7, War and Marine.

Local Government.—Each separate State has its own

internal constitution, government, and laws; but inter-State customs duties are not permitted. Each has its governor and legislature popularly elected under rules similar to those of the Federation; and the civil and criminal code in force in the Federal District prevails, with few exceptions (Vera Cruz and the State of Mexico), in the different States.

Religion, Instruction, and Justice.—The prevailing religion is the Roman Catholic, but the Church is independent of the State, and there is toleration of all other religions. No ecclesiastical body can acquire landed property. In 1863 the religious houses were closed and the church property confiscated; and since that year many ecclesiastical buildings have been assigned to serve the purpose of libraries, schools, and hospitals. Within the republic there are 6 archbishops and 23 suffragan bishops. In 1895 the population consisted of 12,380,245 Roman Catholics; 40,445 Protestants; 8,972 Jews and persons of other faiths; 61,911 of no professed faith. A dispute with the United States respecting the Californian Pious Fund was referred to the Hague arbitration court, which in October, 1902, gave its decision, awarding to the United States the sum of 1,420,682 Mexican dollars and an annual sum of 43,051 Mexican dollars.

In almost all the States education is free and compulsory, and the law is now strictly enforced. In the municipality of Mexico there were in 1895, 323,336 persons who could read only, and 1,782,822 persons who could neither read nor write. Primary instruction is mostly at the expense of the states and municipalities, but the Federal Government makes frequent grants, and many schools are under the care of beneficent societies. Higher education is carried on in secondary schools and seminaries, and in colleges for professional instruction, including schools of law, medicine, engineering, mining, fine arts, agriculture, commerce, arts, trades, and music.

In 1902 there were in the Republic the National Library, with 180,000 volumes, and 123 other public libraries. There were in that year 37 museums for scientific and educational purposes, and 11 meteorological observatories. The number of newspapers published was 273, of which 7 were in English, 4 in Spanish and English, 1 in Italian.

The judicial power, which is entirely distinct from and independent of the executive, consists of the Supreme Court, with 15 judges chosen for a period of six years, Circuit Courts, with 3 judges, and District Courts, with 32 judges.

The Ordinary, Civil, Criminal, and Correctional Courts are controlled by the Department of Justice and Public Instruction.

NETHERLANDS (THE).

The first Constitution of the Netherlands after its reconstruction as a kingdom was given in 1815, and was revised in 1848 and in 1887. According to this charter the Netherlands form a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of primogeniture; in default of male heirs, the female line ascends the throne. In default of a legal heir, the successor to the throne is designated by the Sovereign and a joint meeting of both the Houses of Parliament (each containing twice the usual number of members), and by this assembly alone if the case occurs after the Sovereign's death. The age of majority of the Sovereign is eighteen years. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the State Council.

The executive power of the State belongs exclusively to the Sovereign, while the whole legislative authority rests conjointly in the Sovereign and Parliament, the latter—called the States-General—consisting of two Cham-

bers. The Upper or First Chamber is composed of 50 members, elected by the Provincial States from among the most highly assessed inhabitants of the eleven provinces, or from among some high and important functionaries, mentioned by law. Members of the First Chamber not residing in the Hague, where the Parliament meets, are allowed 10 guilders (16s. 8d.) a day during the session of the States-General. The Second Chamber of the States-General numbers 100 deputies, who are elected directly.

The Government and the Second Chamber only may introduce new bills; the functions of the Upper Chamber being restricted to approving or rejecting them, without the power of inserting amendments. The meetings of both Chambers are public, though each of them, by the decision of the majority, may form itself into a private committee. The ministers may attend at the meetings of both Chambers, but they have only a deliberative vote, unless they are members. Alterations in the Constitution can be made only by a bill declaring that there is reason for introducing those alterations, followed by a dissolution of the Chambers and a second confirmation by the new States-General by two thirds of the votes. Unless it is expressly declared, the laws concern only the realm in Europe, and not the colonies.

The executive authority, belonging to the Sovereign, is exercised by a responsible Council of Ministers. There are eight heads of departments in the Ministerial Council, namely:—

The Minister of Foreign Affairs and President of the Ministerial Council.

The Minister of the Interior.

The Minister of Finance.

The Minister of Justice.

The Minister of the Colonies.

The Minister of Marine.

The Minister of War.

The Minister of Public Works and Commerce.

Each of the above Ministers has an annual salary of 12,000 guilders, or 1,000*l*.

There is a State Council—"Raad van State"—of 14 members, appointed by the Sovereign, of which the Sovereign is president, and which is consulted on all legislative and a great number of executive matters.

Local Government.—The territory of the Netherlands is divided into 11 provinces and 1,123 communes. Each province has its own representative body, "the Provincial States." The members are elected for 6 years, directly from among the male Dutch inhabitants of the province who are 25 years of age, one half of the number being subject to re-election or renewal every three years. Except that they must be inhabitants of the province, the electors, as well as the mode of voting, are the same as for the Second Chamber. The number of members varies according to the population of the province, from 80 for Holland (South) to 35 for Drenthe. The Provincial States are entitled to make ordinances

concerning the welfare of the province, and to raise taxes according to legal precepts. All provincial ordinances must be approved by the King. The Provincial States exercise a right of control over the municipalities. They also elect the members of the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of six of their members, called the "Deputed States," is charged with the executive power in the province and the daily administration of its affairs. This committee has also to see the common law executed in the province. Both the Deputed as well as the Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but in the latter named only a deliberative vote. He is the chief magistrate in the province. Only the members of the Deputed States receive an allowance.

The communes form each a Corporation with its own interests and rights, subject to the general law. In each commune is a Council, elected for six years directly, by the same voters as for the Provincial States, provided they inhabit the commune; one third of the Council retiring every two years. All the male Dutch inhabitants 25 years of age are eligible, the number of members varying from 7 to 45, according to the population. The Council has a right of making and enforcing by-laws concerning the communal welfare. The Council may raise taxes according to rules prescribed by common law; besides, each commune receives from the State Treasury an allowance proportioned to the total number of its inhabitants and to the share which its non-contributing inhabitants have failed to pay toward local taxes. All by-laws may be vetoed by the Sovereign. The Municipal Budget and the resolutions to alienate municipal property require the approbation of the Deputed States of the province. The Council meets in public as often as may be necessary, and is presided over by a Mayor, appointed by the Sovereign for six years. The executive power is vested in a college formed by the Mayor and 2 to 6 Aldermen (wethouders), elected by and from the Council; this college is also charged with the execution of the common law. Municipal Police is under the authority of the Mayor; as a State functionary the Mayor supervises the actions of the Council; he may suspend their resolutions for 30 days, but is bound to inform the Deputed States of the province.

Religion.—According to the terms of the Constitution, entire liberty of conscience and complete social equality are granted to the members of all religious confessions. The royal family and the majority of the inhabitants belong to the Reformed Church. The salaries of several British Presbyterian ministers, settled in the Netherlands, and whose churches are incorporated with the Dutch Reformed Church, are paid out of the public funds. The State Budget contained fixed allowances for the different churches; for Protestant Churches, 1,373,000 guilders; for Roman Catholics, 578,035; and for Jews, 14,000.

Instruction.—Public instruction (primary) is given in all places where needed, and education was made compulsory in 1900. Religious convictions are respected.

From the beginning of this century elementary schools have been more or less under State regulation and inspection. In 1806, and more expressly in 1848, secular instruction was separated from religious or sectarian instruction. Elementary education is now regulated by the Primary Instruction Act, passed in 1857, supplemented by an Act of 1878, and again considerably altered by the Act of December, 1889. By the last Act public instruction is diminished and a greater share in the education of the youths left to private instruction, which is now supported by the State. According to the regulations of the present Act the cost of public primary instruction is borne jointly by the State and the communes, the State contributing to the salaries of the teachers and being responsible for 25 per cent. to the costs of founding or purchasing schools. There are 4 universities—Leyden, Groningen, Utrecht, and Amsterdam—attended by over 3,000 students; 1,820 private and higher schools; and 3,188 public elementary schools.

Justice.—Justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 23 district tribunals, and by 106 cantonal courts; trial by jury is unknown in Holland. All Judges are appointed for life by the Queen (the Judges of the High Court from a list prepared by the Second Chamber). They can be removed only by a decision of the High Court.

RUSSIA.

Constitution and Government.—The government of Russia is an absolute hereditary monarchy. The whole legislative, executive, and judicial power is united in the Emperor, whose will alone is law. There are, however, certain rules of government which the sovereigns of the present reigning house have acknowledged as binding. The chief of these is the law of succession to the throne, which, according to a decree of the Emperor Paul, of the year 1797, is to be that of regular descent, by the right of primogeniture, with preference of male over female heirs. This decree annulled a previous one, issued by Peter I., February 5, 1722, which ordered each sovereign to select his successor to the throne from among the members of the imperial family, irrespective of the claims of primogeniture. Another fundamental law of the realm proclaimed by Peter I. is that every sovereign of Russia, with his consort and children, must be a member of the orthodox Greek Church. The princes and princesses of the imperial house, according to a decree of Alexander I., must obtain the consent of the Emperor to any marriage they may contract; otherwise the issue of such union cannot inherit the throne. By an ancient law of Russia, the heir-apparent is held to be of age at the end of the sixteenth year, and the other members of the reigning family with the completed twentieth year.

The administration of the Empire is entrusted to four great boards, or councils, possessing separate functions. The first of these boards is the *Council of the State*, established in its present form by Alexander I., in the year 1810. It consists of a president—the Grand Duke Mikhail since 1882—and an unlimited number of members appointed by the Emperor. In 1894 the Council consisted of 62 members, exclusive of the ministers, who have a seat *ex officio*, and six princes of the imperial house. The Council is divided into three departments, namely, of Legislation, of Civil and Church Administration, and of Finance. Each department has its own president, and a separate sphere of duties; but there are collective meetings of the three sections. The chief function of the Council of the Empire is that of examining into the projects of laws which are brought before it by the ministers, and of discussing the budget and all the expenditures to be made during the year. But the Council has no power of proposing alterations and modifications of the laws of the realm; it is, properly speaking, a consultative institution in matters of legislation. A special department is intrusted with the discussion of the requests addressed to the

Emperor against the decisions of the Senate. The second of the great colleges or boards of government is the *Ruling Senate*, or “*Pravitelstvuyushchiy Senat*,” established by Peter I. in the year 1711. The functions of the Senate are partly of a deliberative and partly of an executive character. To be valid a law must be promulgated by the Senate. It is also the high court of justice for the Empire. The Senate is divided into nine departments or sections, which all sit at St. Petersburg, two of them being Courts of Cassation. Each department is authorized to decide in the last resort upon certain descriptions of cases. The senators are mostly persons of high rank, or who fill high stations; but a lawyer of eminence presides over each department, who represents the Emperor, and without whose signature its decisions would have no force. In the *plenum*, or general meeting of several sections, the Minister of Justice takes the chair. Besides its superintendence over the courts of law, the Senate examines into the state of the general administration of the Empire, and has power to make remonstrances to the Emperor. A special department consisting of seven members is intrusted with judgments in political offenses, and another (six members) with disciplinary judgments against officials of the crown.

The third college, established by Peter I. in the year 1721, is the *Holy Synod*, and to it is committed the superintendence of the religious affairs of the Empire. It is composed of the three metropolitans (St. Petersburg, Moscow, and Kieff), the archbishops of Georgia (Caucasus), and of Poland (Kholm and Warsaw), and several bishops sitting in turn. All its decisions run in the Emperor's name, and have no force till approved by him. The President of the Holy Synod is the Metropolitan of Novgorod and St. Petersburg.

The fourth board of government is the *Committee of Ministers*. It consists of all the ministers, who are :—

1. *The Ministry of the Imperial House and Imperial Domains.*
2. *The Ministry of Foreign Affairs, Assistant Minister.*
3. *The Ministry of War.*
4. *The Ministry of the Navy.*
5. *The Ministry of the Interior.*
6. *The Ministry of Public Instruction.*
7. *The Ministry of Finance.*
8. *The Ministry of Justice.*
9. *The Ministry of Agriculture and State Domains.*
10. *The Ministry of Public Works and Railways.*
11. *The Department of General Control.*

18. The Procurator-General of the Holy Synod.

Besides the Ministers, four Grand Dukes, and six functionaries, chiefly ex-ministers, form part of the Committee, of which Actual Privy Councillor *Durnovo* is President.

Minister and State Secretary for Finland.

Most of the above heads of departments have assistant ministers who supply their place on certain occasions. They all communicate directly with the sovereign.

The Emperor has two Private Cabinets, one of which is occupied with charitable affairs, and the other is devoted to public instruction of girls and to the administration of the institutions established by the late Empress Maria, mother of the Emperor Nicholas I. Besides, there is the Imperial Head-Quarters (*Glavnaya Kvartira*), and a Cabinet, which is entrusted also with the reception of petitions presented to the Emperor, formerly received by a special Court of Requests (abolished in 1884). According to a law of May 19, 1888, a special Imperial Cabinet having four sections (Administrative, Economical, Agricultural and Manufacturing, and Legislative) has been created, instead of the same departments in the Ministry of Imperial Household. According to the law of May 22, 1894, a special chief for the protection of the Imperial residences and trains has been appointed under the title of "General in Service at the Emperor" (*Dezhurnyi General*), General Aide-de-Camp *Tcherevin* holding this position.

Local Government.—The Empire is divided into general governments, or vice-royalties, governments, and districts. There are at present in European Russia (including Poland and Finland) 68 governments, with 635 districts (*uyezdy*), 2 *odtely*, and 1 *okrug*, also considered as separate governments. Some of them are united into general governments, which are now those of Finland, Poland, Wilna, Kieff, and Moscow. The Asiatic part of the Empire comprises 5 general governments: Caucasus, Turkestan, Stepnoye (of the Steppes), Irkutsk, and of the Amur, with 10 governments (*guberniya*), 17 territories (*oblasti*), and 3 districts (*okrug*, or *odtyel*: *Zakataly*, *Chernomorsk*, and *Sakhalin*). At the head of each general government is a governor-general, the representative of the Emperor, who as such has the supreme control and direction of all affairs, whether civil or military. In Siberia the governors-general are each assisted by a council, which has a deliberative voice. A civil governor assisted by a council of regency, to which all measures must be submitted, is established in each government, and a military governor in twenty frontier provinces. A vice-governor is appointed to fill the place of the civil governor when the latter is absent or unwell. There is also, in each government, a council of control under the presidency of a special officer, depending directly on the Department of Control. Each government is divided into from 8 to 15 districts, having each several administrative institutions. A few districts (*okrug* or *odtyel*) in Siberia, in the Caucasus, in Turkestan, and in the Transcaspian region are considered as independent governments. So also the townships (*gradonachalstvo*) of St. Petersburg, Odessa, Kertch, Sebastopol, and Taganrog; Cronstadt, Vladivostok, and Nikolaevsk are under separate military governors. In 1894, the Government of Warsaw has been increased by one district of Plock and one district of Lomja.

In European Russia the government of the parish, in so far as the lands of the peasantry are concerned, and

part of the local administration, is entrusted to the people. For this purpose the whole country is divided into communes (107,676 in European Russia, exclusive of the three Baltic provinces), which elect an elder (*Starosta*), or executive of a commune, as also a tax-collector or superintendent of public stores. All these officers are elected at communal assemblies ("Mir" — which means both "the village" and "the world") by the peasants, and from among themselves. The communal assemblies are constituted by all the householders in the village, who discuss and decide all communal affairs. These communal assemblies are held as business requires. The communes are united into cantons, or "Volosts," each embracing a population of about 2,000 males (10,530 in European Russia). Each of the cantons is presided over also by an elder ("Starshina," elected at the cantonal assemblies, which are composed of the delegates of the village communities in proportion of one man to every ten houses. The canton assemblies decide the same class of affairs as do the communal assemblies, but concerning each its respective canton. The peasants have thus a special institution: of their own, which are submitted also to special colleges "for peasants' affairs," instituted in each government. In Poland the "Volosts" is replaced by the "Gmina," the assemblies of which are constituted of all landholders — nobility included, the clergy and the police excluded — who have each but one voice, whatever the area of land possessed. The "Gmina" has, however, less autonomy than the "Volosts," being subject directly to the "Chief of the District." In conjunction with the assemblies of the Volosts and Gminas are cantonal tribunals, consisting of from four to twelve judges elected at cantonal assemblies. Injuries and offenses of every kind, as well as disputes relating to property between the peasants, not involving more than a hundred roubles, come under the jurisdiction of these popular tribunals. Affairs of more importance, up to 300 roubles, are judged by Judges of Peace, elected in Central Russia, and nominated elsewhere; appeal against their judgments can be made to the "Syezd," or gathering of judges of the district, and further to the Senate. In 1889 an important change was made in the above organization. Justices of Peace have been replaced in twenty provinces of Central Russia by Chiefs of the district (*uyezdnyi nachalnik*), nominated by the administration from among candidates taken from the nobility, recommended by the nobility, and endowed with wide disciplinary powers against the peasants; in the cities, except St. Petersburg, Moscow, and Odessa, special "town magistrates" (*gorodskoi sudia*), nominated in the same way, are to take the place of the former Justices of Peace. As to the peasants' tribunals (*volostnoi sud*), they are placed in direct subjection to the "Chiefs of the Districts." The same measure has been extended in 1890 and 1891 over all the provinces endowed with provincial institutions (*zemstvo*).

Religion.—The established religion of the Empire in the Græco-Russian, officially called the Orthodox-Catholic Faith. It has its own independent synod, but maintains the relations of a sister Church with the four patriarchates of Constantinople, Jerusalem, Antioch, and Alexandria. The Holy Synod, the board of government of the Church, was established with the concurrence of the Russian clergy and the four Eastern patriarchs.

The Emperor is head of the Church; he appoints to every office in the Church, and is restricted only so far as to leave to the bishops and prelates the privilege of proposing candidates; and he transfers and dismisses persons from their offices in certain cases. But he has never claimed the right of deciding theological and dogmatic questions. Practically, the Procurator of the Holy Synod enjoys wide powers in Church matters.

The points in which the Græco-Russian Church differs from the Roman Catholic faith are, its denying the spiritual supremacy of the Pope, its not enforcing the celibacy of the clergy, and its authorizing all individuals to read and study the Scriptures in the vernacular tongue. With the exception of the restraints laid on the Jews, all religions may be freely professed in the Empire. The dissenters have been and are still, however, severely persecuted, though recently some liberty has been extended to those of the "United Church." It is estimated that there are more than 12,000 dissenters in Great Russia alone. The affairs of the Roman Catholic Church are entrusted to a Collegium, and those of the Lutheran Church to a Consistory, both settled at St. Petersburg. Roman Catholics are most numerous in the former Polish provinces, Lutherans in those of the Baltic, and Mohammedans in Eastern and Southern Russia, while the Jews are almost entirely settled in the towns

and larger villages of the western and southwestern provinces.

Instruction.—Most of the schools in the Empire are under the Ministry of Public Instruction, and the Empire is divided into 11 educational districts (St. Petersburg, Moscow, Kazan, Orenburg, Kharkoff, Odessa, Kiev, Vilna, Warsaw, Dorpat, Caucasus, Turkestan, West Siberia, and East Siberia). However, many special schools are under separate Ministries. The total contribution for education from the various Ministries in 1894 was 39,338,096 roubles; of this, 7,294,473 roubles was for universities, 19,576,208 roubles for middle-class schools, and 7,408,612 roubles for primary schools.

Justice.—The organization of justice was totally reformed by the law of 1864; but the action of that law has not yet been extended to the governments of Olenets, Vologda, Astrakhan, Ufa, and Orenburg, and has been applied but in a modified form (in 1889) to the Baltic Provinces and the government of Arkhangelsk. In the above-named governments the Justice of Peace has been introduced, but the other tribunals remain in the old state. No juries are allowed in Poland and the Caucasus; the justices of peace are nominated by the Government in the provinces which have no *zemstvo*. In Poland there are judges of peace in the towns only, their functions in the villages being performed by Gmina courts, elected by the inhabitants of the Gmina. Siberia has maintained the tribunals of old; in the Steppe Provinces there are district judges, while courts of higher instance are represented by the Justice Department of the provincial administration.

There were in 1891, 2 appeal departments of the Senate, 10 high courts, 85 courts of first instance. There were besides—1,280 inquiry judges, and 1,345 notaries; 2,126 actual, and 3,662 honorary justices of peace. In the un-reformed tribunals there were 604 judges, 129 public prosecutors, and 156 inquiry judges.

By a law, dated June 21, 1889, the functions of the juries were limited to some extent, especially as regards the crimes committed by the representatives of nobility in their elective functions.

By a law of April 6, 1891, reformed courts as well as chiefs of districts have been introduced in the provinces of the Kirghize Steppes. In Siberia, the reformed Courts and trial by jury were introduced in 1897, and in Turkestan in 1898.

SPAIN.

The present Constitution of Spain, drawn up by the Government and laid before a Cortes Constituyente, elected for its ratification, March 27, 1876, was proclaimed June 30, 1876. It consists of 89 articles or clauses. The first of them enacts that Spain shall be a constitutional monarchy, the executive resting in the King, and the power to make laws "in the Cortes with the King." The Cortes are composed of a Senate and Congress, equal in authority. There are three classes of senators—first, senators by their own right, or *Senadores de derecho propio*; secondly, 100 life senators nominated by the Crown—these two categories not to exceed 180; and thirdly, 180 senators, elected by the Corporations of State—that is, the communal and provincial states, the church, the universities, academies, etc.—and by the largest payers of contributions. Senators in their own right are the sons, if any, of the King and of the immediate heir to the throne, who have attained their majority; Grandees who are so in their own right and who can prove an annual *renta* of 60,000 pesetas, or 2,400*l.*; captain-generals of the army; admirals of the navy; the patriarch of the Indies and the archbishops; the presi-

dents of the Council of State, of the Supreme Tribunal, of the Tribunal of Cuentas del Reino, and of the Supreme Council of War and of the Navy, after two years of office. The elective senators must be renewed by one half every five years, and by totality every time the Monarch dissolves that part of the Cortes. The Congress is formed by deputies "named in the electoral Juntas in the form the law determines," in the proportion of one to every 50,000 souls of the population. According to the law of June 26, 1890, the electoral qualification is held by all male Spaniards, 25 years of age, who enjoy full civil rights, and have been citizens of a municipality for at least two years. Members of Congress must be 25 years of age; they are re-eligible indefinitely, the elections being for 5 years. Deputies, to the number of 10, are admitted who, although not elected for any one district, have obtained a cumulative vote of more than 10,000 in several districts. Deputies to the number of 88 are elected by *scrutin de liste* in 26 large districts, in which minorities may be duly represented. There are in all 431 deputies. The deputies cannot take State office, pensions, and salaries; but the ministers are exempted from this law. Both Congress and Senate meet every year. The Monarch has the power of convoking them, suspending them, or dissolving them; but in the latter case a new Cortes must sit within three months. The Monarch appoints the president and vice-presidents of the Senate from members of the Senate only; the Congress elects its own officials. The Monarch and each of the legislative chambers can take the initiative in the laws. The Congress has the right of impeaching the ministers before the Senate.

The Constitution of June 30, 1876, further enacts that the Monarch is inviolable, but his ministers are responsible, and that all his decrees must be countersigned by one of them. The Cortes must approve his marriage before he can contract it, and the King cannot marry anyone excluded by law from the succession to the crown. Should the lines of the legitimate descendants of the late Alphonso XII. become extinct, the succession shall be in this order—first, to his sisters; next to his aunt and her legitimate descendants; and next to those of his uncles, the brothers of Fernando VII., "unless they have been excluded." If all the lines become extinct, "the nation will elect its Monarch."

The executive is vested, under the Monarch, in a Council of Ministers, as follows, March 4, 1899:—

President of the Council.

Minister of Foreign Affairs.

Minister of Justice.

Minister of Finance.

Minister of the Interior

Minister of War.

Minister of Marine.

Minister of Agriculture and Commerce and of Public Works.

The Ministry of the Colonies was abolished February 10, 1899.

Local Government.—The various provinces and communes of Spain are governed by the provincial and municipal laws. Every commune has its own elected *Ayuntamiento*, consisting of from five to thirty-nine *Regidores*, or *Concejales*, and presided over by the *Alcalde*, at whose side stand, in the larger towns, several *Tenientes Alcaldes*. The entire municipal government, with power of taxation, is vested in the *Ayuntamientos*. Half the members are elected every two years, and they appoint the *Alcalde*, the executive functionary, from their own body. In the larger towns he may be appointed by the King. Members cannot be re-elected until after two years. Each province of Spain has its own Parliament, the *Diputacion Provincial*, the members of which are elected by the constituencies. The *Diputaciones Provinciales* meet in annual session, and are permanently represented by the *Commission Provincial*, a committee elected every year. The Constitution of 1876 secures to the *Diputaciones Provinciales* and the *Ayuntamientos* the government and administration of the respective provinces and communes. Neither the national executive nor the Cortes have the right to interfere in the established municipal and provincial administration, except in the case of the action of the *Diputaciones Provinciales* and *Ayuntamientos* going beyond the locally limited sphere to the injury of general and permanent interests. In the Basque provinces self-government has been almost abolished since the last civil war, and they are ruled as the rest of Spain. Notwithstanding the provisions of the Constitution, pressure is too frequently brought to bear upon the local elections by the Central Government.

Religion.—The national Church of Spain is the Roman Catholic, and the whole population of the Kingdom adhere to that faith, except (in 1887) 6,654 Protestants, 402 Jews, 9,645 Rationalists, 510 of other religions, and 13,175 of religion not stated. There were in 1884 in Spain 32,435 priests in the 62 dioceses into which the country is divided; 1,684 monks resident in 161 monastic houses, and 14,592 nuns in 1,027 convents. The number of cathedrals was 65, of religious colleges 30, of churches 18,564, and of convents, religious houses, sanctuaries, and other buildings of a religious character 11,202. According to Article 12 of the Constitution of 1876, a restricted liberty of worship is allowed to Protestants, but it has to be entirely in private, all public announcements of the same being strictly forbidden. The Constitution likewise enacts that "the nation binds itself to maintain the worship and ministers of the Roman Catholic religion." Resolutions of former legislative bodies not repealed in the Constitution of 1876, settled that the clergy of the Established Church are to be maintained by the State. On the other hand, by two decrees of the Cortes, passed July 23, 1835, and March 9, 1836, all conventual establishments were suppressed, and their property confiscated for the benefit of the nation. These decrees gave rise to a long dispute with the head of the Roman Catholic Church, which ended in the sovereign pontiff conceding the principle of the measure. By a concordat with Rome concluded in August, 1859, the Spanish government was authorized to sell the whole ecclesiastical property, except churches and parsonages, in return for an equal amount of untransferable public debt certificates bearing interest at the rate of 3 per cent.

Instruction.—The latest census returns show that a large proportion of the inhabitants are illiterate. In 1880 20.0 per cent. of the population could read and write; 4.6 per cent. could read only; and 75.3 per cent. could neither read nor write. In 1889, out of a population of 17,552,346 accounted for, 5,004,460 (3,317,555 males, and 1,686,915 females), or 28.5 per cent. could read and write; 608,005 (221,613 males, and 386,392 females), or 3.4 per cent. could read only; and 11,945,871 (6,067,098 males, and 5,878,773 females), or 68.1 per cent. could neither read nor write.

By a law of 1857 an elaborate system of primary education was ordained: education was to be compulsory, there was to be a primary school for every 500 inhabitants, and instruction was to be on a rigidly uniform plan. Compulsion has never been enforced, and, partly from political causes and partly from the wretched pay of most of the elementary teachers (10¢ to 20¢ per annum), education is very inefficient. In 1881, however, several improvements were introduced. Under the Minister of Public Works there is a Director-General of Public Instruction, with a council; there are ten educational districts, with the universities as centers, 49 inspectorial districts, and numerous local educational authorities. The public and primary schools are supported mainly by the municipalities, the total sum spent in each of the last three years on primary education, including a small contribution by Government, being about 1,000,000. Most of the children are educated free.

TURKEY.

The present sovereign of Turkey is the thirty-fourth, in male descent, of the house of Othman, the founder of the empire, and the twenty-eighth Sultan since the conquest of Constantinople. By the law of succession obeyed in the reigning family, the crown is inherited according to seniority by the male descendants of Othman, sprung from the Imperial Harem. The Harem is considered a permanent State institution. All children born in the Harem, whether offspring of free women or of slaves, are legitimate and of equal lineage. The Sultan is succeeded by his eldest son, but only in case there are no uncles or cousins of greater age.

The fundamental laws of the empire are based on the precepts of the Koran. The will of the Sultan is absolute, in so far as it is not in opposition to the accepted truths of the Mahometan religion as laid down in the sacred book of the Prophet. Next to the Koran, the laws of the "Mulleka," a code formed of the supposed sayings and opinions of Mahomet, and the sentences and decisions of his immediate successors, are binding upon the Sovereign as well as his subjects. Another code of laws, the "Cahon nameh," formed by Sultan Solyman the Magnificent, from a collection of "hatti-sheriffs," or decrees, issued by him and his predecessors, is held in general obedience, but merely as an emanation of human authority.

The legislative and executive authority is exercised, under the supreme direction of the Sultan, by two high dignitaries, the "Sadrazam," or Grand Vizier, the head of the temporal Government, and the "Sheik-ul-Islam," the head of the Church. Both are appointed by the Sovereign, the latter with the nominal concurrence of the "Ulema," a body comprising the clergy and chief functionaries of the law, over which the "Sheik-ul-Islam" presides, although he himself does not exercise priestly functions. Connected with the "Ulema" are the "Mufti," the interpreters of the Koran. The Ulema comprise all the great judges,

theologians, and jurists, and the great teachers of literature and science, who may be summoned by the Mufti. The principal civic functionaries bear the titles of Effendi, Bey, or Pasha.

Forms of constitution, after the model of the West European States, were drawn up at various periods by successive Ottoman Governments, the first of them embodied in the "Hati-Huméyou" of Sultan Abdul-Medjid, proclaimed February 18, 1856, and the most recent in a decree of Sultan Abdul-Hamid II., of November, 1876. But the carrying out of these projects of reform appears entirely impossible in the present condition of the Ottoman Empire.

The Grand Vizier, as head of the Government and representative of the Sovereign, is assisted by the Medjliss-i-Hass, or Privy Council, which corresponds to the British Cabinet. The Medjliss-i-Hass consists of the following members: 1, The Grand Vizier; 2, The Sheik-ul-Islam; 3, The Minister of the Interior; 4, The Minister of War; 5, The Minister of Evkaf (Worship); 6, The Minister of Public Instruction; 7, The Minister of Public Works; 8, President of Council of State; 9, Minister of Foreign Affairs; 10, Minister of Finance; 11, Minister of Marine; 12, Minister of Justice; 13, Minister of Civil List.

The whole of the empire is divided into thirty Vilayets, or governments, and subdivided into Sanjaks, or provinces, Kazas, or districts, Nahies, or subdistricts, and Kariés, or communities. A Vali, or governor general, who is held to represent the Sultan, and is assisted by a provincial council, is placed at the head of each Vilayet. The provinces, districts, etc., are subjected to inferior authorities (Mutesarifs, Calmakams, Mudirs and Mukters) under the superintendence of the principal governor. The division of the country into Vilayets has been frequently modified of late for political reasons. For similar reasons six of the Sanjaks of the empire are governed by Mutesarifs appointed directly by the Sultan, and are known as Mutesarifats. All subjects, however humble their origin, are eligible to, and may fill, the highest offices in the State.

Under the capitulations foreigners residing in Turkey are under the laws of their respective countries, and are amenable for trial (in cases in which Turkish subjects are not concerned) to a tribunal presided over by their consul. Foreigners who own real property are amenable to the Ottoman civil courts in questions relative to their landed property. Cases between foreign and Turkish subjects are tried in the Ottoman courts, a dragoman of the foreign consulate being present to see

that the trial be according to the law; the carrying out of the sentence, if against the foreigner, to be through his consulate. Cases between two foreign subjects of different nationalities are tried in the court of the defendant.

Religion and Education.—Mahometans form the vast majority of the population in Asiatic Turkey, but only one half of the population in European Turkey. Recognized by the Turkish Government are the adherents of seven non-Mahometan creeds—namely: 1, Latins, Franks, or Catholics, who use the Roman Liturgy, consisting of the descendants of the Genoese and Venetian settlers in the empire, and proselytes among Armenians; Bulgarians, and others; 2, Greeks; 3, Armenians; 4, Syrians and United Chaldeans; 5, Maronites, under a Patriarch at Kanobin in Mount Lebanon; 6, Protestants, consisting of converts chiefly among the Armenians; 7, Jews. These seven religious denominations are invested with the privilege of possessing their own ecclesiastical rule. The Bishops and Patriarchs of the Greeks and Armenians, and the "Chacham-Baschi," or high-rabbi of the Jews, possess, in consequence of those functions, considerable influence.

The Mahometan clergy are subordinate to the Sheik-ul-Islam. Their offices are hereditary, and they can only be removed by Imperial iradé. A priesthood, however, in the strict sense of a separate class, to whom alone the right of officiating in religious services belongs, cannot be said to exist in Turkey.

The Koran and Multeka encourage public education and, as a consequence, public schools have been long established in most considerable Turkish towns; while "medresses," or colleges, with public libraries, are attached to the greater number of the principal mosques. But the instruction afforded by these establishments is rather limited.

The number of mosques in the Turkish Empire is 2,120, of which 379 are in Constantinople. The number of the clergy is 11,600. Connected with the mosques are 1,780 elementary schools, where education is supplied gratis. The private revenue of the Evkaf (church), previous to the war of 1878, was 30,200,000 piastres (250,000*l.*) per annum, but they have now been reduced to 20,000,000 piastres (166,000*l.*). The expenses are reckoned at 15,000,000 piastres (125,000*l.*). The stipend of the Sheik-ul-Islam, 7,031,520 piastres (56,000*l.*), and those of the Naibs and Muftis, 7,876,646 piastres (63,000*l.*), are paid by the State. The principal revenues of the Evkaf are derived from the sale of landed property which has been bequeathed it, and which is known under the name of Vacouf. Three fourths of the urban property of the empire is supposed to belong to the Vacouf. Purchasers of property of this description pay a nominal annual rent to the Evkaf; but should they die without direct heirs the property reverts to the Church.

SWEDEN AND NORWAY.

By the treaty of Kiel, January 14, 1814, Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people did not recognize this cession, and declared themselves independent. A Constituent Assembly met at Eidsvold, and having adopted, on May 17, a Constitution, elected the Danish Prince, Christian Fredrik, King of Norway. The Swedish troops, however, entered Norway without serious resistance, and, the foreign Powers refusing to recognize the newly elected King, the Norwegians were obliged to conclude, August 14, the Convention of Moss, by which the independency of Norway in union with Sweden was solemnly proclaimed. An extraordinary *Storting* was then convoked, which adopted the modifications in the Constitution made necessary by the union with

Sweden, and then elected King Carl XIII. King of Norway, November 4, 1814. The following year was promulgated a charter, the *Rikssakt*, establishing new fundamental laws on the terms that the union of the two kingdoms be indissoluble and irrevocable, without prejudice, however, to the separate government, constitution, and code of laws of either Sweden or Norway.

The law of succession is the same in Sweden and Norway. In case of absolute vacancy of the throne, the two Diets assemble for the election of the future sovereign, and should they not be able to agree upon one person, an equal number of Swedish and Norwegian deputies have to meet at the city of Karlstad, in Sweden, for the appointment of the King, this nomination to be absolute. The common affairs are decided upon in a Council of State composed of Swedes and Norwegians. In case of minority of the King, the Council of State exercises the sovereign power until a regent or council of regency is appointed by the united action of the Diets of Sweden and Norway.

1. Sweden. — CENTRAL GOVERNMENT. The fundamental laws of the Kingdom of Sweden are: 1. The constitution or *Regerings-formen* of June 6, 1809. 2. The amended regulations for the formation of the Diet of June 22, 1866. 3. The law of royal succession of September 26, 1810. 4. The law on the liberty of the press of July 16, 1812. According to these statutes, the King must be a member of the Lutheran Church, and have sworn fealty to the laws of the land. His person is inviolable. He has the right to declare war and make peace, after consulting the Council of State. He nominates to all higher appointments, both military and civil; concludes foreign treaties, and has a right to preside in the Supreme Court of Justice. The princes of the blood royal, however, are excluded from all civil employments. The King possesses legislative power in matters of political administration, but in all other respects that power is exercised by the Diet in concert with the sovereign, and every new law must have the assent of the crown. The right of imposing taxes is, however, vested in the Diet. This Diet, or Parliament of the realm, consists of two Chambers, both elected by the people. The First Chamber consists of 150 members. The election of the members takes place by the *Landstings*, or provincial representations, 25 in number, and the municipal corporations of the towns, not already represented in the *Landstings*, Stockholm, Göteborg, Malmö, Norrköping, and Gefle. All members of the First Chamber must be above 35 years of age, and must have possessed for

at least three years previous to the election either real property to the taxed value of 80,000 kronor, or 4,444*l.*, or an annual income of 4,000 kronor, or 223*l.* They are elected for the term of nine years, and obtain no payment for their services. The Second Chamber consists of 230 members, of whom 80 are elected by the towns and 150 by the rural districts. All natives of Sweden, aged 21, possessing real property to the taxed value of 1,000 kronor, or 56*l.*, or farming, for a period of not less than five years, landed property to the taxed value of 6,000 kronor, or 333*l.*, or paying income tax on an annual income of 800 kronor, or 45*l.*, are electors; and all natives, aged 25, possessing the same qualifications, may be elected members of the Second Chamber. The number of qualified electors to the Second Chamber in 1899 was 339,876, or 6.7 of the population; only 136,982, or 40.3 of the electors, actually voted. In the smaller towns and country districts the election may either be direct or indirect, according to the wish of the majority. The election is for the term of three years, and the members obtain salaries for their services, at the rate of 1,200 kronor, or 67*l.*, for each session of four months, or, in the case of an extra session 10 kronor (11*s.*) a day, besides traveling expenses. The salaries and traveling expenses of the deputies are paid out of the public purse. The members of both Chambers are elected by ballot, both in town and country.

Local Government. — The provincial administration is entrusted in Stockholm to a governor-general, and in each of the 24 governments to a prefect, who is nominated by the King. As executive officers of the prefects there are 118 bailiffs (*Kronfogdars*) and 520 sub-officers (*Länsmäns*). Each rural parish, and each town, forms a commune or municipality in which all who pay the local taxes are voters. The communal assembly or municipal council decides on all questions of administration, police and communal economy. Ecclesiastical affairs and questions relating to primary schools are dealt with by the parish assemblies, presided over by the pastor of the parish. Each government has a general council which regulates the internal affairs of the government. The council meets annually for a few days in September under a president appointed by the King from among its members. The members are elected by the towns and provincial districts. Towns having a population of 1-150th of the total population and towns already separated from the "*Landstings*" are administered separately by their municipal councils; these towns are Stockholm, Göteborg, Malmö, Norrköping, and Gefle.

Religion. — The mass of the population adhere to the Lutheran Protestant Church, recognized as the State religion. There were 12 bishoprics, and 2,671 parishes in 1901. At the census of 1890, the number of Evangelical Lutherans was returned at 4,735,218, the Protestant Dissenters, Baptists, Methodists, and others numbering 44,378, including 23,307 unbaptized children. Of other creeds, there were 1,390 Roman Catholics, 46 Greek Catholics, 313 Irvingites, 3,402 Jews, and 234 Mormons. No civil disabilities attach to those not of the national religion. The clergy are chiefly supported from the parishes and the proceeds of the Church lands.

Instruction. — The Kingdom has two universities, at Upsala and Lund, the former frequented by 1,384 and the latter by 628 students in the spring of 1901. There are also a state faculty of medicine in Stockholm (280 students) and private philosophical faculties in

Stockholm and Göteborg. Education is well advanced in Sweden. In 1904 there were 79 public high schools, with 17,244 pupils; 29 people's high schools, 1,388 pupils; 13 normal schools for elementary school teachers, 1,239 pupils; 2 high and 6 elementary technical schools; 10 navigation schools, 700 pupils; 21 institutions and schools for deaf mutes and blind; besides medical schools, military schools, veterinary and other special schools. Public elementary instruction is gratuitous and compulsory, and children not attending schools under the supervision of the Government must furnish proofs of having been privately educated.

Justice.—The administration of justice is entirely independent of the Government. Two functionaries, the *Justitie-Kansler*, or Chancellor of Justice, and the *Justitie-Ombudsman*, or Attorney-General, exercise a control over the administration. The former, appointed by the King, acts also as a counsel for the Crown; while the latter, who is appointed by the Diet, has to extend a general supervision over all the courts of law. The Kingdom, which possesses one Supreme Court of Judicature, is divided into 3 high court districts and 208 district court divisions, of which 90 are urban districts and 118 country districts.

In town these district courts (or courts of first instance) are held by the burgo-master and his assessors; in the country by a judge and 12 jurors—peasant proprietors—the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. In Sweden trial by jury only exists for affairs of the press.

Pauperism.—Each commune is bound to assist children under 15 years of age, if their circumstances require it, and all who from age or disease are unable to support themselves. In other cases the communal poor board decides what course to take. Each commune and each town (which may be divided) constitutes a poor district, and in each is a board of public assistance.

2. Norway.—CENTRAL GOVERNMENT.

—The Constitution of Norway, called the *Grundlovs*, bears date May 17, 1814, with several modifications passed at various times. It vests the legislative power of the realm in the *Storting*, or Great Court, the representative of the sovereign people. The King, however, possesses the right of veto over laws passed by the *Storting*, but only for a limited period. The royal veto may be exercised twice; but if the same bill pass three *Storthings* formed by separate and subsequent elections, it becomes the law of the land without the assent of the sovereign. The King has the command of the land and sea forces, and makes all appointments, but, except in a few cases, is not allowed to nominate any but Norwegians to public offices under the crown.

The *Storting* assembles every year. New elections take place every three years. The meetings take place *suo jure*, and not by any writ from the King or the executive. They begin on the first week day after October 10 each year, and must receive the sanction of the King to sit longer than two months. Every Norwegian citizen of twenty-five years of age (provided that he resides and has resided for five years in the country) is entitled to elect, unless he is disqualified from a special cause, for instance, actual receiving of parish relief. Under the same conditions citizens thirty years of age, and having resided in Norway for ten years, are qualified to be elected. The mode of election is indirect. Every third

year the people choose their deputies, one to fifty voters in towns where the election is administered by the magistrate, and one to a hundred in rural districts, where the election is presided over by the bailiff (*Lensmand*)—another member of the election committee. The deputies afterwards assemble and elect from among themselves, or from among the other qualified voters of the district, the *Storting* representatives. Former members of the Council of State can be elected representatives of any district of the Kingdom without regard to their residence. No new election takes place for vacancies, which are filled by the persons already elected for that purpose, or, if not, who received the second largest number of votes. At the election in 1900 the number of electors was 440,174, or 19.73 per cent. of total population, while 238,617 votes, or 54.21 per cent. of the whole number, were recorded. The *Storting* has 114 members—38 from towns, 76 from rural districts.

Local Government.—The administrative division of the country is into twenty districts, each governed by a chief executive functionary (*Amtmand*), viz., the towns of Kristiania and Bergen, and 18 *Amts* (counties). There are 40 towns, 22 *Ladesteder* (ports), and 541 rural communes (*Herreder*), mostly parishes or sub-parishes (wards). The government of the *Herred* is vested in a body of representatives (from 12 to 48), and a council (*Formænd*), elected by and from among the representatives, who are four times the number of the *Formænd*. The representatives elect conjointly every third year from among the *Formænd* a chairman and a deputy chairman. All the chairmen of the rural communes of an *Amt* form with the *Amtmand* the *Amtsting* (county Diet), which meets yearly to settle the budget of the *Amt*. The *Amtmand* is the chairman of the Diet. The towns and the ports form 60 communes, also governed by a council (6 to 21), and representatives (four times the size of the council); a chairman and a deputy chairman are yearly elected. The members of the local governing bodies are elected under the same conditions as the *Storting*, with the exception that a limited suffrage was in 1901 accorded to women.

Religion and Instruction.—The evangelical Lutheran religion is the national Church and the only one endowed by the State. Its clergy are nominated by the King. All other Christian sects (except Jesuits), as well as the Jews, are tolerated, and free to exercise their religion within the limits prescribed by the law and public order. Ecclesiastically Norway is divided into 6 bishoprics, 83 *Provstier* (provostships, or archdeaconries), 482 *Præstegjeld* (clerical districts).

Education is compulsory, the school age being from six and a half in towns and seven in the country to fourteen.

Justice and Crime.—For civil justice Norway is divided into 109 districts, each with an inferior court. Of these 82 are rural courts, divided into 461 circuits. The other courts are in towns. There are three superior courts, having each one chief justice and two other justices, and one supreme court for the whole kingdom (*Højesteret*), consisting of one president and at least 6 other justices. There is a court of mediation (*Forsigtelseskommission*) in each town and *Herred* (district) consisting of two men chosen by the electors, before which, as a rule, civil cases must first be brought.

According to the law of criminal procedure of July 1, 1887, all criminal cases (not military, or coming under the *Rigsret*—the court for impeachments) shall be tried either by jury (*Lagmanderet*), or *Meddomsret*.

DENMARK.

The present Constitution of Denmark is embodied in the charter of June 5, 1849,

which was modified in some important respects in 1855 and 1863, but again restored, with various alterations, by a statute which obtained the royal sanction on July 28, 1866. According to this charter, the executive power is in the King and his responsible ministers, and the right of making and amending laws in the *Rigsdag* or Diet, acting in conjunction with the sovereign. The King must be a member of the Evangelical Lutheran Church, which is declared to be the religion of the State. The *Rigsdag* comprises the *Landsting* and the *Folkething*, the former being a Senate or Upper House, and the latter a House of Commons. The *Landsting* consists of 66 members. Of these 12 are nominated for life by the Crown, from among actual or former representatives of the Kingdom, and the rest are elected indirectly by the people for the terms of eight years. The choice of the latter 54 members of the Upper House is given to electoral bodies composed partly of the largest taxpayers in the country districts, partly of deputies of the largest taxpayers in the cities, and partly of deputies from the totality of citizens possessing the franchise. Eligible to the *Landsting* is every citizen who has passed his twenty-fifth year and is a resident of the district. The *Folkething*, or Lower House of Parliament, consists of 114 members, returned in direct election, by universal suffrage, for the term of three years. According to the Constitution there should be one member for every 16,000 inhabitants. The franchise belongs to every male citizen who has reached his thirtieth year, who is not in the actual receipt of public charity or who, if he has at any former time been in receipt of it, has repaid the sums so received, who is not in private service without having his own household, and who has resided at least one year in the electoral circle on the lists of which his name is inscribed. Eligible for the *Folkething* are all men of good reputation past the age of twenty-five. Both the members of the *Landsting* and of the *Folkething* receive payment for their services at the rate of 3 rixdalers (6s. 8d.) per day during the actual session, and are reimbursed for traveling expenses to and from the capital.

Religion.—The established religion of Denmark is the Lutheran, which was introduced as early as 1536, the Church revenue being at that time seized by the Crown, to be delivered up to the university and other religious and educational establishments. The affairs of the National Church are under the superintendence of seven bishops. The bishops have no political character. Complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters. **Instruction.**—Elementary education has been widely diffused in Denmark since the beginning of this century, and in 1814 it was made compulsory. The school age is from 7 to 14. The public schools, maintained by communal rates, are free. Of elementary schools there

are about 2,940 (28 in Copenhagen, 132 in other towns, and 2,780 in rural districts), with 307,633 pupils. For higher instruction there are: a veterinary and agricultural college at Copenhagen (founded 1892) with 37 professors and teachers and about 300 pupils in 1901; 31 agricultural or horticultural schools; 67 *folkehøjskoler* or popular high schools; 31 Latin schools (14 Government, 17 private); a college of pharmacy (founded 1892) with 7 teachers and 57 students; a Royal Academy of Arts (founded 1754) with 7 teachers and 200 pupils; a Polytechnic Institution (founded 1829) with 23 professors and teachers and about 450 students; 99 *realskoler* or technical and commercial schools. The *folkehøjskoler* are all private, but to them and the agricultural schools the State annually makes a grant of about 300,000 kroner. To 72 of the *realskoler* grants are made amounting annually to about 110,000 kroner, exclusive of the cost of apparatus, inspection, etc. The University of Copenhagen, founded in 1479, has five departments to all of which, except theology, women are admitted on equal terms with men. It has 85 professors and teachers and about 400 matriculated students.

Justice and Crime.—The lowest courts of justice in Denmark are those of the hundred or district magistrates (*herredsfogder* and *birkedommere*) and town judges (*byfogder*). From these courts an appeal lies to the superior court, or court of second instance, in Viborg with 9 judges, and in Copenhagen with 17 judges. The Copenhagen superior court, however, is identical with that of the civic magistrates. The supreme court (*Højesteret*) or court of final appeal, with a chief justice, 12 puisne judges, and 11 special judges, sits in Copenhagen. Judges under 65 years of age can be removed only by judicial sentence.

SWITZERLAND.

On August 1, 1291, the men of Uri, Schwyz, and Lower Unterwalden, entered into a defensive League. In 1353 the League included eight cantons, and in 1513, thirteen. Various associated and protected territories were acquired, but no addition was made to the number of cantons forming the League till 1798. In that year, under the influence of France, the Helvetic Republic was formed, with a regular constitution. This failed to satisfy the cantons, and in 1803 Napoleon, in the Act of Mediation, gave a new constitution and increased the number of cantons to nineteen. In 1815, the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, Great Britain, Portugal, Prussia, and Russia, and the Federal Pact, which had been drawn up at Zurich and which included three new cantons, was accepted by the Congress of Vienna. The Pact remained in force till 1848, when a new constitution, prepared without foreign interference, was accepted by general consent. This, in turn, was, on May 29, 1874, superseded by the constitution which is now in force.

The constitution of the Swiss Confederation may be revised either in the ordinary forms of Federal legislation, with compulsory referendum, or by direct popular vote, a majority both of the citizens voting and of the cantons being required, and the latter method may be adopted on the demand (called the *popular initiative*) of 50,000 citizens with the right to vote. The Federal Government is supreme in matters of peace, war, and treaties; it regulates the army, the postal and tele-

graph system, the coining of money, the issue and repayment of bank notes, and the weights and measures of the Republic. It provides for the revenue in general, and especially decides on the import and export duties in accordance with principles embodied in the constitution. It legislates in matters of civil capacity, copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidize, besides the Polytechnic School at Zurich, a Federal University and other higher educational institutions. There has also been intrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests, and the construction of railways.

The supreme legislation and executive authority are vested in a parliament of two chambers, a *Ständerath*, or State Council, and a *Nationalrath*, or National Council. The first is composed of forty-four members, chosen and paid by the twenty-two cantons of the Confederation, two for each canton. The mode of their election and the term of membership depend entirely on the canton.

Local Government.—Each of the cantons and demicantons of Switzerland is *souverain*, so far as its independence and legislative powers are not restricted by the federal constitution; each has its local government, different in its organization in most instances, but all based on the principle of absolute sovereignty of the people. In a few of the smallest cantons, the people exercise their powers direct, without the intervention of any parliamentary machinery, all male citizens of full age assembling together in the open air, at stated periods, making laws and appointing their administrators. Such assemblies, known as the *Landsgemeinden*, exist in Appenzell, Glarus, Unterwald, and Uri. In all the larger cantons, there is a body chosen by universal suffrage, called *der Grosse Rath*, which exercises all the functions of the *Landsgemeinden*. In all the cantonal constitutions, however, except that of Freiburg and those of the cantons which have a *Landsgemeinde*, the *referendum* has a place. This principle is most fully developed in Zurich, where all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revision of the constitution, must be submitted to the popular vote. In many of the cantons, the *popular initiative* has also been introduced. The members of the cantonal councils, as well as most of the magistrates, are either honorary servants of their fellow citizens, or receive a merely nominal salary. In each canton there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungstatthalter*) representing the canton. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, maire or syndic, and not less than four other members. In the smaller communes there is a council only, with its proper officials.

Religion.—According to the Constitution of 1874 there is complete and absolute liberty of conscience and of creed. No one can incur any penalties whatsoever on account of his religious opinions. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The order of Jesuits and its affiliated societies cannot be received in any part of Switzerland; all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious orders whose action is dangerous to the State, or interferes with the peace of different creeds. The foundation of new convents or religious orders is forbidden.

The population of Switzerland is divided between Protestantism and Roman Catholicism, about 69 per

cent. of the inhabitants adhering to the former, and 40 per cent. to the latter. According to the census of December 1, 1900, the number of Protestants amounted to 1,918,197, of Roman Catholics to 1,383,135, and of Jews to 12,551.

Instruction.—In the educational administration of Switzerland there is no centralization. Before the year 1848 most of the cantons had organized a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it was made obligatory (the school age varying in the different cantons), and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free. In the north-eastern cantons, where the inhabitants are mostly Protestants, the proportion of the school-attending children to the whole population is as one to five; while in the half Protestant and half Roman Catholic cantons it is as one to seven; and in the entirely Roman Catholic cantons as one to nine. The compulsory law has hitherto not always been enforced in the Roman Catholic cantons, but is rigidly carried out in those where the Protestants form the majority of inhabitants. In every district there are primary schools, and secondary schools for youths of from twelve to fifteen. Of the contingent for military service in 1900, 18 per cent. could not read, and 62 per cent. could not write.

PANAMA.

The new republic of Panama extends about 460 miles from east to west and has an area of about 31,500 square miles—about one fourth less than the state of Ohio. The statistical bureau of the Department of Commerce at Washington estimates the population at about 300,000. It is chiefly the seacoast that is inhabited, most of the interior being dense jungle and unexplored. The city of Panama has about 25,000 people, and Colon, formerly known as Aspinwall, is a smaller place, with about 3,000. Colon dates from the building of the railroad, while Panama was founded a hundred years before the Pilgrims landed at Plymouth. The greatest drawback to the development of the isthmus has been the prevalence of fevers. American engineers, however, declare that with proper sanitary administration it could be made a favorite winter resort.

On November 3, 1903, dispatches to the daily papers informed the world that the inhabitants of the state of Panama were in revolt against the government of the United States of Colombia. On November 7, President Roosevelt, through Secretary Hay, recognized the Republic of Panama, and notified Colombia that she must not attempt to regain control of the isthmus. On the same day, the provisional government of the Republic of Panama, through the American consul, notified Secretary Hay that Philippe Bruneau-Varilla had been appointed its diplomatic agent in this country, and that a commission would leave Panama for Washington on November 10, to arrange for a treaty to govern the construction and operation of the canal. Singularly enough, M. Bruneau-Varilla holds a great deal of stock in the French Canal Company, of which concern he is also one of the engineers.

The promptness with which the United States and Europe showed a determination to prevent punitive action by Colombia caused many persons to assume that there had been concerted preparation. The theory has been both strongly supported and strongly contested. At any rate, a record in republic-making has been established, not only in speed but also in bloodlessness. Not a shot was fired, nor is there on record the wounding or killing of one man.

Only in Panama could such an undertaking have been carried through to success, and only under conditions actually existing in Colombia at the time. Necessary, also, was an incentive. The big canal gave that, because secession from the Federation meant the paying to Panama of many millions of dollars that would otherwise have gone into the Colombian treasury.

Cortez was the first to see that a canal across the isthmus was necessary, and he actually had a route surveyed. Then came Antonio Galvao, in 1550, who suggested digging a ditch along the identical route now proposed. In 1818, Spain decided that the work should be begun, but industrial progress was interfered with by a continuous insurrection inaugurated just then by Bolivar, the Liberator, who succeeded in organizing the United States of Colombia, which became the Republic of New Granada after his death. In 1840, Panama and Veragua seceded, but were quickly whipped back into the union. In 1843, the French government discussed the advisability of building the canal, but soon abandoned the idea. In 1846, when travel to the Pacific was increasing, the United States entered into a treaty with New Granada, wherein that government guaranteed that "The right of way or transit across the Isthmus of Panama, upon any mode of communication that now exists or may hereafter exist, shall be free and open to the government and citizens of the United States." In compensation, the United States, in the same treaty, guaranteed to maintain uninterrupted traffic between Panama and Colon, and to preserve "The rights of sovereignty and property which New Granada has and possesses over the said territory."

Then following the building of the trans-isthmian railway, which was completed in 1855. The next year Panama and Antioquia seceded, but were reincorporated in the Federation after a few years. In 1879, Ferdinand de Lesseps organized a large company for the construction of the canal and failed. In 1902, Congress passed a bill in which provision was made to purchase from the French company, for forty million dollars, its entire interest in

the Panama Canal, and to pay Colombia ten millions for the right to build and control the canal, and an annual rental of two hundred and fifty thousand dollars for the territory traversed. The President was authorized to negotiate a treaty with Colombia, which he did, but, unfortunately, the Colombian senate adjourned on October 31, 1903, without ratifying it.

Italy and France have recognized the new republic of Panama, Germany has refused all invitations to interfere, and England is neutral.

In February, 1904, Panama was duly organized as an international state, and a treaty concluded with it by the United States, granting to the latter country the right to construct the Panama canal. In pursuance of this treaty, the President appointed a board of commissioners, made up for the most part of eminent civil and military engineers, to take charge of the construction of the canal. Work is expected to begin as soon as the appropriation becomes available, and after the title has been legally passed by the French company. Ten years is the time estimated for its completion.

International Copyright Protection.

—By an act of Congress which went into effect on July 1, 1891, the United States Government removed the limitation of the privilege of copyright to citizens of the United States, thus making it possible for foreign authors to obtain protection in this country upon the same terms as native authors, except that they are required to pay a double fee. At the same time Congress stipulated that this copyright protection should apply only to a citizen of a foreign state or nation when such foreign state or nation permitted citizens of the United States to enjoy the benefits of copyright on substantially the same basis as its own subjects, or when such foreign state or nation should become a party to an international agreement providing for reciprocity in the granting of copyright. Under the operation of this amendment of the copyright law, therefore, the privileges of copyright in the United States have been extended, by presidential proclamation, to the authors of Belgium, Chili, Costa Rica, Denmark, France, Germany, Great Britain and her possessions (Australia, Canada, India, etc.), Italy, Mexico, Netherlands, Portugal, Spain, and Switzerland, and, as the result, the artists, composers, and authors of these nations are now entitled to receive copyright protection from the United States, and American authors and makers of works of art may demand the same privilege for their production under the laws of the other countries.

HEADS OF THE GOVERNMENTS OF THE WORLD.

MARCH 1, 1906.

| COUNTRY. | Official Head. | Title. | Born. | Acceded. |

RATES OF POSTAGE.

Letters.—Prepaid by stamps, 2 cents each ounce or fraction thereof to all parts of the United States and Canada; forwarded to another post office without charge on request of the person addressed; if not called for, returned to the writer free, if indorsed with that request. If the stamp is omitted the letter is forwarded to the Dead-Letter Office and returned to the writer. For registering letters the charge is 8 cents additional. Drop letters at letter-carrier offices, 2 cents per ounce or fraction thereof; at other offices, 1 cent per ounce or fraction thereof. On insufficiently prepaid matter mailed in Canada, 3 cents per $\frac{1}{2}$ ounce or fraction thereof. Stamped postal cards, furnished only by government, 1 cent each; if anything except a printed address slip is pasted on a postal card, or anything but the address written on the face, letter postage is charged. Special delivery letters 10 cents additional. The Rural Delivery system is being extended in various parts of the country to the great accommodation of thousands.

Second-Class Matter.—Periodicals issued at regular intervals, at least four times a year, and having a regular list of subscribers, with supplement, sample copies, 1 cent a pound; periodicals, other than weekly, if delivered by letter carrier, 1 cent each; if over 2 ounces, 2 cents each. When sent by other than publishers, for 4 ounces or less, 1 cent.

Third-Class Matter (not exceeding four pounds).—Printed matter, books, proof-sheets, corrected or uncorrected, unsealed circulars, inclosed so as to admit of easy inspection without cutting cords or wrappers, 1 cent for each 2 ounces.

Fourth-Class Matter.—Not exceeding four pounds, embracing merchandise and samples, excluding liquids, poisons, greasy, inflammable or explosive articles, live animals, insects, etc., 1 cent an ounce. Postage to Canada and British North American states, 2 cents per ounce; must be prepaid; otherwise, 6 cents.

Postage Rates to Foreign Countries.—To the countries and colonies which, with the United States, comprise the Universal Postal Union, the rates of postage are as follows: Letters, per 15 grams ($\frac{1}{4}$ ounce), pre-payment optional, 5 cents; postal cards, each, 2 cents; newspapers and other printed matter, per 2 ounces, 1 cent. Commercial papers—First 10 ounces or fraction thereof, 5 cents; every additional 2 ounces, 1 cent. Samples of merchandise—First 4 ounces, 2 cents; every additional 2 ounces, 1 cent. Registration fee on letters or other articles, 10 cents. All correspondence other than letters must be prepaid at least partially.

Printed matter other than books received in the mails from abroad under the provisions of postal treaties or conventions is free from customs duty.

Postal Money Orders.—Not exceeding \$2.50, 3 cents; over \$2.50 to \$5, 5 cents; over \$5 to \$10, 8 cents; over \$10 to \$20, 10 cents; over \$20 to \$30, 12 cents; over \$30 to \$40, 15 cents; over \$40 to \$50, 18 cents; over \$50 to \$60, 20 cents; over \$60 to \$75, 25 cents; over \$75 to \$100, 30 cents.

To Switzerland, Germany, Belgium, Portugal, Canada, Newfoundland, Italy, France, Algeria, New South Wales, Victoria, Tasmania, New Zealand, Jamaica: Fees, not exceeding \$10, 15 cents. To Great Britain, Ireland, and adjacent islands: Fees, not exceeding \$10, 25 cents. To British India: Fees, not exceeding \$10, 35 cents.

THE NATIONAL BANK LAW.

In towns of a population of 3,000 or less the minimum capital allowed is \$25,000. In towns of between 3,000 and 6,000 people the minimum capital allowed is \$50,000; and in cities and towns having a population of 6,000 or more but not exceeding 50,000, the minimum capital must be \$100,000; while in cities of over 50,000 people the bank must have a capital of at least \$200,000. There is no limit to the amount of excess capital.

Every national bank must purchase and deliver to the Treasurer of the United States registered U. S. bonds to an amount not less than \$50,000, except banks with a capital of \$150,000, or less, the minimum amount of bonds required is one quarter of the capital.

The Government then issues and delivers to the bank circulating notes in denominations of \$5, \$10, \$20, \$50, \$100, as desired, in total amount equal to the par value of the bonds deposited. A bank may deposit bonds and receive circulating notes to an amount equal to its capital.

Each bank is required to make a sworn statement of its condition to the Comptroller of the Currency at Washington at least five times a year, and to publish the same in a newspaper. Two examinations a year are made by capable men employed by the Government as national bank examiners, their visits being always without notice.

Requirement is made in the National bank act for the accumulation of a surplus by each bank from its earnings as an additional protection above its capital to the depositors. The depositors are further protected against loss by the liability of each stockholder to the payment of an amount equal to the par value of the stock held, in event of failure of the bank.

PARLIAMENTARY LAW CONDENSED.

Letters refer to Rules below.

Modifying or amending.

8. To amend or to substitute, or to divide the question K

To refer to committee.

7. To commit (or recommit) . . . D

Deferring action.

6. To postpone to a fixed time . . C
4. To lay on the table A E G

Suppressing or extending debate.

5. For the previous question . . . A E M
To limit, or close, debate . . . A M
To extend limits of debate . . . A

Suppressing the question.

- Objection to consideration of question A H M N

9. To postpone indefinitely . . . D E
4. To lay upon the table A E G

To bring up a question the second time.

- To reconsider debatable question D E F I
To reconsider undebatable question A E F I

Concerning Orders, Rules, etc.

8. For the orders of the day . . . A E H N
To make subject a special order . . M
To amend the rules M
To suspend the rules A E F M
To take up a question out of its proper order A E
To take from the table A E G
Questions touching priority of business A

Questions of privilege.

- Asking leave to continue speaking after indecorum . . . A
Appeal from chair's decision touching indecorum . . . A E H L
Appeal from chair's decision generally E H L
Question upon reading of papers . . A E
Withdrawal of a motion A E

Closing a meeting.

2. To adjourn (in committees, to rise), or to take a recess, without limitation A E F

1. To fix time to which to adjourn . . B

Order of Precedence.—The motions above numbered 1 to 9 take precedence over all others in the order given, and any one of them, except to amend or substitute, is in order while a motion of a lower rank is pending.

RULE A. Undebatable, but remarks may be tacitly allowed.

RULE B. Undebatable if another question is before the assembly.

RULE C. Limited debate allowed on propriety of postponement only.

RULE D. Opens the main question to debate. Motions not so marked do not allow of reference to main question.

RULE E. Cannot be amended. Motion to adjourn can be amended when there is no other business before the house.

RULE F. Cannot be reconsidered.

RULE G. An affirmative vote cannot be reconsidered.

RULE H. In order when another has the floor.

RULE I. A motion to reconsider may be moved and entered when another has the floor, but the business then before the house may not be set aside. This motion can only be entertained when made by one who voted originally with the prevailing side. When called up it takes precedence of all others which may come up, excepting only motions relating to adjournment.

RULE K. A motion to amend an amendment cannot be amended.

RULE L. When an appeal from the chair's decision results in a tie vote, the chair is sustained.

RULE M. Requires a two-thirds vote unless special rules have been enacted.

RULE N. Does not require to be seconded.

General Rules.—No motion is open for discussion until it has been stated by the chair.

The maker of a motion cannot modify it or withdraw it after it has been stated by the chair, except by general consent.

Only one reconsideration of a question is permitted.

A motion to adjourn, to lay on the table, or to take from the table, cannot be renewed unless some other motion has been made in the interval.

On motion to strike out the words, "Shall the words stand part of the motion?" unless a majority sustains the words, they are struck out.

On motion for previous question, the form to be observed is, "Shall the main question be now put?" This, if carried, ends debate.

On an appeal from the chair's decision, "Shall the decision be sustained as the ruling of the house?" the chair is generally sustained.

On motion for orders of the day, "Will the house now proceed to the orders of the day?" This, if carried, supersedes intervening motions.

When an objection is raised to considering questions, "Shall the question be considered?" objections may be made by any member before debate has commenced, but not subsequently.

Draco's Laws.—Draco, an Athenian lawgiver and archon, was the author of the first written code of laws at Athens, which he is supposed to have published in the fourth year of the 39th Olympiad, 621 B. C. He was of distinguished birth, honored for his severe manners and his large experience in public affairs, and the people of Athens, a prey to anarchy, besought him to give them a code of laws. These, however, effected little change in the form of the state, but by being committed to writing put an end to the arbitrary administration of justice on the part of the archons, and resulted in the establishment of a court of appeals—that of the Ephetæ. The system which he proposed linked together civil and moral duties. He took the citizen at the moment of his birth, prescribed the manner in which he should be nourished and educated, and followed him with directions through the different epochs of life. His legislation had a beneficial and permanent effect upon the political development of Athens. The extraordinary severity of these laws, however, which punished the slightest theft, or even laziness, with death, no less than sacrilege, murder, and treason, caused them to be often neglected, and made them so hated that Solon was appointed to draw up a new code. Solon, though he softened their severity in some instances, retained that law which punished a murderer with death. Draco, at a later period, went to Ægina, where, after having introduced his laws, he is said to have been stifled in the theater by the garments thrown upon him as a mark of respect by the people. Extremely severe and sanguinary laws are still called *Draconic*, and in ancient Greece it was commonly said that Draco's laws "were written in blood."

Trial by Jury.—The form of trial by jury is generally conceded to be derived from the institutions of the Greeks and Romans. There was a custom in the ancient city of Athens whereby a certain number of freemen, selected by lot, heard and decided, under the direction of a presiding judge, every case to be tried at law, each case being heard and determined by a different set of men. A similar system was adopted in Rome; and as the Romans always introduced their laws and institutions into all their provinces, it is probable that their mode of judicial procedure was established among the Britains. Another form, called the trial by compurgation, was in use among the Saxons. In this, each party to a suit appeared, with certain of his friends, who swore with him to the truth of his case. As the number of the compurgators was usually six on each side, it is supposed by some that

we have here the origin of the number of the modern jury. Witnesses were first brought in to aid the jury during the reign of Edward III., but it was not until the reign of Queen Anne that the law provided that those who had evidence to give could not serve as jurors. In Scotland the jury system was established at a very early date, but was soon after discontinued in civil cases. A jury in that country consists of fifteen, and a majority may render a verdict. The jury in civil cases was re-introduced in the time of George III. In Ireland the jury is substantially the same as in England; but the Repression-of-Crime bill, passed in 1882, provided for the trial of certain cases without juries. In France a jury is only allowed in cases of felony, where a majority of the jurors can render a verdict. In Germany, trial by jury in criminal cases was introduced early in the century. It was established in Prussia in 1819, and again by the Constitution of 1848; but in 1851 political offenses were withdrawn from its operation. The system was adopted by Austria in 1850, by Greece in 1834, and by Portugal in 1837. It has also been introduced in recent times into Italy, into Brazil, and finally into Russia, where the first trial by jury was held August 8, 1886. In each of these last-named countries a verdict can be rendered by the majority. The jury system has existed in Belgium since that country separated from Holland, and includes within its operations political offenses and those of the press. In Switzerland all crimes against the Confederation are tried by jury, and for other crimes each canton has its own machinery. The form of trial by jury was brought from England to America by the colonists, and is protected by mention in the Federal Constitution and in the Constitutions of most of the states. It is also in use in the South American republics. The origin of the institution as found in England is also ascribed by some to the establishment of Norman law there by William the Conqueror, as the Normans had a form of trial by jury much more like that of modern times than any legal usage of the Saxons.

Chinese Immigration Law.—According to the law passed by both houses of Congress and approved by the President in 1882, and amended in May, 1884, Chinese laborers are forbidden to come to the United States under penalty of being returned. The law further declares that any master of any vessel who shall knowingly land any Chinese laborer shall be deemed guilty of a misdemeanor, and for every Chinese brought shall be fined a sum not exceeding \$500, and may also be imprisoned for one year. Chinese

persons who are not laborers desiring to visit this country are obliged to bring with them from the Chinese Government (or any other Government of which they may at the time be subjects) certificates of identification, giving their names in full, description, statement of business, place of residence, etc., the certificates to be also indorsed by the American diplomatic representative in the country where issued, and the forgery or substitution of any name for the correct one in such certificates shall render the perpetrator thereof liable to a fine of \$1,000 and an imprisonment of five years. A master of any vessel bringing into a United States port any such Chinese persons, not laborers, is required to give a list of them to the Collector of Customs of the port. Any master of a vessel who violates any of these provisions against admitting the Chinese forfeits his vessel to the Government, and any person aiding or abetting a Chinaman not lawfully entitled to visit this country to land here renders himself liable to a fine of \$1,000 and one year's imprisonment. Further, any Chinese person found traveling in the United States without a proper certificate shall be removed to the country from whence he came at the cost of the United States, any person who may have been instrumental in bringing such Chinese to the United States being liable for all the expenses of his removal; and all peace officers of the several States and Territories are invested with the powers of a United States marshal for the purpose of carrying the law into effect. The only Chinese persons exempted from the action of this law are diplomatic officers traveling on the business of their Government, their retinue of servants, and Chinamen who arrived within ninety days after the passage of the act. The law also requires Chinese already established in the country to take out certificates, if they leave the United States, in order to prove their identity in the event of return.

Massachusetts Blue-Laws.—In regard to the so-called "blue-laws" of Massachusetts it is difficult to determine just where the line between fact and fancy is to be drawn. It is claimed that the founders of Connecticut borrowed most of their laws and judicial proceedings from Massachusetts. Many of these laws were enacted previous to 1640, and a number were the orders and sentences of the Massachusetts Court of Assistants and General Court. For instance, one order we find is as follows: "It is ordered, that all Rich. Clough's strong water shall presently be seized upon, for his selling greate quantytie thereof to severall men servants, which was the occasion of much disorder, drunkenes, and mis-

demeanor." Another record, in March, 1681, is to the effect that "Nich. Knopp is fyned 5£ for takeing upon him to cure the scurvey, by a water of noe worth nor value, which he solde att a very deare rate, to be imprisoned till hee pay his fine or give securitye for it, or else to be whipped; and shal be lyable to any man's action of whome he hath received money for the said water." In September, 1684, a number of restrictions regarding the fashions of dress were enacted. One of them was as follows: "The court, takeing into consideration the greate, superfluous, and unnecessary expenses occasioned by reason of some newe and immodest fashions, as also the ordinary wearing of silver, golde, and silke laces, girdles, hatbands, etc., hath therefore ordered that noe person, either man or woman, shall hereafter make or buy apparell, either woollen, silke or linnen, with any lace on it, silver, golde, silke, or threed, under the penalty of forfecture of such cloathes." That there was restraint put upon the tongue is shown by the following, under date of September, 1686: "Robert Shorthose, for swearing by the bloud of God, was sentenced to have his tongue put into a cleft stick, and to stand so by the space of haulfe an houre." And here is one against cakes and buns: "It is ordered, also, that no person shall sell any cakes or buns, either in the markets or victualing houses, or elsewhere, upon paine of 10s. fine; provided that this order shall not extend to such cakes as shal be made for any buriall, or marriage, or such like spetiall occasion."

Prohibitory Laws.—The first actual prohibitory law was enacted in Maine in 1851. This was the famous Maine Liquor Law, and it is still in force in that State, and in 1884 its specifications were put in the form of a constitutional amendment, and adopted by a large popular majority. Vermont enacted a prohibitory law in 1852. In 1902 the legislature repealed this statute, and substituted for it a high license law with local option. This law, after being repealed in 1904, was reenacted. A mild prohibitory law was passed by New Hampshire in 1855, which has been strengthened by enactments since adopted. Damages are assessed on the liquor seller for the acts of drunkards in that state, by an act passed in 1870. Massachusetts passed a prohibitory law in 1852, which was repealed in 1868 and restored in 1869. In 1874 it was again repealed, and a general license law was passed which was supplemented in 1881 by a local option provision. The state is now under high license and local option. Rhode Island also passed a prohibitory law in 1852, but it was repealed in 1863 and the license system was substituted.

A second prohibition law was enacted in 1874 only to be replaced by a license law the next year. In 1889 a high license law with local option was adopted. Connecticut passed a prohibitory law in 1854, but owing to some defect in the law, or to the indifference of the people, it could not be enforced, and became virtually a dead letter. In 1872, therefore, it was superseded by the present license law, which has the local option feature. Three other States—Indiana, Illinois, and Iowa—adopted prohibitory laws in 1855. That of Indiana was declared void soon after, and has never been reenacted. The legislative enactment of Illinois was submitted to the people and rejected by them. Since then no effort has been made to make the State prohibitory, but a high license law was passed by the Legislature of 1873. This law has been declared constitutional by the courts, and has been generally successful in its operation. The Iowa law has stood, with some modifications, and where public opinion has supported it, has been generally executed. In 1882 a prohibitory clause was put into the Constitution by popular vote. This amendment has been declared void by the Supreme Court on account of certain technical errors in drawing it up. In 1884 a prohibitory law was passed. Ohio put a "no-license" clause in its constitution and the sale of liquors until 1886 was virtually free throughout the State. In that year the Dow tax law was passed assessing a yearly tax of \$250 upon each saloon. This State has local option.

Two of the States adopted prohibitory laws while they were still under territorial organization—Minnesota in 1852 and Nebraska in 1855. In both cases the law was modified to make it fit public sentiment more nearly, and both States now have high license laws. Kansas adopted a modified prohibitory law in 1866. In 1880 the popular vote added an amendment to the Constitution prohibiting the manufacture and sale of intoxicating liquors in the State "except for medical, scientific, and mechanical purposes."

North Dakota passed her present prohibitory law as an amendment to the Constitution in 1889. South Carolina has the celebrated dispensary system by which the liquor traffic is under the control of the State. The people of Michigan in 1876 abrogated the prohibitory clause of their constitution and in 1887-88 the legislature passed an act providing for local option by counties. A large part of the South is under prohibition by local option exercised in the counties of the several States.

The following list of the territory in United

States under prohibition was approximately correct at the close of 1905:—

- Alabama—21 counties prohibition, 11 dispensary, 34 license.
- Arkansas—45 counties prohibition, 30 license.
- California—180 towns and cities.
- Colorado—55 towns and cities.
- Connecticut—95 prohibition, 73 license towns.
- Delaware—About half the state.
- Florida—33 out of 45 counties.
- Georgia—104 counties prohibition, 33 license and dispensary.
- Illinois—650 towns and cities prohibition.
- Iowa—All the State except 23 cities.
- Kansas—Prohibition by Constitutional Amendment.
- Kentucky—47 counties prohibition; 35 counties with one license town each; 18 counties with two license towns each; 19 counties, unrestricted license.
- Louisiana—20 out of 59 counties.
- Maine—Prohibition by Constitutional Amendment.
- Maryland—15 out of 24 counties.
- Massachusetts—20 cities license, 13 no license; 80 license, 240 no license towns.
- Michigan—420 towns and cities.
- Minnesota—425 towns and cities.
- Mississippi—66 out of 75 towns.
- Missouri—13 out of 115 cities.
- Nebraska—250 towns and cities.
- New Hampshire—145 towns prohibition, 60 towns and 10 cities license.
- New Jersey—200 towns and cities.
- New York—310 out of 943 towns have the right of local option: cities have license by State law.
- North Carolina—Local option recently passed (1903).
- North Dakota—Prohibition by State Constitution.
- Ohio—215 towns prohibition under Beal law.
- Pennsylvania—21 counties, 620 towns and cities.
- Rhode Island—20 towns and cities.
- South Carolina—Dispensary law.
- Tennessee—Prohibition except 8 cities, over 5,000 population.
- Texas—142 counties prohibition; 56 partial prohibition; 48 license.
- Vermont—138 towns prohibition, 83 license.
- Virginia—Richmond the only large city without prohibition.
- West Virginia—42 out of 54 counties.
- Washington—52 towns and cities.
- Wisconsin—310 towns and cities.

The Law of Subscriptions.—1. Subscription is the placing of a signature under a written or printed engagement. By such an act a person contracts, in writing, to pay a

sum of money for a specific purpose; as a subscription to a charitable institution, a subscription for a book, etc.

2. "The law on the subject of these subscription papers," says Parsons, "and of all voluntary promises of contribution, is substantially this: No such promises are binding unless something is paid for them, or unless some party for whose benefit they are made (and this party may be one or more of the subscribers), at the request, express or implied, of the promisor, and on the faith of the subscription, incurs actual expense or loss, or enters into valid contracts with other parties which will occasion expense or loss. As the objection to these promises, or the doubt about them, comes from the want of consideration, it may be removed by a seal to each name, or by one seal, which is declared in the instrument to be the seal of each."

3. A person subscribing for a book is bound to take it when delivered by the agent, provided it corresponds with the sample copy shown him when the subscription was given. The agent or publisher may recover at law the price of the book should the subscriber refuse to take it when presented to him.

4. There is no postal law regulating the transactions between publishers and subscribers. The ordinary rules of contract govern all relations between the parties concerned, and the post office has no part except to deliver the article, or return it when ordered to do so.

5. If the publisher of any paper or periodical sends his paper or magazine, the postmaster must deliver it, if the person to whom it is sent will take it. If he will not take it, the postmaster must notify the publisher.

6. If a person subscribes for a periodical for a given period, say one year, and the publisher sends it accordingly, the subscriber cannot terminate the contract by stopping his paper at any time during the year. But at the end of the year the subscriber may stop his paper even without paying the subscription due. He is under no legal obligation to take the paper another year. The fact that he has not paid for the expired year's subscription does not bind him to continue taking the paper. He can stop taking it at the end of the year and the publisher can sue for and collect his year's subscription only.

7. If at the end of the year the publisher continues to send his paper and the subscriber to receive it, the sending is the offer of another year's subscription at the same price, and the receiving of the paper is an acceptance. The implied contract from such action is a renewal of the subscription; and the publisher can send the paper for the renewed term of one

year and collect the subscription price for that year as well as the preceding.

8. If the publisher advertises terms of subscription, all parties taking the paper under these conditions will be held according to the conditions.

RIGHTS AND OBLIGATIONS OF PARENTS AND CHILDREN.

In ancient domestic life the father ruled as absolute monarch over the family. So it is still in oriental countries. Christian civilization has greatly modified this and laws have been enacted that set forth the relation of parent and child, defining the duties and obligations of each.

Rights of Parents.—1. As long as a child is under age he is subject to the control of the parents, who have all reasonable authority to enforce obedience. As long as a child is properly treated by the parents no one has a right to interfere nor to take away and retain a child against their wishes.

2. *Adopting a Child.* When a child is adopted by another family its parents lose their claim upon it and the adopting persons take their place. A child cannot be adopted without the consent of its parents, but if consent is once given it cannot be revoked.

A child over fourteen must himself consent to the adoption. The Court has in all cases the right to consent to or refuse the adoption.

Application must therefore be made at the County Court and the Judge will consider it and pass upon it.

3. *Punishment.* Parents have a right to punish their minor children providing they are not guilty of cruelty. Brutality is severely punished by law as a crime. The punishment must be reasonable, leaving no bruises nor injuring the health of the child.

4. *Claims upon Earnings.* While the child is a minor parents have a right to all his earnings. They can claim them of his employer. Parents, however, may free the child and allow him to collect and use his own wages. When this is once made public the parents cannot thereafter collect the child's wages.

5. *A Runaway Child.* A child has no right to leave home without permission of the parents; if he does he can be brought back by force. Relations or others who would keep him can be forced by law to give him up unless it can be shown that the father is brutal in his treatment of the child or is not capable because of drunkenness or other causes to properly care for the child.

Obligations of Parents.—*Obligation to Support.* The law requires that parents shall support their minor children. A child having

property of his own does not relieve the parents from supporting him. They can, however, by applying to the Court, get permission to use a part or all of the income from the child's property for his support. Beyond this the parents have no claim upon or control over the child's property.

Children's Rights and Obligations.

— 1. A child can own property over which the parents have no control, except the use of the income of the same for the support of the child, as stated above.

2. Where it is shown that parents are unable to support themselves the child is under legal obligations to support and care for them, at least do what he can toward such support.

3. If a child commits a premeditated crime he is personally liable; parents cannot be held responsible for crimes committed by their minor children.

4. *Guardian.* A guardian may be appointed over an orphan child, or the child may choose his own guardian, who in a legal sense exercises all the authority of a parent.

LAW OF APPRENTICESHIP.

An apprentice is a minor, male or female, bound by due form of law to learn some art, trade, or business, and when so bound is under obligation to serve the master during the time of the apprenticeship.

The Contract should be signed by the apprentice and his father, or in case of death or incapacity of the latter, by the mother or legally constituted guardian. It is executed in duplicate, one copy going to the master, the other to the apprentice. The minor cannot be bound for a longer time than until he becomes of age. Without the consent of the parent or guardian, the contract would not be binding upon the minor.

Consent of Minor. The minor cannot be bound without his consent, which consent must be stated in the contract.

Duties of the Master. It is made the master's duty by the contract to teach the apprentice the trade or business which he himself follows, to provide him with suitable food, clothing, and shelter. He has no right to employ the apprentice in menial labors not connected with

the trade or business which he undertook to teach him. If he corrects for misbehavior, the punishment must be moderate and reasonable.

Duties of the Apprentice. He is under obligation to serve his master faithfully and well; to obey all lawful commands; to guard his master's property and interests, and to faithfully endeavor to learn the business, and to perform what is required of him in the contract.

Termination of Apprenticeship. His time of service ends when he becomes of age, or in case his master dies, unless the contract includes the master's executors and administrators.

If the apprentice runs away, and enters the employment of another, the master is not bound to take him back, but is entitled to whatever he may earn, provided he can prove that the new employer was aware of the existence of the apprenticeship.

The apprentice cannot be compelled to leave the State, nor can he be assigned to anyone else.

BILLS OF LADING.

A bill of lading is a document delivered by a master or owner of a vessel, or the officer of a transportation company, and signed by such parties as an acknowledgment that the goods have been received for transportation.

The bill constitutes the contract between the shipper and the carrier. Three copies of the bill are made out, one is kept by the shipper, another by the party transporting the goods, and the third is sent to the person to whom the goods are directed.

Bills of Lading are transferable and assignable, and the assignee may sue for the recovery of the goods.

If the goods perish without fault of the master of a ship, the freight must be paid, otherwise the master or owner of a ship is liable for damages.

Railroad companies, as common carriers, are subject to the common State laws regulating such business; their bill of lading usually states as to how far they hold themselves responsible for the safe transportation of the goods.

SHAKESPEARE.

From the Bronze Statue by John Quincy Adams Ward in Central Park, New York.

Book II.

Language and Literature.

Language and Literature.

LITERATURE.

In the general sense of the word, comprises the entire results of knowledge, and mental activity, expressed in writing; but in a narrower sense, it is used to denote the department of elegant letters, excluding works of abstract science and mere erudition. In this limited view it comprehends languages, particularly Greek and Latin, grammar, etymology, logic, rhetoric, poetry, history, criticism, bibliography, and a description of the attainments of the human mind in every sphere of research and invention. The history of literature represents the development and successive changes of civilization, so far as these are exhibited in written works, and embraces the history of the literature of special ages or countries, and of the separate branches of literature, as poetry, rhetoric, philology, and so forth.

LANGUAGES.

The classification of the different languages of the earth into a few great families is due to the science of comparative philology, and is of recent origin. Till the latter end of the last century the preference as to the antiquity of language was usually given to the Hebrew, but a striking improvement of linguistic study is dated from the discovery of the Sanskrit, the ancient language of the northern parts of Hindustan, in the latter part of the last century. A belief in an affinity in languages and a separation of them into certain great groups or families then arose.

The languages of the world are divided into four great branches; viz., the **ARYAN**, or Indo-European, the most important; the **SEMITIC**, the **TURANIAN**, and the **DRAVIDIAN**.

The **TURANIAN** family, called also the **Tataric** or **Altaic**, includes the numerous and widely different languages of the Manchoes, the Mongols, the Turks (in Asia and Europe), the Magyars (in Hungary), the Finns (in Russia), and a multitude of other tribes.

The **DRAVIDIAN** includes the Tamil and the dialects in Ceylon and the islands off Asia, etc.

The **SEMITIC** includes the Hebrew, Syriac, Arabic and Ethiopic, Basque (in the Pyrenees), etc.

The **INDO-EUROPEAN**, to which extensive family the English language belongs, is divided into six principal branches.

I. The *Indian* branch, represented by the Sanskrit, which has now ceased to be spoken, but is the mother of the Hindustani, Bengali,

Mahratti, and the other numerous dialects of modern India.

II. The *Medo-Persic* branch, at the head of which is the Zend, in which the Zend-Avesta is composed, and the cuneiform inscriptions of Cyrus, Darius, and Xerxes. Next follow the Pehlevi, of the Sassanian dynasty; the Parsee, in which the national poem of Ferdusi is written (A. D. 1000), and lastly the modern Persian.

III. The *Celtic* branch, divided into two dialects, the Gaelic and the Cymric; the former comprising the Irish or Erse, the Scottish Gaelic or Highland-Scotch, and the Manx of the Isle of Man; and the latter Welsh, the Cornish (now extinct) and the Armorican of Brittany.

IV. The *Græco-Latin* branch, comprising the two ancient classical languages, and the so-called Romanic languages, derived from the Latin, which are six in number; namely, the French, Italian, Spanish, Portuguese, Wallachian, and the Roumanish or Romanese spoken in the Grisons in Switzerland.

V. The *Teutonic* branch, which comprises all the different German and Scandinavian dialects.

VI. The *Slavonic* branch, divided into three principal classes: 1. The *Lettic*, comprising the Lithuanian, the Old Prussian (now extinct), and the Lettish, the language of Kurland and Livonia. 2. The *Western Slavonic*, comprising the Polish; the Bohemian or Tehechian, spoken in Bohemia; the Slovakian, spoken by the Slovaks in Hungary, and the Wendian, spoken in Lusatia. 3. The *Eastern Slavonic*, comprising the Old Slavonic, preserved in the translations of the Bible made by Cyrillus in the ninth century, and its derivate dialect, the Bulgarian; the Russian, Servian, Croatian, and Slovinian.

The *Teutonic* branch of the Indo-European family of languages is divided into two great branches, the German and Scandinavian.

The **GERMAN** is divisible into three principal dialects, the *Mæso-Gothic*, the *Low German*, and the *High German*, the two latter being so called because the Low German is spoken by the inhabitants of the low or flat country near the shores of the German Ocean, while the High German belongs to the higher country in the interior.

1. The *Mæso-Gothic*, the most easterly of all the German dialects, has long ceased to be spoken, but is preserved in the translation of the gospels by *Ulfilas*.

2. The **LOW GERMAN** comprised the following dialects: (1) *Anglo-Saxon*, which was cultivated with great success in England, and in which the second most ancient specimens of the Germanic language are preserved. (2) The *Old Saxon*, so called to distinguish it from the Anglo-Saxon in England, formerly spoken in Westphalia. (3) The *Frisian*, now confined to a small district in Holland. (4) The *Dutch*, the present language of Holland. (5) The *Flemish*, spoken in many parts of Belgium.

3. The **HIGH GERMAN** comprises the Old High German, from the seventh to the eleventh century; the Middle High German, from the twelfth century to the Reformation, and the New High German, which since Luther's time has been the literary language of Germany.

The **SCANDINAVIAN** branch, of which the most ancient language is the Old Norse, the language of Norway, is represented by the Icelandic, which was carried into Iceland by the Norse colonists in the ninth century and which continues to be spoken on that island with little alteration. On the Continent the Old Norse is represented by the Swedish, Danish, and Norwegian, of which the last has now become a mere *patois*.

The following table exhibits the relationship of the different Teutonic languages:—

| | | | |
|----------|---|------------------|---------------------------------|
| Teutonic | { | I. GERMAN | 1. <i>Mæso-Gothic</i> . |
| | | | 2. <i>Low German</i> . |
| | | | (i) Anglo-Saxon. |
| | | | English. |
| | | | (ii) Old Saxon. |
| | | | (iii) Frisian. |
| | | | (iv) Dutch. |
| | | | (v) Flemish. |
| | | | 3. <i>High German</i> . |
| | | | (i) Old High German. |
| | { | II. SCANDINAVIAN | (ii) Middle High German. |
| | | | (iii) New High German. |
| | | | 1. <i>Old Scandinavian</i> . |
| | | | (i) Icelandic. |
| | | | (ii) Ferrole. |
| | | | 2. <i>Modern Scandinavian</i> . |
| | | | (i) Danish. |
| | | | (ii) Swedish. |
| | | | (iii) Norwegian. |

The **English Language** is the descendant and representative of the Anglo-Saxon. It has lost very much of the inflection and very many of the words which belong to the parent language; and on the other hand it has borrowed words largely, to the extent even of half its vocabulary, from other languages, especially the French and the Latin. Yet all the inflections that remain in it, and most of its formative endings, the pronouns and particles, and in general the words which are in most frequent and familiar use, have come to it from the Anglo-Saxon. All the constituents of the English Language as it now exists are presented in a condensed form as follows:—

1st. Saxon and Danish words, of Teutonic and Gothic origin.

2d. British or Welsh, Cornish and Armoric, of Celtic origin.

3d. Norman, a mixture of French and Gothic.

4th. Latin.

5th. The French, chiefly Latin corrupted.

6th. Greek.

7th. A few words directly from the Italian, Spanish, German, and other Continental languages of Europe.

8th. A few foreign words introduced by commerce or by political and literary intercourse.

Capital Letters.—Begin with a capital:—

1. Every sentence and every line of poetry.

Examples.—Forget others' faults. How bright the day! What is fame? Custom forms us all.

"Time is the warp of life; oh! tell
The young, the fair, to weave it well."

2. All proper nouns, and titles of office, honor, and respect.

Examples.—Henry the Fowler, Emperor of Germany; Robert Roe, Esquire; His Honor the Mayor; Elizabeth Barrett Browning; the Red River; Union Square; the Superior Court of the City of New York.

3. All adjectives formed from proper names.

Examples.—African, Italian, Welsh, Ciceronian.

Also adjectives denoting a sect or religion.

Examples.—Methodist, Puritan, Catholic.

4. Common nouns, where personified in a direct and lively manner; not where sex is merely attributed to an inanimate object.

Examples.—Then *War* waves his ensanguined sword, and fair *Peace* flees sighing to some happier land. But, the sun pursues his fiery course; the moon sheds her silvery beams.

5. All appellations of the Deity. The personal pronouns *Thou* and *He* standing for His name are sometimes capitalized.

Examples.—The Almighty; the King of kings; the Eternal Essence; Jehovah; the Supreme Being; our Father.

In the standard editions of the Bible, the pronouns, when referring to God, are never capitalized, not even in forms of direct address to the Deity.

6. The first word of a complete quoted sentence not introduced by *that*, *if*, or any other conjunction.

Examples.—Thomson says, "Success makes villains honest." But, Thomson says that "success makes villains honest."

7. Every noun, adjective, and verb in the title of books and headings of chapters.

Examples.—Butler's "Treatise on the History of Ancient Philosophy"; Cousins' "Lectures on the True, the Beautiful, and the Good."

8. Words that denote the leading subjects of chapters, articles or paragraphs.

A word defined, for instance, may commence with a capital. Do not introduce capitals too freely under this rule. When in doubt use a small letter.

9. The pronoun *I* and the interjection *O*.

10. Words denoting great events, eras of history, noted written instruments, extraordinary physical phenomena and the like.

Examples.—The Creation; the Confusion of Languages; the Restoration; the Dark Ages; the Declaration of Independence; the Aurora Borealis.

11. Letters standing for words are generally written as capitals.

Examples.—A. D. for *Anno Domini*, the year of our Lord.

12. The months of the year, and the days of the week. The names of the seasons, however, should not generally be capitalized, although it is customary with some authors.

13. The words *North, South, East, and West*, and their compounds, as *Northwest*, when they signify a section of country. Also adjectives derived therefrom. This class of words should not be capitalized, however, when merely denoting direction.

Punctuation Points.—The Punctuation Points are as follows:—

| | | | |
|---------------------|-----|---------------------|---|
| Period | . | Paragraph | ¶ |
| Colon | : | Brace | } |
| Semicolon | ; | Acute Accent | ' |
| Comma | , | Grave Accent | ` |
| Interrogation Point | ? | Circumflex Accent | ^ |
| Exclamation Point | ! | The Long, or Macron | ~ |
| Dash | — | The Short, or Breve | ˘ |
| Parentheses | { } | Diaeresis | ¨ |
| Brackets | [] | Cedilla | ¸ |
| Hyphen | — | Asterisk | * |
| Quotation Marks | " " | Dagger, or Obelisk | † |
| Apostrophe | ' | Double Dagger | ‡ |
| Ellipsis | ... | Section | § |
| Caret | ^ | Parallel | |
| Index | ☞ | | |

Punctuation is the art of dividing composition by points or stops for the purpose of showing more clearly the sense and relation of the words, and of noting the different pauses and inflections required in reading.

The usage of to-day is not that of the past and will not be that of the future.

The following rules are the most important and are compiled from the best modern authorities:—

THE PERIOD must be placed after every declarative and imperative sentence and every abbreviated word.

Examples.—Obey your parents. Virtue is the only nobility. We write Jas. for James, N. Y. for New York, No. for number, George I. for George the First.

After all abbreviations.

Example.—Mdse.—Amt.—Ph. D.—LL. D.

After numbers written in the Roman notation.

Example.—XIX.—Psalm XC.

A nickname which is not really an abbreviation is not followed by a period.

Examples.—Dave Bidwell; Sam Slick.

A COLON is placed after a sentence which formally introduces a distinct quotation.

Example.—We are often reminded of this remark of Marshal Lannes: "Know, Colonel, that none but a poltroon would boast that he was never afraid."

The colon may be used to separate the great parts of a long complex sentence when the minor sentences therein are separated by the semicolon.

The colon is passing out of use, its place being taken by the dash, the semicolon, and the period.

A SEMICOLON is placed before *as, to wit, viz., namely, and that* is when they introduce examples or illustrations.

Example.—Every solid has three dimensions; namely, length, breadth, and thickness.

Place a semicolon at the close of a sentence which by its terms promises another sentence.

Example.—"Tic-tac, tic-tac, go the wheels of thought; our will cannot stop them; they cannot stop themselves; sleep cannot still them; madness only makes them go faster; death alone can break into the case."

A semicolon may be used to separate short sentences which have but a slight connection with each other.

Example.—He was a poor boy; he had no showy accomplishments; he had no influential friends; but he was rich in youth, courage, and honesty of purpose.

COMMA.—Set off by the comma an explanatory modifier when it does not restrict the modified term.

Example.—The order, to fire, was given.

Set off by the comma a word or phrase that is independent.

Example.—To tell the truth, he was not at home.

Set off by the comma a phrase that is out of its natural order.

Example.—Shifting his burden, he hurried on.

Set off by the comma a particle used as an adjective.

Example.—The water, expanding, burst the pipe.

Set off by the comma connected words and phrases unless the conjunctions are all expressed.

Example.—"From the mountain, from the river, from the hill, and from the plain, we are sweeping to the rescue."

A comma is used before a direct quotation unless it is formally introduced. Greeley said, "The way to resume is to resume."

Set off by commas all parenthetical expressions and the following words when used as such; however, that is, indeed, of course, finally, again, first, second, also, therefore, yes, no, too, etc.

Example.—He is, indeed, worthy.

Use the comma after *as, viz., to-wit, namely, and that is*, when they introduce examples.

Example.—We will promote the man; that is, if he is worthy.

The parts of a complex sentence should be separated by a comma when the *auxiliary* precedes the *principal* sentence.

Example.—If the messenger calls, give him the letter.

Separate by the comma a phrase or sentence used as a subject and its verb.

Example.—"That all men are created equal, is a self-evident truth."

Words used in direct address should be separated by the comma.

Example.—"Stranger, I am Roderick Dhu."

THE INTERROGATION POINT must be placed after every interrogative sentence, member, and clause; also after the interjections *et* and *lev* implying a question.

Example.—Has the air weight? Air has weight; do you not believe it? You thought it would rain, eh?

An interrogation inclosed in parentheses denotes doubt.

Example.—Your friend (?) told me this.

THE EXCLAMATION POINT should be placed after every exclamatory sentence, member, clause, and expression.

Examples.—How disgusting is vice! Life is short; how careful we should be to use it aright! For shame!

An exclamation point placed in parentheses denotes peculiar surprise.

A DASH is usually placed before the answer to a question when both are in the same paragraph.

Example.—Are you acquainted with the defendant?—I am.

A dash is often used in place of the parentheses.

Example.—With a firm step—for he was brave—he advanced.

Use the dash where there is an omission of such words as, *namely, that is, as*, introducing equivalent expressions and when letters or figures are omitted.

Example.—“Some wit has divided the world into two classes—the wise and the otherwise.” General M ——— was present.

Use the dash when there is a sudden transition.

Example.—We have learned the bitter lesson — let us bury the past.

PARENTHESES. Marks of Parenthesis are used to inclose words which explain, modify, or add to the main proposition, when so introduced as to break the connection between dependent parts and interfere with the harmonious flow.

Example.—The Saxons (for they descended from the ancient Sacs) retained for centuries the energy and morality of their ancestors.

BRACKETS. Brackets are used principally in quoted passages, to inclose words improperly omitted or added by way of correction, observation, or explanation.

Example.—She is weary with [of] life.

In regard to the use of points before and after the brackets, and the punctuation of any sentence or clause within the brackets, the same rules apply that have been given in regard to the marks of parenthesis.

THE APOSTROPHE denotes the omission of a letter or letters, and the possessive case of nouns.

Examples.—'Tis for it is; e'en for even; don't for do not; o'clock for on [the] clock. So in the possessive: hero's, Charles', men's, heroes', children's.

Pronouns never take the apostrophe in the possessive case.

THE HYPHEN is used to connect the elements of a compound word, when each retains its own accent.

Example.—Castle-builder, father-in-law.

The hyphen is also used after a complete syllable at the end of a line, to connect the parts of a divided word; also to denote that

the final vowel of a prefix does not form a diphthong with the first vowel of a primitive; but in this latter case a mark of dieresis is more appropriate.

Example.—Pre-engagement, re-establish [preëngagement, reëstablish.]

QUOTATION POINTS are used to inclose words quoted from an author or speaker, or represented in narrative as employed in dialogue.

Example.—“Remember now thy Creator in the days of thy youth.”

When the substance merely is given, and not the exact words, quotation points are unnecessary.

Matter within quotation points is to be punctuated just as if it stood in any other position.

When quotation points are needed at the end of a sentence, they come after whatever other point is required there if this point applies to the quotation alone, but before this point if it applies to the whole sentence and not exclusively to the quotation.

Example.—Pilate asked, “What is truth?” Where now is the “man of destiny”?

When a quotation incloses within it another quotation, the external quotation has the double marks, and the one included has only the single marks.

Example.—It has been well said, “The command, ‘Thou shalt not kill,’ forbids many crimes besides that of murder.”

If the inclosed or secondary quotation ends a sentence, three apostrophes will there come together, of which the first will belong to the inclosed quotation, and the other two to the original. When an inclosed quotation itself contains words or phrases that are quoted, those words or phrases have the double marks.

Example.—“French says, ‘What a lesson the word “diligence” contains!’”

When the sentence becomes more involved than this, the additional marks of quotation would create confusion, and may therefore be omitted.

THE PARAGRAPH is used to indicate a new subject of remark. The sign is retained in the Holy Scripture but in ordinary composition is indicated to the eye by beginning a little to the right of the marginal line of the page.

ACCENT MARKS are used to denote the proper pronunciation of words. They are:—

The *Acute* ['], which marks the syllable which requires the principal stress in pronunciation; or to denote a rising inflection of the voice, or a close or short vowel.

The *Grave* [˘] is used in opposition to the acute to distinguish an open or long vowel, or to denote the falling inflection of the voice.

The *Circumflex* [ˆ] generally denotes a broad sound or a combination of the acute and grave.

The *Brace* [] is used to denote either a close vowel or a syllable of short quantity.

The *Macron* [-] is used to denote either an open vowel or a syllable of long quantity.

The *Diaeresis* ["] is placed over the latter of two vowels to show that they are to be pronounced in separate syllables, as *aërial*. In German this character is called the *Umlaut*, and denotes a modification of the sound of a vowel over which it is placed, peculiar to the Germanic languages.

The *Cedilla* [,] is placed under the letter *c* to give it the sound of *s* before *a* or *o*; as in the words *façade*, *Alençon*.

The *Tilde* [~] is placed over the letter *n* in Spanish words to give it the sound of *ny*; as, *señor*, *miñon*.

OTHER MARKS.—The *Ellipsis* or *Suppression* denotes the omission of some letters or words.

Examples.—K—g, for King; G * * * * m, for Graham; A s, for Adams; H—m—hr—y, for Humphrey.

The *Caret*, used only in writing, shows where to insert words or letters that have been accidentally omitted.

Example.—James said he ^{would} be home to-night.

The *Index* or *Hand* [☞] points out something remarkable, or what the reader should particularly observe.

The *Brace* [~] serves to unite a triplet, or to connect several terms to something to which they are all related.

Examples.—

| | | | |
|------|--|-----------|--|
| Case | { Nominative. Possessive. Objective. | Committee | { W. Brown. H. Jones. R. Smith. M. Mills. |
|------|--|-----------|--|

The *Section* [§] marks the smaller divisions of a book or chapter, and, with the help of numbers, serves to abridge references.

The *Paragraph* [¶] denotes the commencement of a new subject. The parts of discourse which are called paragraphs are in general sufficiently distinguished by beginning a new line and carrying the first word a little backwards.

Leaders [.] are used in contents and indexes of books and similar matter to lead the eye to the end of the line for the completion of the sense.

Example.—Wharfage,\$30.

Marks in Proof Reading.

THOUGH several differing opinions exist as to the individual by whom the art of printing was first discovered; yet all authorities concur in admitting Peter Schoeffer to be the person who invented cast metal types, having learned the art of cutting the letters from the Gutenberg; he is also supposed to have been the first who engraved on copper plates. The following testimony is preserved in the family, by Jo. Fred. Faust, of Ascheffenburg: 'Peter Schoeffer, of Gernsheim, perceiving his master Faust's design, and being himself desirous ardently to improve the art, found out (by the good providence of God) the method of cutting (incidendi) the characters in a matrix, that the letters might easily be singly cast, instead of being cut. He privately cut matrices for the whole alphabet: Faust was so pleased with the contrivance, that he promised Peter to give him his only daughter Christina in marriage, a promise which he soon after performed. But there were many difficulties at first with these letters, as there had been before with wooden ones, the metal being too soft to support the force of the impression: but this defect was soon remedied, by mixing a substance with the metal which sufficiently hardened it, and when he showed his master the letters cast from these matr

THOUGH several differing opinions exist as to the individual by whom the art of printing was first discovered; yet all authorities concur in admitting PETER SCHOEFFER to be the person who invented cast metal types, having learned the art of cutting the letters from the Gutenbergs: he is also supposed to have been the first who engraved on copper-plates. The following testimony is preserved in the family, by Jo. Fred. Faust, of Ascheffenburg:

'PETER SCHOEFFER, of Gernsheim, perceiving his master Faust's design, and being himself ardently desirous to improve the art, found out (by the good providence of God) the method of cutting (incidendi) the characters in a matrix, that the letters might easily be singly cast, instead of being cut. He privately cut matrices for the whole alphabet: and when he showed his master the letters cast from these matrices, Faust was so pleased with the contrivance, that he promised Peter to give him his only daughter Christina in marriage, a promise which he soon after performed. But there were as many difficulties at first with these letters, as there had been before with wooden ones, the metal being too soft to support the force of the impression: but this defect was soon remedied, by mixing the metal with a substance which sufficiently hardened it.'

A wrong letter in a word is noted by drawing a short perpendicular line through it, and making another short line in the margin, behind which the right letter is placed. (See No. 1.) In this manner whole words are corrected, by drawing a line across the wrong word and making the right one in the margin opposite.

A turned letter is noted by drawing a line through it, and writing the mark No. 2 in the margin.

If letters or words require to be altered from one character to another, a parallel line or lines must be made underneath the word or letter; viz., for capitals, three lines; small capitals, two lines; and italics, one line; and, in the margin opposite the line where the alteration occurs, caps, small caps, or ital. must be written. (See No. 3.)

When letters or words are set double, or are required to be taken out, a line is drawn through the superfluous word or letter, and the mark No. 4 placed opposite in the margin.

Where the punctuation requires to be altered, the correct point, marked in the margin, should be encircled.

When a space is omitted between two words or letters which should be separated, a caret must be made where the separation ought to be and the sign No. 6 placed opposite in the margin.

No. 7 describes the manner in which the hyphen and ellipsis line are marked.

When a letter has been omitted, a caret is put at the place of omission, and the letter marked as No. 8.

Where letters that should be joined are separated, or where a line is too widely spaced, the mark No. 9 must be placed under them, and the correction denoted by the marks in the margin.

Where a new paragraph is required, a quadrangle is drawn in the margin, and a caret placed at the beginning of the sentence. (See No. 10.)

No. 11 shows the way in which the apostrophe, inverted commas, the star, and other references, and superior letters and figures, are marked.

Where two words are transposed, a line is drawn over one word and below the other, and the mark No. 12 placed in the margin; but where several words require to be transposed, their right order is signified by a figure placed over each word, and the mark No. 12 in the margin.

Where words have been struck out, that have afterward been approved of, dots should be marked under them, and *etc.* written in the margin.

Where a space sticks up between two words, a horizontal line is drawn under it, and the mark No. 14 placed opposite, in the margin.

Where several words have been left out, they are transcribed at the bottom of the page, and a line drawn from the place of omission to the written words (see No. 15); but if the omitted matter is too extensive to be copied at the foot of the page, *Out, see copy.* is written in the margin, and the missing lines are inclosed between brackets, and the word *Out* is inserted in the margin of the copy.

Where letters stand crooked, they are noted by a line (see No. 16); but where a page hangs, lines are drawn across the entire part affected.

When a smaller or larger letter, of a different font, is improperly introduced into the page, it is noted by the mark No. 17, which signifies wrong font.

If a paragraph is improperly made, a line is drawn from the broken-off matter to the next paragraph, and No. 1 written in the margin. (See No. 18.)

Where a word has been left out or is to be added, a caret must be made in the place where it should come in, and the word written in the margin. (See No. 19.)

Where a faulty letter appears, it is denoted by making

a cross under it, and placing a similar mark in the margin (see No. 20); though some prefer to draw a perpendicular line through it, in the case of a wrong letter.

Where a word has been accidentally separated by a space, it is marked as in No. 21.

9

Turn letter.

□

Indent line one em quad.

c

Take out; expunge.

^

The caret shows where the letter or word is omitted.

"Hall, Columbia" is the production of Joseph Hopkinson (1770-1842).

FAMILIAR ALLUSIONS.

Abderit. Democritus, the original laughing philosopher, was born in Abdera, a Thracian city. From him a scoffer or person given to continual laughing is called an Abderit.

Abraham's Bosom. The rest of the blessed dead. **Abyla** and **Calpe**, the Pillars of Hercules, the exit from the Mediterranean.

Academias. Plato's disciples were so called from the Academy.

Academy. (Academe.) Plato founded his school in a gymnasium of this name near Athens, 388 B. C.

Academy, The French. A French scientific body limited to forty members.

Acadia. Formerly the name of Nova Scotia.

Adam's Apple. A part of the throat where, it is said, a piece of the forbidden fruit lodged.

Admirable Crichton. The James Crichton, an accomplished Scotchman of the sixteenth century.

Admiral. The highest rank in the Navy.

Æneid. An epic poem by Virgil.

Æges. The five ages of the world according to Hesiod, are the Golden, the Silver, the Brazen, the Heroic, and the Iron.

Alabama. A Confederate privateer built in England. Sunk by the Kearsarge June 19, 1864.

Aladdin's Window, To Finish. Trying to complete another's work. Aladdin's palace was perfect except one window left for the Sultan to finish, but his treasure failed him.

Albany Regency. Name applied sixty years ago to some Democrats at Albany, N. Y.

Albino. A person with white skin and hair and red eyes. The Portuguese so called the white negroes.

Albion. England, so called from the chalky white cliffs.

Aldine Press. Founded by Aldus Manutius at Venice in 1498. Editions of the classics issued from this press were called the Aldine editions. This term is now applied to some elegant editions of English works.

Alexandrian Library. Was founded by Ptolemy Philadelphus. It contained 400,000 manuscripts, and was burned 47 B. C.

Alexandrine Age. 323-640, when Alexandria was the seat of the highest culture.

Alhambra. A magnificent palace and a fortress built by the Moors at Granada, in Spain.

All-Hallows. All Saints' day, November 1st.

Allah. Arabic name of God.

Almaacks. Assembly room in London where the most exclusively aristocratic balls were given.

Almighty Dollar. A phrase first used by Irving in *His Creole Village*, and which has become quite common. The title of a play.

Alastia. A quarter in London where criminals take refuge.

Alto-Relievo. Figures in marble or castings projecting one half or more from the tablet.

Ambrosia. Food of the Gods.

Anachronism. An error in computing time.

Anacreontics. Poems composed in the manner of Anacreon, a great poet noted for his exact imitation of nature.

Ancien Regime. The French Government previous to the revolution of 1789.

Angling, The Father of. Izaak Walton.

Annus Mirabilis. (Wonderful year.) A. D. 1666. Noted for the great fire in London, the Plague, and an English victory over the Dutch.

Antoninus, The Wall of. Was built by the Romans in A. D. 140 across Scotland between the Clyde and the Frith of Forth; an embankment of earth.

Apollo Belvedere. One of the most beautiful and perfect representations of the human form is the statue of Apollo in the Belvedere Gallery of the Vatican Palace at Rome.

Appian Way. The road from Rome to Capua. The oldest Roman road.

Apples of Sodom. Beautiful fruit, but full of ashes. Applied figuratively to the disappointment of sin.

Apple, Golden. Prize for beauty disputed before Paris, between Juno, Pallas, and Venus; awarded by him to Venus.

Arabesque. Decoration in Moorish style.

Arcadian. A shepherd; a Greek grazing country named Arcadia has furnished this word to the poets.

Argo. The ship in which Jason and his fifty-four companions sailed when going to Colchis for the Golden Fleece.

Argonauts. The adventurers on the Argo.

Argus-eyed. Crafty, watchful. Argus had a hundred eyes; the jealous Juno put him on detective duty over Io.

Armada. The Spanish. A fleet of 130 ships gathered by Philip II. of Spain for the invasion of England in 1588. Queen Elizabeth was busy preparing for resistance when the news came that a storm had completely wrecked the Armada.

Artesian Well. Boring in the earth until water is reached that will flow spontaneously. Their first use was in Artois, France.

Aryans. The stem of the Indo-European peoples.

Astor Library. Founded by John Jacob Astor in New York City.

Athens, The Modern. Boston.

Augustan Age. As the most flourishing period of the Roman literature was during the time of Augustus, that name is given to any age wherein literature is pre-eminent.

Auld Reekie. Edinburgh, Scotland.

Avalon. King Arthur's burial place, Glastonbury.

Ayrshire Poet. The Burns. Born 1759, died 1796. His birthplace was near Ayr in Scotland.

Barnburners. A name given some years ago to radical Democrats, a leading man amongst whom was John Van Buren.

Babylonish Captivity. The seventy years' captivity of the Jews at Babylon, 606-538 B. C.

Baconian Philosophy. The inductive philosophy of Lord Bacon.

Balmoral Castle. A Scotch castle owned by Queen Victoria.

Bank of England. Founded 1694.

Bard of Avon. Shakespeare, so called from his home being Stratford-on-Avon.

Barmecide's Feast. A mockery, a delusion, and a sham. Barmecide asked a starving beggar to dinner, and seated him at a table of empty dishes.

Basilisk. A mythical serpent with power to kill by merely looking at its victim.

Baso Relievo. Figures in marble and castings that project but a little from the plane.

Bastile. French prison and fortress. People were incarcerated here by *lettre de cachet*, without notice or trial. Destroyed by a mob, 1789.

Battle of the Books. Satire by Dean Swift comparing ancient and modern literature.

Battle of the Kegs. A practical joke on the British General Loring. Detailed in a ballad of the Revolutionary War.

Battery, The. A park in New York City adjoining the river.

Beacon Street. The aristocratic residence street of Boston.

Beauty and the Beast. A fairy tale. Beauty lives with the Beast to save her father's life. By her love she disenchants the Beast, who proves to be a great Prince.

Bedlam. A mad-house.

Bee, The Attic. Plato; so called from his honeyed style.

Bee, The Busy. An example of communal industry.

Beelzebub. A Philistine deity.

Begging, the Question. Assuming as true what you are to prove.

Belle France, La. Beautiful France.

Belgravia. Fashionable quarter of London.

Bell the Cat. In a convention of mice it was proposed to hang a bell on the cat's neck, to give warning of her coming. No one would serve on the committee.

Bell, The Passing. Rung formerly when persons were dying.

Beloved Disciple, The. St. John.

Bess, Good Queen. Queen Elizabeth.

Bibliothèque National. (National Library.) At Paris; contains over 1,000,000 books, 150,000 MSS.

Billingsgate. Coarse language. Such as is used at the fish market of Billingsgate in London; a fishwife's tongue being said to be remarkably expressive.

Black Death. A plague which desolated Europe, Asia, and Africa in the fourteenth century.

Black Friday. Gold panic Sept. 24, 1869. Immense fortunes lost and won same day. Investigation could never discover the true cause of it.

Black Hole of Calcutta. Dark prison cell wherein Surajah Dowlah shut up 146 British soldiers; only 23 lived till morning.

Black Prince, The. Edward, Prince of Wales, son of Edward III.

LANGUAGE AND LITERATURE.

Black Republicans. The Republican party of U.S., so called when opposing the extension of slavery.

Blarney Stone. Its supposed virtue when kissed is to impart a smooth and oily tongue. Profusion of compliments is called Blarney. This stone is in Blarney Castle, near Cork, Ireland.

Bluebeard. A wife-killing tyrant, in a nursery story.

Blue Laws. Some severe New England statutes were so called.

Blue Stocking. A literary society at Venice in 1400, whose members wore blue stockings, is the origin of this name for a female pedant.

Bohemian. As opposed to Philistine, an artist or literary man living loosely by his wits.

Bols de Boulogne. A Parisian promenade.

Border, The. Frontier of England and Scotland.

Border Minstrel, The. Sir Walter Scott.

Border States. Maryland, Delaware, Virginia, Kentucky, Missouri.

Bourgeoisie. A class of the people of France mostly composed of traders and manufacturers.

Boulevard. A wide street in Paris, in the place of the ancient ramparts.

Bourse. Parisian stock exchange.

Bow Bells. A set of bells in the Church of St. Mary-le-Bow, London. One "born within sound of Bow Bells" is a Cockney.

Bowery, The. A New York thoroughfare.

Boycott. To refuse to have anything to do with a person. To let him severely alone. A trying ordeal passed through by Captain Boycott in Ireland in 1881. No one would sell to him, buy from him, work for him, or speak to him.

Brandy Nose. Queen Anne of England.

Breeches Bible, The. An edition in which "aprons" in Gen. iii. 7 is rendered "breeches."

Bride of the Sea. Venice.

Bridge of Sighs. In Venice. Connects Doge's Palace and State Prison. Over this bridge the condemned passed when on their way to be executed.

British Museum. Library and museum in London.

Broadway. The principal business street of New York.

Brook Farm. A Socialistic community to carry out the idea of Fourierism; was founded at West Roxbury, Mass., 1841.

Brother Jonathan. America; an American. Some doubt as to its origin, but it is said to come from Gov. Jonathan Trumbull, of Connecticut, in speaking of whom Washington would say, "We must consult Brother Jonathan."

Buncombe. Clap-trap speeches, to cajole constituents, more than for immediate effect. Buncombe is in North Carolina. A North Carolina member said a fiery speech was not delivered to the House, but to Buncombe.

Bunker Hill Monument. An obelisk of granite marking the site of the battle of Bunker Hill, fought between the British and Americans, June 17, 1775.

Cachet, Lettres de. (Sealed letters.) Blank warrants with the seal of the French King already affixed for imprisoning or releasing any person in the Bastille.

Caledonia. Scotland.

Calumet. An Indian pipe. In old times a treaty of peace with the red men would be ratified by smoking the calumet.

Campagna. The plains around the city of Rome.

Carbonari. A secret political society organized in Italy, 1820.

Carmagnole. Song and dance in the French Revolution.

Cartesian Philosophy. From Descartes, "I think, therefore I exist."

Castle Garden. At New York City, the landing-place of emigrants.

Catacombs. Subterranean sepulchers. About three miles from Rome in the Appian Way a vast number of long underground passages about three feet wide and ten feet high. On each side in niches were deposited the bodies of the martyrs and early Christians. These niches were closed with tiles or slabs of marble having proper inscriptions on them. During the persecutions the Christians concealed themselves in these caves.

Cavalier Servente. The escort of a married woman.

Cecilia, St. A martyr; patroness of music.

Celestial Empire. China, whose first emperors were all divinities.

Central Park. The great park of New York City; contains 845 acres.

Champs de Mars. A field in Paris for military maneuvers.

Champs Elysees. A promenade in Paris.

Charter Oak. A tree in Hartford, Conn., in which the Colonial Charter was secreted in 1688. It was blown down in 1856.

Chauvinism. Patriotism of the blatant kind, from Chauvin, one of Scribe's characters.

Cheapside. A thoroughfare in London.

Chiltern Hundreds, To Accept the. A member of the English Parliament cannot resign, and cannot hold office during membership. If he wishes to leave, he can vacate his seat by accepting the office of Steward of the Chiltern Hundreds.

Chiltern Hundreds. A tract in Buckinghamshire and Oxfordshire, England, to which is attached the nominal office of steward under the crown.

Christ Church. The name of the largest college in the University of Oxford.

Cid, The. The Spanish hero, Don Roderigo Laynez, Count of Bivar.

Cincinnati, The. Society of American Revolutionary officers.

Citizen King, The. Louis Philippe of France.

Cockagne, Land of. An imaginary country of ease and pleasure; usually applied to London.

Colossus of Rhodes. A brass statue, one of the wonders of the world, which stood astride the entrance to the port of Rhodes.

Columbia. Poetical name of the United States.

Column of Vendome. A stone pillar in Paris erected by Napoleon, commemorating the successes of the French armies. It was thrown down by the Communists in 1871.

Confederate States. The eleven states which seceded in 1861, Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and Virginia.

Congressional Library. At Washington; it is the largest in the United States.

Consols. English public securities.

Copperheads. Northern sympathizers with the South in the Civil war.

Cornerackers, The. Kentuckians.

Corn Law Rhymers, The. Ebenezer Elliott.

Corso. The chief thoroughfare of Rome.

Crapaud Johnny. A Frenchman.

Credit Mobilier. An authorized stock company. The American Credit Mobilier formed for raising money for the Pacific Railroad raised a foul odor in 1873.

Crocodile Tears. Counterfeit sorrow. A fable says the crocodile weeps as it eats its victim.

Cumberland. A United States vessel sunk by the Confederate ram Merrimac in Hampton Roads, March 8, 1862.

Curfew Bell. At 8 o'clock, the ringing of the curfew bell in old times in England, all lights were extinguished, the fires raked up and covered, and the people of the Kingdom retired to bed. This rule, made by William the Conqueror, lasted for a long time, and even yet there is some sign of its observance in the nine o'clock bell rung in many parts of New England.

Damocles' Sword. Damocles, having commented upon the happiness which the tyrant Dionysius must enjoy, was invited by him to a feast where, whilst discussing the good things, he looked up and discovered a sword hanging by a single hair immediately over his head.

Darby and Joan. The loving couple.

Darwinian Theory. An explanation of the origin of species in animals, that they come from one or a few original forms, the present differences resulting from development and natural selection.

De Profundis. The 130th Psalm; part of the burial service.

Debatable Ground. Land on the western border of Scotland, disputed between England and Scotland.

Defender of the Faith. Henry VIII. received this title from Pope Leo X., and his successors have borne it ever since.

Directory, The French. By the Constitution of 1795 the executive power was vested in five Directors; it lasted only four years.

Dixie, The Land of. The Southern States.

Dizzy. The nickname of Benjamin Disraeli, Earl of Beaconsfield.

Doctors' Commons. The place where the Ecclesiastical Court sat in London.

Doctrinaire. A cant term in French politics, given

to the proposer of an impracticable compromise measure.

Doe, John. The fictitious plaintiff in ejectment suits, the defendant being Richard Roe.

Doomsday Book. Compiled by order of William the Conqueror. It contained a survey and an estimate of value of all the lands in England.

Donnybrook Fair. A once celebrated annual fair near Dublin.

Douay Bible, The. The English Bible authorized by the Roman Catholic Church; first published at Douay, France.

Downing Street. The official residence of the English Prime Minister since the time of Sir Robert Walpole is in Downing Street, London.

Drury Lane Theater. In London; was opened in 1688.

Dying Gladiator. An ancient statue in the Capitol at Rome.

Eastern States, The. Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut.

Ecco Homo. A painting by Correggio representing the Saviour crowned with thorns.

Ecole Polytechnique. A Parisian school, the graduates of which are given places in the public service.

El Dorado. A fabulous region in South America, surpassing all other countries in the production of gems and precious metals. A name for any wealthy country.

Elephant, Seeing the. Seeing the world.

Elgin Marbles. A collection of Greek sculptures made by Lord Elgin. Now in the British Museum.

Escorial, The. A royal residence built by Philip II.; it is the largest structure in Spain, and one of the most splendid buildings in Europe. It is 23 miles from Madrid and contains a palace, a church, a monastery, free schools, and a mausoleum.

Eternal City, The. Rome.

Eureka. (I have found it.) Exclamation of Archimedes when he discovered the method of proving that the sum of the squares of the sides of a right-angled triangle equaled the square of the hypotenuse.

Evangelists, Symbols of the. Matthew has a scroll before him and holds a pen; Mark sits writing, with a winged lion by his side; Luke has a pen and a scroll, near him is an ox; John is a young man, behind whom is an eagle.

Exclusion, Bill of. A bill which passed the English House of Commons in 1679, proposing to exclude the Duke of York from the throne because he was a Roman Catholic.

Expounder of the Constitution, The. Daniel Webster.

Fabian Policy. Delaying; dilatory. From Quintus Fabius Maximus, the Roman General who successfully opposed Hannibal, the Carthaginian, by avoiding a battle and continually harassing him.

Fabius, The American. George Washington.

Fairmount Park. In Philadelphia, where the Centennial Exhibition of 1876 was held; contains nearly 3,000 acres.

Faineants, Les Rois. (Do-nothing Kings.) The last twelve Kings of the Merovingian Dynasty were so called. For about 100 years previous to 720, when Pepin dethroned Childeric III., they were mere puppets, and the supreme authority was exercised by the mayors of the palace.

Falerianum. A celebrated ancient Italian wine grown at Falerium.

Faneuil Hall. In Boston, built 1742; called the "Cradle of Liberty," for there the Revolutionary patriots were wont to assemble.

Farmer George. George III. of England; so called from his love of agriculture.

Fata Morgana. A mirage in the Straits of Messina.

Father of his Country. George Washington.

Fathers of the Latin Church. St. Ambrose of Milan, St. Augustine, St. Bernard, St. Hilary, St. Jerome, Lactantius.

Faubourg St. Antoine. The part of Paris where the workmen live.

Faubourg St. Germain. Aristocratic part of Paris.

Fenians. A society of Irishmen formed in the United States in 1865 to free Ireland.

Field of the Cloth of Gold. Plain in France where Francis I. and Henry VIII. met on a mutual visit. It is historical on account of the gorgeous display, both parties being most extravagant in their outfit.

Fifth Avenue. A celebrated residence street in New York.

Fighting Joe. The American General Joseph Hooker. First Gentleman in Europe. George IV. of England.

Five Points. A once notorious locality in New York. **Flagellants.** Religious fanatics of the thirteenth century who went about naked and scourging themselves.

Fleet, The. A London prison taken down in 1845.

Flowery Kingdom, The. China.

Flying Dutchman. A specter ship cruising about the Cape of Good Hope. Forebodes trouble to whoever sees it.

Forfe. Strong point.

Fort Sumter. In the harbor of Charleston, S. C. Here were heard the first sounds of the cannons' thunder in the late Civil War.

Fourierism. Charles Fourier, a French visionary, proposed a system of communism in which the world should be divided into "phalansteries" of four hundred families who were to live and work in common.

Freshman. A student in his first year at college.

Funk, Peter. A mock auction; a person employed to act as an apparent purchaser and bid up articles for sale.

Gadshill. Near Rochester, in Kent, England. Place where Falstaff met so many men in buckram. Charles Dickens' residence was at Gadshill.

Genre Painting. Represents ordinary domestic and rural scenes.

George, St., and the Dragon. St. George, the patron saint of England, is said to have slain in Libya a hideous dragon whose daily food was a virgin.

Gerrymander. The geographical apportionment of districts to give preponderance to one political party. Started in Massachusetts, and named from its Governor, Elbridge Gerry. Example, a shoestring district in Missouri.

Ghetto. The quarter in Rome to which the Jews were formerly restricted.

Ghibelline. One of a faction in Italy in the thirteenth century, which favored the German Emperors, in opposition to the Guelphs, adherents of the Pope.

Girondists; The Gironde. Moderate "Constitutional" Republican party in the French Revolution in 1798.

Glencoe. A pass in Argyleshire, Scotland. Here, February 13, 1691, were massacred thirty-eight of the McDonalds by one hundred and twenty soldiers under Capt. Campbell.

Gobelins. A tapestry and carpet manufactory at Paris, founded by Gobelin, a dyer, about 370 years ago.

Godiva, Lady. Wife of Leofric, Earl of Mercia, who offered to remit certain exactions to his tenants if she would ride naked through the streets of Coventry. She did so, all the people closing their doors and keeping within except one, "Peeping Tom," who was struck blind for peeping at her.

Golconda. The neighborhood of some rich diamond mines in India.

Gold Fever. 1849; peopled California.

Golden Age. A period of innocence and prosperity. Nearly always refers to some past age.

Golden Gate. The entrance to the harbor of San Francisco.

Golden Horn. The estuary of the Bosphorus, upon whose banks Constantinople is built.

Gordian Knot. A difficulty; an obstacle. Gordius, King of Phrygia, consecrated to Jupiter a wagon, the beam and yoke of which were tied together by such an intricate knot that no one could unravel it. An oracle having foretold that he who could untie this knot would be master of Asia, Alexander cut it asunder with his sword.

Gordon Riots, The. In 1780, in London, the bill passed by the House of Commons for the relief of the Roman Catholics caused so much ill feeling that Lord George Gordon, a fanatic, incited the mob to try to force its repeal. Dickens in his *Barnaby Rudge* gives a vivid description of these riots.

Gotham. A name sometimes applied to New York City.

Gotham, The Wise Men of. Noted for their folly. Gotham was an English village.

Great Commoner, The. William Pitt.

Great Duke, The. Wellington.

Great Eastern. The largest vessel ever launched. She was built to carry 1,000 passengers and 5,000 tons of

cargo. Her chief work has been in the laying of ocean telegraph cables.

Great Pyramid, The. Is at Gizeh, Egypt. It is 494 feet high.

Greenbacks. United States Treasury notes. So named from their color.

Green Isle, The. Ireland. Sometimes also called the Emerald Isle.

Greenwood. A cemetery in Brooklyn, N. Y.

Gregorian Year. 1582; it being proved that the years were eleven minutes shorter than what they were counted at, Gregory XIII. took ten days of October out of that year and advanced the dates so as to correct the calendar. The reform has been accepted throughout Christendom, except in Russia. Example: George Washington, born February 11, O. S.

Greta Green. A Scotch village famous for runaway matches.

Grub Street. In London; used to be noted for its literary denizens.

Guelphs. The adherents in the thirteenth century of the Papacy against the German Emperors. They were the constant opponents of the Ghibellines, and between them Italy was kept in turmoil.

Guildhall. The London town hall.

Gunpowder Plot, The. A plot to blow up the English Parliament in its House, November 5, 1605. A cellar underneath was stored with gunpowder intended to be touched off during the session by Guy Fawkes. The discovery was made in time to prevent mischief. To use a modern but inelegant phrase, the plot was considered by some people to be "a put up job."

Gygæ's Ring. A ring which made the wearer invisible. Gygæ, having found a man's corpse in a brazen horse that he discovered in a cave, took a ring from the finger of the dead that rendered him invisible. By using this ring he entered unseen the chamber of the King of Lydia and murdered him. He became King.

Habeas Corpus Act, The. Was passed in the time of Charles II. and provides that the body of any person restrained of his liberty must on proper application be brought before a judge and the reason of his confinement stated. The judge will then determine the amount of bail he shall furnish, or he will remand him to prison or allow him his freedom, as the case may require.

Haleyon Days. A period of happiness; days of peace and tranquillity. The haleyon, as the kingfisher was anciently called, was said to lay her eggs in nests on rocks near the sea during the calm weather about the winter solstice.

Handicap. Apportionment of the weights that must be carried in a race by different horses, considering their age and strength, to equalize their chances.

Hansard. Name of the firm which prints the debates of the British Parliament.

Hanse Towns. In the twelfth century some commercial cities in the north of Germany formed an association for the protection of commerce. To these other similar cities in Holland, England, France, Spain, and Italy acceded, and for centuries this confederacy commanded the respect and defied the power of kings.

Hanseatic League. The name of the confederation of Hanse towns. There were seventy-two cities in the league, and they held triennial conventions called *Hansa*. It has long since fallen to pieces. Four of its members, Lubeck, Hamburg, Bremen, and Frankfort, are called free cities, but are really part of the German Empire.

Hare, Mad as a March. The hare is wilder than usual in March.

Harpies. Three ravenous and filthy monsters, each having a woman's face and the body of a vulture. Their names were Aello, Ocypete, and Celeno. Juno sent them to plunder the table of Phineus.

Hart-Karl. (Happy dispatch.) Japanese official salute.

Harvest Moon. The full moon at or nearest the fall equinox; rises for a number of days about sunset.

Heathen Chinese, The. A poem.

Heidelberg Castle. Ruins near Heidelberg, Germany.

Hegira. The date of Mohammed's flight from Mecca, July 16, 622. The epoch from which the Mohammedans compute their time.

High Church. The more conservative portion of the Episcopal Church.

High Seas, The. The sea beyond three miles from the coast.

History, The Father of. Herodotus, the Greek historian.

Hobson's Choice. Take what is offered or go without. Tobias Hobson, an English stable-keeper, made whatever customer came to hire a horse take the one nearest the door.

Holborn. A street in London by which criminals used to be carried out to execution at Tyburn.

Holy Alliance. Formed in 1816 by Austria, Prussia, and Russia.

Holy Family, The. The name of pictures representing in group the infant Jesus, St. Joseph, the Blessed Virgin, John the Baptist, Anna, and St. Elizabeth. The most celebrated are by Michael Angelo at Florence, by Raphael in London, and by Leonardo da Vinci in the Louvre.

Holy Land, The. Palestine.

Holy League, The. The alliance of Pope Julius II., France, Germany, Spain, and some of the Italian Republics in 1508, against Venice.

Honi soit qui mal y pense. (Shame to him who evil thinks.) Motto of the highest order of knighthood in Great Britain, that of the Garter, instituted by Edward III. At a ball, a garter of the Countess of Salisbury, having fallen off, was picked up by the King, who expressed himself in the above phrase and fastened it around his own knee. This incident led to the formation of the order.

Honors of War. Allowing a surrendered enemy to keep his arms.

Hotel de Ville. The city hall in French and Belgian cities.

Houris. Beautiful virgins of Paradise; promised by the Koran for the delight of the true believers.

Hundred Days, The. From March 20, 1815, when Napoleon escaped from Elbe, to June 22, 1815, when he abdicated.

Iconoclast. (Image-breaker.) A radical reformer.

Iliad. A Greek epic poem by Homer, relating the story of the siege of Troy by the Greeks.

Independence, Declaration of. Issued July 4, 1776.

Independence Hall. In Philadelphia, Pa., where Congress met and adopted the Declaration of Independence.

Index Expurgatorius. A list of books forbidden to be read by the Roman Catholic Church.

Inns of Court. The four London law societies which have the sole right of admitting candidates to the Bar. They are Gray's Inn, Lincoln's Inn, the Inner Temple, and the Middle Temple.

Inquisition. A tribunal established in some countries to try heretics.

Irish Agitator, The. Daniel O'Connell.

Iron City, The. Pittsburgh, Pa.

Iron Duke, The. The Duke of Wellington.

Iron Mask, The Man in the. A mysterious French state prisoner.

Jack Ketch. The hangman. The name of an English hangman.

Jack Robinson. Before you can say Jack Robinson; at once. Jack Robinson was noted for the shortness of his visits; the servant had scarcely time to repeat his name, before he would leave.

Jack, The Giant Killer. A nursery hero.

Jack, The American, or Union. The blue ground of the American flag with the stars but without the stripes.

Jacobins. A revolutionary club, 1789, in Paris, held its meetings in what had been the Jacobin Monastery. They were violent and extreme in the measures they proposed. Their name spread to all similar organizations and to individuals acting with them throughout France.

Jacobites. Adherents of James II. of England, and of the Stuarts, his descendants.

Jardin des Plantes. Botanical and zoological garden in Paris.

Jardin Mabille. Of world-wide notoriety. A Parisian resort where the can-can flourished. Suppressed in 1882.

Jericho, Gone to. Disappeared; ruined.

Jerusalem Delivered. An Italian epic poem by Torquato Tasso.

Jingo, Jingoism. Expression applied in England to those who wanted the English Government to assume an aggressive foreign policy, 1874-1880.

John Bull. England. Nickname for an Englishman.

John Chinaman. The Chinese in America.

Jehnnny Cakes. Made of Indian meal baked in the ashes.

Jubilee, Year of. Among the Jews the jubilee came every fiftieth year, which was the year after one week of weeks of years had passed (seven times seven). All slaves who were of Hebrew blood were freed, all debts were canceled, and all lands returned to original owners during the jubilee. In the Roman Catholic Church it is observed every twenty-fifth year.

Juggernaut. A Hindoo god who has a famous temple in India. There is an immense car in the service of this god, which, when moved about the country, causes the greatest excitement. The car resembles a large building, and its weight is very heavy. It is dragged along by the multitude, and their fanaticism is so great that crowds of devotees cast themselves under the wheels and are crushed to death, a fate which they believe insures paradise.

Julian Era, The. A method of reckoning time from 46 B.C., when Caesar reformed the calendar.

Junius, Letters of. Some remarkable political letters written during the reign of George III. Their authorship is unknown.

Kansas, Bleeding. So called by Horace Greeley during the Free Soil controversy.

Kensington Gardens. A London Park near which Queen Victoria was born.

Kilkenny Cats, The. Disputing people; from the old verse:

There once were two cats in Kilkenny,
Who each thought there was one cat too many,
So they howled and they fit, and they scratched
and they bit,
Until instead of two cats there wasn't any.

King can do no wrong, The. Meaning that the Ministers and not the King are responsible for mistakes of government.

King of Yvetot. The Seigneur of Yvetot was made king of his estate by the King of France as a recompense for the killing of his father. It was a kingdom of eight square miles.

King Cole. A legendary king of Britain, who affected tobacco and spirits.

King Cotton. A name given to the great Southern industry before the war.

King's Evil. The scrofula. So called from the belief that a king's touch would cure the disease.

King Log. A good-for-nothing ruler. The name comes from one of Esop's fables, wherein Jupiter puts a log to rule over the frogs.

King-Maker, The. Richard Nevill, the Earl of Warwick, who set up and deposed kings at his will during the Wars of the Roses, in the fifteenth century.

King Stork. A tyrant. The sequel to the Esop fable mentioned above. The frogs grew tired of King Log, whereupon King Stork was brought in at their request, who devoured the whole community.

Kit Kat Club, The. A London club founded in 1688. It had many eminent members.

Knickerbocker. A member of any old Dutch family in New York. Derived from Irving's immortal history.

Knight of Malta. A chivalric and monastic order founded during the Crusades, also called the Knights Hospitaliers of St. John.

Know-Nothings. A political party in the United States, whose cardinal principle was opposition to foreign office-holders.

Koh-i-Noor. A Golconda diamond, the largest in the world, now one of the crown diamonds of England. Value, \$625,000.

Koran, The. The Mohammedan Bible.

Kremlin, The. The Royal Russian residence in Moscow.

Labyrinth, The. A celebrated structure built by Minos, King of Crete, which consisted of a maze out of which no one who entered could find the way back.

Laconic. Curt. So called from the brief speech in fashion in old Laconia, afterwards called Sparta.

Lacrymal Christi. An Italian wine.

Lake School, The. A society of English poets consisting of Coleridge, Wordsworth, and Southey.

Land of Bondage, The. Egypt.

Land o' Cakes, The. Scotland.

Land of Nod, The. Sleep; Dreamland.

Land of Promise, The. Canaan, the goal of the Jewish wanderings in the wilderness.

Lang Syne. Long ago.

Langue d'Oc. Provence, a part of France so called from the dialect in use.

Langue d'Oïl. All of France except Provence.

Laocoon, The. A celebrated statue in the Vatican representing Laocoon strangled by serpents.

Laodicean. A person lukewarm in religion.

Lares and Penates. The household gods.

Last Judgment, The. The theme of a number of frescoes of the Renaissance period in Italy.

Last Supper, The. Similar to the above. Leonardo da Vinci's best canvas is on this subject.

Lateran Palace, The. One of the Papal residences at Rome.

Laughing Philosopher, The. Democritus of Abdera, who believed that life was only to be laughed at.

Leaning Tower, The. A celebrated structure Pisa, Italy, which leans fourteen feet out of the perpendicular: 180 feet high.

Learned Blacksmith, The. Elihu Burritt.

Leonine Verses. Verses which rhyme at the middle and the end.

Libby Prison. A Confederate jail for prisoners of war at Richmond, Va.

Lilliput. The pigmy land in Gulliver's travels.

Lingua Franca. A dialect of French, Italian, and Arabic spoken on the Mediterranean Sea.

Lion and Unicorn. The supporters of the British royal arms.

Lion of the North, The. Gustavus of Sweden, the great leader of the Protestant forces during the Thirty Year War.

Lion's Share. The bigger portion in a division. So called from one of Esop's fables.

Little Corporal, The. Napoleon Bonaparte.

Little Giant, The. Stephen A. Douglas.

Lloyds. The originators of marine insurance.

Lombard Street. The financial street of London.

Long Star State, The. Texas.

Long Parliament. The Parliament which sat for thirteen years at the beginning of the civil war in England. It sat from 1640 to 1663.

Lorolei. A malignant but beautiful water-sprite of the Rhine.

Lotus-Eaters, The. Homer in the Odyssey describes the effect of eating the lotus as making the eater forget his home.

Louvre, The. The art palace of Paris.

Low Church, The. A part of the Episcopal Church which is opposed to ceremonials.

Lusiad, The. The Portuguese epic poem, written by Camoens, describing Vasco da Gama's adventures.

Lynch Law. Mob law. The name comes from a Virginia farmer who instituted the first vigilance committee in America.

Mab, Queen. The queen of the fairies. So called from an Irish fairy princess named Medb, who flourished in the night of time.

Macadamize. Paving with broken stones. So called from the inventor, Sir John MacAdam.

Macaronic Verse. A verse made by mixing different languages.

Macchiavellism. Political trickery.

Madam Tussaud's Exhibition. A famous London wax-works show.

Mad Poet, The. Nathaniel Lee, an insane English dramatist.

Madman of Macedonia, The. Alexander the Great.

Madman of the North, The. Charles XII. of Sweden.

Madonna. The Blessed Virgin.

Maecenas. A noted patron of poets during the reign of Augustus of Rome.

Magna Charta. The charter making the corner stone of English liberty, extorted from King John Lack-Land.

Mahomet's Coffin. The body of Mahomet is said to hang in mid-air over Medina.

Maid of Orleans. Joan of Arc.

Maid of Saragossa. Augustina Zaragoza, the heroine of the siege of Saragossa in 1808-9.

Maiden Queen, The. Elizabeth of England.

Maine Law. A prohibitory law first adopted in Maine.

Malthusian Doctrine, The. The theory that the population of the world is growing faster than the food supply.

Mammoth Cave. A cave near the Green River, Kentucky, the largest cave in the world.

Man in the Moon. According to the legend the man who first broke the Sabbath.

Man of Destiny. Napoleon Bonaparte.

- Man of Iron, The.** Bismarck.
- Man of Straw.** An irresponsible person.
- Mare's Nest.** A matter which seems of importance but turns out to be nothing.
- Marriage à la Mode.** The title of six satirical pictures by Hogarth.
- Marseillaise.** The French national air, composed by Rouget de Lisle.
- Martinet.** A strict disciplinarian. So called from a French officer of the seventeenth century.
- Mason and Dixon's Line.** The north boundary of the Slave States, dividing Virginia and Maryland from Pennsylvania.
- Mausoleum.** The tomb of Mausolus, built by Queen Artemisia, one of the seven wonders of the world.
- Mayfair.** The west end of London.
- Mercator's Projection (or Mercator's Chart)** is so called after Gerard Mercator, a Flemish geographer of the sixteenth century, the first to give an unbroken view of the whole surface of the earth. In it all the meridians are straight lines *perpendicular* to the equator, and all the parallels *parallel* to the equator, the effect being to greatly exaggerate the polar regions.
- Merry Andrew.** A buffoon, from Andrew Borde, the whimsical physician of Henry VIII.
- Merry Monarch, The.** Charles II. of England.
- Mesmerism** takes its name from Mesmer, a German physician.
- Mezzo Relievo.** Carved or cast figures projecting from the tablet a little more than basso relievo, and something less than alto relievo, are called mezzo relievo.
- Middle Ages, The.** The period between the destruction of the Roman Empire and the revival of learning in Italy—476 to 1500.
- Middle States, The.** New York, Pennsylvania, New Jersey, and Delaware.
- Minnesingers.** (Love singers.) The German lyric poets of the twelfth and thirteenth centuries.
- Miserere.** The fifty-first psalm.
- Mississippi Bubble, The.** A hollow financial scheme.
- Missouri Compromise, The.** A measure that prohibited slavery north of 36° 30' north latitude.
- Mistress of the Seas.** England.
- Molly Maguires.** A secret society in the United States. Many crimes were attributed to it, especially in Pennsylvania.
- Monarch, Le Grand.** Louis XIV. of France.
- Monroe Doctrine.** The United States is not to meddle in European affairs, nor to allow European Governments to meddle in the affairs of the American Continent.
- Mont de Piete.** A pawnbroker's shop.
- Montmartre.** A Parisian cemetery.
- Monumental City, The.** Baltimore, Md.
- Morey Letter, The.** A forged letter attributing to General Garfield anti-Chinese sentiments, 1880.
- Morganatic Marriage.** A marriage between a man of high rank and a woman of a lower one. She does not take her husband's title.
- Mother of Presidents.** Virginia; having produced seven Presidents of the United States.
- Mother Carey's Chickens.** Stormy Petrels.
- Mother Goose.** She lived near Boston, and was a nursery rhymist. She sang rhymes to her grandson, Thomas Fleet, who printed them in 1819.
- Mount Vernon.** The home of Washington, in Virginia.
- Muscular Christianity.** An expression of Charles Kingsley. "A sound mind in a sound body."
- Music of the Spheres.** Order, harmony. Plato taught that each planet had a siren whose song harmonized with the motion of our sphere and with that of the others.
- Namby-Pamby.** Childish. A term used for poor literary productions.
- Nantes, Edict of.** A decree issued at Nantes, France, in 1698, by Henry IV., granting toleration to the Protestant religion. Revoked by Louis XIV., October 22, 1685.
- Nation of Shop-keepers.** The name given to the English by Napoleon.
- Natural Bridge, The.** A natural arch over Cedar Creek near James River in Virginia. It is two hundred feet high.
- Newgate.** A London prison.
- New World.** The Americas.
- Nibelungenlied.** A German epic poem of the thirteenth century.
- Nine Worthies, The.** Joshua, David, Judas Maccabeus, Hector, Alexander, Julius Caesar, Arthur, Charlemagne, and Godfrey of Bouillon.
- Noctes Ambrosianae.** The title of a work by Professor Wilson (Christopher North).
- Noel.** Christmas day.
- Non-Conformists.** Dissenters from the Church of England.
- Northern Giant, The.** Russia.
- Notre Dame.** The Cathedral of Paris.
- Odyssey.** Homer's narrative poem of the adventures of Ulysses on his voyage from Troy to Ithaca.
- Ogres.** Giants who feed on human flesh.
- Ol Polloi.** The multitude.
- Old Abe.** Abraham Lincoln.
- Old Bailey.** A London criminal court.
- Old Dominion, The.** Virginia.
- Old Guard, The.** A favorite regiment of Napoleon Bonaparte. In the Chicago Convention, 1860, the friends of General Grant received this name.
- Old Hickory.** Gen. Andrew Jackson.
- Old Prob.** (Old Probabilities.) The United States Signal Service.
- Old Public Functionary.** President James Buchanan.
- Old South, The.** A famous church in Boston, Mass.
- Orangeman.** A Protestant Irishman. Member of an organization which cherishes the memory of William Prince of Orange.
- Orange Peel.** Sir Robert Peel.
- Ordinance of 1787.** An act fixing the government of the Northwest Territory of the United States.
- Orlando Furioso.** An Italian poem by Ariosto.
- Ossian.** The son of Fingal, a Scotch bard. Ossian's poems, published in 1760, were the work of James MacPherson, a gifted Caledonian.
- Ostend Manifesto.** Issued by the United States Ministers to England, France, and Spain during Pierce's administration, declaring that Cuba must belong to the United States.
- Ostracism.** The Athenians expelled every public man against whom a sufficient number of votes were cast. The votes were written on oyster shells.
- Pallimpsest.** A parchment having the original writing erased and new writing substituted.
- Pall Mall.** A street in London.
- Palladium.** Something that affords defense, protection, and safety. A statue of Pallas was the palladium of Troy.
- Pantheon.** A circular building in Rome erected in the time of Augustus. It is now a church, the Rotunda.
- Paradise Lost.** A poem by John Milton, treating of the fall of man.
- Paradise Regained.** Poem by Milton on the temptation and triumph of Jesus.
- Paris of America, The.** Cincinnati.
- Parthenon.** A temple of Minerva in Athens.
- Partington, Mrs.** The American Mrs. Malaprop. The creation of B. P. Shillaber.
- Pasquinade.** A lampoon or satirical writing. Political squibs used to be posted on an old statue that stood in Rome near the house of a sneering old cobbler named Pasquin.
- Peeler.** A policeman. Sir Robert Peel founded the Irish constabulary.
- Peninsular War.** The war between England and France in Spain and Portugal, 1808-1812.
- People's William.** William E. Gladstone.
- Père-la-Chaise.** A cemetery near Paris.
- Philippic.** An invective. The orations of Demosthenes against Philip of Macedon originated this word.
- Phillistine.** A word in use in the German universities for a person below caste.
- Philosopher's Stone, The.** A substance supposed to have the property of turning anything else into gold.
- Phoenix.** A mythical bird, without a mate, renews itself every five hundred years by being consumed in a fire of spices, whence it rises from the ashes and starts for a new flight.
- Pied Piper of Hamelin, The.** Not being paid for having drawn, by the sound of his pipe, the rats and mice out of Hamelin into the river, he piped the children of the town into Koppelberg hill, where 130 of them died.
- Pigeon English.** A mixture of English, Chinese, and Portuguese.
- Pion-Pion.** Prince Napoleon J. C. Bonaparte.
- Plumed Knight, The.** J. G. Blaine, American statesman.

Yosemite Valley. In California. Also a picture by Bierstadt.

Yule. Christmas.

Yule-log. A large log of wood burnt on the hearth at Christmas.

Zend-Avesta, The. Persian Scriptures written in the Zend language.

Zollverein. An association between German States for the maintenance of uniform tariff rates.

THE LORD'S PRAYER.

Latin.—Pater noster, qui es in coelis, sanctificetur nomen tuum. Adveniat regnum tuum. Fiat voluntas tua, sicut in coelo, et in terra. Panem nostrum quotidianum da nobis hodie. Et remitte nobis debita nostra, sicut et nos remittimus debitoribus nostris. Et ne nos inducas in tentationem, sed libera nos a malo. Tibi enim est regnum, et potentia, et gloria, in sempiternum. Amen.

Italian.—Padre nostro, che sei ne' cieli, sia santificato il tuo nome. Il tuo regno venga. La tua volontà sia fatta in terra come in cielo. Dacci oggi il nostro pane quotidiano. E rimettici i nostri debiti, come noi ancora gli rimettiamo a' nostri debitori. E non indurci in tentazione, ma liberaci dal maligno. Perciò che tuo è il regno, e la potenza, e la gloria, in sempiterno. Amen.

French.—Notre Père qui es aux cieux, ton nom soit sanctifié. Ton règne vienne; ta volonté soit faite sur la terre, comme au ciel. Donne-nous aujourd'hui notre pain quotidien. Pardonne-nous nos péchés, comme aussi nous pardonnons à ceux qui nous ont offensés. Et ne nous abandonne point à la tentation, mais délivre nous du malin. Car à toi appartient le royaume, la puissance, et la gloire, à jamais. Amen.

German.—Unser Vater in dem Himmel, dein Name werde geheiligt. Dein Reich komme. Dein Wille geschehe auf Erden wie im Himmel. Unser tägliches Brod gib uns heute. Und vergieb uns unsere Schulden, wie wir unsern Schuldigern vergeben. Und führe uns nicht in Versuchung, sondern erlöse uns von dem Uebel. Denn dein ist das Reich, und die Kraft, und die Herrlichkeit, in Ewigkeit. Amen.

GREAT MEN'S WORKS.

Shelley wrote "Queen Mab" at 18.
Mohammed began the Koran at 85.
Keats wrote his "Endymion" at 22.
Alexandre Dumas wrote plays at 22.
Disraeli wrote "Vivian Grey" at 21.

Heine published his first songs at 23.

Alphabets. The alphabets of different languages contain the following number of letters: English, 26; French, 23; Italian, 20; Spanish, 27; German, 26; Slavonic, 27; Russian, 41; Latin, 22; Greek, 24; Hebrew, 22; Arabic, 28; Persian, 32; Turkish, 33; Sanskrit, 50; Chinese, 214.

Early Literature. The first Greek writers were Homer and Hesiod, 1000 B. C., Tyrtæus and Archilochus, 700 B. C., and Alcæus, Sappho, and Anacreon, 600. The first Latin writers were Lucretius, Ennius, and Terentius, 200 B. C. The first British writers, Gildas, Nennius and Bede, 500 and 600 A. D. The first German writers, Eginhard, Wallafrid, and Rabanus, 800 A. D. The first French writers, Fort, Gregory, and Maralfe, 500 A. D. The first Spanish, Anian, Fulgentius, and Martin, 500 A. D. The first Polish, Yaraslof and Neslor in 1000 A. D. The first Italian, Gracian, Falcan and Campanus in 1100 A. D.

CHINESE LITERATURE.

The antiquity of Chinese literature is proportionate to that of the language, and its development has been greatly promoted by the early invention of the art of printing, which has been known in China for at least nine hundred years. The Chinese language presents a remarkable specimen of philological structure, which for ingenuity of arrangement and copiousness of expression, is not surpassed

in any written literature. It belongs to that class of idioms which are called monosyllabic. Every word consists of only one syllable. The roots or original characters of the Chinese are only 214 in number, and it is supposed that a minute analysis would reduce them to a still smaller amount. Each of these characters represents one word, and each word an idea. Their various combinations form the whole language. Taken singly, they express the principal objects or ideas that are suggested in the common intercourse of life; and combined, according to obvious analogies, they are made to comprehend the entire field of thought. Thus the character, which originally represents the word "hand," is so modified and combined with others, as to denote every variety of manual labor and occupation. The Chinese characters are written from top to bottom, and from right to left. The lines are not horizontal, but perpendicular and parallel to each other. Much importance is attached by the Chinese to the graphic beauty of their written characters, which in picturesque effect, it must be owned, are superior to most forms of alphabetic symbols. The grammar of the language is very limited. The nouns and verbs cannot be inflected, and hence the relation of words to each other in a sentence can be understood only from the context, or marked by their position.

The Chinese literature is rich in works in every department of composition, both verse and prose. Their scholars are fond of discussions in moral philosophy, but they have also numerous books of history, geography, voyages, dramas, romances, tales, and fictions of all kinds. The labors of various European travelers and students have given us specimens of almost every description of Chinese literature. In legislation, we have a translation of the Penal Code of the Empire; in politics and morals, the sacred books of Confucius, and his successor Meng-Tsew; in philology and belles-lettres, a well-executed dictionary of the language; several translations and abstracts of history; and selections from the drama, criticism, and romance. Among the most successful explorers of the field of Chinese literature, we may mention Staunton, Davis, Morrison, Klaproth, and Remusat, who have followed up the earlier researches of the Jesuits at Pekin, and elucidated a subject which had been supposed to be inaccessible.

Chinese literature suffered a similar misfortune to that of the West in the destruction of the Alexandrian library; for their Emperor, Chee-whang-tee, ordered all writings to be destroyed, that everything might begin anew from his reign; consequently their books an-

records were recovered with great difficulty by succeeding emperors

GREEK LITERATURE.

The language which we call Greek was not the primitive language of Greece, for that country was originally inhabited by tribes whose language had become extinct in the time of Herodotus. With regard to its origin, there is a diversity of opinion among the learned, although it evidently forms a branch of the extensive family of languages known by the name of the Indo-Germanic. It has existed as a spoken language for at least three thousand years, and, with the exception of the Arabic and the English, has been more widely diffused than any other tongue. Out of Greece, it was spoken in a great part of Asia Minor, of the South of Italy and Sicily, and in other regions which were settled by Grecian colonies. The Greek language is divided into four leading dialects, the Æolic, Ionic, Doric, and Attic, beside which there are several secondary dialects. The four principal dialects may, however, be reduced to two, the Hellenic-Doric, and the Ionic-Attic, the latter originally spoken in the northern part of Peloponnesus and Attica, the former in other parts of Greece. In each of these dialects, there are celebrated authors. To the Ionic dialect, belong in part the works of the oldest poets, Homer, Hesiod, Theognis; of some prose writers, especially Herodotus and Hippocrates; and the poems of Pindar, Theocritus, Bion, and Moschus. The Doric dialect was of the greatest antiquity. We have few remains of Doric prose, which consists chiefly of mathematical or philosophical writings. After Athens became the center of literary cultivation in Greece, the works of Æschylus, Sophocles, Euripides, Aristophanes, Thucydides, Xenophon, Plato, Isocrates, Demosthenes, and Aristotle, were regarded as standards of style, and made the Attic the common dialect of literature. Poetry, except dramatic, was not written in Attic. The peculiarities of Homer were imitated by all subsequent poets except the dramatists, and even they assumed the Doric to a certain degree in their choruses, for the sake of the solemnity of expression which belonged to the oldest liturgies of the Greeks. According to the general tradition, Cadmus the Phœnician was the first who introduced the alphabet into Greece. His alphabet consisted of but sixteen letters; four are said to have been invented by Palamedes in the Trojan war, and four more by Simonides of Ceos. It has been maintained, however, by some persons, that the art of writing was practiced by the Pelasgi before the time of Cadmus. On the

other hand, many of the most sagacious critics place the origin of writing in Greece at a much later period.

The origin of Greek literature, or the intellectual cultivation of the Greeks, by written works, dates at a period of which we have few historical memorials. The first period of Grecian cultivation, which extends to eighty years after the Trojan war, is called the ante-Homeric period, and is destitute of any literary remains properly deserving the name. Of the poets previous to Homer, nothing satisfactory is known. The most ancient was Olen, who is mentioned by Pausanias. He was followed by Linus, Orpheus, Musæus, and others, but the poems which are circulated under their names cannot be regarded as their genuine productions. It was in the Greek colonies of Asia Minor that the first great impulse was given to the development of literature; and among them we find the earliest authentic specimens of Greek poetry and historical composition. Situated on the borders of a noble sea, enjoying a climate of delicious softness and purity, and a country abounding in the most nutritious and tempting products of nature, and in beautiful natural scenery, these colonies possessed a character of refined voluptuousness which, if not favorable to the performance of great deeds, allured the dreamy spirit to poetical contemplations, and was manifested in noble creations of a fancy and imagination unsurpassed in the progress of civilization. Living near the scene of the Trojan war, the bards devoted their first poems to the celebration of Grecian heroism. With them commenced the second period of Greek literature, which we call the Epic age. Of these, Homer alone has survived. We have from him the two great poems, the *Iliad* and *Odyssey*, with several hymns and epigrams. He gave his name to the Homeridæ, an Ionian school of minstrels, who preserved the old Homeric and epic style, and who are probably the authors of much that has been ascribed to Homer himself.

Next to the Homeridæ, come the Cyclic poets, whose works embrace the whole circle of mythology and tradition, describing the origin of the gods and of the world, the adventures of the Heroic times, the Argonautic expedition, the labors of Hercules and Theseus, the principal events of the Theban and Trojan wars, and the fortunes of the Greeks after the fall of Troy. A transition between these historic poets and the later school of Ionian minstrelsy is formed by Hesiod, who conducted poetry back from Asia Minor into Greece. Of the sixteen works ascribed to him, we have the *Theogony*, the *Shield of Hercules*, and *Works*

and Days, the last, an agricultural poem, interspersed with moral reflections and prudential maxims.

The third period commences with the growth of lyric poetry, of apologues and philosophy, with which history gained a new development and a higher degree of certainty. Lyric poetry sprung up on the decline of the Epic school, and was much cultivated from the beginning of the epoch of the Olympiads (776 B. C.) to the first Persian war. The poems of this period are considered among the most valuable productions of Grecian literature. Many of them resembled the epic, and contained the subjects of heroic song. They were sung by bands of youths and maidens, accompanied by instrumental music. Among the most celebrated of the lyric poets were Archilochus of Paros, the inventor of the Iambus; Tyrteus, Terpander, and Alcman, whose martial strains enkindled the valor of the Spartans; Callimachus of Ephesus, inventor of the elegaic measure; Simonides and Anacreon of Ceos; the impassioned Sappho of Mitylene; Stesichorus, Hipponax, and Pindar. Many didactic poems, fables, and proverbs were written during this period, and served to prepare the way for prose composition.

The philosophy of this age was marked by its constant reference to practical affairs. Among its expounders we may consider the seven wise men of Greece, as they are called (Periander, or according to some, Epimenides of Crete, Pittacus, Thales, Solon, Bias, Chilo, and Cleobulus), of whom six acquired their fame, not by the teaching of speculative abstractions, but by their admirable wisdom in the affairs of life, and their skill in the offices of state. Their celebrated sayings are the maxims of experience, applied to the practical relations of life. But with the progress of intellectual culture, a taste for speculative inquiries was unfolded. This resulted in the establishment of the Ionic philosophy by Thales, the Italian, by Pythagoras, and the older and later Eleatic. With the development of these schools, we are brought to the scientific period of Greek literature. The Ionic school ascribed a material origin to the universe. Its principal followers were Pherecydes, Anaximander, Anaxamines, Anaxagoras, Diogenes of Apollonia, and Archilaus of Miletus. Of the Pythagorean school, which explained the organization of the world by number and measure, were Ocellus Lucanus, Timæus of Locris, Epicharmus, Theages, Archytas, Philolaus, and Eudoxus. To the older Eleatic school, which cherished a more sublime, but less intelligible conception of the origin of the world, assuming the fact of a

pure necessary existence, belonged Xenophanes and Parmenides; to the later Eleatic, Melissus and Diagoras. Until about the commencement of the 90th Olympiad, the philosophers and their disciples were dispersed throughout the various Grecian cities. Athens subsequently became their chief residence, where the class of men called Sophists first rose into importance as public teachers. Of these, the most distinguished names that have been preserved to us are Gorgias of Leontium, Protagoras of Abdera, Hippias of Elis, Prodicus of Cos, Trasimæus, and Tisias. They were especially devoted to the subjects of politics and eloquence, but also made a study of the natural sciences, mathematics, the theory of the fine arts, and philosophy. Professing the art of logic as a trade, they were less earnest in the pursuit of truth than in the construction of plausible arguments. Their fallacious pretenses awakened the honest indignation of Socrates, who not only became their zealous antagonist, but gave a vigorous and original impulse to the progress of philosophy. This shrewd and subtle reasoner opened a new direction to philosophical research, turning it to the study of human nature and of the laws of psychology and ethics, instead of barren speculations and theories. Without leaving any written record of his genius, he is known at the present day by the affectionate and beautiful memorials which have been consecrated to his character in the productions of his disciples.

Among these, Plato was pre-eminent by the force and comprehensiveness of his reason, the marvelous keenness of his insight in the region of transcendental ideas, the vigor and acuteness of his logical faculties, and the winning sweetness and grace of expression, which lend a charm to his writings that has never been equaled in philosophical literature. The masterly conversations of Socrates, in which he expounded the principles of his philosophy in the streets and market place of Athens, are reproduced with admirable dramatic effect, in the glowing pages of his eloquent disciple.

The progress of history kept pace in Grecian cultivation with the development of philosophy. Among the oldest historical prose writers, are Cadmus, Dionysius, and Hecæus of Miletus, Hellanicus of Mitylene, Pherecydes of Scyros. After them appears Herodotus, who has received the name of the Homer of history. He was followed by Thucydides, the grave, condensed, and philosophical historian of the Peloponnesian war. Strongly contrasted with his sternness and energy, is Xenophon, whose limpid narrative flows on with the charming facility of a graceful stream, presenting a de-

lightful specimen of the tranquil beauty of Greek prose in its most simple form. These three historians distinguished the period from 450 to 400 B. C., during which time we have to notice the introduction of a new class of poetical creations.

The popular festivals which were celebrated after the vintage, with rude songs and dances, led to the gradual creation of the drama. A more artistic form was given to the wild choruses in honor of Bacchus; the recitation of fables by an intermediate speaker was introduced into the performances; and soon the games of the vintage festival were repeated on other occasions. The spirit of the drama was thus cherished, until the appearance of *Æschylus*, who may be deemed the author of the dramatic art in Greece. He divided the story into different portions, substituted the dialogue for recitation by a single person, and assigned the various parts to skillful actors. The three great tragic writers are *Æschylus*, *Sophocles*, and *Euripides* (see Dict. of Authors), while distinguished rank in comedy is held by *Cratinus*, *Eupolis*, *Crates*, and especially *Aristophanes*.

During this period we find several didactic and lyric poets, while the sister art of eloquence was illustrated by the names of *Lysias*, *Demosthenes*, *Æschines*, *Antiphon*, *Gorgias*, and *Isocrates*.

The succeeding period, which is usually called the Alexandrine, was characterized by the prevalence of a critical spirit; the luxuriant bloom of the earlier Greek literature had passed away; and the fresh creative impulses of genius were made to yield to the love of speculation and the influence of erudition. The glowing imaginative philosophy of Plato was succeeded by the more rigid system of Aristotle, who founded the Peripatetic school, and gave order and precision to the principles of reasoning. With the passion for subtle analysis, which was the characteristic of his mind, he drew a sharp line of distinction between logic and rhetoric, ethics and politics, physics and metaphysics, thus enlarging the boundaries of philosophy, and establishing a system which exercised an undisputed supremacy for ages. The dogmatic tendencies of Aristotle found their counterpart in the skeptical principles of which *Pyrrho* of Elis was the most distinguished advocate. The same principles prevailed to a certain extent in the Middle and New Academies founded by *Arcefilaus* and *Carneades*, while the Socratic philosophy was modified by the disciples of the Stoic school, established by *Zeno*, and of the Epicurean, which bears the name of its celebrated founder. At length the intellectual scepter, which had been so long wielded by the philosophers and

poets of Greece, passed from Athens to Alexandria; the nation itself was absorbed in the progress of Roman conquest; Greek literature ceased to give birth to original productions; and its brilliant career became the subject of history.

HEBREW LITERATURE.

The literature of the ancient Hebrews, apart from its religious character and claims, presents a curious and important subject of investigation. It is the oldest literature of which any remains have come down to modern times. With a rich poetical coloring, a profound sentiment of humanity, and a lofty religious faith, it sustains a most intimate relation to the development of the intellect and the moral and political history of the race.

The Hebrew language is one of the oldest branches of the numerous family of languages which have received the name of Semitic, on account of the supposed descent of the nations by which they were spoken, from *Shem*, the son of *Noah*. These are the Chaldaic, the Aramaic, the Hebrew, the Syriac, the Arabic, the Phœnician, and the Ethiopian. The history of the language has been divided by many critics into four periods. I. From *Abraham* to *Moses*. II. From *Moses* to *Solomon*. III. From *Solomon* to *Ezra*. IV. From *Ezra* to the end of the age of the *Maccabees*, when it was gradually lost in the modern Aramaic and became a dead language. The differences, however, which can be traced in the language are so slight, that a sounder division would be into only two periods, the first extending from the time of *Moses* to the reign of *Hezekiah*, and the second from the reign of *Hezekiah* to its final extinction as a spoken language. The written characters or letters, which date from the time of *Solomon*, were the same as the Phœnician. During the Babylonish captivity, the Hebrews received from the Chaldees the square character in common use, and, in the time of *Ezra*, the old Hebrew manuscripts were copied in these characters. The punctuation of the language was not settled until after the seventh century of the Christian era. The accents, vowels, points, and divisions into words were also introduced at a later period.

The poetical and religious sentiment was the foundation of Hebrew literature. Lyric poetry received a rich development under *David*, to whom are ascribed several noble specimens of song and elegy. The fragments of didactic poetry which bear the name of *Solomon* are stamped with a character of practical wisdom, and often exhibit an energy of expression, which authorizes us to class them among the most extraordinary productions of

ancient literature. After the division of the kingdom, the prophets became the great teachers of the people, and have left various collections of their writings, none of which have come down to us with completeness. Upon the return of the exiled people from the Babylonish captivity, the remains of Hebrew literature were collected by a college of learned men under the direction of Ezra, and from their labors we have received the books of the Old Testament in their present form.

ROMAN LITERATURE.

The language of the ancient Romans is usually called Latin, for, though Rome and Latium were originally separate communities, they always appear to have spoken the same language. The Latins, as far as we can decide on such a question at the present day, seemed to have formed a part of that great race which overspread both Greece and Italy under the name of Pelasgians. It is supposed that the Pelasgians who settled in Italy originally spoke the same language with the Pelasgians who settled in Greece. The Greek and Latin languages accordingly have many elements in common, though each has its own distinctive character.

The history of Roman literature may be divided into four periods: I. From the earliest times till Cicero. II. To the death of Augustus, A. D. 14. III. To the death of Trajan. IV. To the conquest of Rome by the Goths. During the first five hundred years of the Roman history, scarcely any attention was paid to literature. Its earliest attempts were translations and imitations of the Greek models. The *Odyssey* was translated into Latin by Livius Andronicus, a Greek captive of Tarentum, and the earliest writer of whom we have any account. His tragedies and comedies were taken entirely from the Greek. He was followed by Nævius, who wrote an historical poem on the first Punic war, by the two tragic writers Pacuvius and Attius, and by Ennius, B. C. 239, the first epic poet, and who may be regarded as the founder of Roman literature. Being a Greek by birth he introduced the study of his native language at Rome, and had among his pupils, Cato, Scipio Africanus, and other distinguished citizens of that day. At the same time, he taught the Romans the art of easy and graceful writing in their own language, and helped to inspire them with a love of literature by his refined taste and elegant cultivation. Contemporary with Ennius was Plautus, whose dramatic pieces, in imitation of the later comedies of the Greeks, were remarkable for their vivacity of expression and their genuine comic humor. He was followed

by Cecilius and Terence, of whom the latter has left several admirable comedies, fully imbued with the Grecian spirit. The first prose writers were Quintus Fabius Pictor and Lucius Cincius Alimentus, who lived in the time of the second Punic war, and wrote a complete history of Rome. Their style was meager and insipid, aiming only at brevity, and entirely destitute of ornament or grace.

With the age of Augustus, in which some earlier writers are usually reckoned, a new spirit is exhibited in Roman literature. In didactic poetry, Lucretius surpassed his Grecian masters, by the force of thought, and the splendor of diction, which characterize his great philosophical poem on the origin of the universe. Catullus attempted various styles of poetry, in all of which he obtained eminent success. His lyric and elegiac poems, his epigrams and satires, are marked by singular versatility of feeling, frequent flashes of wit, and rare felicity of expression. Among the elegiac poets, of whose genius we still possess the remains, the highest distinction was gained by Tibullus, Propertius, and Ovid. The former of these poets was pronounced by Quintilian to be the greatest master of elegiac verse; Ovid possessed an uncommon fertility of invention and ease of versification; while Propertius tempers the voluptuous cast of his writings with a certain dignity of thought and vigorous mode of expression. The great lyric poet of the Augustan age is Horace, whose graceful and sportive fancy, combined with his remarkable power of delicate and effective satire, continues to make him a favorite with all who have the slightest tincture of classical learning.

The noblest production of this period, however, is the *Æneid* of Virgil, which with his elaborate poem on rural affairs, the *Georgics*, and his sweet and tender pastorals, or *Eclogues*, fairly entitles him to the position which has been given him by universal consent, of the most gifted epic and didactic poet in Roman literature.

The prose writings of the Latin authors, taken as a whole, betray a higher order of genius and cultivation than the works of the poets. In this department, the preëminence belongs to Cicero, whose various productions in eloquence, philosophy, and criticism are among the most valuable treasures of antiquity. In history, Cæsar, Sallust, and Livy are the most prominent names, who, each in his own peculiar style, have left models of historical composition which have been the admiration of every subsequent age. The literature of the Augustan period partook of the general character of the Roman people. De-

voted to the realization of practical objects, with slight tendencies to the ideal aspect of things, and absorbed in the exciting game of politics and war, the Romans had little taste either for abstract speculation or for the loftiest flights of poetical fancy. Hence no new system of philosophy was produced in their literature; their best poets were essentially imitative; and of all branches of study, those connected with popular eloquence were held in the greatest esteem.

With the death of Augustus commenced the decline of Roman literature. Among the poets of this period are Phædrus, an ingenious fabulist, the satirists, Juvenal and Persius, whose works are more important for their illustrations of the manners of the age than for their poetical merit, and Lucan, who describes the wars of Cæsar and Pompey in an insipid historical epic. In prose, we have the somber but condensed and powerful histories of Tacitus, and the quaint and artificial treatises on ethics and philosophy by Seneca. Subsequent to the reign of Trajan, we meet with no writers who have any claim upon our attention, and the literature of Rome, after a brief interval of splendor, during the golden age between Cicero and Augustus, passes into unimportance and obscurity.

SANSKRIT LITERATURE.

Until the close of the last century, the Sanskrit literature was almost wholly unknown to the learned of Europe. The Roman Catholic missionaries in India had, to a certain extent, engaged in the study of the language at an earlier period, but it is only since the year 1790 that it has attracted the attention of eminent scholars. Among those who have given an impulse to the study of Sanskrit, and who have themselves pursued it with distinguished success, are Sir William Jones, Wilkins Forster, Colebrooke, Wilson, Haughton, Rosen, Chézy, Burnouf, A. W. Schlegel, Oldenberg, Max Müller, and Bopp. We are indebted to their labors for a knowledge of this rich and curious literature, which, on many accounts, may be considered as one of the most remarkable products in the history of intellectual culture.

The Sanskrit language is a branch of the Indo-Germanic family of languages, and is supposed to bear the greatest resemblance to the primitive type. In its construction, it is in the highest degree ingenious and elaborate, and the variety and beauty of its forms are well adapted to illustrate the laws of the formation of language. It is the sacred language of the Brahmans, and contains the Vedas, the oldest records of their religion. The last cen-

tury before the Christian era was the period of its richest blossoming, although it extends back to a far more remote antiquity. It appears in its most ancient form in the Vedas, which date from the thirteenth century before Christ, and in that state exhibits many striking analogies with the Zend, the ancient language of Persia. These writings are the foundation of Sanskrit literature, and diffuse their influence through the whole course of its development.

The Vedas are divided into four classes, the first being in poetry, the second in prose, the third consisting of lyrical prayers, and the fourth of devotional pieces, intended to be used in sacrifices and other religious offices. Each Veda is composed of two parts, the prayers and the commandments. The Sanskrit possesses a variety of other works in sacred literature, which contain not only a copious exposition of religious doctrines, but numerous discussions of philosophical and scientific subjects, and an extensive collection of poetical legends.

The two oldest and most interesting epic poems are *The Ramayana*, describing the seventh great incarnation of Vishnu, and *The Mahabharata*, devoted to the wars of two rival lines descended from the ancient Indian monarch, Bharata. An episode from this work called *Bhagavat Gita* has been translated by Wilkins, Herder, Schlegel, and others, and has excited no small interest as an illustration of the early oriental philosophy.

A new character was given to Sanskrit poetry about one hundred years before the Christian era, by the introduction of themes connected with courts and princes. It lost the popular and national tendency which appears in the two great epics, alluded to above, and assumed a more artificial form. With a manifest improvement in the mere externals of style, the new poetry shows a degeneracy in point of thought, and an entire absence of original invention. In the principal works of this class we find labored descriptions of natural objects, and many curious artifices of composition, but they are destitute both of brilliancy of imagination and depth of reflection. The most fertile author of the new school is undoubtedly Kālidāsa, who attempted almost every species of poetical composition, and whose epic, lyric, and dramatic productions must be allowed to possess considerable merit. His best descriptive poem, entitled *Meghaduta*, is a model of simplicity and elegance. It exhibits a highly ideal character, tracing out the spiritual significance of visible phenomena, and striving to penetrate into the hidden life of the universe. The drama called

Sakountala or *The Fatal Ring*, by this author, has received the warmest commendation from modern critics. "All its scenes," says the genial Herder, "are connected by flowery bands, each grows out of the subject as naturally as a beautiful plant. A multitude of sublime as well as tender ideas are found in it, which we should look for in vain in a Greek drama." A valuable translation of this poem has been made by Sir William Jones.

The influence of religious speculation in India early gave birth to numerous philosophical writings. With the love of contemplation, to which the natives are so strongly inclined, and the progress of thought in opposition to the doctrines of the Vedas, a variety of philosophical systems was the natural consequence. The oldest of these is called the *Sankhya*. It teaches the duality of matter and spirit, which are essentially different in their nature, though found in such intimate union. The problem of life is the emancipation of the soul from the dominion of the senses, and the attainment of blessedness by the supremacy of the intellect. Another system of transcendental speculation is named the *Nyaya*. This is constructed from strict logical deductions, which it applies to the interpretation of nature, and arrives at a theory of materialism, the reverse of the *Sankhya* ideality. The *Nyaya* school has produced a multitude of writings. Opposed to each of these systems is the *Mimansa*, which maintains the doctrines of the Vedas in their original strictness, and strives to reconcile them with the suggestions of philosophy.

The Sanskrit literature, moreover, abounds in works on various other branches of learning. Its philological treatises, especially, are of great value. The Indian grammarians surpass those of any other ancient people. No less important are the Sanskrit works on rhetoric, criticism, music, astronomy, and jurisprudence. They well deserve the attention of the scholar, not only on account of their intrinsic character, but as precious memorials of the early development of the intellect, and significant illustrations of the history of the race.

ARABIC LITERATURE.

Literature, after its decay and final extinction in the Eastern and Western Roman Empires, revived first among the Arabic tribes in the East. Even before the era of Mahomet, there were renowned poets and story-tellers in Arabia. In the fifth century, during the great fairs of Mecca, poetical contests frequently took place, the victorious productions being lettered with gold and hung up in the Caaba.

Among the most renowned poets of this period were Amralkeis, Tharafa, and Antar. Their works are distinguished by imaginative power, richness of illustration, and great skill in depicting the passions of love and revenge. With Mahomet commenced a memorable epoch in Arabic literature. Through the Koran, which was arranged from Mahomet's teachings, by Abubekr, the first caliph, the method of writing and the literary style of the nation were determined. The reigns of Haroun Al-Raschid and Al-Mamun in the seventh and eighth centuries were the most enlightened periods of the Arabic dominion, though for two centuries afterwards the nation produced many eminent geographers, philosophers, jurists, and historians. Under the government of Al-Mamun, excellent universities were established at Bagdad, Bussora, and Bokhara, and extensive libraries in Alexandria, Bagdad, and Cairo. The dynasty of the Abbassides in Bagdad emulated that of the Ommanides in Spain; during the tenth century the University of Cordova was almost the only refuge of literature in Europe. The labors of the Arabic scholars and travelers contributed greatly to the spread of geographical knowledge. Ibn Batuta, who in the thirteenth century visited Africa, India, China, and Russia, ranks with Marco Polo and Rubruquis.

In the twelfth century Abu'l Kasein wrote the history of the Arabs in Spain: Bohaeddin, a biography of Sultan Saladin; Ibn Arabschah described the exploits of Tamerlane, and Hadji Khalfa, in later times, has produced an encyclopedia of Arabic, Persian, and Turkish literature. The style of the Arabian historians is clear, concise, and unincumbered with imagery. The most renowned philosopher was Avicenna, who flourished in the eleventh century. Averrhoes, whose name is also familiar to scholars, was famous as an expounder of the system of Aristotle. In the departments of medicine, astronomy, geometry, and arithmetic, there are many Arabic works which exhibit great research and scientific knowledge.

The number and variety of the works produced by the Arabian poets is most remarkable, and their influence on the modern literature of Europe was greater than is generally suspected. In picturesque narration they have rarely been excelled, and the *Thousand and One Nights*, which first appeared in its collected form during the reign of Caliph Mansur, in the ninth century, has been naturalized in all modern languages. Only half of this, however, is Arabic, the remainder having been translated from the Sanskrit and Persian. The Arabian poets left many poetic chronicles, the most celebrated of which are *The Deeds*

of *Antar*, *The Deeds of the Warriors*, and *The Deeds of the Heroes*. Of late years several eminent French and German scholars have given their attention to the study of Arabic literature, the best works of which are now accessible through their translations.

PERSIAN LITERATURE.

The modern literature of Persia succeeded that of Arabia. After the conquests of the country by the caliphs, about the middle of the seventh century, the arts and sciences of the Arabs, together with the religion of Mahomet, were transplanted upon Persian soil, but the fruits of this new culture did not appear for several succeeding generations. The first Persian books, both of poetry and history, were written in the early part of the tenth century, and for several centuries there was no interruption in the list of renowned authors. Literature was encouraged and rewarded, whatever might be the political convulsions that affected the empire. Persian poetry consists for the most part of small lyrics, arranged in *divans*, or collections. There are also several voluminous historical, romantic, and allegorical poems, besides legends and narratives told in a mixture of prose and verse. The first Persian poet is Rudegi, who flourished about the year 952. Firdausi, the great epic poet of Persia, died in the year 1030, at the age of seventy. He wrote the *Shah Nameh*, or *King's Book*, describing the deeds of the Persian rulers, from the creation of the world to the downfall of the Sassanide dynasty in 632. He was thirty years in the composition of this work, which contains sixty thousand verses. The most celebrated portion is that recounting the adventures of the hero Rustem. Nisami, at the close of the twelfth century, wrote extensive romantic poems, the most remarkable of which were *Medjnoun and Leila*, and *Iskander-Nameh*, an epic on Alexander the Great. Chakani was a celebrated writer of odes in the thirteenth century. Saadi, one of the most celebrated Persian authors, was born in 1175, and lived till 1263. His poems are principally moral and didactic, but rich with the experience of a fruitful life, and written in a very simple and graceful style. His best works are the *Gulistan*, or *Garden of Roses*, and the *Bostan*, or *Garden of Trees*. Hafiz, the oriental poet of love, was born at Schiraz in the beginning of the fourteenth century, where he lived as a dervish in willing poverty, resisting the invitations of the caliphs to reside in Bagdad. In the year 1388 he had an interview with Tamerlane, by whom he was treated with much honor. His poems consisted of odes and elegies which have been collected into a *Divan*.

His lyrics, devoted to the praise of love and wine, are full of fire and melody.

Djami, who died in 1492, was one of the most prolific of Persian writers. His life was spent at Herat, where, in the hall of the great mosque, he taught the people the precepts of virtue and religion. He left behind him forty works, theological, poetical, and mystical. Seven of his principal poems were united under the title of *The Seven Stars of the Bear*. His history of mysticism, entitled *The Breath of Man*, is his greatest prose work. Among the later Persian poems are the *Schekinschek-Nameh*, a continuation of the *Book of Kings*, and the *George-Nameh*, an account of the conquest of India by the British. The Persian is the only Mahometan literature containing dramatic poetry. Its dramas strikingly resemble the old French mysteries. Of the collections of tales, legends, and fairy stories, the most celebrated are the *Anwari soheili*, or *Lights of the Canopy*, and the *Behari danisch*, or *Spring of Wisdom*. The historical works in the Persian language are very numerous and valuable. They embrace the history of the Mahometan races from Mongolia to Barbary. The principal works are the *Chronicles of Wassaf*, a history of the successors of Genghis Khan, which appeared in 1333; the *Marrow of the Chronicles*, by Khaswini, in 1370, and the *Rauset Essafa*, a great universal history, of which modern historians have made good use. It was written by Mirchond, about the year 1450. In the departments of ethics, rhetoric, theology, and medicine, the Persian scholars are only second to the Arabic. They also excelled in translation, and have reproduced, in Persian, nearly the entire literature of India.

ITALIAN LITERATURE.

The Italian language assumed a regular and finished character at the Court of Roger I., King of Sicily, in the twelfth century. Several poets arose, who, borrowing the forms of verse from the provençal troubadours, gave the people songs in their native language in place of the melodies of the Moors and Arabians. The Italian soon became the court language of Italy, and Malespina's History of Florence, which was written in the year 1280, is scarcely inferior in elegance and purity of style to any Italian prose works which have since been produced. The first genuine poet of Italy, however, was her greatest, and one of the greatest of all time. Dante commenced his great poem of the *Divina Commedia* in the year 1304, just before his exile from Florence, and completed it during his many years of wandering from one court of Italy to another. Out of the rude and imperfect materials within

his reach, he constructed an epic which places his name beside that of him whom he humbly called his master, Virgil. Taking the religious faith of his time as the material, he conducts the reader through the sad and terrible circles of Hell, the twilight region of Purgatory, and the fair mount of Paradise, showing him all forms of torture and punishment for the vile, all varieties of supreme happiness for the pure and good. The poem takes a fierce and gloomy character from the wrongs and persecutions which the poet endured in his life. Dante died in 1321, at which time Petrarch, who was born in 1304, had commenced those studies which led to the restoration of classic literature to Italy. As an enthusiastic admirer of antiquity he imparted to his contemporaries that passion for the study of the Greek and Roman authors which preserved many of their masterpieces at a moment when they were about to be lost to the world. His songs and sonnets, most of which were inspired by his unfortunate love for Laura de Sade, gave him a worthy place after Dante in Italian literature. He died in 1374. Contemporary with Petrarch was the great master of Italian prose, Boccaccio, who was born in 1313. He early devoted his life to literature, and in 1341 assisted at the celebrated examination of Petrarch, previous to his coronation in the capitol. His principal work is the *Decameron*, a collection of one hundred tales, which, notwithstanding the impurities with which they are disfigured, are models of narration and exhibit the most varied powers of imagination and invention. Boccaccio is considered as the inventor of romances of love — a branch of literature which was wholly unknown to antiquity.

For a century following the death of Boccaccio, the literature of Italy shows no great name, though several scholars distinguished themselves by their attainments and the aid which they rendered to the cause of classic literature. The most noted of these were John of Ravenna; Leonardo Aretino, who wrote a history of Florence in Latin; Poggio Bracciolini, a most voluminous writer, who enjoyed the patronage of Cosmo de' Medici, at Florence; Francesco Filelfo and Lorenzo Valla, both men of great erudition, whose labors contributed to bring on a new era of Italian literature. Lorenzo de' Medici, called the Magnificent, towards the close of the fifteenth century, gave the first impulse to the cultivation of the Italian tongue, which had been lost sight of in the rage for imitating Latin poets. Besides being the author of many elegant songs and sonnets, his court was the home of all the authors of that period. Among these

were Politiano, who wrote *Orfeo*, a fable formed on the myth of Orpheus, which was performed at the court of Mantua, in 1483; Luigi Pulci, the author of *Morgante Maggior*, and Boiardo, author of the *Orlando Innamorato*. Both the last named poems are chivalrous romances, written in the *ottava rima*, and full of a quaint humor which before that time had only appeared in the prose of Boccaccio. But the master of the gay and sparkling poetic narrative was Ariosto, who was born in 1474, and first appeared as an author about the year 1500. Five years later he commenced his *Orlando Furioso*, which was not completed till 1516. This is a romantic poem in forty-six cantos, celebrating the adventures of Roland, the nephew of Charlemagne. It is one of the classics of Italy, and has been translated into all modern languages. After the death of Ariosto in 1533, no literary work of any prominence appeared until Torquato Tasso published his *Jerusalem Delivered* in 1581. Alamanni, Trissino and Bernardo Tasso flourished in the interval and produced labored poems, which are no longer read. The subject of Tasso's poem is the rescue of the Holy Sepulcher from the Moslems, by the Crusaders under Godfrey of Bouillon. The wrongs and persecutions heaped upon Tasso clouded his mind and shortened his days; he died in Rome in 1595, on the day before that appointed for his coronation. Three other Italian authors of the sixteenth century are worthy of mention: Cardinal Bembo, the most finished scholar of his day, and author of a history of Venice; Nicolo Machiavelli, whose name has become synonymous with all that is sinister and unscrupulous in politics, from his treatise entitled *The Prince*, for which, after his death, an anathema was pronounced against him; and Pietro Aretino, one of the most infamous and dissolute men of his time. Machiavelli wrote an admirable History of Florence, which is still a standard work.

In the half-century following the death of Tasso, there are but two poets who have attained any renown: Guarini, the author of *Pastor Fido*, and Tassoni, who wrote the *Secchia Rapita* (Rape of the Bucket). Filicaja, whose impassioned lyrics are still the revolutionary inspiration of Italy, belongs to the latter part of the seventeenth century; he died in 1707. After another long interval arose Frugoni, a lyric poet of some celebrity, who died in 1768, and Metastasio, the author of plays, operas, and ballets innumerable. He is remarkable for his wonderful command of the language, and the free and spirited movement of his dialogue. He died in Vienna in the year 1782. During this same period, Italian

dramatic literature received a new accession in Goldoni, whose comedies are still the glory of the Italian stage. He had a rival in Count Gazzi, whose works, nevertheless, are far inferior to Goldoni's in humor and brilliancy. What Goldoni did for comedy, Alfieri accomplished for Italian tragedy. This author justly stands at the head of modern Italian literature. His tragedies, odes, and lyrics exhibit an eloquence and fervor of thought which are scarcely reached by any other author. His principal works are *Saul*, *Myrrha*, *Octavia*, *Brutus the Second*, and *Philip II*. Since the commencement of this century, Italy has not been barren of authors. Pindemonte, who has published several volumes of dramatic poetry; Ugo Foscolo, author of a poem called *The Sepulchres*; Manzoni, who wrote *I Promessi Sposi* (The Betrothed), a charming romance of life on the shores of Lake Como; Silvio Pellico, whose *Le Mie Prigione* is a narrative of his sufferings in the prison at Spielberg, and Niccolini, equally celebrated as a poet and prose writer. Mazzini, Triumvir of Rome during the brief period of the Republic, and Gioberti distinguished themselves as Italian authors, as did also Leopardi.

During the last half-century the rapid progress of political events in Italy seems to have absorbed the energies of the people, who have made little advance in literature. For the first time since the fall of the Roman empire the country has become a united kingdom, and in the national adjustment to the new conditions, and in the material and industrial development which has followed, the new literature has not yet, to any great extent, found voice. Yet this period of natural formation and consolidation, however, has not been without its poets, among whom a few may be here named. Aleardo Aleardi (d. 1882) is one of the finest poetical geniuses that Italy has produced within the last century, but his writings show the ill effects of a poet sacrificing his art to a political cause, and when the patriot has ceased to declaim, the poet ceases to sing. Prati (1815-1884), on the other hand, in his writings exemplifies the evil of a poet refusing to take part in the grand movement of his nation. He severs himself from all present interests and finds his subjects in sources which have no interest for his contemporaries. He has great metrical facility and his lyrics are highly praised. Carducci, like Aleardi, is a poet who has written on political subjects; he belongs to the class of closet democrats. His poems display a remarkable talent for the picturesque, forcible, and epigrammatic. The poems of Zanella are nearly all on scientific subjects connected with human

feeling, and entitle him to a distinguished place among the refined poets of his country. A poet of greater promise than those already spoken of is Arnaboldi, who has the endowment requisite to become the first Italian poet of a new school, but who endangers his position by devoting his verse to utilitarian purposes.

The tendency of the younger poets is to realism and to representing its most materialistic features as beautiful. Against this current of the new poetry Alessandro Rizzi, Guerzoni, and others have uttered a strong protest in poetry and prose.

Among historians, Capponi is the author of a history of Florence; Zini has continued Farina's history of Italy; Bartoli, Settembrini, and De Sanctis have written histories of Italian literature; Villari is the author of able works on the life of Machiavelli and of Savonarola, and Berti has written the life of Giordano Bruno. In criticism philosophic, historical, and literary, Fiorentino, De Sanctis, Massarani, and Trezza are distinguished. Barili, Farina, Bersezio, and Giovagnoli are writers of fiction, and Cossa, Ferrari, and Giacosa are the authors of many dramatic works. The charming books of travel by De Amicis are extensively translated and very popular.

SPANISH LITERATURE.

The earliest essay in Spanish literature is the *Chronicle of the Cid*, which is supposed to have been written about the middle of the twelfth century. In form the poem is sufficiently barbarous, though the language is remarkably spirited and picturesque. It has been the fount of numberless songs and legends through the later centuries. It narrates the adventures of Ruy Diaz de Bivar, the Cid Campeador.

In the following century, Gonzales de Berceo, a monk, wrote nine voluminous poems on the lives of the saints. Alfonso X. of Castile, whose reign terminated in 1284, was the author of a poem entitled *The Philosopher's Stone*, besides several prose works. The first author of the fourteenth century was Prince Don John Manuel, who wrote a prose work entitled *Count Lucanor*, a collection of tales embodying lessons of policy and morality. He was followed by Pedro Lopez de Ayala and Mendoza, Marquis de Santillana; though the latter belongs properly to the next century. He produced a number of works, both prose and poetry, all of which were remarkable for the erudition they displayed. Some of his lighter poems are very graceful and melodious.

Under the reign of Charles V. Spanish literature first reached its full development. After

the union of Arragon and Castile, and the transfer of the seat of the government to Madrid, the Castilian became the court language, and thus received a new polish and elegance. The first author of this period was Boscan, an imitator of Petrarch, in some respects, but a poet of much native fervor and passion. Garcilaso de la Vega, the friend of Boscan, surpasses him in the sweetness of his verses and in their susceptibility and imagination. He was a master of pastoral poetry, and his eclogues are considered models of that species of writing. His life was actively devoted to the profession of arms. He fought under the banner of Charles XI. in Tunis, Sicily, and Provence, and was finally killed while storming the walls of Nice. Don Diego de Mendoza, one of the most celebrated politicians and generals of that period, is generally awarded a place next to Garcilaso. He was a patron of classical literature, and the author of a history of the Moorish Revolt in the Alpuxarra, and a History of the War of Granada, but a man of cruel and tyrannical character. Montemayor, who flourished at the same time, attained much celebrity from his pastoral of Diana. These authors during the reign of Charles V. gave Spanish poetry its most graceful and correct form, and have since been regarded as models of classic purity. The great masters of Spanish literature, however, were reserved for the succeeding generation. Herrera and Ponce de Leon, lyrical poets, fill the interval between the age of Garcilaso de la Vega and Cervantes. Herrera is considered the first purely lyrical poet of Spain. Ponce de Leon, who was imprisoned five years by the Inquisition for having translated the Song of Solomon, was the author of several volumes of religious poetry.

Two of the brightest stars of Spanish literature, Cervantes and Lope de Vega, were contemporaries, and were followed in the next generation by the third, Calderon. Cervantes was born in 1549. He traveled throughout Italy, lost a hand at the battle of Lepanto, and was five years a slave in Barbary. He commenced his literary career by the writing of comedies and tragedies, the first of which, *Galatea*, was published in 1584. Thirty of his comedies have been entirely lost. His great work, *Don Quixote*, was published in 1605, and was immediately translated into all the languages of Europe. From this time until his death in 1616, he wrote many novels and comedies. The tragedy of *Numantia* and the comedy of *Life in Algiers* are the only two of his plays which have been preserved. To this same period belongs Don Alonso de Ercilla,

whose epic of *La Aracuna* was written during the hardships of a campaign against the Araucanian Indians in Chile. Lope de Vega was born in 1562, and after a life of the most marvelous performances died in 1635. He was a prodigy of learning, imagination, and language. Out of eighteen hundred dramas which he wrote, one hundred were each produced in the space of a single day. His detached poems have been printed in twenty-seven volumes in quarto. Very few of his plays are now read or performed. The only remaining authors of eminence during this period are Quevedo, who wrote several moral and religious works and three volumes of lyrics, pastorals, and sonnets; Villegas, an Anacreonic poet; and the Jesuit Mariana, author of a History of Spain. The life of Calderon de la Barca, the illustrious head of the Spanish drama, extended from 1600 to 1687. His plays are of four kinds: sacred dramas, from Scriptural sources; historical dramas; classic dramas; and pictures of society and manners. The most celebrated are, *The Constant Prince*, *El Secreto a Voces* and *El Magico Prodigioso*. A number of small dramatists were contemporary with Calderon, but with his death Spanish literature declined, and has since produced few eminent names. Luyando, counselor of state, published two tragedies in 1750, and in 1758 appeared *The Life of Friar Gerund*, by Salazar—a work in the style of Don Quixote, but directed against the clergy instead of the chivalry. It abounds with wit and satire, and is perhaps the best Spanish prose work of the last century. Toward the close of the century Huerta achieved considerable reputation by his attempts to revive the Spanish drama. Tomas de Yriarte published in 1782 his *Literary Fables*, and a few years later Melendez appeared as the author of two volumes of idyls and pastorals. Both of these authors display considerable lyric genius.

The new life and health infused into literature in the age of Charles III. was checked by the French revolutionary wars in the reign of Charles IV., and afterwards by the restoration of civil despotism and the Inquisition, brought again into the country by the return of the Bourbon dynasty in 1814. Amidst the violence and confusion of the reign of Ferdinand VII. (1814–1833), elegant letters could hardly hope to find shelter or resting place. Nearly every poet and prose writer, known as such at the end of the reign of Charles IV., became involved in the fierce political changes of the time,—changes so varied and so opposite, that those who escaped from the consequences of one, were often, on that very account, sure to

suffer in the next that followed. Indeed, the reign of Ferdinand VII. was an interregnum in all elegant culture, such as no modern nation has yet seen,—not even Spain herself during the War of the Succession. This state of things continued through the long civil war which arose soon after the death of that king, and indeed, it is not yet entirely abated. But despite the troubled condition of the country, even while Ferdinand was living, a movement was begun, the first traces of which are to be found among the emigrated Spaniards, who cheered with letters their exile in England and France, and whose subsequent progress, from the time when the death of their unfaithful monarch permitted them to return home, is distinctly perceptible in their own country.

The two principal writers of the first half of the century are the satirist Jose de Larra (d. 1837) and the poet Espronceda (d. 1842); both were brilliant writers, and both died young. Zorrilla (b. 1817) has great wealth of imagination, and Fernan Caballero is a gifted woman whose stories have been often translated. Antonio de Trueba is a writer of popular songs and short stories not without merit. Campoamor (b. 1817) and Bequer represent the poetry of twenty years ago. The short lyrics of the first named are remarkable for their delicacy and finesse. Bequer, who died at the age of thirty, left behind him poems which have already exercised a wide influence in his own country and in Spanish America; they tell a story of passionate love, despair, and death.

Perez Galdós, a writer of fiction, attacks the problem of modern life and thought, and represents with vivid and often bitter fidelity the conflicting interests and passions of Spanish life. Valera, a minister from Spain to the United States, is the author of the most famous Spanish novel of the day, *Pepita Jimenez*, a work of great artistic perfection, and his skill and grace are still more evident in his critical essays. Castelar gained a European celebrity as an orator and a political and miscellaneous writer, and was as well preëminent in the field of diplomacy. The works of these authors, and of many others not named, show clearly that Spain is making vigorous efforts to bring herself socially and intellectually into line with the rest of Europe.

Of the Spanish colonies, Cuba has produced some writers of enduring renown. The most distinguished for poetic fame is Gertrude de Avellaneda; Heredia and Placido may also be mentioned. In Venezuela, Baralt is known as a historian, poet, and classical writer; Olmedo as a poet of Bolivia, and Caro a writer of the United States of Colombia.

PORTUGUESE LITERATURE.

Portugal first acquired its position as an independent kingdom after the battle of Ourique, in 1139. The date of the origin of its literature is nearly coeval with that of the monarchy. Hermiguez and Moniz, two knights who flourished under Alfonso I., wrote the first ballads. King Dionysius, who reigned from 1279 to 1325, and his son Alfonso IV., were both renowned as poets; but few vestiges of their writings remain. It was not until the fifteenth century, however, that Portuguese literature attained any considerable merit. Macias, a Portuguese knight engaged in the wars with the Moors of Granada, was called *El Enamorado*, on account of the tender and glowing character of his amatory poems. The first distinguished poet of the country was Bernardin Ribeyro, who flourished under the reign of Emmanuel the Great, in the beginning of the sixteenth century. His most celebrated productions are his eclogues, the scenes of which are laid on the banks of the Tagus and the sea shores of Portugal. His lyrics of love, the origin of which is attributed to an unholy passion for the king's daughter, are wonderfully sweet and melodious. The first prose work in Portuguese worthy of note is a romance entitled *The Innocent Girl*, which appeared about this period. Saa de Miranda, who also attained celebrity as a Spanish author, was born in Coimbra in 1495, and wrote many sonnets, lyrics, and eclogues in his native tongue. He also wrote a series of poetical epistles, after the manner of Horace. Antonio Ferreira, who was born in 1528, followed the example of Miranda in his sonnets and eclogues, but surpassed him in entering the field of dramatic literature. His *Inez de Castro*, founded on the tragic story of that lady, displays much power and pathos in the delineation of the characters. The other poets of this generation were Andrade Caminha, Diego Bernardes, and Rodriguez de Castro, all of whom wrote lyrics, sonnets, and pastorals, few of which have survived them.

The sole star of Portuguese literature, who is now almost its only representative to other nations, was Luis de Camões, who was born in 1525. After studying at Coimbra, where he was coldly treated by Ferreira, he embraced the profession of arms, and lost an eye in the siege of Ceuta. Sailing for India in 1538, he reached Goa in safety, participated in an expedition against the king of Cochin-China, spent a winter in the islands of Ormuz, and afterwards, on account of a satire entitled *Follies in India*, directed against the Portuguese governor, was banished to Macao, on the coast of China. During his residence of five

years in that place, he wrote his great epic of *The Lusiad*, devoted to celebrating the passage of the Cape of Good Hope by Vasco de Gama, and the triumph of Portuguese arms and commerce in the Orient. On his return to Portugal he was shipwrecked on the coast of Cambodia, and escaped by swimming, with *The Lusiad* in his hand, held above the waves. He died in great poverty in 1579. He left behind him many sonnets, songs, and pastorals, but most of them are penetrated with a vein of deep and settled melancholy. Among the successors of Camoëns, the most noted are Gil Vicente, a dramatic writer, who is supposed to have served as a model to Lope de Vega and Calderon; and Rodriguez Lobo, who was at one time considered a rival of Camoëns. He wrote the *Winter Nights*, a series of philosophical conversations, *Spring*, a romance, and numberless pastorals. Cortereal also described in a ponderous epic the adventures of Manuel de Sousa Sepulveda, a distinguished Portuguese.

The age of Camoëns also gave rise to a new branch of literature. John de Barros, born in 1496, is esteemed by his countrymen as the Livy of Portugal. He commenced his career by a romance entitled, *The Emperor Clarimond*, but after his return from service on the coast of Guinea, he devoted himself to the preparation of a grand historical work on the Portuguese empire. Only one-fourth of this, entitled *Portuguese Asia*, which was published in 1552, appeared. This is one of the most comprehensive, accurate, and interesting historical works of that age. Alfonso d'Albuquerque, one of the most distinguished contemporaries of Barros, wrote a series of *Commentaries*, and Couto and Castanheda undertook to complete the work which Barros had left unfinished. Bernardo de Brito, born in 1570, designed to give a universal history of Portugal, but, commencing with the Creation, he died by the time he reached the Christian Era. Osorio, Bishop of Sylvez, who died in 1580, wrote the *History of King Emmanuel*, describing the religious troubles of that time in a most liberal and enlightened spirit. Manuel de Faria, born in 1590, almost rivaled Lope de Vega in the amount of his works; his dissertations on the art of poetry are held in most value. He also wrote a history of Portugal and a commentary on Camoëns. After the subjugation of Portugal by Philip II. of Spain, the literature of the country declined, and presents no distinguished name for nearly a century following. The first author of the last century is the Count of Ericeyra, born in 1678. He was a general in the army, and a scholar of splendid attainments. His chief

work was the *Henriqueide*, an epic poem describing the adventures of Henry of Burgundy, the founder of the Portuguese monarchy. Towards the close of the last century, Antonio Garcao and the Countess de Vimieiro acquired some celebrity by their dramatic productions. The only Portuguese authors of note whom the present century has brought forth are Antonio da Cruz e Silva, who imitated Pope and other English poets, and J. A. da Cunha, an eminent mathematician and elegiac poet. The Portuguese colonies have produced a few writers, the most noted of whom are Vascenellos and Claudio Manuel da Costa.

FRENCH LITERATURE.

The literature of France was later in its development than that of the other nations of Southern Europe. It was necessary to wait the decline of the two romance-tongues of Normandy and Provence before the language could take a settled form, and a still further time elapsed before it was sufficiently matured for the purpose of the scholar and the author. During the thirteenth and fourteenth centuries the kingdom produced many romances, in which the influence of the literature of the Trouveres and Troubadours was manifest. Gilbert de Montreuil, Castellan de Coucy, and some others were noted for this species of composition; many sacred dramas and mysteries were written in the north of France, and about the middle of the fifteenth century, several romantic epics appeared. The only remarkable name of this early period is the renowned chronicler, Froissart, who was born in 1337, and in the course of his travels and sojourn at all the courts of Europe, was witness of many of the chivalrous events he describes in his "Chronicles of France, Spain, Italy, England, and Germany." Philip de Comines, who died in 1509, passed his life in the service of Louis IX., and left behind him the "Memoirs" of his time. The latter part of the fifteenth century produced many small writers of satires, odes, songs, etc., among whom Charles, Duke of Orleans, takes the first rank. The sacred mysteries, the first attempt at theatrical representation, gradually gave place to a rude form of drama and comedy, and a very successful comedy of French life appeared in 1475.

With the reign of Francis I. the study of the classics became popular in France, and from that time until the age of Louis XIV. the progress of French literature was rapid and uninterrupted. The sixteenth century produced a few great names. Scaliger and Casaubon were renowned for their scholastic acquirements; Clement Marot and Theodore Beza

cultivated poetry under Francis I., whose sister, Margaret of Valois, published a collection of novels, called the *Heptameron*; Ronsard was the first French poet who showed strong original genius, and, with Regnier, gave the national poetry a freer and more characteristic tone. The drama was improved by Etienne Jodelle, who imitated the Greek tragedians; Claude de Seyssel wrote the History of Louis XII.; and Brantôme and Agrippa d'Aubigné left behind them many memoirs and historical essays. But the boast of the age is the names of Malherbe, Rabelais, and Montaigne. Malherbe, born in 1554, is considered the first French classic, in poetry; his language is most inflexibly pure and correct. Rabelais was born in 1483, and his romance of *Gargantua and Pantagruel* was first published in 1533. Notwithstanding its grossness it is one of the most lively, humorous, and brilliant books in the language. It satirizes the clerical and political characters of his time. Montaigne, whose life extended from 1533 to 1592, wrote three volumes of essays, on moral, political, and religious subjects, which on account of their elegant style no less than the treasures of thought they contain, have always held their place among French classics.

The seventeenth century is the glory of French literature. Under the auspices of Richelieu, Colbert, and Louis XIV. all departments of letters, science, and art reached a height unknown before. The French Academy was founded by Richelieu in 1635, and the language, at that time unrivaled in clearness, perspicacity, and flexibility, gradually became the polite tongue of Europe. Dramatic poetry, especially, founded on the principles of the Greek theater, attained a character it has never since reached. Corneille, born in 1606, was the father of the classic French drama. His first play, *The Cid*, belongs rather to the romantic drama, but through the influence of the Academy his later works, the most eminent of which are *Les Horaces*, *Cinna*, *Polyeucte*, and *Mort de Pompée*, are strictly classical. His dramatic works amount to thirty-three. Racine, who was born in 1639, brought the classic drama to perfection. His language is the most elegant and melodious of all French dramatists, while he is inferior to none in his knowledge of nature and his command of the sentiments and passions. His plays, though constructed on the classic model, are not confined strictly to classic subjects. The most celebrated are *Andromaque*, *Bajazet*, *Mithridate*, *Phèdre*, *Esther*, and *Athalie*. After these two authors ranks Molière, the father and master of French comedy. His *Tartuffe* has a universal celebrity. He died in 1673. Crébil-

lon, sometimes called the French *Æschylus*, was a writer of tragedies. Legrand, Regnard, and Scarron distinguished themselves as dramatists of secondary note. To this age belong Le Sage, the author of *Gil Blas*; La Fontaine, the greatest fabulist since *Æsop*; and Boileau, the satirist and didactic poet, whose *Art Poétique* and *Lutrin* or "Battle of the Books" have been made classic. Mademoiselle de Scudery wrote many chivalrous romances, and Perrault's fairy tales soon became household words. The *Télémaque* of Fénelon was also produced during this period. This author, with Bourdaloue, Bossuet, and Massillon, were celebrated as theological writers and pulpit orators. Madame de Sevigné's letters are unsurpassed as specimens of graceful and spirited epistolary writing. As historians, Rollin is the most distinguished, but Mézeray, author of the national Chronicles, the Jesuit D'Orleans, author of Histories of Revolutions in England and Spain, and Bossuet's theological histories are worthy of notice.

During the eighteenth century, when the literature of Spain, Italy, and Portugal were on the decline, and England and Germany remained stationary, France still maintained her supremacy. In 1694 was born Voltaire, who in the course of his life made himself master of nearly every department of literature. His first play, *Œdipe*, was successfully performed in 1718, though his epic of the *Henriade*, written at the same time, was not published till 1729. Many of his succeeding plays were unsuccessful, and his satires and philosophical essays produced only banishment. His principal plays are *Zaire*, *Alzire*, *Brutus*, *Oreste*, *Mahomet*, and *Tancrède*. After his return from Germany, he settled at Ferney on the Lake of Geneva, where for twenty years he devoted himself to literature. His principal works are *History of Charles XII. of Sweden*; *History of Russia under Peter The Great*, *Pyrrhonisme de l'Histoire*, *Droits de l'Homme* and the *Dictionnaire Philosophique*. Jean Jacques Rousseau, born in 1712, exercised scarcely less influence on French literature than Voltaire. His first work, a dissertation on Modern Music, appeared in Paris in 1743, about which time he wrote several comedies and tragedies and composed an opera. His romance entitled *Nouvelle Héloïse*, was published in 1760, and his *Contrat Social* and *Emile* in 1762. His most remarkable work, the *Confessions*, was completed in 1770, and he died in 1778. As bold and independent as Voltaire in his philosophical views, he had nothing of his cynicism. His works, the style of which is absolutely fascinating, express a sincere sympathy with humanity. Montesquieu, whose *Spirit of Laws* is a standard work

on jurisprudence, belongs to the first half of the eighteenth century. Among the historians contemporary with Voltaire, were Condorcet, author of a *History of Civilization*, and Barthélemy, who also wrote the *Voyage de Jeune Anacharnis*. La Bruyère, La Harpe, and Madame d'Épinay distinguished themselves by their didactic and epistolary writings. The most noted novelists were Marmontel, Bernardin de St. Pierre, author of *Paul and Virginia*, and Louvet. Marivaux attained distinction as a writer of comedies, and Beaumarchais as a dramatist and writer of operas. The well-known *Barber of Seville* is from his pen. France produced few lyric poets during the last century. Lebrun, Delille, and Joseph Chenier are the most worthy of mention, but the *Marseillaise* of Rouget de Lisle is the finest lyric of the century, if not of all French literature. Mirabeau, Barnave, Sièyes, and the leaders of the Revolution gave a new and splendid character to French oratory, toward the close of the century.

Chateaubriand, de Staël, and Béranger connect the age of Rousseau and Voltaire with the modern literature of France. Chateaubriand was born in 1769, and published his first work, the *Essay on Revolutions*, in London, in 1797, while in exile. His *Atala*, the subject of which was derived from his adventures among the Natchez tribe of Indians, on the Mississippi, appeared in 1801, and his *Génie du Christianisme* in 1802. He also published *Les Martyrs* in 1807, and an account of his travels in the East. He filled many diplomatic stations under the Bourbons, and was made peer of France. After his death, which took place in 1848, his autobiography was published, under the title of *Mémoires d'outre Tombe*. Madame de Staël, the daughter of M. Neckar, afterwards minister under Louis XVI., was born in 1766, and first appeared as an author in 1788, when she published a series of letters on the life and writings of Rousseau. During the French Revolution she remained in Switzerland and England, where she wrote several political pamphlets, dramas, and essays on life and literature. Her romance of *Corinne* was published in 1807, and her *De l'Allemagne*, which directed attention to the literature of Germany, in 1810. Her work entitled *Ten Years of Exile* was written in Sweden; she died in Paris in 1817. Béranger is the first songwriter of France. Many of his lyrics and ballads have become household words with the common people. Casimir Delavigne, who died in 1843, was among the first restorers of that lyric school which Lamartine, Victor Hugo, and Alfred de Musset have since carried to a high degree of perfection. The most re-

nowned names in recent French Literature are, as poets, Alphonse de Lamartine, author of *Méditations Poétiques*, *Harmonies Poétiques* and *La Chute d'un Ange*; Victor Hugo, author of three volumes of lyrical romances and ballads; Alfred de Musset; Jean Reboul, a disciple of Lamartine; and Auguste Barbier, who mingles with his poems a vein of keen satire. Jamin, a barber of Agen, has obtained much celebrity by his poems in the Gascon dialect. The new school of French romance has infected the modern literature of all countries. Balzac, who died in 1850, is unequaled as a painter of society and manners; Eugene Sue, whose *Mysteries of Paris* and *Wandering Jew* have been so widely read, delights in exciting subjects and the most intricate and improbable plots; Alexander Dumas, best known by his *Count of Monte Cristo*, and his romances of travel, is a master of picturesque narrative; Victor Hugo is best known as a novelist by his *Notre Dame de Paris*, a brilliant historical fiction, and *Les Misérables*; and Paul de Kock, as a lively though unscrupulous painter of Parisian life, enjoys a remarkable popularity.

The most striking and original writer of fiction is Madame Dudevant, better known as "George Sand," whose *Andre*, *Lettres d'un Voyageur*, and *Consuelo* have placed her in the first rank of French authors. It is somewhat remarkable that the excellence of this group of novelists has been maintained by a new generation of writers, Murger, About, Feuillet, Flaubert, Erckmann-Chatrian, Droz, Daudet, Cherbuliez, Gaboriau, Dumas, fils, Zola, Merimée, and others. As dramatists, Scribe, Leon Gozlan, Etienne Arago, Germain Delavigne, Sardou and Felix Pyat have distinguished themselves. The most prominent historical and political writers are Lamartine, Thiers, Michelet, Guizot, Louis Blanc, De Tocqueville and Thibaudau; while Cousin and Comte are the founders of the new schools of philosophy. French oratory now occupies a higher position than ever before; its most illustrious names are Guizot, Thiers, Berryer, Lamartine, Odilon Barrot, Victor Hugo, Lacordaire, Père Hyacinthe, and Coquerel. Renan is a prominent name in theological writing, and Montalembert a historian with strong religious tendencies. The great master of criticism is Sainte-Beuve (1804-1869), who possessed a rare combination of great and accurate learning, compass and profundity of thought, and, above all, sympathy in judgment. Henri Taine, whose works on English literature are among the best we have, Théophile Gautier, Arsène Houssaye, Jules Janin, Sarcy, and others, are distinguished in this branch of letters.

GERMAN LITERATURE.

The first period of German literature commenced with the reign of Charlemagne in the eighth century, and extended to the time of the Suabian emperors, at the close of the twelfth century. The first learned society was instituted by Alcuin, the greatest scholar of Charlemagne's time. In the succeeding period, Einhard, Rithard, and Lambert von Aschaffenburg distinguished themselves as historical and theological writers. About this time also originated those epic ballads and fragments which were afterwards collected under the title of the *Nibelungen-Lied*, or "Lay of the Nibelungen," and the "Song of Hildebrand." See p. 198. More artistic and of more thoughtful insight into human nature is the *Gudrun*. It describes the winning of the Princess Hilde by King Hettel of Denmark and the long captivity of Gudrun, their daughter, and of her final happy rescue by her lover.

The second period terminates with the close of the fifteenth century. It includes the Minnesingers, or German Troubadours, who were the result of the intercourse of Germany with Italy and France, which made German scholars acquainted with the amatory literature of Provence. The most renowned Minnesingers were Wolfram von Eschenbach, who wrote *Percival*; Walter von der Vogelweide, the most graceful and popular of all, and Heinrich von Ofterdingen. Otto von Friesingen achieved renown for his histories, which were written in Latin.

The third period, dating from the commencement of the fifteenth century, at which time the German language was fully developed and subjected to rule, extends to the present time. It has been subdivided by German critics into three parts, viz. : 1, to the commencement of the Thirty Years' War; 2, to Klopstock and Lessing; 3, to our own day. The progress of the Reformation in the fifteenth century operated very favorably upon German literature. Melancthon, Luther, Ulric von Hutten, and the other leaders of the movement were also distinguished scholars. Luther's Translation of the Bible is the monument of the period. To it Germany owes the gift of a common speech. The naturalist Gesner; the painter Albert Dürer, and the astronomers Kepler and Copernicus, flourished also in the fifteenth century. The most distinguished poet of this period was Hans Sachs, a writer of beautiful hymns. He was the master of a school or guild of poetry, which was then considered as an elegant profession. In the number of his works he rivals Lope de Vega, as he is said to have written 6048, 208 of which were comedies and tragedies. He died in

1576. Martin Opitz, who marks the commencement of a new era in German poetry, was born in 1597. He first established a true rhythm in poetry, by measuring the length of the syllables, instead of merely counting them as formerly. As prose writers of the seventeenth century, Leibnitz, the distinguished philosopher, Gerhardt Grimmelshausen and Gottsched are the most prominent. The most important form of literature in the last half of the seventeenth century was novels. Of these Grimmelshausen's *Simplicissimus* was the greatest and is the only one to survive. There is no great name in German literature, however, from Opitz till the middle of the last century, when Gellert, Gessner, Klopstock, and Hagedorn were the inauguration of a new life. Under these authors, and others of less note, the language attained a richness of expression, a flexibility of style, and a harmony of modulation which it never possessed before. Gellert, born in 1715, is distinguished for his "Spiritual Songs and Odes," his letters, and his romance of *The Swedish Countess*, which is the first domestic novel written in the German language. Gessner is best known through his idylls, in which he followed the classic models. Hagedorn, who died in 1754, wrote many poems; he is supposed to have exercised considerable influence on Klopstock in his earlier years. As prose writers, Forster, Mendelssohn the philosopher, and Musäus, who made a collection of German legends and traditions, are worthy of note.

With Klopstock commenced the golden age of German literature, and the list of renowned names continues unbroken until the present time. Klopstock was born in 1724. In his odes and lyrical poems he struck out a new and bold path, casting aside the mechanical rules of the older schools of German poetry. His greatest work is the *Messias*, a sacred epic, which was commenced in 1745 and finished in 1771. Lessing, born in 1729, stands by the side of Klopstock as a poet, while he is also distinguished as a prose writer. He may be considered as the first successful German dramatist, his plays of *Emilia Galotti*, *Minna von Barnhelm*, *Nathan the Wise*, still keeping their place on the stage. As a critical writer on all the branches of the Fine Arts, he is also distinguished.

Wieland follows next in the list of German classics. Born in 1733, he is the link between the age of Gellert and Klopstock, and that of Schiller and Goethe. He died in 1813. His principal works are *The New Amadis*, which illustrates the triumph of spiritual over physical beauty, the heroic epic of *Oberon*, a romance of the middle ages, the

drama of *Alceste*, the *History of the Abderites*, a satirical romance, besides many letters, satires, and criticisms on literature and art. Herder, his contemporary, in addition to his fame as a poet, is celebrated for his philosophical and theological writings, and his *Spirit of Hebrew Poetry*. He died in 1803. At the commencement of the 19th century, Wieland, Herder, Goethe, and Schiller were gathered together at the court of Weimar—the most illustrious congregation of poets since Shakespeare, Spenser, Ben Jonson, and Fletcher met together in London. Goethe was born in 1749, and from his boyhood displayed a remarkable talent for literature, science, and art. His first romance, *The Sorrows of Werther*, produced a great sensation throughout all Europe. His tragedy of *Götz von Berlichingen*, written at the age of 22, established his fame as a poet. After his settlement at Weimar in 1774, his works followed each other rapidly. He produced the tragedies of *Iphigenia*, *Egmont*, *Tasso*, and *Clavigo*, the pastoral epic of *Hermann und Dorothea*, the philosophical romances of *Wilhelm Meister* and *Die Wahlverwandtschaften*, the *West-Oestliche Divan*, a collection of poems founded in his studies of Oriental literature, and the first part of his greatest work, *Faust*. He also published narratives of travel in France and Italy, and *Wahrheit und Dichtung*, an autobiography of his life. His philosophic and scientific writings, especially his theory of color, are scarcely less celebrated than his literary works. He is equally a master in all departments of literature, and is generally acknowledged as the greatest author since Shakespeare. He died in 1832. Schiller, born in 1759, exercised scarcely less influence on German literature than Goethe. His tragedy of *The Robbers* produced nearly as great a revolution as *The Sorrows of Werther*. On account of this and other works he was obliged to fly from his native Würtemberg, and, after many vicissitudes, settled in Weimar, with his great colleagues. After a brief but intense and laborious life, he died in 1805. After *The Robbers*, he wrote the following dramatic works: *Fiesco*, *Cabal and Love*, *Don Carlos*, *The Maid of Orleans*, *Marie Stuart*, *William Tell*, *The Bride of Messina*, and *Wallenstein*. The last is the greatest drama in the German language. His lyrical poems are unsurpassed. His principal prose works are the *History of the Netherlands* and *History of the Thirty Years' War*. This period, so glorious for German literature, produced also the poets, Bürger, author of *Lenore* and *The Wild Huntsman*; Count Stolberg; Voss, author of *Luise*; Salis and Matthisson, elegiac poets; Tiedge, author

of *Urania*; and the hero Korner, the Tyrtæus of the wars of 1812 and 1813. The department of prose was filled by many distinguished writers of philosophy, history, and romance. Kant, who lived from 1724 to 1804, is the father of modern German philosophy, and exercised a great influence on all his contemporaries. Schlegel, in the department of literary criticism, and Winckelmann, in that of art, are renowned names. Hegel and Fichte succeeded Kant as philosophers, and these in turn were followed by Ruge, Strauss, Feuerbach, Ulrici, Schopenhauer, and Von Hartmann; while Alexander von Humboldt became the leader of a new and splendid company of writers on cosmical science. The name of Tieck heads the school of modern German romance. He was born in 1773, and early attracted attention by his *Bluebeard* and *Puss in Boots*. In addition to a great number of plays, romances, and poems, he produced, in conjunction with Schlegel, a German translation of Shakespeare, which is the most remarkable work of its kind in all literature. Jean Paul Richter, the most original and peculiar of all German authors, was born in 1763 and died in 1825. His first work was a humorous and satirical production, entitled, *The Greenlandic Lawsuit*, followed by *Selections from the Devil's Papers*. His works are distinguished by a great knowledge of human nature, and a bewildering richness of imagination, and a style so quaint and involved as almost to form a separate dialect. His best works are *Titan*, *Hesperus*, *Die Unsichtbare Loge*, and *Flower, Fruit, and Thorn Pieces*. E. T. A. Hoffman is scarcely less original in his romances, which have a wild, fantastic, and supernatural character. Among other German authors, the brothers Grimm are celebrated for their *Kinder und Haus Märchen*, the notorious Kotzebue for his plays, and Wolfgang Menzel for his *History of Germany and German Literature*.

Since the commencement of the 19th century Germany has been prolific of authors, but the limits of this sketch prohibit us from much more than the mere mention of their names. Baron de la Motte Fouque is known as the author of *Undine*, one of the most purely poetical creations of fiction, *Sintram*, and *Thiodolf, the Iclander*. Börne attained celebrity as a satirist, critic, and political writer. Uhland stands at the head of the modern generation of poets. His ballads, romances, and his epic of *Ludwig der Baier* are among the best German poems of the day. After him rank Ruckert, also renowned as an Oriental scholar; Hauff, a lyric poet, and author of the romance of *Lichtenstein*; Gustav Schwab, Jus-

tinus Kerner, author of the *Seeress of Prevorst*; Arndt, author of the *German Fatherland*, the national lyric; Anastasius Grün (Count Auer-sperg), author of the *Pfaff von Kahlenberg*; Nicholas Lenau, author of *Savonarola*; Ferdinand Freiligrath, a vigorous political poet; Heinrich Heine, author of many popular songs and ballads; Chamisso, who also wrote the romance of *Peter Schlemihl*; Gutzkow, distinguished as a dramatist; Halm, also a dramatist, and author of *Der Sohn der Wildniss*; and, as lyric poets, Herwegh, Geibel, and Beck. Among the distinguished prose writers are Schlosser, author of a Universal History; Ne-ander, author of a History of the Church, and a Life of Christ; Prince Puckler-Muskau and the Countess Hahn-Hahn, critics and tourists; Zschokke (a Swiss), Auerbach and Freytag distinguished as novelists, and Feuerbach; Schelling as a philosopher; Strauss, author of a Life of Christ and head of the German "Rationalists"; Müller, as a historian, and Krummacher, a writer of fables and parables. As historians Rotteck, Niebuhr, and Ranke are among the most distinguished of the present century. One of the most popular prose writers is Adalbert Stifter, whose *Studien* are unsurpassed for exquisite purity and picturesqueness of style. In science the first place belongs to Humboldt's *Cosmos*; In chemistry Liebig is widely and popularly known; Du Bois-Reymond has made great researches in animal electricity, physics, and physiology; Virchow in biology; Helmholtz in physiological optics and sound; Haeckel has extended the theories and investigations of Darwin. Modern German literature is singularly rich in history, theology, and criticism.

SCANDINAVIAN LITERATURE.

Under this head we have grouped the literature of the three nations of Scandinavian origin,—Sweden, Norway, and Denmark. The old Scandinavian Eddas, or hymns of gods and heroes, may be traced back to the seventh or eighth century. The earlier Edda, which was collected and arranged by Samund in the year 1100, consists of legends of the gods, most of which were probably written in the eighth century. The latter Edda, collected by Snorre Sturleson in the first half of the thirteenth century, contains fragments of the songs of the Skalds who flourished in the ninth and tenth centuries, especially in the latter, when their genius reached its culmination in Norway and Iceland. Among the most renowned works of the Skalds were the *Eiríksmal*, the apotheosis of King Eric, who died in 952, and the *Hakonarmal*, describing the fall of Jarl Haco. A celebrated Skald was Egill Skalagrímsson, who

wrote three epic poems, and two *drapas*, or elegiac poems. The power of the Skalds declined through the eleventh and twelfth centuries, and after the fourteenth, when the Christian element first began to appear in Icelandic poetry, wholly disappeared. Many sagas were written in prose, and the *Heimskringla* of Snorre Sturleson, who died in Iceland in 1238, contains the chronicles of Scandinavian history from its mythic period to the year 1177.

Previous to the establishment of the University of Upsala, in 1476, the only literature of Sweden was a few rhymed historic legends. The two centuries succeeding this period have left no great names, and few distinguished ones. Saxo-Grammaticus made a collection of legends in the fifteenth century; Olaus Magni wrote a history of the North in Latin; Messenius, who died in 1637, wrote comedies and a historical work entitled *Scandia Illustrata*; Axel Oxenstierna, the celebrated minister, was also a theologian and patron of literature; Olof Rudbeck, a distinguished scholar, published in 1675 his *Atlantica*, wherein, from the study of the old Sagas, he endeavored to show that Sweden was the Atlantis of the ancients. George Stjernhjelm, who died in 1672, was the author of a poem called *Hercules*, whence he is named the father of Swedish poetry. Swedenborg, the most striking character in Northern literature, was born in 1688. After several years of travel in England and on the continent, he established himself in Sweden, where he devoted his attention to science, and produced a number of works on natural philosophy, mineralogy, zoology, and other kindred subjects. The close of his life was entirely occupied with his religious studies, and the production of his *Arcana Cœlestia*, which contains his revelations of the future life, and his theory of the spiritual universe. These writings gave rise to a new religious sect, the members of which, in the United States, are supposed to number about 6,000. He professed to be visited by the Holy Spirit, and his works are considered by his disciples as equally inspired with those of the Apostles. He died in London in 1772. Dalin and Madame Nordenflycht were the first noted poets of the last century. They were succeeded by a multitude of lyric and didactic poets; but Swedish poetry did not attain a high character before the commencement of the present century. Among the authors most worthy of note are Lidner, Bellman, and Thorild. An important history of Sweden has been written by Professors Geijer, Fryxell, and Strinholm. The 19th century produced Atterbom and Dahlgren, poets of considerable celebrity, and Tegner, the first of Swedish poets, whose *Frithiof's Saga* has

been translated into English, French, and German. Longfellow has translated his *Children of the Lord's Supper*. In the glow of his imagination, his fine artistic feeling, and his wonderful command of rhythm, Tegner ranks among the first of modern poets. He died in 1846. As writers of fiction, Count Sparre, author of *Adolf Findling*, Frederika Bremer, whose fame, as a painter of Swedish life, has extended over both hemispheres, and Madame Flygare-Carlen, author of the *Rose of Thistle Island*, have attained an honorable place. The most celebrated works of Miss Bremer are *The Neighbors*, *The Home*, and *Strife and Peace*.

There are few names in Danish literature before the last century. Ludwig von Holberg, born in 1685, was the first who achieved a permanent reputation as poet and historian. Towards the close of the last century Denmark produced many distinguished scholars and men of science. Rafn and Finn Magnussen rescued the old Icelandic sagas from oblivion, and established the fact of the discovery of New England by Bjorne in the tenth century; Petersen became renowned as a classical scholar and critic; Oersted is a well known name in science and philosophy; and Müller and Allen successfully labored in the department of history. Nearly all these authors first became known in the present century. At the head of Denmark's poets is Øhlenschläger, who died in 1850. His national tragedies, epics, and lyrics were written partly in German and partly in Danish. He is considered the originator of the artist-drama, of which his *Coreggio* is a masterpiece. Baggesen, who commenced his career in the last century, is one of the first Danish lyric poets. Heiberg devoted himself to vaudeville and the romantic drama, and Hauch to tragedy, in which he is justly distinguished. Hertz is known through his *King Rene's Daughters*, which has been successfully produced on the English stage. One of the most distinguished of modern Danish authors is Hans Christian Andersen, known alike as poet, novelist, and tourist. His romances of Danish life are the most characteristic of his works, though he is better known out of his native country by his *Improvisatore* and *The True Story of My Life*. Norway cannot be said to have had a literature distinct from the Danish until after its union with Sweden in 1814. The period from that time to the present has been one of great literary activity in all departments, and many distinguished names might be mentioned, among them that of Björnson whose tales have been extensively translated. Jonas Lie, who enjoys a wide popularity, Camilla Collett, and Magdalene Thoresen are also favorite writers. Wergeland

and Welhaven were two distinguished poets of the first half of the century. Kielland is an able novelist of the realistic school, and Professor Boyesen is well known in the United States for his tales and poems in English. Henrik Ibsen is the most distinguished dramatic writer of Norway and belongs to the realistic school. Among other recent writers are Björjesson, whose *Eric XIV.* is a masterpiece of Swedish drama; Tekla Knös, a poetess whose claims have been sanctioned by the Academy; and Claude Gérard (*nom de plume*), very popular as a novelist.

RUSSIAN LITERATURE.

The first fragments of Russian literature belong to the tenth and eleventh centuries. They consist principally of rude songs and legends, the hero of which is Wladimir the Great, who first introduced Christianity into the country. Nestor, a monk in the monastery of Kiev, who died in the year 1116, left behind him a collection of annals, beginning with 852, which threw much light on the early history of Russia. After the empire was freed from the Mongolian rule by Ivan I. in 1478, the progress of literature and the arts were more rapid. The first printing press was established in Moscow in 1564, though the Academy in that city was not founded until a century later. Peter the Great devoted much attention to the Russian language and literature. At his command, the characters used in printing were greatly simplified and improved. The first Russian newspaper was printed in 1705, in this character.

From 1650 to 1750, Russia produced several authors, but principally among the clergy. and their works are dissertations on theology or lives of the saints. Tatitshev wrote a *History of Russia*, which still retains some value. The only poet of this period was Kantemir, son of the Hospodar of Moldavia, who entered the Russian service, devoted himself to study, and obtained much reputation from his satires. Towards the close of the last century, and especially during the reigns of Elizabeth and Catharine II., the establishment of universities and academies of science and art, contributed greatly to the development of the language and the encouragement of literature. The distinction between the old Slavic and modern Russian dialects is strongly exhibited in the works of Lomonosow, and the predominance of the latter was still further determined by Sumarakow, the first Russian dramatist, whose plays were performed on the stage. Cheraskow, who belongs to the last half of the eighteenth century, wrote a long epic poem on the Conquest of Kazan. and an-

other on Wladimir the Great. He was considered the Homer of his time, but is now never read. Among his contemporary poets were Prince Dolgoruki, who wrote philosophic odes and epistles, and Count Chvostow, the author of some of the best lyric and didactic poetry in the language.

The first Russian poet whose name was known beyond the borders of the empire was Derzhavin, who was born at Kazan in 1743, and after filling important civil posts under the Empress Catharine, died in 1816. Many of his most inspired odes were addressed to his imperial patroness. His ode *To God* has been translated into nearly all languages, and a Chinese copy, printed in letters of gold, hangs upon the walls of the palace at Pekin. The prose writers of this period were Platon, Lewanda, and Schtscherbatow, who wrote a History of Russia. Under Alexander I., in the commencement of the present century, Russian literature made rapid advances. Karamzin, who stood at the head of Russian authors during this period, first freed the popular style from the fetters of the classic school, and developed the native resources of the language. Prince Alexander Schakowski wrote many comedies and comic operas, and Zukowski, following in the path of Karamsin, produced some vigorous and glowing poetry. Count Puschkin, one of the most celebrated Russian authors, was born in 1799. His first poem, published at the age of fourteen, attracted so much attention that he resolved to devote himself to literature. An *Ode to Freedom*, however, procured him banishment to the south of Russia, where his best poems were written. His works are *Russian* and *Ljudmilla*, a romantic epic of the heroic age of Russia; the *Mountain Prisoner*, a story of life in the Caucasus; the *Fountains of Baktchissarai*, and *Boris Godunoff*, a dramatic poem. In his invention, the elegance of his diction, and the richness of his fancy, Puschkin excels all other Russian authors. He was killed in a duel in 1837. His contemporary, Baratynski, who stood nearest him in talent, died in 1844. Other poets of this period are Lermontow, Podolinski, and Baron Delwig. Russian romance is not yet fairly developed. The first names in this department are Bestuzew, who suffered banishment in Siberia and met death in the Caucasus, where his best work, *Amaleth-Beg*, was written, Bulgarin, author of *Demetrius and Mazeppa*, Count Tolstoi, and Turgenieff. The only histories written in Russia are histories of Russia. The best of these which have been produced by the present generation of authors are those of Ustrialow, Pogodin, Polewoi, and Michailowski-Danilewski.

POLISH LITERATURE.

The Polish language has received a more thorough development and boasts a richer literature than any other language of Slavic origin. It first reached a finished and regular form in the sixteenth century, though a fragment of a hymn to the Virgin remains, which was supposed to have been written by St. Adalbert, in the fifteenth century. The first bloom of Polish literature happened during the reigns of Sigismund I. and Augustus, from 1507 to 1572. Michael Rey, the father of Polish poetry, was a bold, spirited satirist. He died in 1586, and was followed by the brothers Kochanowski, Miaskowski, and Szymonowicz, who, for his Latin odes, was called the Latin Pindar. Bielski wrote the *Kronika*, a collection of Polish legends, and Gornicki, secretary to Sigismund, a *History of the Crown of Poland*. Orzechowski, one of the most distinguished orators of his day, wrote in the Latin language, the *Annales Poloniae*.

After the commencement of the seventeenth century, Polish letters declined, and as the kingdom came under the ascendancy of the Jesuits, a corresponding change came over the character of the literature. Kochowski, who died in 1700, was historiographer to King John Sobieski, and accompanied him against the Turks. Opalinski, the Woiwode of Posen, published in 1652 his *Satyres*, a lively and characteristic work, and a number of Jesuit historians undertook histories of the country, in which few of them were successful.

Through the influence of French authors, Polish literature made another advance, at the close of the first half of the last century. The first poet who served to concentrate the scattered elements of Polish poetry, was Krasicki, who was born in 1734, and in 1767 was made Bishop of Ermeland. He wrote a mock-heroic poem, *Myszeis* (The Mousead), an epic entitled *Wojna Chocimska* (The War of Chocim), and many fables in verse. The most prominent of the later poets are Godebski, Wezyk, author of romances and dramas, Felinski, author of *Barbara Radziwill*, and Gen. Kropinski, who wrote *Ludgarda*. Tropinski, who died in 1825, was the author of many admirable lyrics and idyls, and a tragedy called *Judyta*. Niemcewicz, his contemporary, wrote the *Historical Lives of Poland*, a History of the reign of Sigismund III., and a romance, *Johann v. Tenczyn*. The university of Wilna, which in 1815 was the seat of Polish learning, witnessed a revolution in the character of the literature. Several young authors, with Mickiewicz at their head, determined to free themselves from the classic spirit of the language, and imitate the later English and

German schools. From this time Polish fiction took a freer, bolder, and more varied form. Mickiewicz, born in 1798, published his first volume of poetry in 1822. Banished to the interior of Russia on account of political troubles, he wrote a series of sonnets which attracted the attention of Prince Galizin, under whose auspices his epic poem, *Konrad Wallenrod*, was published in 1828. His Polish epic of *Pan Tadeusz* first appeared in Paris in 1834. Among his contemporary authors the most noted are Odyniec, author of the drama of *Izora*; Korsac, a lyric and elegiac poet; Garczynski, who wrote many fiery battle-songs; and Czajkowski, a noted writer of Slavic romances. The later prose writers of Poland are the historical Lelwel, and Count Plater, and Henryk Sienkiewicz, author of *With Fire and Sword* and *Quo Vadis*, who is the first of Polish novelists, and second to none in this generation.

ENGLISH LITERATURE.

The English language, like other composite modern tongues, such as the French and Italian, passed through several phases before reaching its present form and character. During the prevalence of the Anglo-Saxon tongue, from the fifth century to the Norman conquest, England boasted several authors, whose names and works have in part descended to us. The venerable Bede, born in Northumberland in 672, is distinguished for his scholarship. He left an Ecclesiastical history of the Angles, which forms the basis of early English history. The monk Cædmon, who flourished in the seventh century, wrote a paraphrase of Genesis and some fragments which are supposed to have given Milton the first idea of *Paradise Lost*. The song of Beowulf, which belongs to the eighth century, is a spirited and stirring heroic. King Alfred's poems belong to the best specimens of Anglo-Saxon literature. The Norman conquest introduced the French language and the literature of the Trouvères, while the Anglo-Saxon was left to the peasants and thralls. Out of these elements, however, the English language was gradually formed, and under the reign of Edward III., in the fourteenth century, was made the language of the court. It then assumed a character which is intelligible to the educated English of the present day, and that period, therefore, may be considered as the first age of English literature.

The earliest English author is Chaucer, "the morning-star of English song," who was born in 1330, and produced many important poems before 1385. During his life he enjoyed the favor of Edward III., and his

son, John of Gaunt. He filled various diplomatic stations, among others that of ambassador to Genoa. During his residence in Italy, he became familiar with the works of Dante, Boccaccio, and Petrarch, and is supposed to have visited the latter. He also wrote *Troilus and Cressida*, *The House of Fame* and *The Canterbury Tales*, his most famous work, an imitation, in poetry, of the Decameron. He died in 1400. The first prose works in the English language were translations of the gospels and of some of the classics. Wickliffe, the Reformer, who first made an English version of the Bible, was a contemporary of Chaucer. Sir Thomas Wyatt, and Henry Howard, Earl of Surrey, who flourished under the reign of Henry VIII., in the beginning of the sixteenth century, are the next English poets of note. They wrote principally songs and odes. Surrey was beheaded on charge of treason in 1547.

The reign of Elizabeth, at the close of the sixteenth century, was the golden age of English literature. Shakespeare, Spenser, Raleigh, Sidney, Ben Jonson, Beaumont, and Fletcher formed a constellation of poets and dramatists, such as no other age or country ever produced. Spenser, born in 1552, became early associated with Sir Philip Sidney, to whom, in 1579, he dedicated his first work, the *Shepherd's Calendar*, a pastoral. From 1586 to 1598, he was sheriff of the county of Cork, in Ireland, and resided at Kilcolman Castle, where his greatest work, *The Faery Queen*, was composed. This is an allegory in twelve books, written in stanza of his own invention (modeled, however, on the Italian *ottava rima*), and which now bears his name. He died in 1599. Sidney, who was born in 1554, is best known as the author of *Arcadia*, a pastoral romance, and the *Defence of Poetry*. He is the first writer who gave an elegant and correct form to English prose. Shakespeare, the greatest dramatic poet of any age, was born in 1564. He commenced his career by preparing for the stage the plays of some of his predecessors, and this fact has thrown some doubt about the authenticity of two or three of the plays included among his works. The order in which his own plays appeared has never been satisfactorily ascertained. The following, however, are known to have been written before 1598: *The Two Gentlemen of Verona*; *Love's Labor Lost*; *The Comedy of Errors*; *Midsummer Night's Dream*; *Romeo and Juliet*; *Merchant of Venice*; *Richard II.*; *Richard III.*; *Henry IV.*; and *King John*. (171)

Either *Winter's Tale* (1611) or *Henry VIII.* was probably his last dramatic work. He also wrote the poems of *Venus and Adonis* and

The Rape of Lucrece, a lyric called *The Passionate Pilgrim*, and a great number of sonnets, some of which are the finest in the language. He died in 1616. Ben Jonson was born in 1574, and published his first dramatic work, the comedy of *Every Man in His Humor*, in 1596. In addition to other comedies, the best of which are *Volpone*, *the Fox*, and *The Alchemist*, he wrote many exquisite songs and madrigals. Sir Walter Raleigh is more distinguished as a gallant knight and daring adventurer than as an author, yet his lyrics and his *History of the World*, written during twelve years' imprisonment in the Tower, give him full claim to the latter title. He was born in 1552, and was beheaded by order of James I. in 1617. Beaumont and Fletcher, contemporaries and in some degree imitators of Shakespeare, deserve the next place after him among the dramatists of that period. Beaumont is supposed to have been the inventive genius of their plays, and Fletcher to have supplied the wit and fancy. The *Faithful Shepherdess* is the work of Fletcher alone. Many dramatists flourished during this and the succeeding generation, whose works are now but little read, but who would have attained eminence but for the greater lights with which they are eclipsed. The most noted of them are Marlowe, Marston, Chapman, Decker, Webster, Ford, and Massinger.

Between Shakespeare and Milton, the only name which appears in English literature is Cowley, the author of the *Davideis*, a forgotten epic. Milton was born in 1608, and in his early boyhood exhibited the genius which afterwards made him the first English poet and one of the great masters of English prose. His hymn on the *Nativity* was written in his twenty-first, and his mask of *Comus* in his twenty-third year. *L'Allegro*, *Il Penseroso*, and *Lycidas* soon afterward appeared. After his return from Italy, he devoted his attention to theology and politics. His treatise on *Marriage* was published in 1643, his *Areopagitica* in 1644, and his famous reply to Salmasius in 1651. In the following year he lost his sight, and was obliged to retire from public service. His *Paradise Lost* appeared in 1665, and was followed by *Paradise Regained* in 1671, and *Samson Agonistes*. He died in 1674. Dryden, who, born in 1631, was known as a poet during Milton's life, introduced a new school of poetry—the narrative and didactic. His first noted poem, the *Annus Mirabilis*, was produced in 1666, his satire of *Absalom and Achitophel* in 1681, and shortly afterwards his *Hind and Panther*, a religious satire. He also wrote sev-

eral rhymed tragedies and an essay on *Dramatic Poesy*. Defoe, born in 1661, wrote the world-renowned narrative of *Robinson Crusoe*, which was first published in 1719. The seventeenth century was also an important epoch for English philosophical literature. Lord Bacon, born in 1561, published his *De dignitate et augmentis Scientiarum* in 1605, and his celebrated *Novum Organum* in 1620. These, although written in Latin, are the most important philosophical works which have ever emanated from an English author. Hobbes, a writer on politics, jurisprudence, and moral philosophy, died in 1679. Locke, born in 1632, first published his *Essay on the Human Understanding* in 1690.

The commencement of the last century brings us to a group of authors of very different character. The influence of French literature began to be felt, and the characteristics of the English writers of this period are elegance and grace. This is properly the age of English prose, which was enriched successively by Addison, Horace Walpole, Swift, Sterne, Richardson, Smollett, Fielding, Hume, Gibbon, Chesterfield, and Robertson. The first poet who rose to eminence in the last century was Pope, who was born in 1688, and published his *Essay on Criticism* in 1711. His most celebrated poetical works are the *Rape of the Lock*, the *Essay on Man* and *The Dunciad*. Thomson, author of *The Seasons* and the *Castle of Indolence*, lived and died in the first half of the century. Gay, a contemporary poet, is distinguished for his Fables. Gray ranks as one of the finest lyric poets of England. The few odes he has left, and his *Elegy in a Country Churchyard*, belong to the classics of the language. Goldsmith was born in 1728 and died in 1774. His poems of *The Traveller* and *The Deserted Village*, and his romance of the *Vicar of Wakefield*, will live as long as his native tongue. Cowper closes the list of the poets of the last century. He died in 1800, after a life darkened by religious melancholy. His *Task*, *Table-Talk*, and ballad of *John Gilpin*, are his best poetical works. Returning to the prose writers, Addison is first in point of time, having been born in 1672. His best works are his essays, contributed to *The Spectator*, which he established in 1711, in conjunction with his friend Steele. His English has rarely been excelled for purity and elegance. Chesterfield, Lady Montague, and Horace Walpole are distinguished as epistolary writers. Dean Swift, born in 1667, was a politician and satirist, but is now best known by his *Tale of a Tub*, published in 1704, and *Gulliver's Travels*, in 1726. Sterne in his *Tristram Shandy* and *The Sentimental Journey*,

displayed a droll mingling of wit and pathos, in a style exceedingly lively and flexible. Richardson, one of the first English romance writers, was born in 1689. His principal novels, which are of immense length, are *Pamela*, *Clarissa Harlowe*, and *Sir Charles Grandison*. Smollett, his successor, published his *Roderick Random* in 1748, and *Humphrey Clinker*, his last work, in 1771. Hume, in addition to political and philosophical works, wrote the *History of England*, from the invasion of Cæsar to the rebellion of 1688, which was published in 1673-4. Smollett wrote four volumes in continuation of the history. Gibbon, born in 1737, completed, after twenty years' labor, his *History of the Decline and Fall of the Roman Empire*, which appeared from 1782 to 1788. Robertson, the contemporary of Gibbon, published his *History of Scotland* in 1759, and his *History of the Reign of Charles V.* in 1769. Dr. Johnson, whose *Rasselas*, *Lives of the Poets*, and contributions to *The Rambler* exercised such a salutary influence on the popular taste of his time, died in 1784. His *Dictionary of the English Language* was first published in 1755. Edmund Burke, one of the most finished and powerful of English orators, published, in 1756, his *Essay on the Sublime and Beautiful*, which is a model of philosophical writing. He died in 1797.

With the present century commenced a new era in English literature. The reign of the drama and the epic was over; the reign of romance, in both prose and poetry, and the expression of a higher and more subtle range of imagination now commenced. The language lost something, perhaps, of its classic polish and massive strength, but became more free and flowing, more varied in style, and richer in epithet. The authors in whom this change is first apparent are Coleridge and Wordsworth in poetry, and Scott in prose. Nearly coeval with the two former, but different in character, were Byron and Moore; the latter are the poets of passion, the former of imagination. Scott, in his *Waverley* novels, first developed the neglected wealth of English romance. Burns, although his best songs are in the Scottish dialect, stands at the head of all English song writers. Campbell, in the true lyric inspiration of his poems, is classed with Gray. Rogers and Southey can hardly be ranked among those poets who assisted in developing the later English literature. The former imitates the old models; the latter, more daring in his forms of verse and more splendid in his imagination, has never been able to touch the popular heart. Coleridge's prose works contain probably the most important contributions to English philosophical

literature since the time of Bacon. The department of history has been amply filled by Scott, Alison, author of a *History of Europe*, Gillies and Grote, celebrated for their *Histories of Greece*, Napier in his *History of the Peninsular War*, Hallam in his *History of the Middle Ages*, and Macaulay in his *History of England*. Leigh Hunt wrote *The Rimini*. The field of historical romance opened by Sir Walter Scott has been successfully followed by Sir Edward Bulwer-Lytton and G. P. R. James.

As novelists of English life and society, under all its aspects, Dickens and Thackeray — and Miss Brontë, author of *Shirley* and *Jane Eyre* — stand preëminent. As essayists and critics, the names of Lords Jeffrey and Brougham, Sidney Smith, Macaulay, Professor Wilson, De Quincey, Carlyle, and Stevens surpass even the group who produced *The Tatler* and *The Spectator*. Carlyle, in his *Sartor Resartus*, *Past and Present*, and *Heroes and Hero Worship*, has made use of an idiom of his own — a broken, involved, Germanesque diction, which resembles that of no other English author. Some of the most prominent English poets of this period are Lord Byron, Shelley, Thomas Moore, Leigh Hunt, Rogers, Alfred Tennyson, Milnes, Barry Cornwall, Robert Browning, Elizabeth Barrett Browning, probably the most impassioned and imaginative of English female authors, Walter Savage Landor, Mary Howitt, R. H. Horne, author of *Orion*, Croly, Philip James Bailey, author of *Festus*, and T. N. Talfourd, author of the tragedy of *Ion*. Among later writers of poetry, Matthew Arnold has written some of the most refined verse of our generation, and among critics holds the first rank. Algernon Swinburne excels all living poets in his marvelous gift of rhythm and command over the resources of the language. Dante Rossetti had great lyrical power; Edwin Arnold has extraordinary popularity in the United States for his remarkable poem, *The Light of Asia*, and for other poems on Oriental subjects. Among other poets of the present generation whose writings are marked by excellences of various kinds are Lord Lytton ("Owen Meredith"), William Morris, Edmund Gosse, Austin Dobson, Andrew Lang, and Philip Marston. Among female writers, the poems of Jean Ingelow have a merited popularity; those of Adelaide Procter are pervaded by a beautiful spirit of faith and hope; while Christina Rossetti shows great originality and deep feeling. Chief in the field of fiction are the writings of "George Eliot," a woman of rare genius, whose works are among the greatest England has produced. Anthony Trollope has produced

many works remarkable for their accurate pictures of English life and character. George Macdonald and Wilkie Collins are novelists of great merit, as are Mrs. Humphry Ward, Rudyard Kipling, and Richard Blackmore. Among others in popular favor are William Black, Mrs. Oliphant, Conan Doyle, and J. M. Barrie. Charles Darwin and Herbert Spencer have been the most distinguished authors identified with the scientific and philosophical aspects of evolution, and have had a wide influence on contemporary thought. Tyndall has done more than any other writer to popularize great scientific truths. Huxley stands foremost among physiologists and naturalists. Among numerous other writers distinguished in various branches of science, a few only can be here named. Walter Bagehot writes of Political Society; Alexander Bain on Mind and Body; Henry Maudsley on Brain and Mind; Norman Lockyer on Spectrum Analysis; and Sir John Lubbock on Natural History. The most distinguished historian of the times is James Anthony Froude, who shows great vigor of thought and power of description. The histories of John Richard Green and E. A. Freeman are valuable for their original research, and have wide celebrity. Max Müller has rendered important service to the sciences of Philology and Ethnology. Lecky is eminent for his *Rationalism in Europe* and *History of Morals*. Leslie Stephen, John Morley, and John Addington Symonds are distinguished in various departments of criticism and history. Thomas Hill Green and James Martineau are masters of Ethical Philosophy. John Stuart Mill holds a high place as a writer on Political Economy. All English works of any merit are now immediately reprinted in this country, and the English literature of the present century is as familiar to most Americans as their own.

AMERICAN LITERATURE.

The literature of the United States belongs almost exclusively to the last century. The language being that of England, and all the treasures of English literature the common inheritance of our countrymen, whatever American authors produce is necessarily measured by the English standard. The language comes to us finished and matured, while the means of intellectual cultivation—until a comparatively recent period—have been limited, and our abundant stores of legend and history are still too fresh to be available for the purpose of poetry and fiction. The present generation, however, has witnessed the growth of a national literature, which, if not peculiarly American in language, is at least so in style and the materials chosen.

The seventeenth century boasted two or three authors, but none we believe native to the soil. Mrs. Anne Bradstreet, wife of a governor of Massachusetts, published in 1640, a poem on the *Four Elements*, smoothly versified, but of little poetical merit. Cotton Mather, born in 1663, is almost the only prose writer worthy of note. His *Magnalia* contains some valuable historical matter. The last century produced some distinguished prose writers and some accomplished versifiers, though no poet in the true sense of the title. Franklin, born in 1706, was master of a singularly clear, compact, and vigorous style. Jonathan Edwards, who flourished during the last century, wrote a celebrated treatise on the *Will*, which is one of the first metaphysical works in the language. The Revolutionary struggle and the circumstances which preceded and succeeded it, produced a number of bold and brilliant writers and speakers, among whom were Jefferson, Hamilton, the Adamses, Richard Henry Lee, and Patrick Henry. The diplomatic correspondence of the Revolution has rarely been surpassed. Philip Freneau, who has been called the first American poet, wrote many patriotic songs, which were sung during the struggle, but none have retained their original vitality. Trumbull was the author of a Hudibrastic poem entitled *McFingal*, in which the Tories were held up to ridicule; the first part was published in 1775. Joel Barlow, who aspired to the rank of an epic poet, published, in 1787, his *Vision of Columbus*, which, in 1808, was expanded into the *Columbiad*, and printed in what was then a style of unusual magnificence.

Dana, Bryant, Washington Irving, Cooper, Paulding, and Everett, were all born towards the close of the last century. Dana may be considered as the first genuine poet the United States has produced. His *Buccaneer* is a picturesque and striking poem, founded on the legend of the pirates who formerly frequented the American coast. Irving's *Knickerbocker's History of New York* appeared in 1809, and instantly gave him a position as a writer of the purest style and of exquisite humor and fancy. A *Biography of Goldsmith*, to whom he has been compared, was published in 1849. Many of his works—among them *The Sketch Book*, *Bracebridge Hall*, *The Alhambra*, and the *Life of Columbus*—were first published in England, where he lived many years. Cooper's first essay in literature was a novel of society entitled *Precaution*, but he subsequently confined himself to the two fields in which he has earned his best fame—the forest and the ocean. His most successful novels are *The Spy*, *The Pioneers*, *The Deerslayer*, *The Pilot*,

and *The Pathfinder*. Bryant first attracted notice by his poem of *Thanatopsis*, written in his nineteenth year. His first volume, *The Ages*, was published in 1825. William Ellery Channing's essays, criticisms, and moral, religious, and political writings won him much celebrity as a prose writer. William Wirt, author of *The British Spy*, a collection of letters written in a chaste and elegant style; Charles Brockden Brown, the earliest American novelist, author of *Wieland*; Richard Henry Wilde, author of a *Life of Tasso*; Chief Justice Marshall, who compiled a voluminous *Life of Washington*; Henry Wheaton, author of standard works on law and political economy; Judge Story, author of several celebrated legal works; Edgar Allan Poe, a most original and strongly marked character, who wrote the poem of *The Raven* and a number of weird and fantastic prose stories; Margaret Fuller, a woman of remarkable acquirements, who has left behind her much admirable descriptive and critical writing, are all entitled to distinguished mention.

The stories and poems of N. P. Willis, as well, are of great brilliancy but otherwise of little merit and have no permanent value as literature. Hawthorne, author of *The Scarlet Letter*, *The House of Seven Gables*, and *The Marble Faun*, is remarkable for the delicacy of his psychological insight, his power of intense characterization, and for his mastery of the spiritual and the supernatural. His style is the pure colorless medium of his thought; the plain current of his language is always equable, full, and unvarying, whether in the company of playful children, among the ancestral associations of family or history, or in grappling with the mysteries and terrors of the supernatural world. Harriet Beecher Stowe, author of *Uncle Tom's Cabin*, and a crowd of other writers of various and high degrees of merit and reputation, followed in almost unbroken succession down to the present. Among these, as writers of fiction, may be mentioned William Ware, author of *Probus* and *Palmyra*; William Gilmore Simms, Oliver Wendell Holmes, author of the *Autocrat of the Breakfast Table*; George William Curtis, Donald G. Mitchell, William Dean Howells, Henry James, Helen Hunt Jackson, Frances Hodgson Burnett, Elizabeth Stuart Phelps, Louisa M. Alcott, F. Marion Crawford, George W. Cable, F. J. Stimson, Edward Everett Hale, Bret Harte, and Lew Wallace. Prominently devoted to poetry and criticism, Richard H. Dana, Emerson, Longfellow, Lowell, Whittier, Bayard Taylor, Walt Whitman, R. H. Stoddard, T. B. Aldrich, R. W. Gilder, Edgar Fawcett, Joaquin Miller, James Whitcomb

Riley, John Hay, and Edmund Clarence Stedman have been preëminent.

To the historical school belong the names of Prescott, Motley, Parkman, Bancroft, Hildreth, Winsor, Fiske, and McMaster. The works of Prescott are among the finest models of historical composition, and they breathe freely the spirit of our liberal institutions. His *History of Ferdinand and Isabella*, of the *Conquest of Mexico*, and the *Conquest of Peru*, unite all the fascination of romantic fiction with the grave interests of authentic events. Motley's *History of the Rise of the Dutch Republic* is a work distinguished for its historical accuracy, philosophical breadth of treatment, and clearness and vigor of style. Bancroft has written the most accurate and philosophical account that has been given of the United States, which has been worthily supplemented by the volumes of McMaster. In Hildreth's *History of the United States*, rhetorical grace and effect give way to a plain narrative confined to facts gleaned with great care and conscientiousness. The writing of Winsor and Fiske has been confined to certain important epochs.

Of the statesmen of the present century who have contributed to our literature of oratory, the most eminent are Webster, Clay, and Calhoun. The speeches and forensic arguments of Webster are remarkable for clearness and impressiveness, and rise occasionally to grandeur. The speeches of Clay are distinguished by a sincerity and warmth which were characteristic of the man, who united the gentlest affections with the pride of the haughtiest manhood. His eloquence reached the heart of the whole nation. The style of John C. Calhoun was terse and condensed, and his eloquence, though sometimes impassioned, was always severe. He had great skill as a dialectician and remarkable power of analysis, and his works will have a permanent place in American literature. The writings and speeches of John Quincy Adams are distinguished by universality of knowledge and independence of judgment, and they are repositories of rich materials for the historian and political philosopher. Edward Everett, as an orator, had few equals, and his occasional addresses and orations have become permanent memorials of many important occasions of public interest. Of the numerous other orators, eminent as rhetoricians or debaters, a few only can be named; among them are Legaré, Randolph, Choate, Sumner, Phillips, Preston, Prentiss, Lincoln, and Robert G. Ingersoll.

Philosophy assumed its first distinctive character under the influence of the Transcendental School of New England. The first to plant

the seeds of this philosophy was George Ripley, a philanthropist of high ideals. Theodore Parker owed his great power as a preacher to his faith in the Transcendental philosophy. The Absolute God, the Moral Law, and the Immortal Life he held to be the three cardinal attestations of the universal consciousness. The first place, however, belongs to Ralph Waldo Emerson, who lighted up its doctrines with the rays of ethical and poetical imagination. With many inconsistencies to be allowed for, he still remains the highest mind that the world of letters has produced in America. His essays are marvels of keen insight and profound wisdom. Other writers identified with the Transcendental movement are O. B. Frothingham, O. A. Brownson, James Freeman Clarke, Henry D. Thoreau, A. Bronson Alcott, C. P. Cranch, and Thomas Wentworth Higginson, the latter one of the most delightful prose writers of this generation. The most distinguished philosophical writer of the present day is Josiah Royce, a professor in Harvard University, with whom must be mentioned John Fiske, William James, Andrew D. White, Joseph Le Conte, and George T. Ladd.

The physical sciences, from an early period, have found able investigators in the United States, and the fields of theology, economy, and jurisprudence have furnished many honorable names. Among scientists those most prominent in chemistry and physics are Benjamin Franklin, Morse, Hare, Silliman, Henry, Edison, Remsen, and Rowland; in geology, Dana, Hitchcock, Hall, Hodge, Owen, Whitney, Le Conte; in botany, Torrey, Gray, Bessey, Coulter, and Campbell; in natural history, Holbrook, Audubon, Agassiz, Henry, and Jordan; in political economy, Henry C. Carey, Francis A. Walker, and Henry George; in psychology, William James and G. Stanley Hall.

French Academy. The, was created by Louis XIV. in 1636. Its original pursuits were eloquence and poetry. In 1648 it was extended to the fine arts; and in 1666, by Colbert, to the arts and sciences.

Runic Writing. The Scandinavians anciently employed an alphabet of letters formed principally of straight lines, which has been called Runic, from an Icelandic word, *runa*, meaning a furrow or line.

Volapük.—This so-called universal language was invented in 1879, by Johann Martin Schleyer, a Swabian pastor and latterly a teacher in Constance. Of the vocabulary, about one third is of English origin, while the Latin and Romance languages furnish a fourth. The grammar is simplified to the utmost. The most practical disciples limit their aims

to making Volapük a convenience for commercial correspondence, a kind of extended international code.

Sanskrit is one of the Indo-European group of languages, intimately connected with the Persian, Greek, Latin, Teutonic, Slavonian, and Celtic languages. It is the classical language of the Hindus, and the parent of all the modern Aryan languages of India. It ceased to be a spoken language about the second century B. C. Sanskrit literature, which extends back to at least 1500 B. C., and is very voluminous, was introduced to the western world by Sir William Jones, who founded the Asiatic Society in Calcutta in 1784.

Languages of the World.—It has been estimated that there are over 8000 languages in the world. English is spoken by above 130,000,000 of the human race; German by 100,000,000; Russian by 70,000,000; French by 45,000,000; Spanish by 40,000,000; Italian by 30,000,000, and Portuguese by 13,000,000.

English is spoken by 4,000,000 Canadians; over 3,500,000 West Indians; 3,000,000 Australians; 1,000,000 East Indians; 88,000,000 in the British Isles, and 65,000,000 in America.

German is spoken by 2,000,000 in the United States and Canada; 2,000,000 in Switzerland; 40,000 Belgians; 46,000,000 in the German Empire, and 10,000,000 in the Austro-Hungarian Empire.

French is spoken by 2,250,000 Belgians; 1,000,000 in the United States and Canada; 1,000,000 in Algiers, India, and Africa; 600,000 Swiss; 600,000 in Hayti; 200,000 in Alsace-Lorraine, and 38,000,000 in France.

Troubadours were minstrels of southern France in the eleventh, twelfth, and thirteenth centuries. They were the first to discard Latin and use the native tongue in their compositions. Their poetry was either about love and gallantry, or war and chivalry. In northern France they were called Trouvères and the language employed was the Walloon.

Grub Street, London, is thus described in Dr. Johnson's Dictionary: "Originally the name of a street near Moorfields, in London, much inhabited by writers of small histories, dictionaries, and temporary poems, whence any production is called Grub Street." Andrew Marvell used the name in its appropriate sense, which later was freely used by Pope, Swift, and others.

Madrigal is a short lyric poem, generally on the subject of love, and characterized by some epigrammatic terseness or quaintness. It was written as a rule in iambic meter, and contained not less than six or more than thir-

teen lines, and ran chiefly upon three rhymes. The name is also applied to the music for a simple song sung in a rich, artistic style but without musical accompaniment.

Minnesingers, The, were love poets, contemporary in Germany with the House of Hohenstauffen. Though called love singers, some of their poems were national ballads, and some were extended romances. Walter of Vogelweide was by far the best of the lyrists; Heinrich of Veldig was the most naïve and ingenuous; Hartman the most classical; Wolfram the most sublime, and Gottfried the most licentious.

Iliad, The, is the tale of the siege of Troy, an epic poem in 24 books by Homer. Menelaus, King of Sparta, received as a guest, Paris, a son of Priam, King of Troy. Paris eloped with Helen, his host's wife, and Menelaus induced the Greeks to lay siege to Troy to avenge the perfidy. The siege lasted ten years, when Troy was taken and burned to the ground. Homer's poem is confined to the last year of the siege.

Lorelei, famed in song and story, is a rock which rises perpendicularly from the Rhine to the height of 427 feet, near St. Goar. It was formerly dangerous to boatmen, and has a celebrated echo. The name is best known from Heine's "Song of the Siren," who sits on the rock, combing her long tresses, and singing so ravishingly, that the boatmen, enchanted by the music of her voice, forget their duty, and are drawn upon the rock and perish.

Beauty and the Beast.—This venerable story, from *Les Contes Marins*, of Mme. Villeneuve (1740), is, perhaps, the most beautiful of all nursery tales. A young and lovely woman saved her father by putting herself in the power of a frightful but kind-hearted monster, whose respectful affection and melancholy overcame her aversion to his ugliness, and she consented to become his bride. Being thus freed from enchantment the monster assumed his proper form and became a young and handsome prince.

Æneid, The, Virgil's epic poem, is contained in twelve books. When Troy was taken by the Greeks and set on fire, Æneas, with his father, son, and wife, took flight, with the intention of going to Italy, the original birth-place of the family. The wife was lost, and the old man died on the way; but, after numerous perils by sea and land, Æneas and his son Ascanius reached Italy. Here Latinus, the reigning king, received the exiles hospitably, and promised his daughter Lavinia in marriage to Æneas; but she had been already betrothed by her mother to Prince Turnus, son of Valmus, king of Rutuli, and Turnus would

not forego his claim. Latinus, in this dilemma, said the rivals must settle the dispute by an appeal to arms. Turnus being slain, Æneas married Lavinia, and ere long succeeded his father-in-law in the throne.

Gesta Romanorum, the deeds of the Romans, is the title of a collection of short stories and legends in the Latin tongue, widely spread during the Middle Ages, but of the authorship of which little is known save that it took its present form most likely in England, about the end of the thirteenth or the beginning of the fourteenth century. The stories are invariably moralized, and, indeed, this edifying purpose throughout is the sole unifying element of the collection. The title is only so far descriptive as the nucleus of the collection consists of stories from Roman history, or rather pieces from Roman writers, not necessarily of any greater historical value than that of Androcles and the Lion from Allus Gallius. Moralized, mystical, and religious tales, as well as other pieces, many of ultimate oriental origin, were afterwards added, and upon them edifying conclusions hung, bringing the whole up to about 180 chapters.

Bluebeard is the hero of the well-known nursery tale, and is so named from the color of his beard. The story is widely known in Western Europe, but the form in which it has become familiar is a free translation of that given by Perrault in 1697. In this story Bluebeard is a Seigneur of great wealth, who marries the daughter of a neighbor in the country and a month after the wedding goes from home on a journey leaving his wife the keys of his castle, but forbidding her to enter one room. She cannot resist her curiosity, opens the door, to find the bodies of all Bluebeard's former wives, and at once sees the fate to which she herself is doomed. Bluebeard, on his return, discovers from a spot of blood upon the key which could not be cleaned off, that his wife has broken his command and tells her that she must die. She begs for a short respite to commend herself to God, sends her sister Anne to the top of the tower to seek for help, and finally is just on the point of having her head cut off, when her two brothers burst in and dispatch Bluebeard. There are many versions of the story, all agreeing in essential details. It is found in the German, French, Greek, Tuscan, Icelandic, Esthonian, Gaelic, and Basque folklore.

Sagas, The, belong to the Norse literature and are generally books in the form of a tale, like a Welch "mahinogi." "Edda" was the name of the Bible of the ancient Scandinavians. In the Edda there are numerous Sagas. As our Bible contains the history of the Jews,

religious songs, moral proverbs, and religious stories, so the Edda contains the history of Norway, religious songs, a book of proverbs, and numerous stories. The original Edda was compiled and edited by Saemund Sigfusson, an Icelandic priest, in the eleventh century. It contains twenty-eight parts or books, all of which are in verse.

Two hundred years later, Snorrio Sturleson, of Iceland, abridged, re-arranged, and reduced the prose of the Edda, giving the various parts a kind of dramatic form like the Dialogues of Plato. It then became needful to distinguish between the two works; so the old poetical compilation is called the Elder or Rhythmical Edda, while the more modern work is called the Younger or Prose Edda, and sometimes the Snorrio Edda. The Younger Edda is, however, partly original, containing the discourse of Bragi on the Origin of Poetry; here, too, we find the famous story called by the Germans "Nibelungen-Lied." Beside the Sagas contained in the Eddas there are a number of productions of various forms.

Miracle Plays, The, were founded on the historical parts of the Old and New Testaments and on the lives of the saints. They were performed at first in churches, and afterwards on platforms in the streets. Their design was to instruct the people in Bible history; but long before the Reformation, they had so far departed from their original character as to bring contempt upon the church and religion. The exhibition of a single play often occupied several days. The earliest recorded Miracle Play took place in England in the beginning of the twelfth century; but they soon became popular in France, Germany, Spain, and Italy.

In Germany these plays, with one exception, were suppressed in the year 1779. The villages of Oberammergau in the Bavarian Highlands, had, upon the cessation of a plague, in 1683, vowed to perform the "Passion of Our Saviour" every tenth year out of gratitude, and also as a means of instruction to the people. The pleading of a deputation of Oberammergau peasants with Maximilian II. of Bavaria, saved their play from general condemnation. The play was remodeled and is perhaps the only Miracle Play that survives to the present day. The performance lasts for eight hours with an intermission of one hour at noon; and though occurring only once in a decade is repeated on several Sundays in succession during the season. The characters in the play number about 600. The personator of the Saviour seems to regard the performance of his part as an act of religious

worship; and the other important actors are said to be selected for their holy life and to be consecrated to their work with prayer. Travelers from all parts of the world flock to Oberammergau during the time announced for its representation.

Cid Campeador, historically Roderigo Diaz, the noted Spanish warrior, is so intermingled with fable that it is almost impossible to get at the truth. His career is celebrated in the Spanish Epic, "Poem of the Cid." From this poem and other Spanish works Southey translated and compiled his "Chronicle of the Cid."

The Cid is supposed to have been born about the year 1026, and to have died at Valentia, 1099. He was such a terror to the Moors, and seemed so superior to all others, that he was called El Seid (Arabic for the Lord); and finally Cid Campeador (Lord Champion).

Rebecca, of Ivanhoe. Sir Walter Scott's model for this character was a young woman, Rebecca Gratz by name, of an honorable Jewish family of Philadelphia. She was born on the 4th of March, 1781, and in her younger days, and even beyond middle life, possessed singular beauty. She was noted for her benevolent and charitable life and for her devotion to the Jewish faith. One of the most intimate friends of her family was Washington Irving, who in the fall of 1817 first introduced the character to the notice of Scott during his visit to Abbotsford. During one of their many conversations, Irving spoke of his friend Rebecca Gratz of Philadelphia, described her wonderful beauty, and related the story of her firm adherence to her religious faith. Scott was deeply interested and conceived the plan of embodying a character like hers in one of his novels. Shortly after this he wrote *Ivanhoe*, and named his heroine Rebecca.

Romance of the Rose, the *Iliad* of France, is a poetical allegory begun by Guillaume de Loris in the latter part of the thirteenth century and continued by Jean de Munge in the fourteenth century. The poet dreams that Dame Idleness conducts him to the palace of pleasure, where he meets Love, whose attendant maidens are Sweet Looks, Courtesy, Youth, Joy, and Competence; by them he is conducted to a bed of roses. He has just singled out one rose when an arrow from Love's bow stretches him fainting on the ground and he is carried away. When he is revived he resolves to find his rose, and Welcome promises to aid him. Shyness, Fear, and Slander obstruct his way; Reason advises him to give up the quest; Pity and Kindness show

him the object of his search; but Jealousy seizes Welcome and locks her in Fear Castle. Here the original poem ends. The sequel takes up the tale at this point, and is an extraordinary mixture of erudition and satire. The poem reached the height of its popularity in the sixteenth century.

A Curious Book.—A book belonging to the family of Prince De Ligne of France is said to be the most curious book in the world, because it is neither written nor printed. The letters of the text are cut out of each folio upon the finest vellum; and, being interleaved with blue paper, it is as easy to read as print. The labor bestowed upon it was excessive. Rudolph II. of Germany offered for it, in 1640, \$80,000.

Talmud, The.—The name given to the compilation of laws and ceremonial regulations pertaining to Rabbinical Judaism together with the elaborate discussion of those laws and regulations; a work whose authority was long esteemed second only to that of the Bible. The Talmud consists of two divisions which are kept distinct: (1) the laws and regulations designated as Mishna or "laws," and (2) the discussion of the laws termed Gemara or "doctrine." The language of the Mishna is Hebrew; that of the Gemara is Aramaic, which, both in Palestine and Babylonia, drove out the Hebrew as the popular speech.

Goethe, the acknowledged prince of German literature, was born at Frankfort-on-the-Main, August 28, 1749, and died in Weimar on March 22, 1832. His greatest work is *Faust*, but it can never become popular, because its wisdom does not lie on the surface. When he had finished it, he said the work of his life was done. *Hermann and Dorothea* is as immortal as the *Vicar of Wakefield*. *The Sorrows of Werther* brought him equal fame. It is said that the Werther fever ran so high that in some countries booksellers were forbidden by law to sell it. Young women cried over it, and young men shot themselves with a copy of Werther in their hand.

Classic and Romantic Literature.—The term classic has, ever since the second century, been applied to writers of the highest rank. Latterly it has come to designate the best writers of ancient Greece and Rome. Romantic literature was the term first used in Germany, about the beginning of the present century, by a number of young poets and critics who wished to indicate that they sought the essence of art and poetry in the wonderful and fantastic.

Telemachus was written by François Fenelon, Archbishop of Cambrey. It is a French prose epic, in 24 books, and contains the

adventures of Telemachus, the only son of Ulysses and Penelope, while in search of his father, who had been absent thirty years from his home. Telemachus is accompanied by the god of wisdom under the form of Mentor. There is perhaps no book in the French language which has been more read, and it is a class book in almost every European school.

Dante is called the father of Italian literature. Before his time the poets of northern Italy wrote in the Provençal language, which was the dialect spoken chiefly in southern France. But Dante wrote in Italian, and from his time the Italian became a real language.

His great work is the "Divine Comedy," an epic poem consisting of three parts, viz.: hell, purgatory, and paradise. This poem is an allegory conceived in the form of a vision, which was the most popular style of poetry in that age. As a poem, it is of the highest order, and ranks Dante with Homer and Milton.

Songs of the Gondoliers.—For more than two hundred years the gondoliers of Venice sang no other songs than strophes from Tasso's immortal epic, "Jerusalem Delivered." This poem commemorates the delivery of Jerusalem from the Saracens; and the hero of the poem is Godfrey de Bouillon, the first Christian king of Jerusalem. Tasso was born at Sorrento in 1544. He became melancholy, and was for seven years confined by the Duke Alfonso in an insane asylum. When released he went to Naples. Pope Clement VIII. invited him to Rome to receive the laurel crown of poet; but he died before the ceremony took place, April, 1595, and was buried on the day on which he was to have been crowned.

Writing, History of.—The very first origin of the art of writing has been a matter of speculation from the earliest times. The myths of antiquity ascribe it to Thoth, or to Cadmus, which only denotes their belief in its being brought from the East, or being, perhaps, primeval. The Talmud ascribes it to a special revelation. Unquestionably the first step toward writing was rude pictorial representations of objects, the next the application of a symbolic meaning to some of these pictures, and gradually all pictures became symbolic, and for convenience were abbreviated. Later they became conventional signs, and in time they were made to stand for the sounds of spoken language. The various systems of writing of the ancient world had probably at least three sources—the Egyptian, the Assyrian, and the Chinese systems—all of which were originally hieroglyphics, or made up of pictures. The Egyptians had four distinct styles of writing—the hieroglyphics, hieratic,

enchorial, and Coptic. The hieroglyphic was probably in use before 4,000 B. C., and at first was made up entirely of pictures; but about 2,000 B. C. the hieratic form was introduced, in which the hieroglyphs were greatly simplified, and developed into purely linear forms. The enchorial form of writing was in use from 700 B. C. to A. D. 200, and was a still further simplification of the earlier forms, finally developing into the alphabetic form known as the Coptic. The cuneiform writing of the Assyrian empire disputes the honors of antiquity with the Egyptian early forms. This was probably hieroglyphic in its origin, but became modified by the different nations occupying the Assyrian empire until it assumed the form of the inscriptions as known to archaeologists. The name of this writing is from a Latin word meaning a wedge, and it is so called because all the characters used are made up of different arrangements of a single pointed figure resembling a wedge in form. There were three classes of cuneiform characters used in the period of development of this form of writing; first, the Assyrian or Babylonian, which was very complicated, containing from six hundred to seven hundred symbols; the Scythian or Median, having about one hundred characters only; and the third, the Persian, which is purely alphabetic. The Chinese gives an example of a written language which was arrested in an early period of its development, before the alphabetic stage had been reached. The people of China still use a written character for a word, as they did thousands of years ago. The Egyptian is the most important of those early systems, as from it was probably derived the Phœnician alphabet, which became the parent of all the graphic systems of the modern world. The Egyptians never fully separated the hieroglyphic and phonetic symbols, but the Phœnicians adopted the latter only, and thus originated the first purely alphabetic plan of writing. The Phœnician alphabet was the parent of five principal branches of graphic forms, the most important of which is the Greek, which was the parent of the Roman alphabet, from which sprang the alphabets of all modern European nations, and those taken from them by the people who now inhabit the Western hemisphere.

Capital letters were first invented, and were in use for many centuries before the invention of small letters. The oldest manuscripts now in use, dating as far back as the third century, are written entirely in capitals, and without spacing between the words, or marks of punctuation. The small letters were first introduced about the seventh century.

Punctuation was unknown to the ancients.

Aristophanes of Alexandria, about two and a half centuries before the Christian era, introduced some of the marks now used. But it was not until about the year 1500 A. D., that Aldus Manutius, a learned printer of Venice, reduced the art of punctuation to a system.

Surnames are so called from the early practice of writing them over the Christian names. In modern times they were first used in France, particularly in Normandy, where they can be traced to the latter part of the tenth century. They were introduced into England by the Normans after the conquest. The ancient Hebrews, Egyptians, Syrians, Persians, and others had but a single name which was generally significant of some feature connected with their birth. Thus, Rachel, dying, had called her child Benoni, "the son of my sorrow"; but Jacob gave him the name of Benjamin, "the son of my strength." These simple names, however, soon became so common to many owners, that they failed to convey individuality; and this led to the addition of other designations, now known to us as surnames. Only about a thousand surnames were taken up by the most noble families in France and in England about the time of Edward the Confessor. The lower nobility did not follow this example before the twelfth century and the citizens and husbandmen had no family names before the fourteenth century. English names have recruits among them from almost every race.

The three most numerous patronymics of Celtic origin now in use among the English are the O, the Mac, and the Ap. The Irish O originally meant grandson, the Scotch Mac and the Welch Ap meaning son.

The Jews were the last to adopt surnames, and it is only within the past hundred years that they were compelled by law to adopt them in England.

Sacred Books of the Hindus are of great antiquity. The oldest of their sacred books, the Vedas (knowledge or science), contain the revelation of Brahma, and were preserved by tradition until collected by Vyasa. The Vedas are three in number: first, the Rig-Veda containing hymns and mystic prayers; second, the Yajur-Veda containing the religious rites; third, the Sama-Veda, with prayers in the form of songs. The Vedas were written in Sanskrit and were first translated into English by Sir William Jones. The whole life of Ancient India is found in the Vedas, the Puranas, and the two great epics, called the Ramayana and the Mahabharata.

The Ramayana contains about 50,000 lines describing the youth of Rama who is an incarnation of their God Vishnu; his banish-

ment and residence in central India. The Mahabharata of later date consists of about 220,000 lines and is divided into eighteen books. Five brothers, the descendants of Bharata are the heroes of the Mahabharata; and episodes in the lives of these heroes occupy three fourths of the poem. The Puranas relate largely to mythological legends. The gods Siva and Vishnu are the sole objects of worship in the Puranas.

Pilgrim's Progress, the chief work of John Bunyan, has gone through more editions and been translated into more languages, than any book, except the Bible. It is an allegory of a Christian's life from the time of his conversion to that of his death. The book was written during the author's incarceration in Bedford jail, where he passed twelve years of his life. He was born near Bedford, in England, in 1628, in 1655 became a Baptist minister and preached with great success until the restoration of Charles II., when an act against conventicles was passed, which put an end to his labors. His trial, conviction, and sentence followed. He was several times offered his liberty on the condition that he would give up preaching; but his answer was always, "If you let me out to-day, I will preach again to-morrow." He died in London, 1688.

Latin language first appears in literature as a written language as well as spoken, in the plain of Latium in the third century B. C. The conquering armies of Rome soon carried a knowledge of the Latin tongue to the utmost boundaries of the known world. Hence its presence is discernible in all European languages. Those languages which are the immediate offspring of the Latin, as the Italian, Spanish, Portuguese, and French, both Norman and Provençal, are called the Romance languages. Wallachian, the language of Roumania, in which Latin predominates, has not until lately been classified with the Latin language. Latin ceased to be a spoken language about 580 A. D.

Poet Laureate means "The Poet of the Laurel Wreath." It was the custom in early Greece to crown with a laurel wreath the successful poet in a contest; this custom was adopted by the Romans during the Empire. But the title of "Poet Laureate" originated in Germany during the twelfth century, when the ancient ceremony of crowning the poet par excellence was revived. The early history of the Laureateship in England is traditional. The story goes that Edward III., following the example of the coronation of Petrarch at Rome, conferred a similar honor upon Geoffrey Chaucer with the yearly pension of 100 marks and other perquisites. Although the Laureateship

was generally recognized, it did not become an established office until 1619, with Ben Jonson.

Hungarian Literature is in the main confined to the Magyar language, which bears a resemblance to the Turkish. It is only of late years that this literature has assumed a popular character. The native language was excluded from public and official documents for eight centuries, but, notwithstanding this fact, the Hungarians possess to-day a literature, which, both in regard to quantity and quality, will sustain comparison with that of the most civilized of western nations. The Latin language was introduced about 1000 A. D. and became the tongue of both church and state until the close of the fifteenth century. The Hungarian language was revived in the sixteenth century and became the sole vehicle for sacred poetry. Translations of the Bible were multiplied, chronicles, histories, grammars, and dictionaries were published, and the period from 1702 to 1780 probably marks the Golden Age of literature in Hungary. But the native language suffered a severe reverse when the country came under the absolute dominion of Austria.

Renaissance, The, means simply a new birth or revival; but the word is always understood to mean a revival in learning. The period known as the Renaissance dates from the taking of Constantinople by the Turks (1453), but long before that epoch the love for classical literature had been reviving. This event, however, gave a decided impulse to the revival of learning in western Europe; the learned men of the Greek or eastern empire sought new homes in the Occident and established schools throughout Europe. The revival of learning, the invention of printing, the discovery of the new world, the decline of feudalism, the elevation of the middle classes, all contributed to bring about the Renaissance. It reached its climax about the beginning of the present century.

Theatrical Performances have been traced to the Grecian custom of celebrating every spring, in Athens, a festival in honor of Bacchus. Thespis originated the custom of introducing a single speaker to amuse the company with recitations. He also invented a movable car on which his performances were exhibited in various places. Theatrical performers are still called thespians. The car of Thespis was soon exchanged for a permanent stage in the Temple of Bacchus. *Æschylus* soon added a second speaker and a chorus, masks, scenery, etc., and is therefore called the "Father of Tragedy." At the festivals of Bacchus new plays were brought out yearly in competition. *Æschylus* won the prize every

year until he was fifty-six years old, when he was defeated by Sophocles. Greek comedy derived its origin from the revels of the Comus (God of revelry) during the Bacchic festivals. Its great master was Aristophanes, 444 B. C.

FOREIGN WORDS AND PHRASES.

A bas.—Down with.
A capite ad calcem.—From head to foot.
A fin.—To the end.
A fortiori.—With stronger reason.
A l'abandon.—At random.
A la bonne heure.—Opportunely; in good time.
A la dérobée.—By stealth.
A la mode.—According to the fashion.
A main armée.—With force of arms.
A mensa et thoro.—From bed and board.
A posteriori.—From effect to cause; from the latter.
A priori.—From cause to effect; from the former.
A tempo giusto.—To sing or play in true time. (*Music.*)
A tempo rimo.—To restore the original movement. (*Music.*)
A vinculo matrimonii.—From the tie of marriage.
A votre santé.—To your health.
Ab extra.—From without.
Ab initio.—From the beginning.
Ab origine.—From the beginning.
Ab ovo.—From the beginning.
Ab urbe condita.—From the building of the city (Rome); abridged A. U. C.
Abbi invidia.—All offense apart; let there be no malice.
Abbi omen.—May it not prove ominous.
Abque hoc.—Without this or that.
Ac etiam.—And also.
Actum est de republica.—It is all over with the commonwealth.
Ad absurdum.—To show the absurdity.
Ad arbitrium.—At pleasure.
Ad astra per aspera.—To the stars through difficulties.
Ad captandum vulgus.—To catch the mob or the vulgar.
Ad eundem.—To the same point or degree.
Ad finem.—To the end.
Ad Græcos Calendas.—An indefinite postponement. (The Greeks had no calends.)
Ad hominem.—To the man (that is, to the interests or the passions of the man).
Ad infinitum.—Without end.
Ad inquirendum.—For inquiry.
Ad interim.—In the meanwhile.
Ad libitum.—At pleasure.
Ad item.—For the action (at law).
Ad nauseam.—To a disgusting degree.
Ad referendum.—For further consideration.
Ad rem.—To the purpose.
Ad unguem.—To the nail; exactly; nicely.
Ad valorem.—According to the value.
Addendum.—An addition or appendix.
Adhuc sub iudice lis est.—The affair is not yet decided.
Egregeti medendo.—The remedy is worse than the disease.
Equam servare mentem.—To preserve an equable mind.
Equo animo.—With an equable mind.
Ere perennius.—More lasting than brass; enduring ever.
Affaire du cœur.—A love affair; an amour.
Affatus.—Inspiration.
Agenda.—Things to be done.
Agitato.—A broken style of performance, to awaken surprise. (*Music.*)
Agnus Dei.—Lamb of God.
Aide-de-camp.—Assistant to a general.
Aide-toi, et le ciel t'aidera.—Help thyself, and Heaven will help thee.
Alere flammam.—To feed the flame.
Al fresco.—In the open air.
Alga.—A kind of seaweed.
Alquasil.—A Spanish constable.
Alas.—Otherwise; elsewhere.
Alibi.—Elsewhere; not present.
Alis volat propriis.—She flies with her own wings.
Alunde.—From some other quarter or person.
Allegretto.—A movement quicker than *andante*, but not so quick as *allegro*. (*Music.*)
Allomando.—A kind of German dance.
Alma mater.—Benign mother (applied to a university).
Alter ego.—A second self.
Alto octavo.—An octavo higher,

Alto relieve.—High relief. (*Sculpture.*)
Alto ripieno.—The tenor of a great chorus.
Alto violino.—A small tenor violin.
Amende.—Compensation; apology.
Ami du peuple.—Friend of the people.
Amicus curiæ.—A friend of the court.
Amor patriæ.—Love of country.
Amour propre.—Self-love; vanity.
Ancien régime.—Former administration; ancient order of things.
Andante.—Moderately slow movement, between *largo* and *allegro*. (*Music.*)
Anglice.—In English.
Anguis in herba.—A snake in the grass.
Animis opibusque parati.—Ever ready with our lives and property.
Animus et fides.—By (or with) courage and faith.
Animus factus.—Really and truly.
Animus furandi.—Felonious intent.
Anno Domini.—In the year of our Lord.
Anno lucis.—In the year of light.
Anno mundi.—In the year of the world.
Annus mirabilis.—Year of wonders.
Anta bellum.—Before the war.
Ante lucem.—Before light.
Ante meridiem.—Before noon.
Aperçu.—A brief sketch of any subject.
Appoggiatura.—A note in a smaller character than the regular notes of the piece. (*Music.*)
Apropos (Fr. & *propos*).—To the purpose.
Aqua vite.—Water of life; brandy.
Arbiter elegantiarum.—Master of ceremonies; an umpire in matters of taste.
Arcana imperii.—State secrets.
Arcanum.—A secret.
Argumentum ad crumenam.—An argument to the purse.
Argumentum ad fidem.—An appeal to faith.
Argumentum ad hominem.—An argument to the person.
Argumentum ad ignorantiam.—An argument founded on an adversary's ignorance of facts.
Argumentum ad iudicium.—An appeal to the common sense of mankind.
Argumentum ad populum.—An appeal to the people.
Argumentum ad veroundiam.—An argument to modesty.
Argumentum baculum.—Club law.
Arioso.—Light, airy.
Armiger.—One bearing arms; an esquire.
Arpeggio.—The notes of a chord played in rapid succession, and not simultaneously. (*Music.*)
Arrière-pensée.—Mental reservation.
Ars est celare artem.—True art is to conceal art.
Assumptum.—It is assumed or taken for granted.
Astra castra, Numen iumen.—The stars my camp, the Deity my light.
At spes non fracta.—But hope is not broken.
Au fait.—Well instructed; master of it.
Au fond.—To the bottom, or main point.
Au pied de la lettre.—Literally.
Au pis aller.—At the worst.
Au revoir.—Farewell.
Audi alteram partem.—Hear the other side.
Aura popularis.—The gale of popular favor.
Auri sacra fames.—The accursed thirst for gold.

CELEBRATED CHARACTERS IN THE LITERATURE OF THE WORLD.

The name of the character is given in black letter; the name of the author and of the work from which the character is taken, in italic.

Abdiel. *Paradise Lost*, Milton. The faithful angel who opposed Satan in his revolt.
Abigail. *The Bible*. The wife of David.
Ablewhite, Godfrey. *Moonstone*, *Wills Collins*. A disreputable spy.
Abou Hassan. *Arabian Nights*. An Arab who was made to believe himself Caliph.
Absalom. 1. *The Bible*. The son of David, King of Israel. 2. *Absalom and Achitophel*, Dryden. A pseudonym for the Duke of Monmouth, an illegitimate son of King Charles II.
Absolute, Captain. *The Rivals*, Sheridan. The hero of the comedy, the gallant and fortunate lover.
Absolute, Sir Anthony. *The Rivals*, Sheridan. Father of Captain Absolute, a very frascible and absolute old gentleman.
Achtophel. *Absalom and Achitophel*, Dryden. The pseudonym for the Earl of Shaftesbury.
Acres, Bob. *The Rivals*, Sheridan. A cowardly boaster, the butt of the comedy.
Acrasia. *The Faery Queen*, Spenser. A beautiful witch, the personification of intemperance.
Adam, Bell. *Reliques*, Percy. A celebrated archer.
Adams, Parson. *Joseph Andrews*, Fielding. An eccentric, good-natured clergyman.
Adriana. *Comedy of Errors*, Shakespeare. The wife of Antipholus.
Aguecheek, Sir Andrew. *Twelfth Night*, Shakespeare. A fool and jester.
Aladdin. *Arabian Nights*. The owner of a magic lamp and ring, which gave the possessor every wish he made.
Allworthy, Squire. *Tom Jones*, Fielding. A good-natured old country gentleman.
Alp. *The Steps of Corinth*, Byron. A brave and devoted man.
Amadis de Gaul. *Amadis de Gaul*. The hero of a Portuguese chivalric romance, the author of which was Vasco Lobeira. It was translated into every language in Europe.
Amelia. *Amelia*, Fielding. A lovely woman, supposed to be drawn from Fielding's own wife.
Amine. *Arabian Nights*. A wicked sorceress, who changed her three sisters into hounds.
Amlet, Richard. *The Confederacy*, Vanbrugh. A gambler.
Amr. *Absalom and Achitophel*, Dryden. Pseudonym for H. Finch.
Andrews, Joseph. *Joseph Andrews*, Fielding. A hero ridiculously portrayed as a model young man.
Anerley, Mary. *Mary Anerley*, Blackmore. A lovely and beautiful girl.
Apemantus. *Timon of Athens*, Shakespeare. A cynic.
Arden, Enoch. *Enoch Arden*, Tennyson. A sailor, supposed drowned, who returns home to find his wife married again.

Argante. *The Faery Queen*, Spenser. A giantess.
Ariel. *The Tempest*, Shakespeare. A spirit of the air, perhaps the daintiest creation of the myriad-minded poet.
Artful Dodger. *Oliver Twist*, Dickens. A young thief who understands his business.
Arthur, King. *Idylls of the King*, Tennyson. A legendary British King, who established an order of chivalry known as the Round Table, and about whom many popular legends are afloat in Wales and Western France.
Ashton, Lucy. *The Bride of Lammormoor*, Scott. A beautiful character, loved and lost by Ravenswood.
Atalanta. *Atalanta in Calydon*, Swinburne. One of Diana's maidens.
Autolycus. *Winter's Tale*, Shakespeare. An intellectual sneak thief.
Baba, Ali. *Arabian Nights*. The hero of the tale of the forty thieves, who breaks into the robbers' cave by means of the magical password "Sesame."
Baba, Cassim. *Arabian Nights*. Brother of the above, who forgets the password and is captured by the robbers.
Backbite, Sir Benjamin. *School for Scandal*, Sheridan. A scandal monger.
Bagstock, Joe. *Dombey and Son*, Dickens. A pompous fellow.
Bailey, Young. *Martin Chuzzlewit*, Dickens. A precocious youth.
Balderstone, Caleb. *Bride of Lammormoor*, Scott. The butler of Ravenswood.
Balthazar. 1. *Comedy of Errors*, Shakespeare. A merchant. 2. *Much Ado About Nothing*, Shakespeare. A servant.
Banquo. *Macbeth*, Shakespeare. A chieftain murdered by Macbeth; later in the same play, a ghost.
Bardell, Mrs. *Pickwick Papers*, Dickens. Mr. Pickwick's landlady, who uses him for breach of promise of marriage.
Bardolph. *Henry IV.*, Shakespeare. A follower of Sir John Falstaff.
Barkis. *David Copperfield*, Dickens. A marrying man who eventually marries.
Bath, Major. *Amelia*, Fielding. A pompous officer.
Bayes. *The Rehearsal*, Dukes of Buckingham. A pseudonym for Dryden.
Baynes, Charlotte. *Adventures of Philip*, Thackeray. The hero's sweetheart.
Bede, Adam. *Adam Bede*, George Eliot. An ideal workingman.
Belch, Sir Toby. *Twelfth Night*, Shakespeare. Olivia's hard-drinking uncle.
Belford. *Clarissa Harlowe*, Richardson. The friend of Lovelace.
Bellinda. *Rape of the Lock*, Pope. The heroine, whose hair is cut.

- Bell, Laura.** *Pendennis, Thackeray.* One of the sweetest heroines in English literature.
- Bell, Peter.** *Peter Bell, Wordsworth.* An extremely prosaic man.
- Bellaston, Lady.** *Tom Jones, Fielding.* One of Tom Jones' sweethearts.
- Bellenden, Lady.** *Old Mortality, Scott.* A Tory gentlewoman.
- Belpheobe.** *The Faery Queen, Spenser.* A pseudonym for Queen Elizabeth.
- Belvidera.** *Venice Preserved, Otway.* The heroine of the poem.
- Benedick.** *Much Ado About Nothing, Shakespeare.* A confirmed bachelor who was converted to matrimony by the lovely Beatrice. From this gentleman comes the name Benedick or Benedict applied to married men who were not going to marry.
- Bennet, Mrs. Amelia.** *Fielding.* An improper character.
- Benvollio.** *Romeo and Juliet, Shakespeare.* One of Romeo's friends.
- Bertram.** *All's Well that Ends Well, Shakespeare.* The hero of the play, who marries Helena.
- Bianca.** *Othello, Shakespeare.* Cassio's sweetheart.
- Birch, Harvey.** *The Spy, Cooper.* The chief character of the novel.
- Bilfil.** *Tom Jones, Fielding.* Allworthy's nephew, a talebearer.
- Blemer, Miss Cornelia.** *Dombey and Son, Dickens.* A bluestocking governess.
- Hobadill, Captain.** *Every Man in His Humor, Jonson.* A boasting coward.
- Bœuf, Front de.** *Ivanhoe, Scott.* One of King John's followers. A ferocious scoundrel.
- Boffin, Noddy.** *Our Mutual Friend, Dickens.* The good-natured occupant of Boffin's Bower.
- Bols Gullbert, Brian de.** *Ivanhoe, Scott.* The master of the Knights Templars.
- Boniface.** *The Beaux Stratagem, Farquhar.* A landlord. Hence applied to landlords generally.
- Booby, Lady.** *Joseph Andrews, Fielding.* One of the minor characters.
- Booth.** *Amelia, Fielding.* The hero of the story.
- Bottom, Nick.** *A Midsummer Night's Dream, Shakespeare.* A ridiculous weaver with whom Titania, the queen of the fairies, is forced to fall in love by a charm.
- Bounderby, Josiah.** *Hard Times, Dickens.* A prosaic, matter-of-fact manufacturer.
- Bowles, Tom.** *Kenelm Chillingly, Bulwer.* A blacksmith.
- Bowline, Tom.** *Roderick Random, Smollett.* A sailor, whose name has been applied to mariners ever since.
- Box and Cox.** *Boz and Cox, Morton.* The heroes of the farce.
- Bradwardine, Baron.** *Waverley, Scott.* The father of Rose Bradwardine.
- Bramble, Matthew.** *Humphrey Clinker, Smollett.* A walking epitome of dyspepsia.
- Brangtons.** *Evelina, Miss Burney.* Very vulgar people.
- Brass, Sally and Sampson.** *Old Curiosity Shop, Dickens.* A shyster lawyer and his sister.
- Brick, Jefferson.** *Martin Chuzzlewit, Dickens.* A ridiculous American editor.
- Bridgenorth, Major Ralph.** *Peveril of the Peak, Scott.* A prominent officer in the Puritan Army.
- Bridget, Mrs.** *Tristram Shandy, Sterne.* Tristram's nurse.
- Brown, Tom.** *Tom Brown's School Days and Tom Brown at Oxford, Thos. Hughes.* The hero of one of the best boys' books ever written in English.
- Bucket, Inspector.** *Bleak House, Dickens.* A detective.
- Bumble.** *Oliver Twist, Dickens.* A beadle.
- Caius, Doctor.** *Merry Wives of Windsor, Shakespeare.* Ann Page's Welsh lover.
- Caliban.** *The Tempest, Shakespeare.* Prospero's monstrous servant.
- Candor, Mrs.** *The Rivals, Sheridan.* A scandal monger.
- Carker.** *Dombey and Son, Dickens.* A scoundrelly clerk.
- Cassio.** *Othello, Shakespeare.* Othello's lieutenant.
- Caudle, Mrs.** *Curtain Lectures, Douglas Jerrold.* An artistic scold.
- Caustic, Col.** *The Lounger, Mackenzie.* A satirical gentleman.
- Celia.** *As You Like It, Shakespeare.* Rosalind's cousin.
- Chadband.** *Bleak House, Dickens.* A hypocrite.
- Chamont.** *The Orphans, Otway.* The hero of the play.
- Chillingly, Kenelm.** *Kenelm Chillingly, Bulwer.* The hero of the novel.
- Christabel.** *Christabel, Coleridge.* The heroine of the poem.
- Christiana.** *Pilgrim's Progress, Bunyan.* The wife of the hero Christian.
- Chuzzlewit, Jonas and Martin.** *Martin Chuzzlewit, Dickens.* The first a miser and murderer, the second the hero of Dickens' story.
- Clare, Ada.** *Bleak House, Dickens.* The wife of Carstone, and one of the most important characters in the story.
- Clifford, Paul.** *Paul Clifford, Bulwer.* A beautiful highwayman hero.
- Clinker, Humphrey.** *Humphrey Clinker, Smollett.* A philosophical young man who meets very singular adventures.
- Cœlebs.** *Cœlebs in Search of a Wife, Hannah More.* A gentleman who has very precise ideas on the subjects of matrimony and woman.
- Coldstream, Sir Charles.** *Used Up, Matthews.* A fatigued and weary man of the world.
- Consuelo.** *Consuelo, George Sand.* The heroine of the novel, a rather inflammable young lady.
- Copper Captain, The.** *Rule a Wife and Have a Wife, Beaumont and Fletcher.* A nickname applied to Perez, the boastful coward of the play.
- Copperfield, David.** *David Copperfield, Dickens.* The hero of the novel, supposed to be a picture of Dickens' own life and character.
- Cordella.** *King Lear, Shakespeare.* The faithful daughter of the king in the play.
- Corinne.** *Corinne, Mme. de Staël.* The heroine of de Staël's greatest work.
- Costigan, Captain.** *Pendennis, Thackeray.* The father of Pendennis' first sweetheart, a hard drinking but amusing old man.
- Coverley, Sir Roger de.** *Spectator, Addison.* A model country gentleman of the olden time.
- Crane, Ichabod.** *Sleepy Hollow, Irving.* The schoolmaster in the sketch.
- Crawley, Rawdon.** *Vanity Fair, Thackeray.* The hero of "the novel without a hero." The husband of Becky Sharp.
- Cressida.** *Troilus and Cressida, Shakespeare.* The heroine of the play, in love with Troilus.
- Crummles, Vincent.** *Nicholas Nickleby, Dickens.* A theatrical head of a theatrical family.
- Crusoe, Robinson.** *Robinson Crusoe, De Foe.* The hero of the most remarkable novel ever written. It has been translated into every civilized language on the globe. The story relates Crusoe's adventures on a desert isle upon which he was cast by the sea, and is one of intense interest.
- Cuttle, Captain.** *Dombey and Son, Dickens.* A nautical character who indulges in a number of queer mannerisms.
- Cymbeline.** *Cymbeline, Shakespeare.* A heroic king of Britain.
- Dalgarno, Lord.** *The Fortunes of Nigel, Scott.* A Scottish nobleman of bad character.
- Dalgetty, Dugald.** *Waverley, Scott.* A famous and well drawn soldier of fortune, whose name has become proverbial.
- Deans, Davie, Effie, and Jeanie.** *Heart of Midlothian, Scott.* Famous characters in the story. Jeanie is the heroine.
- Dedlock, Lady, and Sir Leicester.** *Bleak House, Dickens.* Husband and wife, proud and unfortunate, but noble people.
- Delamaine, Geoffrey.** *Man and Wife, Collins.* A man of muscle.
- Delphine.** *Delphine, Mme. de Staël.* The heroine of the novel.
- Deronda, Daniel.** *Daniel Deronda, George Eliot.* The hero of the novel, one of the best character sketches which George Eliot has made.
- Desdemona.** *Othello, Shakespeare.* The unfortunate heroine of the play, wife of the Moor Othello.
- Diddler, Jeremy.** *Raising the Wind, Kinny.* The prototype of all modern deadbeats.
- Dimmesdale, Rev. Arthur.** *The Scarlet Letter, Hawthorne.* The seducer of Hester Prynne.
- Dods, Meg.** *St. Ronan's Well, Scott.* A landlady.

- Dodson & Fogg.** *Pickwick Papers*, Dickens. Mrs. Bardell's attorneys in her suit against Mr. Pickwick.
- Dogberry.** *Much Ado About Nothing*, Shakespeare. An absurd character who travesties justice.
- Dombey, Florence, Mr. and Paul.** *Dombey and Son*, Dickens. Characters in the novel.
- Dominie, Sampson.** *Guy Mannering*, Scott. An eccentric clergyman.
- Don Quixote.** *Don Quixote*, Cervantes. The hero of the novel. This has been described by eminent critics as the best work of fiction which the world has yet produced. It was written in Spanish by Miguel de Cervantes, as a protest against the ridiculous extravagances of what are known as Chivalric Romances. Don Quixote is the type upon which thousands of later novels have been founded. Crazed by the reading of knightly tales, he arms himself and goes out in search of adventures, on his steed Rozinante, and accompanied by his squire Sancho Panzo. These adventures are told so wittily, that the world has been laughing at them for centuries, and the book has never lost its fresh, boyish interest. The best English translation is Smollett's. Gustave Doré, the famous French artist, some years since completed a set of illustrations for Don Quixote, which have added greatly to its interest.
- Dora.** *David Copperfield*, Dickens. Copperfield's child-wife.
- Dorimant.** *The Man of Mode, Etherege*. A dandy.
- Dorothea.** *Middlemarch*, George Eliot. The heroine of the tale.
- Dorrit, Edward, and "Little."** *Little Dorrit*, Dickens. The father of the Marshalsea prison and his interesting daughter.
- Drawcanair.** *The Rehearsal, The Duke of Buckingham*. A bully.
- Dulcinea del Toboso.** *Don Quixote*, Cervantes. A country girl whom Don Quixote selects as his lady love.
- Dundreary, Lord.** *Our American Cousin*, Taylor. A typical and absurd English lord. The character was really created by the actor Sothern.
- Edgar.** *King Lear*, Shakespeare. The son of Gloucester.
- Emilia.** *Othello*, Shakespeare. Wife of Iago, the villain of the play.
- Esmond, Beatrix, and Henry.** *Henry Esmond, Thackeray*. Heroine and hero of the novel, which is of the time of the English Revolution.
- Eugenia.** *The Return of the Native*, Hardy. A beautiful and unfortunate girl.
- Evangeline.** *Evangeline*, Longfellow. Heroine of the poem; her wanderings are told in verse that will never die.
- Evans, Sir Hugh.** *The Merry Wives of Windsor*, Shakespeare. A Welsh clergyman.
- Evelina.** *Evelina*, Miss Burney. Heroine of the novel.
- Eyre, Jane.** *Jane Eyre*, Brontë. Heroine of the novel.
- Fag.** *The Rivals*, Sheridan. A servant.
- Fagin.** *Oliver Twist*, Dickens. The preceptor in the thieves' academy, where Oliver Twist is held a prisoner.
- Faithful, Jacob.** *Jacob Faithful, Marryat*. The hero of the novel.
- Falkland.** *The Rivals*, Sheridan. A jealous lover of Julia's, and friend to Captain Absolute.
- Falstaff, Sir John.** *Henry IV. and the Merry Wives of Windsor*, Shakespeare. This is Shakespeare's most comic character; Queen Elizabeth was so pleased with Sir John in Henry IV. that, at her request, Shakespeare composed *The Merry Wives of Windsor*, in order to give the fat knight a wider field for fun.
- Fanny.** *Under the Greenwood Tree*, Hardy. A pretty schoolmistress.
- Fat Boy, The.** *Pickwick Papers*, Dickens. One of the minor characters in the novel, given to sleep and ple.
- Faust.** *Faust*, Goethe. The hero of the great German tragedy, who sells his soul to the Devil, and gets in return youth, wealth, and an attendant devil, Mephistopheles. Goethe was to Germany what Shakespeare was to England.
- Felton, Septimius.** *Septimius Felton*, Hawthorne. The mystical hero of the novel.
- Ferdinand.** *The Tempest*, Shakespeare. Son of the king, falls in love with Prospero's daughter, Miranda.
- Ferrers, Endymion.** *Endymion*, Benjamin Disraeli. Hero of the novel.
- Figaro.** *The Marriage of Figaro*, Beaumarchais. An exceedingly comical and sharp-witted barber.
- Firmin, Philip.** *The Adventures of Philip*, Thackeray. The hero of the novel.
- Florizel.** *A Winter's Tale*, Shakespeare. The prince of Bohemia.
- Fluellen.** *Henry V.*, Shakespeare. A pedantic but brave Welsh officer.
- Foker, Harry.** *Pendennis*, Thackeray. One of the minor characters.
- Foppington, Lord.** *The Relapse*, Van Brugh. An idiotic dandy.
- Fosco, Count.** *Woman in White*, Collins. A complicated scoundrel.
- Frankenstein.** *Frankenstein*, Mrs. Shelley. The dreadful result of the labors of a German student, who makes a man in the dissecting room out of corpses, and brings him to life by galvanism. The hideous hero of the novel has a series of most blood-curdling adventures.
- Friar Tuck.** *Reliques*, Percy. The jolly companion of Robin Hood, the outlaw of Sherwood Forest.
- Friday.** *Robinson Crusoe*, De Foe. Crusoe's savage servant.
- Gadgrind, Jeremiah.** *Hard Times*, Dickens. A tyrannical "practical" man.
- Gamp, Sairy.** *Martin Chuzzlewit*, Dickens. A comical and hard-drinking monthly nurse.
- Gargantua.** *Gargantua, Rabelais*. Hero of the tale.
- Gaunt, Griffith.** *Griffith Gaunt*, Reade. Hero of the novel.
- Gay, Walter.** *Dombey and Son*, Dickens. Marries Florence Dombey.
- Gibbie, Goose.** *Old Mortality*, Scott. A half-witted boy.
- Gil Blas.** *Gil Blas*, Le Sage. The hero of a very famous novel. His adventures are of the most surprising character, and are told in a most interesting manner.
- Gilpin, John.** *John Gilpin's Ride*, Cowper. The absurd hero of the poem.
- Ginevra.** *Ginevra*, Rogers. The heroine of the poem, accidentally locked in a trunk on her wedding day, and not found for years and years.
- Gobbo, Launcelot.** *The Merchant of Venice*, Shakespeare. A merry servant.
- Goneril.** *King Lear*, Shakespeare. The eldest daughter of the king, a traitor and an ingrate.
- Gonzalo.** *The Tempest*, Shakespeare. An old councillor.
- Goosling, Giles.** *Kentworth*, Scott. A landlord.
- Grandison, Sir Charles.** *Sir Charles Grandison*, Richardson. Hero of the novel.
- Gray, Vivian.** *Vivian Gray*, Disraeli. Hero of the novel.
- Grundy, Mrs.** *Speed the Plow*, Morton. An old lady who represents worldly propriety and talebearing.
- Gulliver, Lemuel.** *Gulliver's Travels*, Swift. Hero of the romance.
- Hamlet.** *Hamlet*, Shakespeare. The melancholy Dane, hero of the play.
- Harley.** *The Man of Feeling*, Mackenzie. Hero of the novel.
- Harlowe, Clarissa.** *Clarissa Harlowe*, Richardson. Heroine of the novel.
- Harris, Mrs.** *Martin Chuzzlewit*, Dickens. A fictitious person invented by Sairy Gamp, for the purpose of enforcing her statements by quoting the opinions of Mrs. Harris upon the subject under discussion.
- Headstone, Bradley.** *Our Mutual Friend*, Dickens. A schoolmaster in love with Lizzie Hexam.
- Heep, Uriah.** *David Copperfield*, Dickens. A hypocrite and sneal.
- Helena.** *All's Well that Ends Well*, Shakespeare. Heroine of the play.
- Hero.** *Much Ado About Nothing*, Shakespeare. Daughter of Leonato.
- Hexam, Lizzie.** *Our Mutual Friend*, Dickens. Heroine of the novel.
- Holofernes.** *Love's Labor's Lost*, Shakespeare. A schoolmaster and pedant.
- Holt, Felix.** *Felix Holt*, George Eliot. Hero of the novel.
- Honeyman, Charles.** *The Newcomes*, Thackeray. A fashionable preacher.
- Honor, Mrs.** *Tom Jones*, Fielding. Sophia Western's waiting woman.
- Hopful.** *Pilgrim's Progress*, Bunyan. A pilgrim.
- Horatio.** *Hamlet*, Shakespeare. The friend of Hamlet.

Howe, Miss. *Clarissa Harlowe, Richardson.* Clarissa's friend.
Hudibras. *Hudibras, Butler.* Hero of the poem.
Hunter, Mr. and Mrs. Leo. *Pickwick Papers, Dickens.* Minor characters in the novel.

Iago. *Othello, Shakespeare.* The villain of the tragedy.
Imogen. *Cymbeline, Shakespeare.* Heroine of the play.
Isabella. *Measure for Measure, Shakespeare.* Heroine of the play.
Ivanhoe. *Ivanhoe, Scott.* Hero of the novel.

Jack, Col. *Col. Jack, DeFoe.* The criminal hero of the tale.
Jaffer. *Venice Preserved, Otway.* Hero of the poem.
Jaques. *As You Like It, Shakespeare.* The melancholy philosopher.
Jarndyce, John. *Bleak House, Dickens.* A benevolent old gentleman.
Javert. *Les Misérables, Hugo.* A detective.
Jessie. *Merchant of Venice, Shakespeare.* Shylock's daughter.
Jingle, Alfred. *Pickwick Papers, Dickens.* An amusing adventurer.

Kilmansegg, Miss. *The Golden Legend, Hood.* The golden-legged heroine of the poem.
Kitely. *Every Man in His Humor, Jonson.* A jealous husband.

Lady Bountiful. *The Beaux Stratagem, Farquhar.* A generous lady.
Laertes. *Hamlet, Shakespeare.* The son of Polonius, killed by his own sword.

Lalla Rookh. *Lalla Rookh, Moore.* Heroine of the poem, to whom Feramorz relates the stories told in the romance.

Lauglish, Lydia. *The Rivals, Sheridan.* Heroine of the play.
Lear, King. *King Lear, Shakespeare.* Hero of the play.

Leatherstocking, Natty. *Pathfinder, Deerslayer, and other novels, Cooper.* A huntsman and Indian fighter.

Legree. *Uncle Tom's Cabin, Stowe.* Slave master.
Leigh, Aurora. *Aurora Leigh, Browning.* Heroine of the romance.

Lella. *Glaucy, Byron.* Heroine of the poem.
Lightwood, Mortimer. *Our Mutual Friend, Dickens.* Minor character in novel.

Lismahago, Capt. *Humphrey Clinker, Smollett.* A retired officer.

Little, Henry. *Put Yourself in His Place, Reade.* Hero of the novel.

Little Nell. *Old Curiosity Shop, Dickens.* Heroine of novel.

Locksley. *Ivanhoe, Scott.* One of Robin Hood's pseudonyms.

Long Tom Coffin. *Pilot, Cooper.* A boatman.
Lothair. *Lothair, Disraeli.* Hero of novel, supposed pseudonym for the Marquis of Bute.

Lothario. *The Fair Penitent, Rowe.* A rake.

Loveless. *Clarissa Harlowe, Richardson.* A rake.

Lumpkin, Tony. *She Stoops to Conquer, Goldsmith.* A country squire.

Macbeth. *Macbeth, Shakespeare.* Hero of the play.
Macduff. *Macbeth, Shakespeare.* Rival of Macbeth.
MacIvor, Flora. *Rob Roy, Scott.* Heroine of novel.
MacKenzie, Mrs. *Newcomes, Thackeray.* A terminant widow.

Malagrother, Sir Mingo. *The Fortunes of Nigel, Scott.* An ill-natured courtier.

Malaprop, Mrs. *The Rivals, Sheridan.* A character famed for verbal blunders.

Malvolio. *Twelfth Night, Shakespeare.* Olivia's conceited steward.

Manfred. *Manfred, Byron.* Hero of the tragedy.

Mantalin. *Nicholas Nickleby, Dickens.* The absurd husband of the milliner in the story.

Marchioness. *The Old Curiosity Shop, Dickens.*

Mr. Dick Swiveller's remarkable little nurse.

Margaret. *Faust, Goethe.* The heroine of the tragedy.

Marlow, Young. *She Stoops to Conquer, Goldsmith.* Hero of the play.

Medora. *The Corsair, Byron.* Heroine of the poem.

Merdle, Mr. *Little Dorrit, Dickens.* A speculator.

Meister, Wilhelm. *Wilhelm Meister, Goethe.* Hero of the novel.

Mephistopheles. *Faust, Goethe.* The Devil.

Mercurio. *Romeo and Juliet, Shakespeare.* A wonderfully witty friend of Romeo's.

Micawber, Wilkins. *David Copperfield, Dickens.* A remarkable character, always waiting for something to turn up.

Miller, Daisy. *Daisy Miller, Henry James.* An alleged representative American girl.

Minna. *The Pirate, Scott.* One of the heroines of the novel.

Miranda. *The Tempest, Shakespeare.* Daughter of Prospero, beloved of Ferdinand; heroine of the play.

Monimia. *The Orphan, Otway.* Heroine of the poem.

Mouldy. *Henry IV., Shakespeare.* One of Falstaff's recruits.

Mucklewrath, Habakkuk. *Old Mortality, Scott.* A fanatical preacher.

Neuchatel, Adriana. *Endymion, Disraeli.* A wealthy young lady.

Newcome, Clive, Colonel, Ethel. *The Newcomes, Thackeray.* Characters in the best novel Thackeray has written.

Nickleby, Mrs. Nicholas. *Nickleby, Dickens.* The exasperating mother of the hero, Nicholas.

Norna. *The Pirate, Scott.* An insane soothsayer.

Nydia. *Last Days of Pompeii, Bulwer.* A blind flower girl.

Obadiah. *Tristram Shandy, Sterne.* A servant.

Oberon. *Midsummer Night's Dream, Shakespeare.* The King of Fairyland.

Ochiltree, Edie. *The Antiquary, Scott.* A beggar of prominence.

Oldbuck, Jonathan. *The Antiquary, Scott.* Hero of the novel.

Old Mortality. *Old Mortality, Scott.* A gravestone cleaner.

Olfant, Nigel. *The Fortunes of Nigel, Scott.* Hero of the novel.

Ophelia. *Hamlet, Shakespeare.* Heroine of the tragedy.

Orville, Lord. *Evelina, Miss Burney.* Evelina's lover.

Othello. *Othello, Shakespeare.* Hero of the play, a Moor, husband of Desdemona.

O'Trigger, Sir Lucius. *The Rivals, Sheridan.* A fire-eating Irishman.

Overreach, Sir Giles. *A New Way to Pay Old Debts, Massinger.* A usurer.

Page, Anne and Mrs. *The Merry Wives of Windsor, Shakespeare.* Characters in the play.

Pamela. *Pamela, Richardson.* An intensely good young lady.

Pangloss. *The Heir-at-Law, Colman.* A pedantic teacher.

Pantagruel. *Pantagruel, Rabelais.* Hero of the sketch.

Partridge. *Tom Jones, Fielding.* The hero's trusty follower.

Pecksniff, Charity, Mercy, Mr. Martin Chuzzlewit, Dickens. Characters in the story.

Pendennis, Arthur, Helen, Major. *Pendennis, Thackeray.* Well drawn and forcible characters in the novel.

Perdita. *Winter's Tale, Shakespeare.* Florizel's sweetheart.

Petruchio. *The Taming of the Shrew, Shakespeare.* The hero, and husband of Katherine.

Pickle, Peregrine. *Peregrine Pickle, Smollett.* The wandering and immoral hero of the novel.

Pickwick, Samuel. *Pickwick Papers, Dickens.* Hero of the novel.

Pierre. *Venice Preserved, Otway.* A conspirator.

Pistol, Ancient. *Merry Wives of Windsor and Henry IV., Shakespeare.* Falstaff's most characteristic follower.

Pleydell, Paulus. *Guy Mannering, Scott.* A lawyer.

Polina, Ned. *Henry IV., Shakespeare.* A friend of Prince Hal.

Portia. *The Merchant of Venice, Shakespeare.* Heroine of the play.

Poundlint, Peter. *Old Mortality, Scott.* A preacher.

Primrose, Dr. *Vicar of Wakefield, Goldsmith.* The Vicar of Wakefield.

Primrose, Moses. Son of the preceding.

Proflus. *Two Gentlemen of Verona*, Shakespeare. One of the two gentlemen.

Prondfute. *Fair Maid of Perth*, Scott. A bonnet maker.

Frynne, Hester. *Scarlet Letter*, Hawthorne. Heroine of novel.

Pumblechook, Uncle. *Great Expectations*, Dickens. A bully and fraud.

Romeo. *Romeo and Juliet*, Shakespeare. The hero of the play, lover of Juliet.

Sabrina. *Comus*, Milton. River nymph.

Sacripant. *Orlando Furioso*, Ariosto. King of Circassia, in love with Angelica.

Saddletree, Bartoline. *Heart of Midlothian*, Scott. A learned peddler.

Sancho Panza. *Don Quixote*, Cervantes. Worthy squire of a worthy master; the right man in the right place.

Sandford, Harry. *Sandford and Merton*, Day. Hero of the story.

Sangrado, Doctor. *Gu Blas*, Le Sage. A confirmed phlebotomist.

Scheherazade, Queen. *Arabian Nights*. The Sultaness who tells the tales.

Scrub. *The Beaux Stratagem*, Farquhar. A facetious valet.

Sedley, Amelia. *Vanity Fair*, Thackeray. An amiable woman, but of no great decision.

Sedley, Joseph. *Vanity Fair*, Thackeray. A fat, bashful East Indian.

Sellim. *Bride of Abydos*, Byron. The hero.

Shafton, Sir Piersie. *The Monastery*, Scott. A pedantic courtier.

Shandy, Tristram. *Tristram Shandy*, Sterne. Hero of the story.

Sharp, Rebecca. *Vanity Fair*, Thackeray. The designing heroine.

Shylock. *Merchant of Venice*, Shakespeare. A vindictive Jew.

Silvia. *Two Gentlemen of Verona*, Shakespeare. In love with Valentine.

Skimpole, Harold. *Bleak House*, Dickens. Always out of money.

Slipslop, Mrs. Joseph Andrews, Fielding. A waiting woman of doubtful character.

Slop, Doctor. *Tristram Shandy*, Sterne. An irascible physician.

Sly, Christopher. *Taming of the Shrew*, Shakespeare. A drunken tinker.

Slyme, Chevy. *Martin Chuzzlewit*, Dickens. A "gent short of funds."

Smyke, Nicholas *Nickleby*, Dickens. An ill-used, poor, half-witted pupil of Squeers.

Sneerwell, Lady. *School for Scandal*, Sheridan. A gossip and backbiter.

Snodgrass, Augustus. *Pickwick Papers*, Dickens. A poetical character.

Snow, Lucy. *Villette*, Charlotte Brontë. The heroine.

Sparkler, Edmund. *Little Dorrit*, Dickens. Man of fashion.

Squeers, Wackford. *Nicholas Nickleby*, Dickens. The brutal master of Dotheboys Hall.

Squeers, Master Wackford. In same. A spoiled child, the image of his father.

St. Leon. *St. Leon*, William Godwin. Hero of the tale, has the secret of perpetual youth, and the transmutation of metals.

Steerforth, James. *David Copperfield*, Dickens. Talented and profligate.

Steggs, Miss Carolina *Wilhelmina Amelia*. *Vicar of Wakefield*, Goldsmith. A pretender to gentility.

Stiggins, Elder. *Pickwick Papers*, Dickens. Affects pineapple rum and Mrs. Weller.

Strap, Hugh. *Roderick Random*, Smollett. Roderick's follower.

Surface, Sir Charles and Joseph. *School for Scandal*, Sheridan. The first a good-natured rake, the second a hypocrite.

Swiveller, Dick. *Old Curiosity Shop*, Dickens. A gay rattlepate and a good fellow.

Tamora. *Titus Andronicus*, Shakespeare. A Gothic queen.

Tapley, Mark. *Martin Chuzzlewit*, Dickens. Happest when most miserable; jolly when he ought to cry.

Tappertit, Simon. *Barnaby Rudge*, Dickens. A ferocious little apprentice.

Tartuffe. *Tartuffe*, Molière. A hypocritical character.

Teazle, Lady. *School for Scandal*, Sheridan. The heroine.

Teazle, Sir Peter. *School for Scandal*, Sheridan. The old husband of Lady Teazle.

Thersites. *Iliad*, Homer, and *Troilus and Cressida*, Shakespeare. A foul-mouthed Greek.

Thwackum. *Tom Jones*, Fielding. A philosophical pedagogue.

Tillemina. *The Critic*, Sheridan. A maiden very much crossed in love.

Timon. *Timon of Athens*, Shakespeare. A misanthrope, hero of the play.

Tinto, Dick. *The Bride of Lammermoor* and *St. Ronan's Well*, Scott. An artist.

Titania. *Midsummer Night's Dream*, Shakespeare. The queen of fairies.

Titmouse, Tittlebat. *Ten Thousand a Year*, Dr. Warren. Astonished Parliament by an imitation of Chanticleer.

Tito. *Romola*, George Eliot. The handsome, but weak hero.

Todgers, Mrs. Martin Chuzzlewit, Dickens. The keeper of a commercial boarding house.

Toots. *Domby and Son*, Dickens. A simple, eccentric fellow.

Topsy. *Uncle Tom's Cabin*, Mrs. Stowe. An ignorant young slave girl.

Touchstone. *As You Like It*, Shakespeare. A clown.

Touchwood, Peregrine. *St. Ronan's Well*, Scott. An irascible East Indian.

Tox, Miss. *Domby and Son*, Dickens. A spinster, slightly curious.

Traddles, Tom. *David Copperfield*, Dickens. A barister and friend of Copperfield.

Trapbols. *The Fortunes of Nigel*, Scott. A usurer.

Trim, Corporal. *Tristram Shandy*, Sterne. The follower of Uncle Toby.

Trinculo. *Tempest*, Shakespeare. A jester.

Triol, Marquis. *The Pirate*, Scott. A wealthy Zealander.

Trotwood, Betsy. *David Copperfield*, Dickens. The kindest of women, but with an aversion to trespassing donkeys.

Trulliber, Parson. *Joseph Andrews*, Fielding. An ignorant clergyman.

Trunnion, Commodore Hawser. *Peregrine Pickle*, Smollett. An odd nautical character.

Tulkinghorn, Mr. *Bleak House*, Dickens. A wily solicitor.

Tulliver, Maggie. *Mill on the Floss*, George Eliot. The heroine.

Tulliver, Tom. *Mill on the Floss*, George Eliot. The selfish, conceited brother of Maggie Tulliver.

Tupman, Tracy. *Pickwick Papers*, Dickens. An obese admirer of lovely women.

Turveydrop. *Bleak House*, Dickens. Dancing master and professor of deportment.

Tusher, Thomas. *Henry Esmond*, Thackeray. A sycophantic clergyman.

Twemlow, Mr. *Our Mutual Friend*, Dickens. A diner-out and friend of the Veneerings.

Twist, Oliver. *Oliver Twist*, Dickens. Hero of the novel.

Twysden, Talcott. *Philip, Thackeray.* A public office.
Tybalt. *Romeo and Juliet, Shakespeare.* Nephew of Lady Capulet, slain by Romeo.

Ulrica. *Ivanhoe, Scott.* An old witch.
Una. *The Faery Queen, Spenser.* The personification of Truth.
Uncas. *The Last of the Mohican, Cooper.* A Mohican chief.

Uncle Toby. *Tristram Shandy, Sterne.* A noble veteran, the real hero of the story.

Uncle Tom. *Uncle Tom's Cabin, Stowe.* A pious and unfortunate slave, the hero of the novel. This book added more converts to the abolition party than any other factor. It was, in a sense, the most remarkable and effective American work printed.

Varden, Dolly. *Barnaby Rudge, Dickens.* The heroine of the story.

Vathek. *Vathek, Beckford.* The hero of Beckford's remarkable novel.

Vernon, Di. *Rob Roy, Scott.* The heroine of the novel.

Wholes. *Black House, Dickens.* A crafty lawyer.

Viola. *Twelfth Night, Shakespeare.* A sweet little lady in love with Orsino.

Virgilia. *Coriolanus, Shakespeare.* Wife of Coriolanus.

Virginia. *Paul and Virginia, St. Pierre.* Heroine of the novel.

Vivian. *Idylls of the King, Tennyson.* The mistress of Merlin, the Enchanter.

Wadman, Widow. *Tristram Shandy, Sterne.* The lady who seeks to decoy Uncle Toby into matrimony.

Wamba. *Ivanhoe, Scott.* A clown.

Wardle, Mr. *Pickwick Papers, Dickens.* A jolly country gentleman, friend of Mr. Pickwick.

Wegg, Silas. *Our Mutual Friend, Dickens.* The villain of the novel.

Weller, Tony and Samivel. *Pickwick Papers, Dickens.* Father and son; the latter, Mr. Pickwick's serving man, is undoubtedly the most original and most humorous creation of Dickens' exuberant fancy.

Werther. *Sorrows of Werther, Goethe.* Hero of the tale.

Western, Squire and Sophia. *Tom Jones, Fielding.* Father and daughter, the latter the heroine of the novel.

Whiskerandos, Don Fero. *The Critic, Sheridan.* The lover of Tilburina.

Wickfield, Agnes. *David Copperfield, Dickens.* Heroine of the novel.

Wild, Jonathan. *Jonathan Wild, Fielding.* A famous highwayman, and afterwards a noted thief-taker of London.

Wildair, Sir Harry. *The Constant Couple, and Sir Harry Wildair, Farquhar.* The hero of both plays.

Wilfer, Bella, Lavinia, Reginald, and Mrs. *Our Mutual Friend, Dickens.* One of the most entertaining family groups in English fiction. The first is the charming heroine of the novel. Lavinia is her abominable sister; Reginald, her angelic papa; while the somber background is made by the gloomy mamma, whose other name in the family is The Tragic Muse.

Wilfrid. *Robbery, Scott.* Hero of the poem.

Williams, Caleb. *Caleb Williams, Godwin.* The hero of a very remarkable novel.

Wimble, Will. *Spectator, Addison.* Pseudonym for Thomas Morecraft.

Winkle, Rip Van. *Sketch Book, Irving.* The immortal sleeper of the Catskills.

Wishfort, Lady. *The Way of the World, Congreve.* Heroine of the play.

Worldly Wiseman, Mr. *Pilgrim's Progress, Bunyan.* One of Christian's difficulties.

Wray, Fnoch. *The Village, Crabbe.* A noble old man.

Wren, Jenny. *Our Mutual Friend, Dickens.* The dolls' dressmaker.

Wronghead, Sir Francis. *The Provoked Husband, Vanbrugh.* Hero of the play.

Yorick. *Tristram Shandy, Sterne.* A jester descended from the Yorick whose history is told by Hamlet.

Yesset. *Tristram and Yesset, Matthew Arnold.* A Welsh heroine of the olden time.

Zadec. *Abalom and Achitophel, Dryden.* Pseudonym for Saneft, Archbishop of Canterbury.

Zanoni. *Zanoni, Bulwer.* The mystical hero of the novel.

Zeluco. *Zeluco, Dr. J. Moore.* The prodigal hero of the novel.

Zobeide. *Arabian Nights.* The wife of the great Haroun al Raschid.

Zadig. *Zadig, Voltaire.* The Babylonian hero of the novel.

Zophiel. *Paradise Lost, Milton.* A swift-winged cherub.

Zuleika. *The Bride of Abydos, Byron.* Heroine of the poem.

NIBELUNGEN LIED.

This famous historic poem, which is called the *Iliad* of Germany, was produced about 1210, and is divided into two parts, and thirty-two lieds or cantos. The first part ends with the death of Siegfried, and the second part with the death of Kriemhild.

Siegfried, the youngest of the kings of the Netherlands, went to Worms to crave the hand of Kriemhild in marriage. While he was staying with Günther, king of Burgundy (the lady's brother), he assisted him to obtain in marriage Brunhild, queen of Issland, who announced publicly that he only should be her husband who could bea her in hurling a spear, throwing a huge stone, and in leaping. Siegfried, who possessed a cloak of invisibility, aided Günther in these three contests, and Brunhild became his wife. In return for these services Günther gave Siegfried his sister Kriemhild in marriage. After a time the bride and bridegroom went to visit Günther, when the two ladies disputed about the relative merits of their respective husbands, and Kriemhild, to exalt Siegfried, boasted that Günther owed to him his victories and his wife. Brunhild, in great anger, now employed Hagan to murder Siegfried, and this he did by stabbing him in the back while he was drinking from a brook.

Thirteen years elapsed, and the widow mar-

ried Etzel, king of the Huns. After a time she invited Brunhild and Hagan to a visit. Hagan, in this visit, killed Etzel's young son, and Kriemhild was like a fury. A battle ensued in which Günther and Hagan were made prisoners, and Kriemhild cut off both their heads with her own hand. Hildebrand, horrified at this act of blood, slew Kriemhild; and so the poem ends. Who was its author, or rather the man who cast it in its present form, is altogether unknown; the attribution of it to minnesingers of Kurenberg in Upper Austria now finds very little acceptance.

The *Nibelungen Lied* has been ascribed to Heinrich von Ofterdingen, a minnesinger; but it certainly existed before that epoch, if not as a complete whole, in separate lays, and all that Heinrich von Ofterdingen could have done was to collect the floating lays, connect them, and form them into a complete story.

The *Völsunga Saga* is the Icelandic version of the *Nibelungen Lied*. This saga has been translated into English by William Morris.

There is a continuation of the poem, called *Nibelungen Klage*, or Lament for the *Nibelungen*, a production much inferior to the *Nibelungen Lied*. In spite of the uncouth versification of this last, it exercises a strong fascination upon the reader, owing to the grandeur of its conception, its strong characterization, and tragic intensity.

THE MEANING OF CHRISTIAN NAMES.**CHRISTIAN NAMES OF MEN.**

Aaron, *Hebrew*, a mountain, a loft.
 Abel, *Hebrew*, vanity.
 Abraham, *Hebrew*, the father of many.
 Absalom, *Hebrew*, the father of peace.
 Adam, *Hebrew*, red earth.
 Adolphus, *Saxon*, happiness and help.
 Adrian, *Latin*, one who helps.
 Alan, *Celtic*, harmony; or *Slavonic*, a bound.
 Albert, *Saxon*, all bright.
 Alexander, *Greek*, a helper of men.
 Alfred, *Saxon*, all peace.
 Alonzo, form of Alphonso, *q. v.*
 Alphonso, *German*, ready or willing.
 Ambrose, *Greek*, immortal.
 Amos, *Hebrew*, a burden.
 Andrew, *Greek*, courageous.
 Anthony, *Latin*, flourishing.
 Archibald, *German*, a bold observer.
 Arnold, *German*, a maintainer of honor.
 Arthur, *British*, a strong man.
 Augustus, *Latin*, venerable, grand.
 Baldwin, *German*, a bold winner.
 Bardolph, *German*, a famous helper.
 Barnaby, *Hebrew*, a prophet's son.
 Bartholomew, *Hebrew*, the son of him who made the waters to rise.
 Beaumont, *French*, a pretty mount.
 Bede, *Saxon*, prayer.
 Benjamin, *Hebrew*, the son of a right and.

Bennet, *Latin*, blessed.
 Bernard, *German*, bear's heart.
 Bertram, *German*, fair, illustrious.
 Bertrand, *German*, bright raven.
 Boniface, *Latin*, a well doer.
 Brian, *French*, having a thundering voice.
 Cadwallader, *British*, valiant in war.
 Caesar, *Latin*, adorned with hair.
 Caleb, *Hebrew*, a dog.
 Cecil, *Latin*, dim-sighted.
 Charles, *German*, noble spirited.
 Christopher, *Greek*, bearing Christ.
 Clement, *Latin*, mild tempered.
 Conrad, *German*, able counsel.
 Constantine, *Latin*, resolute.
 Cornelius, *Latin*, meaning uncertain.
 Crispin, *Latin*, having curled locks.
 Cuthbert, *Saxon*, known famously.
 Dan, *Hebrew*, judgment.
 Daniel, *Hebrew*, God is judge.
 David, *Hebrew*, well-beloved.
 Denis, *Greek*, belonging to the god of wine.
 Douglas, *Gaelic*, dark gray.
 Duncan, *Saxon*, brown chief.
 Dunstan, *Saxon*, most high.
 Edgar, *Saxon*, happy honor.
 Edmund, *Saxon*, happy peace.
 Edward, *Saxon*, happy keeper.
 Edwin, *Saxon*, happy conqueror.
 Egbert, *Saxon*, ever bright.
 Elijah, *Hebrew*, God the Lord.
 Elisha, *Hebrew*, the salvation of God.
 Emmanuel, *Hebrew*, God with us

Enoch, *Hebrew*, dedicated.
 Ephraim, *Hebrew*, fruitful.
 Erasmus, *Greek*, lovely, worthy to be loved.
 Ernest, *Greek*, earnest, serious.
 Esau, *Hebrew*, hairy.
 Eugene, *Greek*, nobly descended.
 Eustace, *Greek*, standing firm.
 Evan or Ivan, *British*, the same as John.
 Everard, *German*, well reported.
 Ezekiel, *Hebrew*, the strength of God.
 Felix, *Latin*, happy.
 Ferdinand, *German*, pure peace.
 Fergus, *Saxon*, manly strength.
 Francis, *German*, free.
 Frederic, *German*, rich peace.
 Gabriel, *Hebrew*, the strength of God.
 Geoffrey, *German*, joyful.
 George, *Greek*, a husbandman.
 Gerard, *Saxon*, strong with a spear.
 Gideon, *Hebrew*, a breaker.
 Gilbert, *Saxon*, bright as gold.
 Gilles, *Greek*, a little goat.
 Godard, *German*, a godly disposition.
 Godfrey, *German*, God's peace.
 Godwin, *German*, victorious in God.
 Griffith, *British*, having great faith.
 Guy, *French*, a leader.
 Hannibal, *Punic*, a gracious lord.
 Harold, *Saxon*, a champion.
 Hector, *Greek*, a stout defender.
 Henry, *German*, a rich lord.
 Herbert, *German*, a bright lord.

Hercules, *Greek*, the glory of Hera or Juno.
 Heseekiah, *Hebrew*, cleaving to the Lord.
 Horace, *Latin*, meaning uncertain.
 Horatio, *Italian*, worthy to be beheld.
 Howell, *British*, sound or whole.
 Hubert, *German*, a bright color.
 Hugh, *Dutch*, high, lofty.
 Humphrey, *German*, domestic peace.
 Ignatius, *Latin*, fiery.
 Ingram, *German*, of angelic purity.
 Isaac, *Hebrew*, laughter.
 Jabez, *Hebrew*, one who causes pain.
 Jacob, *Hebrew*, a supplanter.
 James or Jacques, begruiling.
 Joab, *Hebrew*, fatherhood.
 Job, *Hebrew*, sorrowing.
 Joel, *Hebrew*, acquiescing.
 John, *Hebrew*, the grace of the Lord.
 Jonah, *Hebrew*, a dove.
 Jonathan, *Hebrew*, the gift of the Lord.
 Joseph, *German*, just.
 Joseph, *Hebrew*, addition.
 Joshua, *Hebrew*, a Savior.
 Josiah or Josias, *Hebrew*, the fire of the Lord.
 Julius, *Latin*, soft hair.
 Lambert, *Saxon*, a fair lamb.
 Lancelot, *Spanish*, a little lance.
 Laurence, *Latin*, crowned with laurels.
 Lazarus, *Hebrew*, destitute of help.
 Leonard, *German*, like a lion.
 Leopold, *German*, defending the people.
 Lewis or Louis, *French*, the defender of the people.
 Lionel, *Latin*, a little lion.
 Llewellyn, *British*, like a lion.
 Llewellyn, *Celtic*, lightning.
 Lucius, *Latin*, shining.
 Luke, *Greek*, a wood or grove.

Manfred, *German*, great peace.
 Mark, *Latin*, a hammer.
 Martin, *Latin*, martial.
 Matthew, *Hebrew*, a gift or present.
 Maurice, *Latin*, sprung of a Moor.
 Meredith, *British*, the roaring of the sea.
 Michael, *Hebrew*, Who is like God?
 Morgan, *British*, a mariner.
 Moses, *Hebrew*, drawn out.
 Nathaniel, *Hebrew*, the gift of God.
 Neal, *French*, somewhat black.
 Nicholas, *Greek*, victorious over the people.
 Noel, *French*, belonging to one's nativity.
 Norman, *French*, one born in Normandy.
 Obadiah, *Hebrew*, the servant of the Lord.
 Oliver, *Latin*, an olive.
 Orlando, *Italian*, counsel for the land.
 Orson, *Latin*, a bear.
 Osmund, *Saxon*, house peace.
 Oswald, *Saxon*, ruler of a house.
 Owen, *British*, well descended.
 Patrick, *Latin*, a nobleman.
 Paul, *Latin*, small, little.
 Paulinus, *Latin*, little Paul.
 Percival, *French*, a place in France.
 Percy, *English*, adaptation of "pierce eye."
 Peregrine, *Latin*, outlandish.
 Peter, *Greek*, a rock or stone.
 Philip, *Greek*, a lover of horses.
 Phineas, *Hebrew*, of bold countenance.
 Ralph, contracted from Randolph, or Randal, or Ranulph, *Saxon*, pure help.
 Raymond, *German*, quiet peace.
 Reuben, *Hebrew*, the son of vision.
 Reynold, *German*, a lover of purity.
 Richard, *Saxon*, powerful.
 Robert, *German*, famous in counsel.

Roderick, *German*, rich in fame.
 Roger, *German*, strong counsel.
 Roland or Rowland, *German*, counsel for the land.
 Rollo, form of Roland, *q. v.*
 Rufus, *Latin*, reddish.
 Samson, *Hebrew*, a little son.
 Samuel, *Hebrew*, heard by God.
 Saul, *Hebrew*, desired.

Penelope, *Greek*, a weaver.
Persis, *Greek*, destroying.
Philadelphia, *Greek*, brotherly love.
Philippa, *Greek, feminine of Philip.*

Phoebe, *Greek*, the light of life.
Phyllis, *Greek*, a green bough.
Polly, *variation of Molly, dim. of Mary, q. v.*
Priscilla, *Latin*, somewhat old.
Prudence, *Latin*, discretion.
Psyche, *Greek*, the soul.
Rachel, *Hebrew*, a lamb.
Rebecca, *Hebrew*, fat or plump.
Rhoda, *Greek*, a rose.
Rosa, or **Rose**, *Latin*, a rose.
Rosalie, or **Rosaline**, *Latin*, little Rosa.
Rosalind, *Latin*, beautiful as a rose.
Rosabella, *Italian*, a fair rose.
Rosamond, *Saxon*, Rose of pease.
Roxana, *Persian*, dawn of day.
Ruth, *Hebrew*, trembling, or beauty.
Sabina, *Latin*, sprung from the Sabine.

Salome, *Hebrew*, perfect.
Sapphira, *Greek*, like a sapphire stone.
Sarah, *Hebrew*, a princess.
Selina, *Greek*, the moon.
Sibylla, *Greek*, the counsel of God.
Sophia, *Greek*, wisdom.
Sophonra, *Greek*, of a sound mind.
Susan, *Susanna, Hebrew*, a lily.
Tabitha, *Syriac*, a roe.
Temperance, *Latin*, moderation.
Theodora, *Greek*, given by God.
Tryphena, *Greek*, delicate.
Tryphosa, *Greek*, delicious.
Victoria, *Latin*, victory.
Vida, *Hebrew*, *feminine of David.*
Ursula, *Latin*, a she bear.
Walburga, *Saxon*, gracious.
Winifred, *Saxon*, winning peace.
Zenobia, *Greek*, life from Jupiter.

MISUSE OF WORDS.

A and **An**. **A** is used before all words beginning with consonants except those beginning with silent **H**, or when the word beginning with **H** is accented on some other syllable than the first. **An** is to be used before all vowel sounds, silent **H**, and when the words beginning with **H** are accented on some other syllable than the first.

Ability (for capacity). Capacity is the power of receiving and retaining knowledge with facility. Ability is the power of applying knowledge to practical purposes.

Abortive (for unsuccessful). A plan may be abortive, but an act cannot.

Acceptance (for acceptance). "No word is more vague in its general acceptance," should be "in its acceptance."

Accident (for wound). "Witch hazel cures accidents."

Accredit (for credit). Few, except very bad writers, employ it as a robust substitute for credit or believe.

Administer (for deal). "The blows were administered [dealt] by Policeman Johnson."

Admire (for desire). It is an error to follow this verb with an infinitive, as "I admire to see a man consistent." Doubly wrong, therefore, is the expression, "I should admire to go with you."

Aggravate (for irritate, worry, annoy). "There would be no danger in aggravating Violet by this expression of pity." Better "irritating."

Agriculturalist (for agriculturist). The first is never correct.

Ain't. The only legitimate contraction of **I am not** is **I'm not**.

Allow (for say, assert, express opinion). We may allow or admit that which we have disputed, but of which we have been convinced; or we may allow certain premises as the basis of argument; but we assert, not allow, our own opinions.

Allude (for say or mention). **Allude** (from *ludo, ludere*, to play) means to indicate jocosely, to hint at playfully; and so to hint at in a slight, passing manner. **Allusion** is the byplay of language.

Alone (for only). **Alone** means "quite by one's self," and is always an adjective, differing herein from only, which is both an adverb and an adjective. In some cases the words may be used indifferently, but as a rule there is a marked distinction between alone and only, as "I did it alone," quite by myself; "an only daughter," "they differ on one point only."

Alternately (for by turns). This word should be used only in speaking of two objects or classes of objects. Whately rightly defines alternative as a choice between two objects.

Amateur (for novice). A professional actor who is new and unskilled in his art is a novice, and not an amateur. An amateur may be an artist of great experience and extraordinary skill.

Among (for between, when speaking of two). Gould says it should not be written amongst, but Worcester and Webster give both forms.

And. The commonest case in which it is violated is where and introduces a relative clause, no relative having occurred before, as "I have a book printed at Antwerp, and which was once possessed by Adam

Smith." And for to is a frequent misuse. "Try to do it," not "try and do it."

Anyways (for anyway). This is a frequent misuse.

Anywheres (for anywhere). Belongs to the class of words frequently misused.

Apprehend (for comprehend). Apprehend denotes the laying hold of a thing mentally, so as to understand it clearly, at least in part. Comprehend denotes the embracing or understanding it in all its compass and extent. We may apprehend many truths which we do not comprehend.

As (for that). "I don't know as [that] I can go."

Assurance (for fire insurance). Webster and Worcester agree that this word is limited to life insurance.

At (for by). "I bought it at auction" is correct English, but "it is to be sold at auction" is American only.

At all. A needless expletive, as "I did not like the play at all."

Avocation (for vocation). Vocation is one's pursuit, employment, business; avocation refers to incidental or pleasure pursuits.

Acoustics takes a singular verb. Names of sciences, such as mathematics, economics, politics, physics, gymnastics, etc., are now regarded as singular in number.

Awful (for very or for ugly). "The crowd present was awfully boisterous."

Bad. "I feel bad," not "I feel badly."

Balance (for rest, remainder). Balance refers to the ledger account, and does not properly convey the same meaning as remainder.

Banquet (for dinner, supper). A banquet is a public, sumptuous feast.

Bean, a word used by the uneducated instead of escort.

Been to (for been). "Where have you been to?"

Between (for among). Between is only for two—and twain. Carefully avoid such expressions as "Between every stitch."

Blame it on (for accuse). A common vulgarism.

Bountiful (for plentiful). Bountiful applies to persons, not to things, and has no reference to quantity.

Bourn (for place, instead of boundary). Frequently misused.

Bravery (for courage). Bravery is inborn, instinctive. Courage is the product of reason, calculation. Men who are simply brave are careless, while the courageous man is always cautious.

Bring (for fetch). Bring expresses motion toward, not away. A boy is properly told to take his books to school and to bring them home. A gardener may say to his helper, "Go and bring me yonder rake," but he might better say, "Fetch me yonder rake."

Bound (for determined). "He is bound to go West."

Burst (for burst). "The pipes burst during the cold weather."

But (for that or if). "I have no doubt but he will come to-night."

But that (for that). "I should not wonder but that was the case."

By (for upon). "By [upon] returning it to this office the finder will be rewarded."

Calculate (for expect). "I calculate [expect] to go to-morrow."

Can (for may). The boy says, "Can I go down street?" when he means "May I?" It is a question not of possibility but of permission.

Captain (for heading). Not sanctioned by good writers.

Casket (for coffin). A newspaper writer facetiously intimated that a man in a casket is not quite so dead as a man in a coffin.

Citizen (for person). A citizen is a person who has certain political rights. To say "Several citizens carried the victims of the accident into a shop," would be as absurd as to say, "several church members."

Come (for go). "I am coming to pay you a visit." Coming is right.

Commence to (for begin). Omit to. We begin to write. We commence writing.

Compulsion (for obligation). The former is a physical, the latter a moral, necessity.

Confess to (for confess). "I confess to a little curiosity on this subject." The natural rejoinder was, "Well, did the little curiosity absolve you?"

Construe (for construct). Writers construct; readers construe.

Consummate (for perform). "The marriage was consummated [performed] at Paris, last April."

Contemptible (for contemptuous). "To a gentleman who, at the close of a fierce dispute with Forson, exclaimed, 'My opinion of you is most contemptible, sir,' he retorted, 'I never knew an opinion of yours that was not contemptible.'"

Continual (for continuous). A continuous action is one which is uninterrupted; continual is that which is constantly renewed and recurring, though it may be interrupted as frequently as it is renewed.

Continue on is often erroneously used for continue. **Corporeal**, frequently misused for corporal, especially of punishment.

Cortege (for procession). A cortege is a procession, but every procession is not a cortege.

Credible (for credulous). "He is very credible [credulous]."

Creditable (for credible). "I am creditably [credibly] informed."

Dead and buried, dead and gone, and similar expressions are to be deprecated. Those who have died have usually been buried, and they are also gone.

Dearest. "A gentleman once began a letter to his bride, thus: 'My dearest Maria.' The wife replied: 'My dear John, I beg that you will mend either your morals or your grammar. You call me your "dearest Maria"; am I then to understand that you have other Marias?'"

Deduction (for induction). Induction is the mental process by which we ascend to the delivery of special truths; deduction is the process by which the law governing particulars is derived from a knowledge of the law governing the class to which particulars belong.

Demoralized (for scared). "The horse, in addition to losing all the hair on his tail, became considerably demoralized."

Departure. To take one's departure is a corruption of the accurate form, "to take one's leave."

Differ (with, in opinion; differ from, in appearance).

Die with (for die of). A man dies of smallpox, not with smallpox.

Dock (for wharf or pier). A dock is an open place without a roof, into which anything is received, and where it is inclosed for safety. The shipping around a city lies at wharfs and piers, but goes into docks.

Dome should be used only with has, had, or have; frequently misused for did.

Don't (for doesn't). Don't is the contraction for do not; doesn't the contraction for does not.

Doubt but (for doubt). "I have no doubt but that it is so."

Each and every (often followed by a plural verb). "When I consider how each of these professions are [is] crowded."

Emblem (for motto, sentiment). The figure is the emblem; not the accompanying motto.

Enthuse (for inspire). This word is not sanctioned by good usage.

Epithet (as necessarily degrading). Is usually and erroneously applied to derogative adjectives.

Equally as well (for equally well). "He plays equally as well [equally well]."

Every once in a while is an absurd and meaningless expression.

Every (for entire or all). "Rendered them every assistance," is absurdly wrong. Every is separated, and can be applied only to a whole composed of many individuals. It is always singular in number.

Execute does not mean to put to death. The law is executed when the criminal is hanged or imprisoned.

Expect (for suppose). Expect refers only to that which is to come, and which, therefore, is looked for. We cannot expect backward.

Female (for woman). A vulgar misuse of English.

From out (for from). "From out the castle."

Farther, further, Farther properly signifies distance, further degree or quantity. "As he walked farther he saw they were further along with the work."

Future (for subsequent). "Her future life was virtuous and fortunate."

First two. Often written and spoken, two first.

Gent and pants. "Let these words go together, like the things they signify. The one always wears the other."

Gentleman, lady (for man, woman). The most important rule to observe is that where adjectives are used the nouns must be man, woman — not a polite gentleman, or a lovely lady; but a polite man, a lovely woman.

Girl (for daughter). A father, on being requested by a rich and vulgar fellow for permission to marry "one of his girls," gave this rather crushing reply: "Certainly. Which one would you prefer — the waitress or the cook?"

Graduated (for was graduated). Students do not graduate, but are graduated. "I graduated [was graduated] in 1878."

Great, big. Frequently used for large.

Gums (for overshoes). "Emily is outside, cleaning her gums upon the mat."

Get signifies possession obtained by exertion. "He has [not has got] red hair."

Had ought (for ought). "You had ought to have been with me."

Haven't no. Omit no. Do not use two words meaning no in the same sentence.

Healthy, healthful, wholesome. Healthy refers to living things. "The man is healthy." "The food is wholesome." "The surroundings are wholesome."

Is (for are). "Their general scope and tendency is [are] not remembered at all."

It is I (not me). It is he (not him). It is she (not her).

Jewelry (for particular jewels). Its use in the latter sense is always to be preferred. Think of Cornelia pointing to the Graechi, "These are my jewelry."

Kids (for kid gloves). Colloquial and should not be used.

Last (for latest). "I have received your latest [not last] letter."

Lay (for lie). Remember that lay expresses transitive action, and lie means rest. We lay the book on the table and the book lies where we have placed it.

Learn (for teach). Learn means to acquire knowledge; teach, to impart it. This use of learn is found in respectable writers, but is now deemed improper, as well as inelegant.

Leave (without an object). "Anna Louise Carey will leave the stage," announces an exchange. "Thanks, Annie; we were afraid you would take the stage with you. So kind to leave it," rejoins the critic.

Leave (for let). "Leave [let] me be."

Let's (for let). "Well, farmer, let's you and I go by ourselves."

Liable. Frequently misused for likely.

Lit (for lighted). Much censured as an Americanism.

Look (followed by an adverb). "Miss Marlowe looked charmingly." Just as correct to say "Miss Marlowe looked gladly, or madly, or sadly, or delightedly."

Loan (for lend). The former word is a noun, the verbal form of which is to lend.

Mutual (for common). It should always convey a sense of reciprocity.

Nice is now applied to a sermon, to a jam-tart, to a young man, in short, to everything. The word should be used with extreme caution.

Nor (for than, after comparative). "Better nor fifty bushel."

Notion (for inclination). "I have a notion to go." Of course incorrect.

None is etymologically singular. "None but the brave deserves the fair," wrote Dryden.

Off (for off). "A yard off of the cloth."

Over his signature (for under his signature). A letter is issued under or by the authority of the writer's signature.

Particle (for at all). As "not a particle," for "not at all."

Past two weeks. Better, the last two weeks.
Patron (for customer) is wrong.
Pile (for amount). "He owed me quite a pile."
Party (for person). Avoid it.
Posted (for informed). A colloquialism in the United States. Must be used with caution.
Previous (for previously). "Previous to my going."
Prolific (for frequent). "It was a prolific [frequent] source of annoyance."
Promise (for assure). "I promise [assure] you I was astonished."
Proof (for evidence). Proof is the result of evidence. Quite is not to be used for nearly. Quite means wholly, completely, or thoroughly.
Raise (for bring up, educate). A peculiarity of the Southern states.
Real (for very). "Real [very] nice."
Reckon (for conjecture, conclude). Provincial and vulgar.
Restive (for restless). Restive signifies stubborn, unwilling to move, balky.
Remember (for recollect). We remember without effort. Recollect with some exertion.
Retire (for to go to bed). A vulgar but unfortunately very common euphemism.
Reverend (for the reverend). The article is absolutely required.
Right (for obligation). "The cars have as good a right to be stopped as the carriages."
Rise up (for rise). "He rose up and left the room."
Sabbath (for Sunday). Sunday is the name of the day, while Sabbath is the name of an institution.
Shall and Will. *Shall*, in an affirmative sentence, in the first person, and *will* in the second and third persons, merely announce future action. Thus, "I *shall* go to town to-morrow." "I *shall* wait for better weather." "We *shall* be glad to see you." "I *shall* soon be twenty." "We *shall* set out early, and *shall* try to arrive by noon." "You *will* be pleased." "You *will* soon be twenty." "You *will* find him honest." "He *will* go with us."
Shall, in an affirmative sentence, in the second and third person, announces the speaker's intention to control. Thus, "You *shall* hear me out." "You *shall* go, sick or well." "He *shall* be my heir." "They *shall* go, whether they want to go or not."
Will, in the first person, expresses a promise, announces the speaker's intention to control, proclaims a determination. Thus, "I *will* [I promise to] assist you." "I *will* [I am determined to] have my right." "We *will* [we promise to] come to you in the morning."
Shall, in an interrogative sentence, in the first and third person, consults the will or judgment of another; in the second person, it inquires concerning the intention or future action of another. Thus, "*Shall* I go with you?" "When *shall* we see you again?" "When *shall* I receive it?" "When *shall* I get well?" "When *shall* we get there?" "Shall he come with us?" "Shall you demand indemnity?" "Shall you go to town to-morrow?" "What *shall* you do about it?"
Will, in an interrogative sentence, in the second person, asks concerning the wish, and, in the third person, concerning the purpose or future action of others. Thus, "*Will* you have an apple?" "*Will* you go with me to my uncle's?" "*Will* he be of the party?" "*Will* they be willing to receive us?" "When *will* he be here?"
Will cannot be used interrogatively in the first person singular or plural. We cannot say, "*Will* I go?" "*Will* I help you?" "*Will* I be late?" "*Will* we get there in time?" "*Will* we see you again soon?"
Official courtesy, in order to avoid the semblance of compulsion, conveys its commands in the *you will* form instead of the strictly grammatical *you shall* form. It says, for example, "You will proceed to Key West, where you will find further instructions awaiting you."
A clever writer on the use of *shall* and *will* says that whatever concerns one's beliefs, hopes, fears, likes, or dislikes, cannot be expressed in conjunction with *I will*. Are there no exceptions to this rule? If I say, "I think I *shall* go to Philadelphia to-morrow," I convey the impression that my going depends upon circumstances beyond my control; but if I say, "I think I *will* go to Philadelphia to-morrow," I convey the impression that my going depends upon circumstances within my control—that my going or not depends on mere inclination. We certainly must say, "I fear that I *shall* lose

it;" "I hope that I *shall* be well;" "I believe that I *shall* have the ague;" "I hope that I *shall* not be left alone;" "I fear that we *shall* have had weather;" "I *shall* dislike the country;" "I *shall* like the performance." The writer referred to, asks, "How can one say, 'I *will* have the headache?' " I answer, very easily, as every young woman knows. Let us see: "Mary, you know you promised John to drive out with him to-morrow; how *shall* you get out of it?" "Oh, I *will* have the headache!" We request that people *will* do thus or so, and not that they *shall*. Thus, "It is requested that no one *will* leave the room."
Shall is rarely, if ever, used for *will*; it is *will* that is used for *shall*. Expressions like the following are common: "Where *will* you be next week?" "I *will* be at home." "We *will* have dinner at six o'clock." "How *will* you go about it?" "When *will* you begin?" "When *will* you set out?" "What *will* you do with it?" In all such expressions, when it is a question of mere future action on the part of the person speaking or spoken to, the auxiliary must be *shall* and not *will*.
Should and *would* follow the regimen of *shall* and *will*. *Would* is often used for *should*; *should* rarely for *would*. Correct speakers say, "I *should* go to town to-morrow if I had a horse." "I *should* not; I *should* wait for better weather." "We *should* be glad to see you." "We *should* have started earlier, if the weather had been clear." "I *should* like to go to town, and *would* go if I could." "I *would* assist you if I could." "I *should* have been ill if I had gone." "I *would* I were home again!" "I *should* go fishing to-day if I were home." "I *should* so like to go to Europe!" "I *should* prefer to see it first." "I *should* be delighted." "I *should* be glad to have you sup with me." "I knew that I *should* be ill." "I feared that I *should* lose it." "I hoped that I *should* see him." "I thought that I *should* have the ague." "I hoped that I *should* not be left alone." "I was afraid that we *should* have had weather." "I knew I *should* dislike the country." "I *should* not like to do it, and *will* not [determination] unless compelled."
Shut (for shut). "Shut the door to."
Somewheres (for somewhere). "The farmer had gone out somewhere."
Sparrowgrass, a corruption of asparagus.
Spoonful (for spoonfuls). "Two spoonful [spoonfuls] at bedtime."
Stopping (for staying). "At what hotel are you stopping?"
Such (for so). "Such an extravagant young man," for "So extravagant a young man."
Than (for when). "The admiral was hardly in the channel than [when] he was driven to sea by the storm."
Think for (for think). "You will find that he knows more than you think for."
Those sort of things. "I never approved of those [that] sort of things."
Those who (for they that). That and those, as demonstrative adjectives, refer backward, and are not therefore well suited for forward reference.
To (for at). "When I was to [at] home."
Try and (for try to). "I will try and [to] come to-morrow."
Unique (for beautiful). A thing is unique when it is the only one of its kind, whether it is good or bad, ugly or beautiful.
Vengeance (for revenge). Vengeance should never be ascribed save to God or to men acting as the executors of his righteous doom.
Vulgar (for immodest). The word vulgarity was formerly thought to mean indecent; now it simply means bad manners. Vulgar people are low, mean, coarse, plebeian, no matter where the wheel of fortune has placed them.
Wasn't (for wasn't). Heard only as a vulgarism.
Was (for is, of, general truths). "Truth is eternal." In the expression of general and necessary truths the present tense is to be preferred to the past tense.
Ways (for way). "He was a long ways [way] behind."
What (for that). "I don't know but what [that] I shall go."
Which (for that). "She would be all which [that] the emperor could desire."
Widow woman (for widow). Uselessly redundant.
You was (for you were). You takes the plural form of a verb.

DICTIONARY OF AUTHORS.

ABBREVIATIONS: *Am.*, American; *Br.*, British; *Dan.*, Danish; *Eng.*, English; *J.*, flourished; *Fr.*, French; *Ger.*, German; *Gr.*, Greek; *Ir.*, Irish; *It.*, Italian; *Nor.*, Norwegian; *Port.*, Portuguese; *Prus.*, Prussian; *Rom.*, Roman; *Russ.*, Russian; *Scot.*, Scottish; *Sp.*, Spanish; *Sw.*, Swedish.

The numbers after each name indicate the years of birth and death.

Where the pronunciation is obvious, and follows regular English rules, no phonetic spelling is given, but in cases where doubt as to place of accent might arise, the accented syllable is marked. Where the pronunciation departs from regular English rules, as in many foreign names, the correct pronunciation is approximated by phonetic spelling, in parenthesis, following the name. In some instances, diacritical marks in accordance with the system used in Webster's Dictionary are employed to indicate the pronunciation more correctly.

Abbott, Jacob, 1808-79. *Am.* A prolific juvenile writer who published more than 200 volumes; among which are "The Rollo Books," the "Rainbow," and "Lucky Series," and a series of histories of America. He wrote in collaboration with his brother, John S. C. Abbott, a series of juvenile histories. His style is fascinating for the young and his books are still popular.

Abbott, John S. C., 1805-77. *Am.* historical and pedagogical writer, author of numerous popular works, all readable but of little critical value. Among his most noted books are "The French Revolution," "The History of Napoleon Bonaparte," "Napoleon at St. Helena," and "The History of the Civil War in America."

About (a-booh), Edmond, 1828-85. *Fr.* novelist and journalist, a brilliant, witty, but uneven writer, elected to the French Academy in 1885. His most popular stories are, "The King of the Mountains," "The Man with a Broken Ear," and "The Notary's Nose."

Ade, George, 1866- . . . *Am.* Journalist and author; born in Indiana, educated at Purdue University, entered upon journalism in Chicago; first attracted notice by his "Stories of the Streets and Town," from which he constructed "Artie." His next books were "Pink Marsh," in dialect, and "Fables in Slang." Author of the librettos for "The Sultan of Sulu," and "Peggy from Paris," and of the rural comedy "The County Chairman."

Addison, Joseph, 1672-1719. *Eng.* poet and essayist; one of the great masters of English prose, unexcelled in natural dignity and propriety of style. His poems "The Letter," and "The Campaign," and also his Tragedy of Cato, "were exceedingly popular during his lifetime. But his most original and permanent production is the series of sketches in the *Spectator*, especially the portrayal of Sir Roger de Coverley, which is one of the most delightful character creations in English literature.

Ælfric (Æl-frick), The Grammarian, about 950-1021. Old English writer, best known by his "Homilies," written in pure and vigorous English. He was given the title, Grammarian, on account of his Latin Grammar and "Colloquium," written in English for the use of the boys of England.

Æschylus (æ-ski-lus), 525-456 B.C. *Gr.* poet. With Sophocles and Euripides, whom he immediately preceded, considered the greatest of Athenian tragic poets; wrote a great number of plays of which seven tragedies now remain; of these the greatest is "Agamemnon," which rivals Sophocles' "King Œdipus" for first place among all Greek tragedies.

Aguilera (ah-gwe-lay-ra), Ventura Ruiz, 1820-81. *Sp.* lyric poet, called the Spanish Beranger. Among his most important works are the collections of poems entitled "Elegías," "Armonías y Cantares," "La Arcadia Moderna," and "Legenda de Noche Buena."

Ainsworth, William Harrison, 1805-82. *Eng.* novelist. His first novel was "Sir John Cheverton," published 1826, soon followed by "Rookwood," "Crichton," and "Jack Sheppard." He then devoted himself to magazine writing for a time. Among his later works are "Lancaster Witches," "The Star Chamber," "The Spanish Match," and "Merrie England." His works, which were very popular in England, are characterized by vividness of scene and directness of action, English scenery and the historical element being made prominent.

Aird, Thomas, 1802-76. *Scot.* poet. Educated at University of Edinburgh. His best known poem is the "Devil's Dream." While highly commended by Carlyle and other critics, his works, though of undoubted merit, have failed to win much popular praise.

Akenside, Mark, 1721-70. *Eng.* author; forerunner of the romantic poets. At age of twenty-three wrote the didactic poem "Pleasures of the Imagination," which gave him much celebrity, but his later poetry did not add to his reputation. Was educated in medicine, but an unsuccessful practitioner, though his medical treatises won for him distinction as a scholar.

Aksakoff (Ak-sah'kof), Ivan Sergeyevich, 1823-86. Russian writer and journalist, Panslavist leader and best known poet of the cause.

Alamanni (ah-la-man'ne), Luigi, 1495-1556. *It.* poet, born in Florence, but, like Dante, spent many years in exile. Conspired against Giulio De Medici, later Pope Clement, was detected, and fled to France. His works comprise didactic poems, imitations of Virgil and the Iliad, translations, and vigorous satires.

Alarcon y Mendoza (ah-lar-kon' e men-do'tha), Don Juan Ruiz de, 1580-1639. *Sp.* dramatist, born in Mexico. Among his many dramas, the most important are "Walls have Ears," and "The Weavers of Segovia." Ticknor says: "He is to be ranked with the very best Spanish dramatists during the best period of the national theater."

Alcæus (al-se'e-us), 620-580 B.C. *Gr.* lyric poet, contemporary of Sappho. Wrote many odes, hymns, and songs, of which only fragments remain; invented the stanza called Alcaic, which was later successfully imitated and established in the Latin language by Horace.

Aleman (al-man), Gr. poet; founder of Doric lyric poetry and forerunner of the bucolic poets, flourished about 670 B.C.

Alcott, Amos Bronson, 1799-1888. *Am.* educational reformer and philosopher of the Transcendental School. Established a school at Boston, 1828, which he taught according to his then novel methods, but soon discontinued on account of vehement opposition. He then lectured to spread his views, winning much attention. Failing in an attempt to found a community at Harvard, Mass., he went to Boston and soon to Concord, living the life of a peripatetic philosopher. He published "Orphic Sayings" in the *Dial*, the Transcendental organ; also a number of books, among which are "Concord Days," "Table Talk," and an essay on Ralph Waldo Emerson.

Alcott, Louisa May, 1832-88. *Am.* novelist and juvenile writer, daughter of A. Bronson Alcott; began as a teacher, was a volunteer army nurse during the Civil War; first attracted notice by "Little Women," 1869, her best and most popular production. The more noteworthy of her numerous juvenile stories are "An Old Fashioned Girl," "Little Men," and "Jo's Boys."

Alden, Mrs. Isabella McDonald, 1841- . . . *Am.* author who writes under the pen-name "Pansy," author of much fiction, including the widely known "Pansy Books," a juvenile series of over sixty volumes.

Aldrich, Thomas Bailey, 1836- . . . *Am.* poet and novelist, sometimes styled the "American Herrick," on account of his graceful verse. Editor of *Atlantic Monthly*, 1881-90, succeeding W. D. Howells. His published verse includes, "The Bells," "Cloth of Gold," "Flower and Thorn," "Fampinea," "Wyndham Towers." His best known novels are "Marjorie Daw," and "The Story of a Bad Boy," but his prose, like his verse, while finished, lacks constructive power.

Alfieri (awf'lee-ay're) Vittorio, Count, 1749-1803. The most important Italian dramatic poet. His greatest works are his tragedies, "Virginia," "Agamemnon," "Oreste," "Timoleone," "Maria Stuarda," and "Saul," his masterpiece, all classic in form and lofty in sentiment.

His supreme aim was to unite "artistic truth with moral truth, beauty with morality."

Allibone, Samuel Austin, 1816-89. Am. author; most important works are his "Critical Dictionary of English Literature," "Poetical Quotations," and "Prose Quotations."

Almeida-Garrett (*al-may'e-da-gahr-red'*), Viscount d', 1799-1854. Author and statesman, the greatest Portuguese poet of the nineteenth century. His most noteworthy poems are the epic "Camões," the lyric epic, "Dona Branca," and his last poem "Fallen Leaves," which is unexcelled in emotional power in the Portuguese literature.

Almqvist (*alm/'kwist*), **Karl J. L.**, 1793-1866. Versatile Swedish writer but of unstable character; first made famous by romances in his "Book of the Thorn Rose." He wrote many lyrics, dramas, and novels, as well as many books on history, religion, and ethics, often contradictory in teaching. He is unexcelled in power of language, and his dramas show great tragic force.

Anacreon (*a-nak'-re-on*), 561-476 B. C. Gr. poet, one of the most highly esteemed lyricists of Greece; was exceedingly popular and great public honors were paid to him after his death. Of his many books of flowing verse only two complete poems remain.

Andersen (*ahn'-der-sen*), **Hans Christian**, 1805-75. Celebrated Danish writer, the "Children's Poet." His parents were poor and he had but little education. At the age of fourteen he went to Copenhagen, worked hard and produced little, but at the end of ten years was able to publish his first book. In 1835 he began the first of the "Fairy Tales" which were to bring him world-wide fame. He wrote many novels, travels, and some poetry without much success; but in 1840, in his "Picture Books without Pictures," he revealed his genius for interpreting child nature and many books of stories followed, most of which have been translated into many languages and are the delight of children throughout the world.

Anderson, Rasmus Bjorn, 1846- . . . Am. scholar and author. Educated at Luther College and University of Wisconsin. Professor of Scandinavian Languages in University of Wisconsin 1875-83. U. S. Minister to Denmark 1888-89. Among his books are "The Scandinavian Languages," "Viking Tales of the North," and translations of the works of Brandes and Bjornson.

Anna Comnena, 1083-1148? Author of a valuable work on Byzantine history. Daughter of the Emperor Alexis I, educated at Constantinople; conspired against the succession of her brother to the throne; was imprisoned in a convent, where she wrote her history, the "Alexiad," a work of great merit.

Annunzio (*an-noon'-tseo*), **Gabriele d'**, 1864- . . . Most widely known contemporary Italian writer. He published his first book of verse at fifteen; other promising volumes followed almost yearly; his first novel appeared in 1889, followed by several powerful stories which added greatly to his fame; among these are: "The Triumph of Death," "The Virgins of the Rocks," and "The Flame of Life." He has recently turned to the drama, producing plays modeled on classic Greek tragedy, the most popular ones, "La Gioconda" and "Francesca da Rimini."

Antimachus (*an-tim'-a-kus*). Greek poet and critic, contemporary of Plato.

Apuleius (*ap-u'-lee-yus*), **Lucius**. Roman satirist of the second century, whose reputation survives in his "Metamorphoses, or The Golden Ass," a satire on the vices of the age.

Arbuthnot, John 1667-1735. Scot. author and physician, friend of Pope and Swift. His fame was established by his "History of John Bull," and "Martinus Scriblerus." The former is a satire on politics, the latter ridiculous pedantry in all its forms.

Archilochus (*ar-ki'-lo-kus*), 714?-676 B. C. First of the Greek lyric poets. A native of the island of Paros. Ranked with Homer among the ancients. Is considered the inventor of the poetry of the passions. Bitter satire characterized his poems, of which only mere fragments remain.

Argyll (*ar-'gil'*), **George John Douglas Campbell**, eighth Duke of, 1823-1900. Eng. author and statesman, member of Gladstone's Cabinet. Best known as a writer by his masterly defense of theism entitled "The Reign of Law." All his works show great ability, among which are "Primeval Man," "Antiquities of Iona," "Organic Evolution," and a volume of poems, "The Burden of Belief."

Ariosto (*ar-yis'-to*), **Ludovico**, 1474-1533. Famous Italian poet, author of one of the world's greatest epic

poems, "Orlando Furioso," based on the old chivalric romances.

Aristophanes (*ar-is-tof'-a-nees*), 450-385 B. C. Gr. comic poet. Author of many comedies in verse, among them: "The Knights," "The Clouds," "The Wasps," "The Birds," "The Frogs." He was first among the brilliant comedy writers of his time, and in wit, humor, invention, and skill in using language has never been surpassed.

Arnold, Sir Edwin, 1832- . . . English author, educated at Oxford. His most remarkable work is "The Light of Asia," a poetic exposition of Buddhism. He has also published "Pearls of the Faith," "The Light of the World," "The Tenth Muse," "East and West," and "The Voyage of Ithobal." He has popularized the philosophy of India. He excels in paraphrase and translation but lacks the originality of the great poets.

Arnold, Matthew, 1822-88. Eng. poet, essayist, and critic, son of Dr. Thomas Arnold of Rugby. While the volume of his verse is not large, in the opinion of many he will yet be ranked next to Tennyson and Browning among Victorian poets. His "Essays in Criticism" establish his place among great critics. His style is admirable and his thought of a high order.

Asbjornsen (*as-byern'-sen*), **Peter Christen**, 1812-85. Nor. author and zoologist. Celebrated for his writings in folk lore, published in his "Norwegian Folk Tales" and "Norwegian Fairy Tales and Folk Legends."

Ascham (*as'-kam*), **Roger**, 1515-68. English writer and classical scholar, educated at Cambridge. In 1545, in defense of the sport of archery, he wrote "Toxophilus," which ranks among the classics of pure English.

Aubigne (*o-ben'-yee*), **Theodore Agrippa d'**, 1550-1630. Fr. historian and militant poet. A classical scholar, Huguenot soldier, and one of the striking figures of the Reformation. His "Universal History" and other historical works are very valuable but extremely satirical. His greatest work is the group of poems called "The Tragedies" in which are unsurpassed descriptions of the horrors of religious warfare.

Auerbach (*ow'-er-bok*), **Berthold**, 1812-82. Ger. novelist, of Jewish parentage; a founder of the German tendency novel of the present day; author of some forty volumes of fiction, much overweighted with philosophy. His reputation was established by his romance, "On the Heights." He excels in description but is weak in construction of plot.

Augier (*o-zhe'-a'*), **Emile**, 1820-89. Fr. dramatist, author of a large number of successful plays. He is vigorous in style, possesses great moral earnestness, is a sincere student of nature, and will probably rank as the greatest French dramatist of his century.

Aurelius (*aw'-ree'-yus*), **Marcus**, 121-180. Roman emperor and noted Stoic philosopher. Author of a moral work entitled "Meditations," which is considered the finest product of Stoic philosophy.

Austen, Jane, 1775-1817. Eng. novelist. Her novels truthfully portray the everyday life of the middle class in her time, and show fine discrimination of character. "Sense and Sensibility," "Pride and Prejudice," "Emma," and "Mansfield Park" were published 1811-16. "Northanger Abbey" and "Persuasion" appeared after her death.

Austin, Alfred, 1835- . . . Eng. poet, author of many volumes of verse, among which are "The Seasons," "Sayonara," "Songs of England," "A Tale of True Love." Although lacking the imagination of the greater poets, he has written graceful verse. Was made Poet-Laureate of England, 1896.

Aytoun (*ay'-toon*), **William E.**, 1843-65. Scot. poet. Established his reputation by his "Lays of the Scottish Cavalier." Following this were: "Fermilian," "Bothwell," and "Scottish Ballads"; his longer works are in the measure and manner of Walter Scott. His poems are marked by simplicity and rapidity of movement, while his prose tales contain a strong vein of humor which made them widely popular.

Bachelor, Irving, 1859- . . . An American novelist, born in Pierpont, N. Y.; was graduated at St. Lawrence University in 1882; became a reporter of the Brooklyn Times. Wrote "D'ri and I" and "Eben Holden." His novels are notable for originality, and for fresh and fascinating pen pictures of American life.

Bacon, Francis, 1561-1626, Viscount St. Albans. One of the most remarkable men of whom any age can boast; a reformer of philosophy, by founding it on the observation of nature, after it had consisted, for many centuries, of scholastic subtleties and barren dialectics. Born in London, his father being Sir Nicholas Bacon, lord keeper of the great seal. He contracted an advanta-

geous marriage; was made solicitor-general and then attorney-general; in 1617 became lord keeper of the seals; in 1618 was made lord high chancellor and created Baron of Verulam, and in 1621, Viscount St. Albans. He might have lived in splendor, without degrading his character by those acts which stained his reputation. He was accused before the House of Lords of having received money for grants of offices and privileges under the seal of state. He was unable to justify himself, and, desiring to avoid the mortification of a trial, confessed his crimes and threw himself on the mercy of the peers, beseeching them to limit his punishment to the loss of the high office which he had dishonored. The lords sentenced him to pay a fine of £40,000, and to be imprisoned in the Tower during the pleasure of the king. He was also declared forever incapable of place or employment, and forbidden to sit in Parliament or to appear within the verge of the court. He survived his fall only a few years. Efforts have been made to prove him the real author of the works of Shakespeare, and the controversy still goes on.

Bagehot, Walter, 1826-1877. An English writer on political economy and government.

Bain, Alexander, 1818-1877. Born in Aberdeen, professor of logic, and twice Lord Rector in the university, where he was much esteemed by and exercised a great influence over his pupils; his chief works: "The Senses and the Intellect," "The Emotions and the Will," and "Mental and Moral Science."

Balzac, Honore de, 1799-1850. Native of Tours, France; one of the most brilliant as well as prolific novel writers of modern times; his productions are remarkable for their sense of reality; they show power of observation, warmth, and fertility of imagination, and subtle and profound delineation of human passion, his design in producing them was to make them form part of one great work, the "Human Comedy," the whole being a minute dissection of the different classes of society.

Bancroft, George, 1800-1891. An American statesman, diplomatist, and historian, born in Massachusetts; his chief work, "The History of the United States," issued finally in six volumes.

Barbauld, Anna Letitia (nee Aiken), 1743-1825. A popular and accomplished English authoress; wrote "Hymns in Prose for Children," "Evenings at Home," in which she was assisted by a brother.

Barham, Richard Harris, 1788-1845. His literary name, Thomas Ingoldsby; born at Canterbury; minor canon of St. Paul's; friend of Sidney Smith; author of "Ingoldsby Legends," published originally as a series of papers in *Bentley's Miscellany*.

Barrie, James Matthew, 1860- . . . A Scotch writer with a rich vein of humor and pathos; began his literary career as a contributor to journals; produced, among other works, "Auld Licht Idylls," "A Window in Thrums," and "Margaret Ogilvie," deemed by some likely to prove the most enduring work he has yet written.

Baudelaire, Charles (de-de-lar'), 1821-1867. French poet of the decadent school, born in Paris; distinguished among his contemporaries for his morbid pessimism and his influence on others of his class; was a writer of prose as well as verse.

Beattie, James, 1735-1803. A Scottish poet and miscellaneous writer. He is remembered for his poem, "The Minstrel," and in 1770 his celebrated "Essay on Truth," for which the University of Oxford conferred on him the degree of LL.D.; and George III. honored him, when on a visit to London, with a private conference and a pension.

Beaumont, Francis, 1585-1615. English dramatic poet, contemporary of Shakespeare; bred for the bar, but devoted to literature; was a friend of Ben Jonson; in conjunction with his friend Fletcher, the composer of a number of plays, about the separate authorship of which there has been much discussion.

Bede or Bede, 672?-735. Surnamed "The Venerable," an English monk and ecclesiastical historian; spent his life devoted to quiet study and learning; his most important work, the "Ecclesiastical History" of England, written in Latin, and translated by Alfred the Great.

Bellamy, Edward, 1850-1898. An American writer, born in Chicopee Falls, Mass. He was educated in Germany; admitted to the bar; was on the staff of the *Evening Post* of New York in 1871-1872; and on his return from the Sandwich Islands in 1877, he founded the *Springfield News*. He is best known by his novel "Looking Backward," a socialistic work.

Beranger (de-ron-zha'), Pierre Jean de, 1780-1857. A

celebrated French song-writer, the first of his countrymen who in that department rose to the high level of a true lyric poet; his first struggles with fortune were a failure; has been compared to Burns, but he lacked both the fire and the humor of the Scottish poet.

Berkeley, George, 1685-1753. Irish bishop, the interest in whom centers in his philosophic teaching, known as Idealism.

Besant, Sir Walter, 1836-1901. English man of letters, eminent chiefly as a novelist of a healthily realistic type; wrote a number of novels jointly with James Rice, and is the author of "All Sorts and Conditions of Men," as well as short stories.

Bjornson (be-jorn'son), Bjornstjerne, 1832- . . . A Norwegian novelist, poet, and dramatist, born at Kvikne, Norway. He published his first story, "Synnøve Solbakken," in 1857; "Arne" and "A Happy Boy," established his reputation as a novelist.

Black, William, 1841-1898. A Scottish journalist and novelist, born in Glasgow, received his education at private schools. In 1874 he abandoned the career of journalism, which he had successfully pursued; visited the United States in 1876. His novels contain fine descriptions of scenery. They are very popular.

Bloomfield, Robert, 1766-1823. An English poet, by trade a shoemaker; author of "The Farmer's Boy," a highly popular production, translated into French and Italian; spent his last days in ill-health, struggling with poverty, which brought on dejection of mind.

Boccaccio (bök-kah't'cho), Giovanni, 1313-1375. Celebrated Italian novelist, author of the "Decameron." He was the friend of Petrarch, and was among the first to establish the study of Greek literature in Italy.

Bo denstedt, Friedrich Martin, [1819-1892. A German poet and miscellaneous writer.

Boileau, Nicolas, 1636-1711. A French poet, born at Paris.

Boswell, James, 1740-1795. A Scotch biographer; the son of Lord Auchinleck; born in Edinburgh. In 1791 appeared his "Life of Johnson," a work which he had been long preparing, and which at once gave readers the same delight that it has ever since inspired. By this time Boswell's health had greatly suffered from his too convivial habits, and he died in London, May 19, 1795.

Boucicault, Dion, 1822-1890. A dramatic writer, author of popular Irish pieces, as "The Colleen Bawn" and "The Shaughraun."

Bowles, William Lisle, 1762-1850. An English poet, born in Northamptonshire; his sonnets, by their "linking" as Professor Saintsbury has it, "of nature's aspect to human feeling," were much admired by Coleridge, and their appearance is believed to have inaugurated a new era in English poetry as developed in the Lake School.

Boyesen, Hjalmar Hjorth, 1848-1895. An American novelist, born at Frederiksværn, Norway. After completing his university studies at Christiania and Leipzig, he came to the United States in 1869 and was editor of a Norwegian journal in Chicago. He returned to Europe in 1872 and studied Germanic Philology at Leipzig two years; then returning to this country, was Professor of German in Cornell University for six years, and of Germanic Languages and Literature in Columbia University till his death.

Braddon, Miss (Mrs. John Maxwell), 1837- . . . A popular novelist, born in London; authoress of "Lady Audley's Secret," "Aurora Floyd," and some 50 other novels; contributed largely to magazines.

Brandes, Georg, 1842- . . . A Danish literary critic of Jewish family; born in Copenhagen, where he graduated at the University in 1864. Several books on æsthetic and philosophic subjects brought on him a charge of skepticism which was not removed by an epoch-making series of lectures, delivered before large audiences. In 1882 he returned to Copenhagen, his countrymen having guaranteed him an income of 4,000 crowns, with the one stipulation that he should deliver public lectures on literature.

Bremer, Fredrika, 1801-1865. A Swedish novelist, was born near Abo, Finland; was brought up at Arsta, about 20 miles from Stockholm. She varied her literary labor by long journeys in Italy, England, the United States, Greece, Palestine.

Bronte, Charlotte, 1816-1855. Born at Thornton, Yorkshire; removed with her father, at the age of four, to Haworth, a moorland parish in the same county, where she lived most of her days; spent two years at Brussels as a student; on her return, in conjunction with her sisters, prepared and published a volume of poems under the pseudonyms respectively of "Currier,

Ellis, and Acton Bell," which proved a failure. Nothing daunted, she set to novel writing and her success was instant; first "Jane Eyre," then "Shirley," and then "Villette," appeared, and her fame was established. In 1864 she married her father's curate, Mr. Nicholls, but her constitution gave way, and she died.

Browning, Elizabeth Barrett, 1806-1861. A distinguished English poetess, regarded by some as the greatest which England has ever produced; wrote "Sonnets from the Portuguese," "Aurora Leigh," "The Seraphim, and Other Poems." In 1846 she was married to Robert Browning.

Browning, Robert, 1812-1889. One of the greatest of the Victorian poets; born in Camberwell, England. His father, who was a clerk in a bank, had the boy educated in a school at Peckham, after which he attended lectures at University College. At the age of twenty he traveled on the Continent and resided for some time in Italy, where he made diligent study of its mediæval history. In 1846 he married Elizabeth Barrett, and settled with her in Florence, where they remained for nearly fifteen years. Recognition of his literary fame, which came slowly, was made in 1867, when he was elected an honorary fellow of Balliol, and an M. A. of Oxford. His masterpiece is "The Ring and the Book." He died in Venice and was buried in Westminster Abbey between Cowley and Chaucer.

Bryant, William Cullen, 1794-1878. Am. poet and journalist; born in Mass.; entered Williams College, read law, admitted to the bar in 1815; published "Thanatopsis," in 1817. It was probably composed in 1811. Became editor of the New York *Evening Post* in 1828.

Bryce, James, 1838- . . . An Irish historian, born in Belfast. He graduated at Oxford in 1862, winning a fellowship in Oriel, and subsequently practiced law in London. From 1870 till 1893 he was Regius Professor of Civil Law in Oxford, and has had a distinguished political career; wrote "The American Commonwealth."

Bulwer-Lytton, Edward, Lord Lytton, 1803-1873. An English novelist, playwright, and poet, born in London; was the son of Gen. Earle Bulwer and Elizabeth B. Lytton, heiress of Knebworth, to whose estates he succeeded in 1843, and assumed the surname of Lytton. In 1866 he was raised to the peerage as Baron Lytton. Altogether his works exceed 60 in number, and fill 110 volumes.

Bunyan, John, 1628-1688. English author; the son of a tinker, he followed that vocation and led for many years a wandering life; served in the Parliamentary army; joined the Non-Conformists in 1653, and in 1655 became a minister; he wrote "The Life and Death of Mr. Badman," and "Grace Abounding," masterpieces of realistic literature; was imprisoned for more than twelve years, and during that time wrote his "Pilgrim's Progress," his masterpiece.

Burdette, Robert Jones, 1844- . . . An American journalist and humorist, born in Greensboro, Pa. He served in the Union army during the Civil War. He is famous for humorous newspaper skits of rare variety, charm, and unrepentitious freshness. He was licensed as a Baptist clergyman in 1887.

Burger, Gottfried August, 1747-1794. A German poet, born in Mölmerswende, Anhalt; died in Göttingen.

Burnett, Frances Hodgson, 1849- . . . An Anglo-American novelist, born in Manchester, England. Her family removed to Tennessee in 1865. She early wrote stories. In 1873 she married Dr. Burnett, and, in 1875, settled in Washington. In 1898 she was granted a divorce from her husband, with the right to resume her maiden name. Her chief work is "Little Lord Fauntleroy."

Burton, Robert, 1577-1640. An English clergyman, born in Leicestershire; scholar of Christ Church, Oxford; lived chiefly in Oxford, spending his time there for some 50 years in study; author of "The Anatomy of Melancholy," which he wrote to alleviate his own depression of mind, a book which is a perfect mosaic of quotations on many classical topics familiar and unfamiliar, from every manner of source.

Burns, Robert, 1759-1796. Scotland's national poet; born in a clay-built cottage less than two miles south of the town of Ayr. A master of beautiful and pathetic expression in Scottish dialect, his poems are most remarkable for the justness of the feelings expressed and for their truthfulness and freshness derived from Burns' insight into life and nature. The Cottar's Saturday Night," "To Mary in Heaven," "Highland Mary," "Scots Wha Hae W' Wallace Bled," "The Jolly Beggars," "Tam O' Shanter," are among his best poems and typical of his style.

Burritt, Elihu (the learned blacksmith), 1811-1879.

Am. scholar, journalist, lecturer, and reformer; the son of a shoemaker, and apprenticed to a blacksmith, he devoted all of his spare time to study, and eventually mastered eighteen languages.

Byron, George Gordon Noel, Lord, 1788-1824. Eng. poet. In 1815 he married Anne Isobel Millbank, but separated from her and left England in 1816; in Italy he formed a *Maison* with the beautiful Countess Guiccioli; espousing the cause of the Greeks in their struggle for liberty, he left for Greece in 1823, and died, 1824, at Missolonghi from the effects of exposure while preparing for the siege of Lepanto. "Don Juan," "Manfred," "Childe Harold," and "Prisoner of Chillon," are his best works.

Cable, George Washington, 1844- . . . An American novelist; born in New Orleans, La.; received a common school education; entered the volunteer service of the Confederate army in 1863 and served till the close of the war, when he obtained employment in a mercantile house, and was on the editorial staff of the New Orleans *Picayune* from 1865-1879. His sketches of creole life in *Scribner's Monthly* proved so successful that in 1879 he turned his entire attention to literature. He has written "Creole Days," "Strange True Stories of Louisiana," "The Cavalier," and "Bylow Hill."

Cædmon, fl. 670. An English poet, the fragment of a hymn by whom, preserved by Bede, is the oldest specimen of English poetry extant.

Caine, Thomas Henry Hall, 1853- . . . An English novelist and dramatist; born in Runcorn, Cheshire, Eng. His novels, which are striking in their pictures of human motives and passions, are read throughout the world. Wrote "The Manxman," and "The Christian."

Calderon de la Barca, 1600-1681. The great Spanish dramatist, born at Madrid; entered the army, and served in Italy and Flanders, producing the while dramas which were received with great enthusiasm; took holy orders, and became a canon of Toledo, but to the last continued to write poems and plays; he has been ranked by competent critics among the foremost dramatists in both ancient and modern times.

Camões, 1524-1580. The poet of Portugal, born at Lisbon, studied at Coimbra; fell in love with a lady of high rank in Lisbon, as she with him, but whom he was not allowed to marry; left Lisbon, joined the army, and fought against the Moors; volunteered service in India, arrived at Goa, and got into trouble with the Portuguese authorities; went to Macao, and consoled himself by writing his "Lusiad"; coming home he lost everything but his poem; died neglected and in poverty; the title of the poem is properly "The Lusians," or the Lusitanians, i. e., the Portuguese, and is their national epic, called, not inaptly, the "Epos of Commerce"; it has been translated into most European languages, and into English alone no fewer than six times.

Campbell, Thomas, 1777-1844. A Scotch poet; born in Glasgow; was interred at Poets' Corner, in Westminster Abbey, close to the tomb of Addison. Some of his poems have gained a permanent place in literature, as "Hohenlinden" and "Ye Mariners of England."

Carleton, Will, 1845- . . . An American poet, born in Hudson, Mich. He is best known in literature by his ballads of home life, many of them having gained great popularity.

Carlyle, Thomas, 1796-1881. Author, born in Ecclefechan, Dumfriesshire, Scotland. He was the eldest son of James Carlyle, a mason, afterward a farmer, and was intended for the Church, with which object he was carefully educated. His first literary productions were short biographies and other articles for the "Edinburgh Encyclopedia." His career as an author may be said to have begun with the issue in monthly portions of his "Life of Schiller" in the *London Magazine* in 1822, this work being enlarged and published separately in 1825. The largest and most laborious work of his life was "The History of Friedrich II. of Prussia, called Frederick the Great," the last two volumes of which appeared in 1865, and after this time little came from his pen. While still in Scotland the sad news reached him that his wife had died suddenly in London. Toward the end of his life he was offered a government pension and a baronetcy, but declined both. "Sartor Resartus," "French Revolution," and "Past and Present," are of his works.

Carr, Alice, 1820-1871. An American poetess, born near Cincinnati, O. In 1850 she, with her sister, Phoebe, removed to New York city, where they lived during the rest of their lives. She died in New York city.

Carr, Phoebe, 1824-1871. An American poetess and prose writer, sister of Alice; born in Cincinnati, O. She died in Newport, R. I.

Catullus, Valerius, 86-57 B. C. A famous Roman poet. He wrote two marriage hymns—one called "The Nuptials of Peleus and Thetis," and "Attis," a weird and imaginative poem.

Cervantes Saavedra, Miguel de, 1547-1616. Author of "Don Quixote," and one of the greatest writers of modern times; born in Alcalá de Henares. Two of his plays survive—"Life in Algiers" and "Numantia," the first worthless, the second the admiration of such authors as Goethe. He wrote also "Exemplary Tales" and "Voyage to Parnassus."

Channing, William Ellery, 1780-1842. An American Unitarian preacher and writer; born in Newport, R. I.; studied at Harvard College. He wrote "Negro Slavery," "Self-Culture," "Character and Writings of Fénelon," "Character and Writings of Milton." He was a vigorous and eloquent writer of lofty moral tone.

Chateaubriand (*shah-to-bre-on*), François Auguste, Vicomte de, 1768-1848. A French author and politician; born in St. Malo, Brittany. His style did much to mold French literature. His memoirs of himself, "Mémoires d'outre-Tombe," appeared after his death; wrote also "René," "Atala," and "Les Natchez."

Chaucer, Geoffrey, 1340-1400. "The father of English poetry"; born in London. His most celebrated work, "The Canterbury Tales," was written at different periods between 1373 and 1400. It consists of a series of tales in verse, supposed to be told at the Tabard Inn by a company of pilgrims to the shrine of St. Thomas (Becket) at Canterbury in 1386. In its pages we get such pictures of English life and English ways of thought in the fourteenth century as are found nowhere else. He died in London, and was buried in Westminster Abbey.

Chesterfield, Philip Dormer Stanhope, Earl of, 1694-1773. Statesman, orator, and man of letters; eldest son of the third earl, born in London; sat in the House of Commons from 1715 to 1726; was an opponent of Walpole; held office under the Pelhams; in 1748 retired, on account of deafness, or perhaps disgust, into private life; celebrated for his "Letters to his Son," models of elegance, though of questionable morality.

Churchill, Winston, 1871- . . . An American author; born in St. Louis, Mo. He was graduated from the United States Naval Academy in 1894, and became an editor of the *Army and Navy Journal* the same year. He wrote "Richard Carvel," "The Crisis," and "The Crossing."

Cicero, Marcus Tullius, 106-43 B.C. A Roman orator; born in Arpinum. He was the greatest Roman orator, one of the greatest the world has known, and a statesman and patriot of singularly pure conduct and motives. He was executed at the instance of the Triumvirate—Octavianus, Antony, and Lepidus.

Clarke, James Freeman, 1810-1898. An American Unitarian clergyman and author; born in Hanover, N. H.; settled in Boston, Mass. in 1841, and was pastor of the Church of the Disciples. He wrote "Orthodoxy: Its Truths and Errors," "Steps of Belief," "Ten Great Religions," "Manual of Unitarian Belief," and "Vexed Questions." From 1867 to 1871 he was Professor of Natural Religion at Harvard.

Clemens, Samuel Langhorne, 1835- . . . Best known by his pen name of Mark Twain. An American humorist; born in Florida, Mo. His first book, "The Jumping Frog"; visit to Europe described in "Innocents Abroad"; "Tom Sawyer," "Tramp Abroad"; with Warner produced a drama entitled "The Gilded Age"; compiled the "Memoirs of General Grant."

Clough, Arthur Hugh, 1819-1861. A lyric poet, born at Liverpool; educated at Rugby, under Dr. Arnold; was at Oxford at the time of the Tractarian movement; traveled in Europe; on his return he was appointed examiner in the Education Office; falling ill from overwork he went abroad again, and died at Florence. He wrote notably, "Dyspepsia," the "Boothe of Tober-na-Vuolich" and "Amours de Voyage," besides shorter poems.

Coleridge, Samuel Taylor, 1772-1834. English poet, philosopher, and critic; educated at Christ's Hospital; had Charles Lamb for schoolmate; at Cambridge devoted himself to classics; falling into debt, enlisted as a soldier, but after four months his friends procured his discharge; gave himself up to a literary life; married, and took up house near Wordsworth, in Somersetshire, where he produced the "Ancient Mariner," "Remorse," and the first part of "Christabel"; preached occasionally in Unitarian pulpits; lectured in London in 1806; when there took to opium, broke off the habit in 1816, and went to stay with the Gillmans at Highgate as their guest, under whose roof, after four years' confinement

to a sick-room, he died. Among his works were "The Friend," his "Biographia Literaria," "Aids to Reflection," "Confessions of an Inquiring Spirit," "Literary Remains," "Table Talk," and "Kubla Khan."

Collins, Wilkie, 1824-1889. English novelist, born in London; tried business, then law, and finally settled to literature; his novel "The Woman in White" was the first to take with the public, and was preceded and succeeded by others which have insured for him a high place among the writers of fiction.

Congreve, William, 1670-1729. English comic dramatist, born near Leeds; "The Old Bachelor" first brought him into repute; the production of "Love for Love" and the "Mourning Bride," a stilted tragedy, added immensely to his popularity, but his comedy "The Way of the World" being coldly received, he gave up writing plays, and wrote only a few verses afterwards.

Cooper, James Fenimore, 1789-1851. An American novelist, born in Burlington, N. J.; having a passion for the sea, he entered the navy as a midshipman in 1806, but in three years resigned his commission, married, and settled to literature; his novels achieved wide popularity; showed him an expert in the narration of events, the description of scenes, as well as in the delineation of character. His well known "Leather Stocking" series of Indian tales have been translated into every European language. He also wrote "Wing and Wing," "Red Rover," "The Spy," and "The Pilot."

Corelli, Marie, 1864- . . . An English authoress; born in Italy; was adopted by Dr. Charles Mackay, the author. She was educated in London; on beginning her literary career adopted as a pen name that which subsequently became her legal name. Among her works are "The Romance of Two Worlds," "The Sorrows of Satan," "Ziska," "Jane," "Thelma," and "The Master-Christian."

Cornellie (*Kor nã'y*), Pierre, 1606-1684. One of the greatest of French tragedians, born at Rouen; was bred for the bar, but gave it up for literature; threw himself at once into the drama; began by dramatizing an incident in his own life, and became the greatest dramatic author of France. His best tragedies are "The Cid," which indeed is his masterpiece; "Horace," "Cinna," "Polyeucte," "Rodogune," and "Le Menteur."

Cowper, William, 1781-1800. An English poet, born in Berkhamstead; was the great-nephew of the Lord-Chancellor Cowper. In addition to translating Homer, he wrote "The Task," the best of all his poems; "Tirocinium," "Truth," "Table Talk," "John Gilpin's Ride," "The Progress of Error," and "To Mary."

Crabbe, George, 1754-1832. An English poet; born in Aldborough, Suffolk, died in Trowbridge, Wilts.

Craik, Dinah Maria Mulock, 1826-1887. An English authoress; born in Stoke-upon-Trent in 1826. In 1866 she married George Lillie Craik, a partner in the publishing house of Macmillan and Company; wrote "John Halifax, Gentleman," "Olive," "Alice Learmont," "Agatha's Husband," "Christian's Mistake," and "Poems of Thirty Years."

Crawford, Francis Marion, 1854- . . . An American novelist; born in Italy; son of Thomas Crawford. He was educated at Concord, N. H.; Trinity College, Cambridge; Karlsruhe, and Heidelberg. At Rome he devoted himself to the study of Sanskrit, and during 1879-1880 was engaged in press work at Allahabad, India, where he was admitted to the Catholic Church. Wrote the National Ode at the Centennial of the American Constitution, Sept. 17, 1887. His works, which are numerous, are chiefly novels.

Cressy, Sir Edward, 1812-1878. Chief-justice of Ceylon; author of "The Fifteen Decisive Battles of the World," and "Imperial and Colonial Constitutions of the British Empire." Professor of history in London University.

Crockett, Samuel Rutherford, 1862- . . . A Scotch novelist; born in Duchrae, New Galloway. He was a tutor and university pupil-teacher at an early age; but a volume of verse, "Dulce Dor," and the "Stickit Minister," a volume of stories, showed literature to be his vocation.

Curtis, George William, 1824-1892. An American author; born in Providence, R. I., February 24, 1824. He was an early abolitionist, and a leader in the Republican party from the first; for many years the editor of *Harper's Weekly*, and the writer of the "Editor's Easy Chair" in *Harper's Monthly*, besides "True and I," "Trumps," "Potiphar Papers," and "Eulogy on Wendell Phillips." He was also a lecturer of great popularity.

Da Costa, Isaac, 1798-1860. A Dutch poet, born in Amsterdam, of Jewish parents; became a Christian, and after the death of Bilderdijk was chief poet of Holland. Wrote "Prometheus," "Poems," and "Festive Songs."

Dahlgrén, Fredrik August, 1816-1895. A Swedish poet and dramatist; born in Nordmark, August 20, 1816. He has written many dialect songs and ballads. He has translated a great many dramas from foreign languages, and has written a history of the Swedish stage.

Dalén, Olof von, 1708-1763. A Swedish poet and historian; "father of modern Swedish poetry"; born in Vinberga, in Holland.

Dana, Richard Henry, 1787-1879. An American poet and critic; editor of the *North American Review*, author of the "Dying Raven," "The Buccaneer," and other poems. Did his best work as a critic.

Dante (a contraction of Durante), Alighieri, 1265-1321. Greatest Italian poet; born in Florence. He is famous as the author of the "Divina Commedia," containing awful word pictures of hell.

Daudet (do-day), Alphonse, 1840-1897. A noted French novelist of great versatility, born at Nîmes, of poor parents; wrote poems and plays; worked up into his novels characters and situations that had come under his own observation; has been likened to Dickens in his choice of subjects and style of treatment. Died suddenly.

Davis, Richard Harding, 1864- . . . An American novelist and contributor to periodical literature; born in Philadelphia. He graduated at Lehigh University, and entered journalism in Philadelphia. He has, since 1891, been constantly engaged writing stories and descriptions and as war correspondent; has written "Captain Macklin," "Ransom's Folly," "Soldiers of Fortune," "King's Jackal," "Cuba in War Time," "Princess Aline," "Our English Cousins," etc.

Defoe, Daniel, 1661-1731. An English writer; born in London. In 1719 appeared the most popular of all his works, "Robinson Crusoe," the favorable reception of which was immediate and universal. Wrote also "True-Born Englishman," a vindication of William III.

De Quincey, Thomas, 1785-1859. An English author; born in Manchester; entered the University of Oxford in 1803, where he remained till 1808. While there, he contracted the habit of eating opium, to which he remained a bounden slave for many years. The consequences were fearful, as he himself relates in his principal work, "The Confessions of an English Opium-Eater." He was a very prolific writer; but his works are mostly essays, and papers on historical, literary, and miscellaneous topics, such as "Letters to a Young Man" and the very valuable "Literary Reminiscences."

Dibdin, Charles, 1745-1814. Musician, dramatist, and song writer; born in Southampton; began life as an actor; invented a dramatic entertainment consisting of music, songs, and recitations, in which he was the sole performer, and of which he was for most part the author; wrote some 30 dramatic pieces, and, it is said, 1,400 songs; his celebrity is wholly due to his sea-songs. Was the author of "Tom Bowling," "The Waterman," and "The Quaker."

Dickens, Charles, 1812-1870. Celebrated English novelist, born at Landport, Portsmouth; son of a navy clerk, latterly in great straits; was brought up amid hardships; was sent to a solicitor's office, as "an office boy," learned shorthand, and became a reporter, a post in which he learned much of what afterwards served him as an author; wrote sketches for the *Monthly Magazine* under the name of "Boz" in 1834, and the "Pickwick Papers" in 1836-1837, which established his popularity; these were succeeded by "Oliver Twist," "Nicholas Nickleby," "Old Curiosity Shop," "A Tale of Two Cities," and many others. They were all written with an aim. He was a little man, with clear blue, intelligent eyes, a face of most extreme mobility, and a quiet shrewdness of expression.

Diderot, Denis, 1713-1784. A French philosopher, foremost of the "Encyclopedists."

Dobson, Austin, 1840- . . . An English poet; born in Plymouth. His poems are inimitable in their artistic finish and grace of fancy; has written "Vignettes in Rhyme," "Proverbs in Porcelain," "Old World Idylls," lives of Steele and Goldsmith.

Dodge, Mary Abigail, 1830-1896. An American journalist and author; born in Hamilton, Mass. From 1865 to 1867 she was one of the editors of *Our Young Folks*. Besides numerous contributions to current literature, she has written, under the pseudonym of "Gail Hamilton," a number of well known books, such as "Gala Days" and "Woman's Wrongs."

Dodge, Mary Elizabeth Mapes, 1833-1905. An American editor, author, and poet; born in New York city. From 1873 she was the editor of *St. Nicholas* (magazine), New York. Her best known works are "Hans Brinker, or the Silver Skates," which has gone through many editions and been translated into five foreign languages.

Doyle, Sir Arthur Conan, 1859- . . . A British novelist; born in Edinburgh, Scotland. He was educated at the University of Edinburgh, where he graduated as Doctor of Medicine. After practicing for some years, the success of several of his books induced him to enter literature. Among his works are "Adventures of Sherlock Holmes," "The Hound of the Baskervilles," and "The Great Boer War." He was knighted in 1902.

Dryden, John, 1631-1700. A celebrated English poet, "glorious John," born in Northamptonshire, of a good family of Puritan principles; educated at Westminster School and Cambridge; poet-laureate; prior to which and afterwards he produced a succession of plays for the stage, which won him great popularity, after which he turned his mind to political affairs and assumed the role of political satirist. On the accession of James II. he became a Roman Catholic, and wrote "The Hind and the Panther"; at the Revolution he was deprived of his posts, but it was after that event he executed his translation of Virgil, and produced his celebrated odes and "Fables." His "Ode to St. Cecilia's Day" is his best lyric, and his "Satires" are masterpieces.

Dumas (du-mah), Alexandre, 1802-1870. The Elder; a French romancist. He was the grandson of a French marquis and a San Domingo negress. The works which bear his name amount to some 300 volumes, including several dramas; but the only claim he could lay to a great number of the productions issued under his name was that he either sketched the plot or revised them before going to press. "Monte Christo," "Three Musketeers," and "Forty-five," are his best novels.

Dumas, Alexandre, 1824-1895. The Younger; a French dramatist and romancist, son of the preceding; best French dramatist of the 19th century.

Du Maurier (du mo-re-ay), George Louis Palmella Bussan, 1834-1896. Artist, caricaturist, and novelist; born in Paris, France. He studied art in Paris and Antwerp, and going to London he began to draw on wood for *Once a Week*, the *Cornhill Magazine*, etc., and also exhibited at the Royal Academy. He subsequently joined the *Punch* staff, and became famous through his weekly drawings for that publication. He also illustrated a large number of books, including Thackeray's "Esmond" and "Ballads." In 1891 appeared his first novel, "Peter Ibbetson," and in 1894 he issued "Trilby," a story which had great popularity both in book form and on the stage. He died in London.

Ebers (ay-bers), Georg Moritz, 1837-1898. A German Egyptologist and novelist; born in Berlin; was educated at Fröbel's school, and studied law at Göttingen. He afterward devoted himself to the study of Egyptology at Berlin. His visit to Egypt resulted in the discovery of the celebrated hieratic medical "Papyrus Ebers." Among his works are "Egyptian Kings," and the novels, "Uarda," "Serapis," and "The Sisters."

Edgeworth, Maria, 1767-1849. An English novelist; wrote "Castle Rackrent," "Leonora," and "Stories of Ireland."

Edwards, Amelia Blandford, 1831-1892. An English Egyptologist and novelist; wrote "My Brother's Wife," "Hand and Glove," and "A Thousand Miles up the Nile."

Eggleston, Edward, 1837-1902. An American author; born in Vevay, Ind. In fiction he achieved celebrity, with stories of life in Southern Indiana in pioneer days; as a historian he made a specialty of American subjects. Wrote "Hoosier Schoolmaster" and "The Beginnings of a Nation."

"Elliot, George," 1819-1880. The assumed literary name of Mary Ann, or, as she preferred to write the name in later years, Marian Evans, an English novelist. Her first literary undertaking was the continuation of a translation of Strauss's "Life of Jesus," completed in 1846. In 1849 she went abroad, returning to England next year, and in 1851 she took up her abode as a boarder in the house of John Chapman, editor of the *Westminster Review*. It was not, however, till 1857, that she came prominently into public notice, when the first of a series of tales entitled "Scenes from Clerical Life," appeared in *Blackwood's Magazine*. The credit of authorship of "Adam Bede," her first novel,

was openly ascribed to several persons of varying note and was claimed by others of more or less modesty and honesty. The secret soon began to leak out. Months before her second novel, "The Mill on the Floss," was published, it was well known, among literary circles at least, that George Eliot was none other than Marian Evans, the Westminster reviewer. By this time was established that close association and literary fellowship with the talented philosophical writer, George H. Lewes, which terminated only with the death of the latter but a little more than two years before her own. In May, 1880, she married John Cross. Others of her novels are "Silas Marner," "Romola," "Daniel Deronda," and "Middlemarch."

Emerson, Ralph Waldo, 1803-1882. An American philosophic author; born in Boston; he graduated at Harvard College in 1821, and was minister of the Second Unitarian Church of Boston; but soon after formed peculiar views with regard to forms of worship, abandoned his profession and, retiring to the quiet village of Concord, devoted himself to the study of the nature of man and his relation to the universe. He was one of the most eminent American philosophers of the Transcendental school; wrote "Representative Men," "The American Scholar," "English Traits," "Nature," also volumes of "Essays" and poems.

English, Thomas Dunn, 1819-1902. An American author; born in Philadelphia, Pa. Was a member of Congress in 1891-1895; author of "Ben Bolt," an exceedingly popular ballad, "Old Glory," "Poems," etc.

Ennius, 239-169 B.C. An early Roman poet, the father of Roman epic poetry, born in Rudia, Calabria; promoted the study of Greek literature in Rome; of his poems, dramatic and epic, only a few fragments are extant.

Epicharmus, 540-430 B.C. A Greek philosopher and poet, born in the island of Cos; studied philosophy under Pythagoras; conceived a taste for comedy; gave that branch of the drama developed and artistic form, and received the name of "Father of Comedy."

Epictetus, 60-120? A celebrated Stoic philosopher, originally a slave; lived and taught at Rome, but after the expulsion of the philosophers retired to Nicopolis in Epirus; was lame, and lived in poverty; his conversations were collected by Arrian, and his philosophy in a short manual under the Greek name of "Encheiridion (Handbook) of Epictetus."

Epizay (ay-pe-nay), Madame d', 1726-1783. A French writer, unhappily married in her youth; her "Mémoires et Correspondence" give a lively picture of her times.

Euripides, 480-406 B.C. The latest of the three great Greek tragic poets, born at Salamis, of poor parents; first trained as an athlete, and then devoted himself to painting, and eventually, to poetry; of his plays the "Alcestes," "Bacchæ," "Iphigenia at Aulis," "Electra," and "Medea" may be mentioned; he won the tragic prize five times.

Evans, Augusta Jane (Mrs. Wilson), 1835- . . . An American novelist; born in Columbus, Ga. Among her works are "Beulah," "St. Elmo," "Vashti," and "A Speckled Bird" (1902).

Fawcett, Edgar, 1847- . . . An American author; born in New York city; was graduated at Columbia College in 1867; latterly resides in London.

Fénelon (ay-non'), François de Salignac de la Mothe, 1651-1715. A French prelate; born in the Château de Fénelon, province of Périgord, France; was educated at Plessis College, in Paris, and at the seminary of St. Sulpice, where he received holy orders in 1675. In 1695 he was created Archbishop of Cambrai. A theological dispute with Bossuet, his former instructor, terminated in his condemnation by Pope Innocent XII. He was the author of numerous works on philosophy, theology, and belles-lettres, among which are "Telemachus," "Fables," and "Epitome of the Lives of the Ancient Philosophers."

Fessler, Ignaz Aurelius, 1756-1839. A Hungarian author. A Capuchin priest; his secret communication to Joseph II. in 1781 regarding the monasteries, brought about a radical reformation of them. Appointed Professor of Oriental Languages in Lemberg University, he had to leave the post and Austria for his atheistic and seditious tragedy "Sidney." He wrote an excellent "History of the Hungarians."

Féuillet (feh-yay') Octave, 1821-1890. A French novelist. He was elected to the Academy in 1863. He wrote "The Romance of a Poor Young Man," "Monsieur de Camors," "Julia de Trécor," and "History of a Parisienne."

Field, Eugene, 1850-1896. An American journalist; born in St. Louis, Mo.; by his poems and tales in the press he won a high reputation; wrote "Book of Western Verse," "Book of Profitable Tales," "With Trumpet and Drum," etc.

Fielding, Henry, 1707-1754. First great English novelist. After ill success as playwright and lawyer he embarked upon a literary career, in which he won fame. His three important works are "Tom Jones," "Joseph Andrews," and "Amelia."

Firdausi, 935-1020. The greatest of Persian epic poets. He wrote the "Shāh Nāmā," one of the greatest epics of literature. It traces the history of Persia.

Fiske, John, 1842-1901. An American historian; born in Hartford, Conn.; was graduated at Harvard in 1863. He was for a while lecturer on philosophy at Harvard, and in 1872-1879 assistant librarian. He wrote "Outlines of Cosmic Philosophy," "Destiny of Man," "Idea of God as Affected by Modern Knowledge," "Origin of Evil," and other works popularizing the philosophy of evolution; in history, "Beginnings of New England," "American Revolution," "Discovery of America," "Essays, Literary and Historical," etc.

Fitzgerald, Edward, 1809-1883. An English poet; born in Bredfield House, near Suffolk, England. His writings are for the most part remodeled translations of poems in other languages; among them "Six Dramas of Calderon" and "The Rubāyat of Omar Khayyam," a translation that won for Fitzgerald great celebrity, although at first published anonymously.

Flaubert (floo-bayr'), Gustav, 1821-1890. A French novelist; born and died in Rouen, France.

Fletcher, John, 1579-1625. English dramatist, the son of a bishop of London; collaborated with Beaumont in the production of their plays. "The Faithful Shepherdess," "The Two Noble Kinsmen," "Maid's Tragedy," and "Philaster," are the best of the 54 dramas produced by the two poets.

Fontenelle (font-nel'), Bernard le Bovier de, 1657-1757. A miscellaneous French writer, born at Rouen; a nephew of Cornelle, whose life he wrote; became secretary of the Académie des Sciences; died in his hundredth year; author of "Dialogues of the Dead," in imitation of Lucian, and "Conversations on the Plurality of Worlds."

Ford, Paul Leicester, 1865-1902. An American author; born in Brooklyn, N. Y. He wrote "Washington" and "Franklin"; edited "Writings of Thomas Jefferson" and "The Federalist"; wrote the novels, "Janice Meredith" and "The Honorable Peter Stirling."

Fox, John, 1516-1587. Martyrologist, born at Boston, Lincolnshire; his most famous work is his "Book of Martyrs," first published in Latin on the Continent, the noble English version appearing in 1563.

Frederic, Harold, 1856-1898. An American journalist and novelist; born in Utica, N. Y. He was for many years London correspondent of the "New York Times"; wrote "Damnation of Theron Ware."

Freeman, Edward Augustus, 1823-1892. An English historian; born in Harborne, in Staffordshire. His first publication was a "History of Architecture," especially devoted to Gothic architecture. "History of the Norman Conquest" is his great work. He wrote also "Growth of the English Constitution," "Comparative Politics," "The Reign of William Rufus," "History of the Saracens," and "Ottoman power in Europe."

He was appointed Professor at Oxford, 1884. His contributions to the periodicals of his day were frequent and of great weight, and he was a fiery and unvarying champion of national freedom.

Fröytag (fri-tahg), Gustav, 1816-1896. A German author; born in Kreuzburg, Prussia. Among his works outside of the drama may be mentioned "Ancestors," a cycle of six stories portraying the German civilization from the beginning of historic times. He died in Wiesbaden, Germany.

Froissart (froy-sar'), Jean, 1337-1410? A French chronicler; born in Valenciennes, in Hainault. He began at twenty to write the history of the wars of the time, and made several journeys to examine the theater of the events he was about to relate. His "Chronicles" form a work of permanent value, because of their accurate and impartial account of important events of the 14th century. They narrate events connected with France, England, Scotland, Spain, Brittany, etc. He is said to have died in poverty at Chimay.

Froude, James Anthony, 1818-1894. An English historian; born in Devonshire, England. In the beginning of the Tractarian controversy he was a close friend of Newman. He took orders in the Anglican Church,

He has written several standard historical works, the best among which are "History of England from the Fall of Wolsey to the Defeat of The Spanish Armada," "Thomas Carlyle," "Cæsar," and "Short Studies on Great Subjects." Froude's chief fault lay in wrongly adapting facts to sustain his own views. He was the successor of Edward A. Freeman in the professorship of Modern History at Oxford.

Gaboriau (*ga-bo-ree-o*), **Emile**, 1835-1873. A French writer of detective stories. His early years were a succession of vicissitudes; the army, the law, and even the church, were in turn the objects of his inconstant attentions till at last he wrote his way to fame and fortune. He wrote "The Lerouge Affair" and "Monsieur Lecoq."

Garland, Hamlin, 1860- . . . An American story writer; born in La Crosse, Wis. His best novel is "Rose of Dutcher's Coolly"; "Prairie Folks," "A Little Norsk," and "Crumbling Idols," are others of his works.

Gaskell, Elizabeth Cleghorn, 1810-1865. An English author; born in Chelsea, London, England. She married in 1832 the Rev. William Gaskell, a Unitarian clergyman, then recently appointed minister of Cross Street Chapel, Manchester.

Gautier (*go-tay*), **Theophile**, 1811-1872. A French poet and prose writer. He applied himself at first, but without much success, to painting; and then turned to literature. He was a prince of short story writers. He was drawn early to feuilleton writing, and for more than thirty years contributed to the Paris newspapers criticisms on the theater and the salon. His poems are considered by critics his claim to fame.

Gay, John, 1685-1732. An English poet. His verse tales, the "Fables," are the best of their kind in English.

Gellert, Christian Furchtegott, 1715-1769. A German poet; born in Saxony. After spending some years in teaching, he received a professorship at Leipzig, where he lectured on poetry, eloquence, and morals. Gellert came to occupy this position partly on account of his writings, but more on account of his personal character. He wrote "Fables and Tales." He died in Leipzig.

Gibbon, Edward, 1737-1794. An English historian; born in Putney; studied at Westminster School, Magdalen College, Oxford, and Lausanne. In 1763 he went to Italy; and while sitting amid the ruins of the Capitol at Rome, he conceived the idea of writing the history of the decline and fall of that city. In the meantime he joined M. Deyverdun, a Swiss scholar, in publishing a journal called "Literary Memoirs of Great Britain," which met with no success. In 1772 he began his celebrated history of the "Decline and Fall of the Roman Empire," a history of the world for thirteen centuries.

Gifford, William, 1756-1826. An English man of letters; born in Ashburton, Devonshire; wrote a celebrated satire "The Baviad," and a year later "The Mæviad"; the work of translation, and the editing of Elizabethan poets occupied him till 1809, when he became the first editor of the *Quarterly Review*.

Gilbert, William Schwenck, 1836- . . . Barrister, notable as a play writer and as the author of the librettos of a series of well known popular comic operas set to music by Sir Arthur Sullivan.

Goethe (*goh'te*), **Johann Wolfgang von**, 1749-1832. Greatest Ger. poet and author; dramatist, scientist, and art critic; the greatest man, it is alleged, the world has seen since Shakespeare left it; born in Frankfurt-on-the-Main; died in the small duchy of Weimar; was the son of an imperial councillor and of Elizabeth Textor, daughter of the chief magistrate of the city, a woman of bright intelligence, who was only eighteen at the time of his birth. Spiritually and bodily he was the most perfectly formed, symmetrically proportioned, justly balanced, and completely cultivated man perhaps that ever lived, whose priceless value to the world lies in the harmony of his philosophy and life; to smaller people the union of the utmost scientific skepticism and the highest spiritual faith and worth in one person appears entirely and absolutely antagonistic. His life lies latent in his successive works, above all in "Götz," in "Werther," in "Faust," and in "Meister." Of the last of the four works named, Carlyle, who has done more than anyone else yet to bring Goethe near us, once said, "There are some ten pages of that book that, if ambition had been my object, I would rather have written than all the literature of my time."

Goldsmith, Oliver, 1728-1774. English man of letters; born at Pallas or Pallasmore, Ireland, and celebrated in English literature as the author of the "Vicar of Wakefield"; produced poems, "The Traveller" and "The Deserted Village," besides comedies, such as "She Stoops to Conquer"; lived extravagantly, and died in debt

wrote histories of Greece and Rome, and "Animated Nature"; was a writer of graceful and natural simplicity.

Goodrich, Samuel Griswold, 1798-1860. Pseudonym Peter Parley; an American author; born in Ridgefield, Conn. His "Peter Parley" books won great popularity, evidenced by the fact that the pen-name was attached to more than seventy spurious volumes. He wrote "Poems," "Sow Well and Reap Well," "Men and Things I Have Seen."

Gosse, Edmund, 1849- . . . Poet, essayist, and critic; born in London; author of "History of Eighteenth Century Literature," a collection of lyrics, and a series of monographs, in particular, "Life of Gray."

Grant, Robert, 1852- . . . An American author; born in Boston, Mass.; was graduated from Harvard in 1873 and the Harvard Law School in 1879. Since 1898 a judge of probate and insolvency for Suffolk county, Mass.; wrote "Facetia Face" and "Unleavened Bread."

Gray, Thomas, 1716-1771. English poet; born in Cornhill, London; produced in 1747 "Ode on a Distant Prospect of Eton College," and in 1750 his well known "Elegy Written in a Country Churchyard"; these were followed by the Pindaric odes, the "Progress of Poesy," and "The Bard," finished in 1757; in 1768 he was presented by the Duke of Grafton with the professorship of Modern History in Cambridge, a sinecure office with £371 a year.

Green, John Richard, 1837-1883. Historian; born at Oxford; in 1874 he published his "Short History of the English People," which was speedily adopted in schools, and was accepted at large as one of the ablest summaries of the history of the country; the welcome with which this small work was received induced the author to essay a larger, which he accordingly by and by published in four volumes; this was followed by "The Making of England" and "The Conquest of England," the latter being published after his decease.

Green, Thomas Hill, 1836-1882. Philosopher; born in Yorkshire; studied at Balliol College, Oxford; was elected a Fellow and became eventually Whyte professor of Moral Philosophy; his philosophy had a Kantian root, developed to a certain extent on the lines of Hegel; he was a great moral force in Oxford; his views on the purely spiritual nature and derivation of the Christian religion have, since his death, attracted attention, and are regarded with some anxiety by those whose faith requires a historical basis.

Grillparzer, Franz, 1791-1872. Popular Austrian dramatist; born at Vienna; studied law and then entered the civil service, in which he remained from 1813 to 1856; his first notable drama was the tragedy "Die Ahnfrau," the motif of which is an extreme fatalism; "Sappho," "Das Goldne Vlies," and many others followed, all of which are marked by dramatic power and lyric grace; he stands in the front rank of Austrian poets.

Grimm, Jakob Ludwig, 1785-1836. A German philologist and literary historian. The labors of Grimm are of unrivaled importance in the broad field of German literary antiquities. The constant aim of his investigations was to increase the spiritual life of the German people by making known their ancient laws, customs, faiths, and poetry. His "Deutsche Grammatik" is perhaps the greatest philological work of the age and may be said to have laid the foundation of the historical investigation of language. This work, as well as the great "Deutsches Wörterbuch," commenced in 1852 in conjunction with his brother Wilhelm, he did not live to complete. He died in Berlin.

Grote, George, 1794-1871. An English historian. In 1832 he was elected a member of Parliament for the city of London, and his subsequent parliamentary career, until his retirement in 1841, was principally devoted to the advocacy of vote by ballot. In 1845 appeared the first two volumes of his "History of Greece." The remaining ten volumes followed in rapid succession, the final volume being published in 1856. The work terminates with the death of Alexander the Great.

Guizot (*goh-zot*), **François Pierre Guillaume**, 1787-1874. A French historian. He was Minister of the Interior, Ambassador to Great Britain, and Minister of Foreign Affairs. After the fall of Louis Philippe, Guizot escaped and fled to England. Henceforth he practically retired from public life. Among his numerous works may be mentioned: "History of Civilization in France," "General History of Civilization in Europe," "History of the English Revolution," "History of the Origin of Representative Government," and "Life, Correspondence, and Writings of Washington."

Haggard, Henry Rider, 1856- . . . An English novel-

1st. He was a barrister by profession. At the age of nineteen he accompanied Sir H. Bulwer as secretary to Natal. Among his works are "King Solomon's Mines," "She," "Elissa Swallow," "Nada, the Lily," "The People of the Mist," "Jess," and "Cleopatra."

Hale, Edward Everett, 1823- . . . An American author and Unitarian clergyman; born in Boston, Mass. He was graduated at Harvard College and was called to the South Congregational (Unitarian) Church, Boston. During his ministerial career he was active in social, educational, and philanthropic enterprises; organized the Harry Wadsworth Club, which has numerous branches in the United States and Europe, and the Look-up Legion among American Sunday schools. Chaplain of the United States Senate. Among his works are "Chautauquan History of U. S.," "Life of Washington," "Franklin in France," "Man Without a Country," "My Double and How He Undid Me," and "Ten Times One is Ten"; contributed largely to the periodical press, and attained wide popularity as a lecturer. To the rising generation he is best known as a writer of charming fiction and history.

Halévy, Ludovic, 1834- . . . A French dramatist; born in Paris, France. He first made himself known as the writer of the librettos to Offenbach's burlesques (partly in collaboration with Meilhac). He wrote besides a large number of vaudevilles and comedies, and also some novels. Halévy was admitted to the Academy in 1886. His best works were a series of satires on the Cardinal family.

Hallam, Henry, 1777-1859. An English historian; born in Windsor, England. His "View of the State of Europe during the Middle Ages" was the first great result of his studies and researches. His masterly work on the "Constitutional History of England" was given to the world in 1827. The next great work of Hallam was his "Introduction to the Literature of Europe in the 15th, 16th, and 17th Centuries." He died in Penshurst, Kent, England.

Halleck, Fitz-Greene, 1790-1867. An American poet; born in Guilford, Conn. By his mother he was descended from John Eliot, "the apostle of the Indians." He became a clerk in a bank in New York in 1811, and in 1824 the private secretary of John Jacob Astor; in 1849 he retired, on an annuity of \$200 left him by Astor, to his native town, where he spent the remainder of his days. From his boyhood Halleck wrote verses, and in 1819 he contributed, with Joseph Rodman Drake, a series of humorous satirical papers in verse to the New York *Evening Post*. In the same year he published his longest poem, "Fanny," a satire on the literature, fashions, and politics of the time. His complete "Poetical Writings" was published in 1869.

Hardy, Thomas, 1840- . . . An English novelist; born in Dorset, England. He was brought up as an architect, and practiced some time at Dorchester; next prosecuted his studies in design at London, gaining professional distinction. Among his works are "Tess of the D'Urbervilles," "The Woodlanders," "Two on a Tower," "Far from the Madding Crowd," "The Three Strangers," and "Poems of the Past and Present."

Harris, Joel Chandler, 1848- . . . An American journalist and story writer; born in Eatonton, Ga. He had a thorough familiarity with the negro of the post-bellum period, and while editing an Atlanta paper, he produced for it the series of "Uncle Remus" sketches and songs which immediately made him known. In a more serious vein is his biography of the lamented Henry W. Grady, a work of genuine power.

Harte, Francis Bret, 1839-1902. An American novelist and poet; born in Albany, N. Y. He went to California in 1854, and figured as a gold miner, a teacher, and a typesetter on the *Golden Era*, in which appeared some of his earliest literary efforts. He next became editor of the *Californian*, and in 1864 secretary of the United States Mint at San Francisco. In 1868 he became editor of the *Overland Monthly*, in which appeared, in 1870, the humorous poem of "The Heathen Chinee." In 1878 he became United States consul at Crefeld, whence he was transferred to Glasgow in 1880, and remained there till 1885. Among his best known works are "The Luck of Roaring Camp," and "The Outcasts of Poker Flat." During the last twenty-four years of his life Mr. Harte resided abroad. He died near London, England.

Hawkins, Anthony Hope, 1863- . . . An English novelist; writing under the name "Anthony Hope"; born in London. He was admitted to the bar in 1887. Among his best known works are "A Man of Mark," "The Prisoner of Zenda," and "Puroso."

Hawthorne, Julian, 1846- . . . An American novelist and journalist, son of Nathaniel; born in Boston. On leaving Harvard University he studied civil engineering in Dresden, but took to authorship. His success was not rapid, but popular favor has been accorded to his novels. Among them are "Garth," "Noble Blood," "The Professor's Sister," "A Fool of Nature." He also wrote "Saxon Studies," and "Nathaniel Hawthorne and His Wife."

Hawthorne, Nathaniel, 1804-1864. American novelist; born at Salem, Massachusetts; his early ambition was to be a literary man, and "Twice-told Tales" was the first production by which he won distinction. After the publication of "Twice-told Tales" he spent some months at Brook Farm, leaving which he married and took up house at Concord; from 1848 to 1850 he held a State appointment, and in his leisure hours wrote his "Scarlet Letter," which appeared in the latter year, and established his fame as a master of literature; this was followed by "The House of the Seven Gables," "The Snow Image," "The Blithedale Romance," and later, by "The Marble Faun," and "Our Old Home."

Hay, John, 1839-1905. An American statesman and writer; born in Salem, Ind. He was graduated from Brown University, and settled in Illinois as a lawyer, but went to Washington in 1861 as one of Lincoln's private secretaries, acting also as his side-de-camp. He served under Generals Hunter and Gillmore with the rank of major and assistant adjutant-general. He was subsequently in the United States diplomatic service, stationed at Paris, Vienna, and Madrid. In 1897 he was made ambassador to England, and in 1898 Secretary of State. His literary reputation rests upon "Pike County Ballads," "Castilian Days," a volume of travel; and "Life of Abraham Lincoln" (with J. G. Nicolay). As Secretary of State Mr. Hay gained a standing equal to that of the most eminent men who have held that high office. In coolness, foresight, and statesmanlike appreciation of current and coming events he had no superior among contemporary diplomats.

Hayne, Paul Hamilton, 1830-1886. An American poet; born in Charleston, S. C. At first a lawyer, he turned to journalism, and in 1855 his maiden volume of verse appeared. He served through the war, retired from the field in poverty, and wrote poetry. His productions show him to be among the first of Southern poets. He died in Augusta, Ga.

Hazlitt, William, 1778-1830. An English critic; born in Maidstone, Kent, England. He wrote "On the Principles of Human Action," "Lectures on the Dramatic Literature of the Elizabethan Age," "Round Table," and "Characters of Shakespeare's Plays."

Headley, Joel Tyler, 1813-1897. An American prose writer; born in Walton, N. Y. Graduated from Union College; became assistant editor of the New York *Tribune*. His writings, such as "Washington" and "Chaplains of the Revolution" contain much valuable information about early American history.

Heine, Heinrich, 1797-1856. A German poet and author; born of Jewish parents in Düsseldorf. He studied law at Bonn, Berlin, and Göttingen; he took his degree at the last mentioned place. In 1831 he settled in Paris, supported himself by his literary labors, and dwelt there till his death. From 1837 to the overthrow of Louis Philippe in 1848 he enjoyed a pension of \$300 from the French government. As a poet Heine is remarkable for the simplicity and pathos of many of his lyric pieces. He collected them in "The Book of Songs"; wrote "Romancero," "Pictures of Travel," "The Romantic School," and "Atta Troll."

Hemans, Felicia Dorothea, nee Browne, 1793-1835. Poetess, born in Liverpool; her marriage was an unhappy one, and after the birth of five children ended in permanent separation; she was the authoress of a number of works, the best of her productions being lyrics.

Herbert, George, 1593-1633. Poet, born in Montgomery Castle, Wales; took holy orders and became rector of Bemerton, Wiltshire, a post he lived only two years to hold; was the author of poems entitled "The Temple." He is held in high regard by people of the devout and reverently contemplative spirit of the author.

Herder, Johann Gottfried von, 1744-1803. A German author. From 1764 to 1769 he was an assistant teacher at the cathedral school of Riga, with which office that of a preacher was connected, and it was during this period that he published his "Fragments on German Literature." His greatest works is his *Ideas on the Philosophy of the History of Man*.

Herodotus, 484-424 B. C. The "Father of History." born at Halicarnassus, in Caria; traveled in Asia Minor, Egypt, and Syria, and in his old age recorded with fidelity the fruits of his observations and inquiries. His chief work was on Xerxes' invasion of Greece.

Herrick, Robert, 1591-1674. English poet, born in London; was incumbent of Dean Prior in Devonshire; author of the "Hesperides" and "Noble Numbers."

Hesiod, fl. 750 B. C. One of the earliest Greek poets; born in Ascra, Boeotia. His "Theogony," being an attempt to present a systematic view of the origin and powers of the gods, and of the order of nature, is of great importance for the history of the religion of the Greeks. He wrote also "Works and Days."

Higginson, Thomas Wentworth, 1823- . . . An American author; born in Cambridge, Mass.; was graduated at Harvard College in 1841; served in the Civil War as colonel of the 33d United States Colored Infantry. Among his works are a memoir of Longfellow, "Army Life in a Black Regiment," "Outdoor Papers," "History of United States," and "The Afternoon Landscape."

Hildreth, Richard, 1807-1865. An American historian; born in Deerfield, Mass. He first became known as a miscellaneous prose writer and political journalist. The "History of the United States" is his greatest work, covering the period from the discovery of America to the end of President Monroe's first administration, and presenting the founders of the Republic in their true characters. He wrote "Japan as It Was and Is."

Hogg, James, 1770-1835. A Scotch poet; born in Selkirkshire in 1770. After receiving a very scanty education he began to earn his bread by daily labor as a shepherd. His early rhymings brought him under the notice of Sir Walter Scott. The appearance of "The Queen's Wake" in 1813, with its charming ballad of Kilmeny, established Hogg's reputation as a poet.

Holberg, Ludwig, 1684-1754. A Danish poet. His works are of four classes—poems, stage pieces, philosophical treatises, and historical works. His poems are chiefly satirical. His best works are "Henrik and Pernille," and "Subterranean Journey of Niels Klim."

Holland, Josiah Gilbert, 1819-1881. Am. author; born in Belchertown, Mass. He was graduated at the Berkshire Medical College, at Pittsfield, 1844. He became assistant editor of the *Springfield Republican*, of which he was part proprietor from 1851 to 1866. In 1870, with Roswell Smith and the Scribners, he founded *Scribner's Monthly*, the present *Century Magazine*; wrote the novels, "Bay Path," "Sevenoaks," and "Nicholas Minturn"; the poems, "Bitter Sweet," "Kathrina," and "Garnered Sheaves."

Holmes, Oliver Wendell, 1809-1894. A celebrated American author, son of a Unitarian minister; graduated in arts and medicine at Harvard; became professor of Anatomy and Physiology at Dartmouth College, but resigned and settled in Boston as a general practitioner. In 1847 he was elected to the chair of Anatomy in Harvard, a position he held till his resignation in 1882; a successful professor, it is as an essayist, novelist, and poet that he is remembered; the appearance of "The Autocrat of the Breakfast-Table," with its quaint humor, fresh thought, and charming egotism took literary America by storm; the "Professor" and the "Poet at the Breakfast-Table" followed in after years, and remain his most widely popular works. "Elsie Venner," a novel dealing with the problem of heredity, "The Guardian Angel," "Songs of Many Seasons," "Memoirs of Motley and of Emerson," are some of his many works, all of which have the impress of his bright, engaging personality.

Homer, fl. about 1000 B. C. The great epic poet of Greece, and the greatest of all time; author of the "Iliad" and the "Odyssey"; is said, when old and blind, to have wandered from city to city rehearsing his verses; it is only modern criticism that has called in question his existence, and has ventured to argue that the poems ascribed to him are a mere congeries of compositions of the early fabulous age of Greece, but the unity of the plan and the simplicity of the style of the poems go to condemn this theory.

Hood, Thomas, 1799-1845. An English poet and humorist; born in London. From 1829 to 1837 he conducted his *Comic Annual*. At the same time his pen was employed on other subjects. It was during his last illness that he contributed to *Punch* "The Song of a Shirt," "The Bridge of Sighs," and "The Lay of a Laborer." Hood is unrivaled as a punster, and he possesses a singular power of combining the humorous with the pathetic. His best comic poem is "Miss Kilmansegg."

Horace (Quintus Horatius Flaccus), 65-8 B. C.

A Latin lyric poet. The talent which he had displayed procured him the friendship of two eminent poets, Virgil and Varius, and to them he was indebted for his first acquaintance with Mæcenas, a refined man of the world. Nine months after, Mæcenas received Horace into the circle of his intimate friends and after some years presented him with the Sabine estate which Horace so often mentions in his poems. It was sufficient to maintain him in ease and comfort during the remainder of his life. Horace wrote the "Odes," "Epodes," "Satires," and "Epistles."

Horne, Richard H., 1803-1884. An English poet and miscellaneous author. He joined the Mexican navy and served through the war against Spain. On the conclusion of the war he was prostrated for a time by yellow fever, and after his recovery he traveled in the United States. In 1828 he began his literary career, writing tragedies and poems. He wrote "Orion: a Tragic Poem," his best work, and two tragedies, "Coamo de Medici" and "The Death of Marlowe."

Howells, William Dean, 1837- . . . An American author; born in Martins Ferry, O. He learned the printers' trade with his father; was afterward assistant editor on the *Ohio State Journal*; published a life of Abraham Lincoln. From 1861 to 1865 he resided in Venice as United States consul. Soon after his return appeared a series of papers under the title "Venetian Life" followed by a similar volume "Italian Journeys." After his return to the United States he was called to the editorial staff of the *New York Tribune*, and also became a regular contributor to the *Nation*. He was assistant editor of the *Atlantic Monthly* during 1866-1871, and editor-in-chief from 1871 till his resignation in 1881. From 1886-1891 he conducted the critical department of *Harper's Monthly* called "The Editor's Study."

Hughes, Thomas, 1823-1896. An English judge, author, and philanthropist; born in Uffington, Berkshire, where his grandfather was vicar. He represented Lambeth in the House of Commons from 1865 to 1868 as an advanced Liberal, and during the six years 1868-1874 he sat for Frome. He was deeply interested in the well-being of the working classes, and devoted much of his time to the support of the co-operative movement and other socialist schemes of a similar kind. As an author, Thomas Hughes is doubtless best known by his first work, "Tom Brown's School Days," published in 1856, which has gone through many editions and been translated into several languages. He wrote also "Alfred the Great" and "Tom Brown at Oxford."

Hugo, Vicomte Victor Marie, 1802-1885. A distinguished French poet, politician, and man of letters; born in Besancon, France. His father was a general in the French army. He received a classical education in a religious house, and, in 1822, brought out the first volume of his "Odes and Ballads." He reflected bitterly in subsequent works on the classical style of French dramatic literature. Shortly after the revolution of July, 1830, his "Marion de Lorme," which had been suppressed by the censorship under the Restoration, was performed with success. "The King Amuses Himself," was also performed at the Theatre Francais in January, 1832, but was indicted by the government the day after. Hugo, who published afterward a number of dramatic pieces of various merit, was, after much opposition, admitted into the Academy in 1841. On the coup d'etat of December 2, 1851, Hugo, then a member of the legislative assembly, was among those deputies who vainly attempted to assert the rights of the assembly and to propose the constitution. His conduct led to his proscription. He took refuge in the island of Jersey, and subsequently in that of Guernsey, having steadfastly refused to avail himself of the general amnesties issued in 1859 and in 1869. He wrote much after he had left France. His very trenchant satire, "Napoleon the Little," appeared at Brussels in 1852, and was rigorously suppressed in France, into which country it had been smuggled. On the fall of the empire in 1870 he returned to France, was elected to the National Assembly, but soon resigned and repaired to Brussels, whence he was expelled by the government on account of the violence of his political writings and his sympathy with the Communists. Returning to Paris, he was elected a senator for life in 1876. "Notre Dame de Paris," "Les Misérables," "Ninety-three," are his great novels. His best lyric verses are found in "The Terrible Year," treating patriotically the French disaster of 1870-71.

Hume, David, 1711-1776. Scotch historian and philosopher; born in Edinburgh, Scotland. In 1746 he became secretary to General St. Clair, whom he accompanied to the court of Turin. In 1751 appeared at Edin-

burgh, his "Inquiry Concerning the Principles of Morals." In 1754 he published the first volume of his "History of England," his best work, which he did not complete till 1762. The work acquired considerable celebrity, and the author gained largely by its popularity, for, besides the profits it brought him, he obtained a pension through Lord Bute. He became under-secretary of state in 1767. He died in Edinburgh.

Hunt, James Henry Leigh, 1784-1859. An English poet and essayist. He was the personal friend of Byron, Shelley, Keats, Lamb, and Coleridge. The "Story of Rimini" is his longest and perhaps his best known poem. He wrote also "Palfrey" and "Abou ben Adhem."

Ibsen, Henrik, 1828- . . . A Norwegian novelist and dramatist; born in Skien, Norway. His youth was passed in extreme poverty. His attention was turned to dramatic writing and he produced "The Banquet at Solhøng," "The Vikings at Helgeland," "Love's Comedy," "Ghosts," "A Doll's House," "When We Dead Awaken," "The Pillars of Society," "The Wild Duck," etc. In 1857 he became artistic director of the Norwegian Theater at Christiania. His plays are much admired for their discussion of social matters.

Ingelow, Jean, 1820-1897. An English poet and story writer. Her first published work appeared anonymously in 1850, but not till the publication of "Poems" in 1863 did Miss Ingelow become famous. This volume won the enthusiastic praise of critics and the instant approval of the public and has passed through many editions. She wrote a great many poems and novels, among which are "Poems of Old Days and New," "Off the Skelligs," "Mopsa," and "Stories Told to a Child."

Irving, Washington, 1783-1859. An American author; born in New York, where his father had emigrated from Scotland before the Revolution. He was originally educated for the legal profession and in 1806 was called to the New York bar, but his tastes were all in the direction of literature, in which field he made his first appearance by the publication, in 1802, of the "Letters of Jonathan Oldstyle," in the *New York Morning Chronicle*; in December, 1809, appeared his celebrated "History of New York," by Diedrich Knickerbocker. During the war with Great Britain in 1812-15 he was connected with the *Analectic Magazine* in Philadelphia, and acted also for a time as aide-de-camp and military secretary to the governor of the state of New York. In May, 1815, he embarked for England, where he commenced in 1818 the series of papers entitled "The Sketch-book," which was published in New York and London. Up to 1832, Mr. Irving continued to reside in Europe. During this period were composed some of his most famous literary works. In the spring of 1832 he returned to New York. In 1841 he became United States minister to Spain. He wrote also "Alhambra," "Christopher Columbus," "Bracebridge Hall," "Washington," "Conquest of Granada," "The Rocky Mountains," "Wolfert's Roost," "Goldsmith," and "Mahomet."

Jackson, Helen Fiske Hunt, 1831-1885. An American author; born in Amherst, Mass. received an academic education; went with her husband to Colorado Springs, Colorado; became actively interested in the treatment of the Indians by the government, and strove to better their condition; appointed to investigate the condition of the Mission Indians of California, in 1883, and studied the history of the early Spanish missions. She wrote "Ramona," "A Century of Dishonor," and several poems of lyric power.

James, George Payne Rainsford, 1801-1860. An English novelist; born in London, England. While still very young he manifested a considerable turn for literary composition, and produced, in 1822, a "Life of Edward the Black Prince." Some years afterward he composed his first novel. Its success determined him toward fiction, and a series of novels, above sixty in number, followed from his pen in rapid succession, besides several historical and other works. Latterly he was British consul at Richmond, Va., and at Venice, where he died. The best examples of his style are perhaps "Richelleu," "Philip Augustus," "Henry Masterton," "Mary of Burgundy," "Darnley," "Corse de Léon," "The Smuggler."

James, Henry, 1843- . . . An American writer; born in New York. He was educated in France and Switzerland and at Harvard Law School. Since 1869 he has made his home in England. Among his works are "The Bostonians" and "The Sacred Fount."

Jerrold, Douglas, 1803-1857. An English humorist. After serving as midshipman, he was bound as an apprentice to a printer in London. He wrote about forty plays, "Black-Eyed Susan" being his chief success.

Jewett, Sarah Orne, 1849- . . . An American writer; born in South Berwick, Me. She received an academic education. Her best work, such as "Tales of New England," portrays New England character.

Johnson, Samuel, 1709-1784. One of the most distinguished English writers, born in Lichfield, England, where his father, Michael Johnson, was a bookseller; he gained distinction as the editor of various important publications. Among many great works the most useful to mankind was his "Dictionary." In 1759 he wrote his celebrated romance of "Rasselas, Prince of Abyssinia," which fine production he composed in the evenings of one week in order to defray the funeral expenses of his aged mother. At length, in 1762 the Bute administration granted him a pension of \$1,500 per annum, which he accepted after a short struggle against the reception of a favor from the house of Hanover. The concluding portion of Johnson's life was saddened by the loss of many old friends and by declining health. His remains were interred in Westminster Abbey with great solemnity. His statue has been placed in St. Paul's. Among his works are "Lives of the Poets," "The Rambler," and "The Vanity of Human Wishes."

Jo'kal, (Jókai) Maurus, 1825- . . . A Hungarian novelist; born in Komorn. He studied law, but never practiced. During the Hungarian struggle of 1848 he was an active patriot. He has written almost three hundred volumes, comprising novels, dramas, poems, including "The New Landlord," "There is No Devil," "Love's Fools," the drama "Milton," and "History of Hungary." In January, 1894, all Hungary united in celebrating the 50th anniversary of his literary activity. He married Rosa Laborfalvi, the great Hungarian actress.

Jonson, Ben, 1573-1637. Dramatist, born at Westminster, posthumous son of a clergyman of Scottish descent; was in his youth first a bricklayer, afterwards a soldier in the Netherlands, whence he returned about 1592; married a shrew and became connected with the stage; he was one of the most learned men of his age, and for forty years the foremost, except Shakespeare, in the dramatic and literary world; killing his challenger in a duel nearly cost him his life in 1598; he was branded on the left thumb, imprisoned, and his goods confiscated; in prison he turned Catholic, but 12 years later reverted to Protestantism; for ten years after Shakespeare's death he produced no dramas; in 1619 he received a degree, M. A., from Oxford, and an increase in pension from the king; in the new reign he turned again to dramatic work with sadly diminished power; he died in poverty, but was buried in Westminster Abbey; he wrote at least sixteen plays, among them "Every Man in his Humour," in which Shakespeare acted, "The Poetaster," the tragedy of "Sejanus," "The Silent Woman," a comedy, and his best work, "The Alchemist."

Juvenal (Decius Junius Juvenalis), 38-120. A Roman poet and satirist; born probably in Aquinum, Campania.

Kalidasa, fl. 500? A great Indian dramatist and poet, was author of "The Lost Ring," translated by Sir William Jones, and much praised by Goethe and Max Muller, and "The Hero and the Nymph."

Karamsin, Nikolai Mikhailovitch, 1766-1826. A Russian historian; his first work was "Letters of a Russian Traveler," in six volumes, which gained him a high reputation; it was followed by his "History of Russia," in twelve volumes, for the materials of which he had access to the most authentic documents as imperial historiographer, an office to which he was appointed in 1803, and the work is in the highest repute.

Keats, John, 1795-1821. An English poet; born in London, England. The first poems Keats published in 1817 were dedicated to Leigh Hunt. In the next year he published "Endymion," a poetical romance, and in 1820, his last and best work, "Lamia," and other poems. He died in Rome. Shelley lamented his poet friend in the beautiful and well known "Adonais."

Keble, John, 1792-1866. An English poet; born in Fairford, Gloucestershire, England. Of his great work, "The Christian Year," hundreds of thousands of copies have been sold, and from its profits the author built one of the most beautiful parish churches in England.

Kerner, Andreas, 1786-1862. A lyric poet of the Swabian school, born in Württemberg; studied and wrote on animal magnetism and spiritualism.

Key, Francis Scott, 1780-1843. An American poet; born in Frederick Co., Md. He was a lawyer by profession. Being detained on one of the British ships during the bombardment of Fort Mifflin, Sept. 14, 1814, he composed the words of "The Star-Spangled Banner." He died in Baltimore, Md.

Kingsley, Charles, 1819-1875. Canon of Westminster and chaplain to the Queen, born at Holne Vicarage, near Dartmoor; studied at Cambridge; became rector of Eversley, in Hampshire, in 1844; was the author in 1848, of a drama entitled "The Saint's Tragedy," with St. Elizabeth of Hungary for heroine, which was followed successively by "Alton Locke," and "Yeast," chiefly in a Socialistic interest; "Hypatia," a brilliant book in the interest of early Christianity in Alexandria, and "Westward Ho!" a narrative of the rivalry of England with Spain in the days of Elizabeth, and besides other works, including "Two Years Ago," "Water Babies," and "Hereward the Wake," he was the author of the popular ballads of "The Three Fishers," "The Starlings," and "The Sands o' Dee." His writings had a great influence on his contemporaries, particularly on young men.

Kipling, Rudyard, 1865- . . . An English author; born in Bombay. He was educated in England, and in 1882 went to India and joined the staff of the *Civil and Military Gazette*, Lahore, for which paper his earlier tales were written. He depicts Anglo-Indian and military life. He is one of the leading authors of the age. Among his works are the novels "The Light That Failed," "Soldiers Three," "Stalky and Co.," and "Kim" whose wonderful revelation of India marks it as his best romance; "The Reckless," "Barrack Room Ballads," "White Man's Burden," and "Departmental Ditties" include his best poetry; and two "Jungle Books" giving a highly imaginative picture of the older India.

Kleist, Heinrich von, 1777-1811. German dramatist and poet, born at Frankfurt-on-the-Oder; entered the army, but afterwards devoted himself to literature. His "Broken Pitcher" is considered by some the best one act comedy of Germany.

Klopstock, Friedrich Gottlieb, 1724-1803. German poet, born at Quedlinburg; distinguished as the author of an epic poem entitled the "Messiah," which is his chief work, his treatment of which invested him with a certain sanctity, and the publication of which did much to enrich the poetic vocabulary of Germany.

Kotzebue, August Friedrich Ferdinand von, 1761-1819. A German dramatist; born in Weimar. Of about 200 tragedies, comedies, dramas, and farces, many of them very popular at the time of their production, the best known now is "Misanthropy and Repentance" reproduced in Paris as late as 1862, and famous in the United States and England in Sheridan's adaptation entitled "The Stranger." During much of his life he was in Russian service; and was once banished to Siberia by the Emperor Paul. He was assassinated in Germany as a Russian spy, by a student, in Mannheim.

La Fontaine, Jean de, 1621-1695. One of the classics of French literature; born in Chateau-Thierry, Champagne, France. The last thirty-five years of his life were spent in Paris. The twelve books of his "Fables" were published in equal parts in 1668 and 1678. It is through them that La Fontaine is universally known. He was admitted to the French Academy in 1683, conjointly with his friend Boileau; died in Paris.

Lamartine, Alphonse de, 1792-1869. An eminent French historian, poet, orator, and statesman.

Lamb, Charles, 1775-1834. A brilliant English essayist. In 1796 and 1797 some short poems by him appeared along with others by Coleridge, and in 1798 he published a volume of poems in conjunction with his friend Charles Lloyd. It met with little success. Nor was his tale of "Rosamund Gray," much more favorably received. Under the name of "Elia" a series of his essays has been frequently republished in a collected form since 1823; latterly along with "Last Essays of Elia," first published in 1833. Here, in a style ever happy and original, and with humor of the rarest and most pungent description, he has carried the short essay to a point of excellence perhaps never before attained. He died in Edmonton, England.

Landon, Walter Savage, 1875-1864. An English poet; born in Warwick, England. He was educated at Rugby and Oxford. During the Peninsular War, raising a troop of cavalry at his own cost, he fought for the Spanish cause till the restoration of Ferdinand VII. In 1824 he took up his abode in Florence, where he resided for several years, and where many of his works were written. He afterward returned to England and remained there for some years, absorbed in literary occupations, but, his eccentric temper constantly involving him in difficulties and litigation, he went back to Italy. His principal poetical works are "Hellenica," "Poems and Inscriptions," "Dry Sticks," and "Last Fruit of an Old Tree." His most important

prose work is the "Imaginary Conversations of Literary Men and Statesmen," which appeared in five volumes between 1824 and 1829. He died in Florence, Italy.

Lang, Andrew, 1844- . . . A British author; born in Selkirk, Scotland. He was educated at Edinburgh Academy, St. Andrew's University, and Balliol College, Oxford, where he took a distinguished position. A versatile writer, he published several volumes of ballads and other light verse: "Ballads, and Lyrics of Old France," "Ballads in Blue China," "Custom and Myth," etc. He has written a number of prose books, and is a frequent contributor to periodical literature.

Lanier, Sidney, 1842-1881. American poet. The poems "Corn," one of his earliest pieces, and "The Marshes of Glynn" show insight into nature. His poetic works were collected and published after his death. He wrote also several works in prose, mostly pertaining to literary criticism; among the former are "The Science of English Verse," "The English Novel and the Principles of its Development." He died in Lynn, N. C.

Larcom, Lucy, 1826-1893. An American poetess; born in Beverly, Mass. In her youth, a factory girl in Lowell, Mass., and a contributor to the *Lowell Offering*, a magazine conducted by the workers in that city's cotton mills; was a student for a time at Monticello Seminary, Godfrey, Ill.; afterward taught school; but the greater part of her life was devoted to literary work. In 1868-1874 she was editor of *Our Young Folks*. She wrote stories and four or five volumes of poetry, among which were "Ships in the Mist" and "The Sunbeam."

Lecky, William Edward Hartpole, 1838-1903. Historian; born near Dublin, Ireland. He was educated at Trinity College, where he graduated B.A. in 1859 and M.A. in 1863. Already in 1861 he had published anonymously "The Leaders of Public Opinion in Ireland," four brilliant essays on Swift, Flood, Grattan, and O'Connell. Later works were his learned, luminous, and dispassionate "History of the Rise and Influence of the Spirit of Rationalism in Europe," "History of European Morals from Augustus to Charlemagne," and "History of England in the Eighteenth Century."

Le Sage, Alain Rene, 1668-1747. A French novelist and dramatist; born in Sarzeau, near Vannes; died in Boulogne-sur-Mer; famous for his "Gil Blas."

Lessing, Gotthold Ephraim, 1729-1781. A German author, and founder of modern German literature; born at Kamen, Saxony, son of the pastor there; sent to study theology at Leipzig, studied hard; conceived a passion for the stage; wrote plays and criticisms; wrote an essay on Pope; took English authors as his models, revolted against those of France; made it his aim to inaugurate or rather revive a purely German literature, and produced examples regarded as classics to this day; his principal dramas, all conceived on the soil, are "Miss Sara Sampson," "Minna von Barnhelm," "Emilia Galotti," and "Nathan der Weise," and his principal prose work is his "Laocoon," a critical work on art still in high repute.

Lever, Charles James, 1806-1872. A novelist, born at Dublin; was by profession a physician; author of numerous Irish stories written in a rollicking humor, "Harry Lorrequer," and "Charles O'Malley" among the chief; was a contributor to, and for some time editor of, *Dublin University Magazine*; held ultimately various consular appointments abroad, and after that wrote with success in a more sober style.

Lie, Jonas Laurits Edemil, 1833- . . . A Norwegian novelist. His novels give admirable realistic pictures of life in Norway, especially of the fisher-folk of the west coast. His popularity is due to the delicate poetry of his books, to the healthy tone of his writing, his fidelity to nature, and genial humor. "The Pilot and His Wife" is his best known work.

Livy (Titus Livius Patavinus), 59 B. C.-18 A. D. A Roman historian of the Augustan age; born in Patavium (now Padua), Italy. After passing the early portion of his life in his native town, he appears to have gone to Rome during the reign of Augustus, where his literary talents soon obtained for him the favor and patronage of the emperor. He wrote a history of Rome of 142 books of which 35 are extant. He was the national historian of his people.

Longfellow, Henry Wadsworth, 1807-1882. An eminent American poet, born in Maine. He was graduated from Bowdoin College, and after studying on the continent became professor of modern languages in Harvard University. He wrote "Hyperion," a romance in prose, and a succession of poems as well as lyrics, among the former; "Evangeline," "The Golden Legend," "Hiawatha," and "Miles Standish."

Lossing, Benson John, 1813-1891. An American historian; born in Beekman, N. Y. He was a voluminous writer, and equally at home in historical, biographical, and critical composition; but his most useful and enduring works were his great "Pictorial Field-Books" of the Revolution, the War of 1812, and the Civil War. He wrote "Life and Times of Philip Schuyler," "Our Country," and "Cyclopedia of U. S. History."

Loti, Pierre, 1850-. A French poet and novelist; real name Louis Marie Julien Viaud; born in Rochefort. He was a French naval officer. In 1891 he was elected a member of the French Academy. His works include "The Desert" and "Galilee."

Lowell, James Russell, 1818-1891. American essayist, poet, and diplomatist; born in Cambridge, Mass.; graduated at Harvard in 1838; studied law, but devoted himself to literature; succeeding Longfellow in the chair of Modern Languages and Literature in Harvard in 1855, he visited Europe to study, returned as United States minister to Spain in 1877, was transferred to England 1880-1885; of his prose work "My Study Windows" and "Among my Books" are essays on literary subjects; "Fireside Travels" contain reminiscences. He wrote "Biglow Papers," "Vision of Sir Launfal," "Old English Dramatists," and a "Life of Hawthorne."

Lucan, 39-65. A Latin poet; nephew of Seneca; born in Spain. His uncle introduced him to the court of Nero. Nero envied his poetic talents and had him executed. "Pharsalia" is his only surviving work.

Lucian, 120?-200? A Greek author, distinguished for his ingenuity and wit; born in Samosata, Syria.

Lucilius, 149-103 B.C. A Roman poet, the creator of that form of poetic satire which was wielded so brilliantly by his successors Horace, Persius, and Juvenal.

Lucretius, Titus Carus, 99-55 B.C. One of the great Roman poets. Wrote the great "De Rerum Natura."

Lytton, Edward Robert, Earl of, 1791-1891. Statesman, and novelist under the nom *d'plume* of Owen Meredith; became viceroy of India in 1876, and subsequently ambassador at Paris. He wrote "Orval," "Lucile," "The Wanderer" (verse), "Fables in Song," and "Glenaveril."

Lytton, George Edward Bulwer, Lord, 1803-1873. Statesman, and novelist born in London; entered Parliament at the age of twenty-six as a Whig, but became a Conservative. "Pelham," published in 1828, was his first novel, and this was followed by a long list of others of endless variety. He was the author of plays as well as novels.

Macaulay, Thomas Babington, 1800-1859. An English historian; born at Rothley Temple, Leicestershire, England. He composed a compendium of universal history before he was eight years old; went to school at Sheffield and entered Cambridge in 1818. In 1826 he was called to the bar, but not succeeding in law practice he soon abandoned it. In 1826 he won distinction by his essay on Milton. After the failure of the firm of which his father was a member he was offered a seat in the Commons by Lord Lansdowne, entering in 1830 to represent a "pocket borough." In 1834 he accepted a seat on the Supreme Council of India. Here he drafted a penal code which became the basis of the criminal code of India. In 1838 he returned to England, and was sent to Parliament from Edinburgh. In 1839 he became War-Secretary in Lord Melbourne's cabinet. In 1846 he was appointed Paymaster-General in Lord John Russell's cabinet, where he had time to devote himself to his "History of England," which he had now begun. He soon retired to private life in order to prosecute this work, refusing a seat in the cabinet in 1849. In 1848 the first two volumes of the "History" appeared. No other historical work ever met with so favorable reception or circulated so rapidly. It was translated into ten European languages. In 1857 he was raised to the peerage as Baron Macaulay of Rothley. He wrote also "Lays of Ancient Rome" and several volumes of essays.

MacDonald, George, 1824-1905. A Scotch novelist and poet; born in Huntley, Aberdeenshire, Scotland; educated at King's College and University, Aberdeen, and at Independent College, Highbury, London. He was originally an independent minister, but became a lay member of the Church of England. He lectured in the United States. He wrote "David Elginbrod," "The Portent," "Malcolm," "The Seaboard Parish," etc.

Mackay, Charles, 1814-1889. A Scotch journalist; born in Perth; was editor of the *Illustrated London News*, and lectured in the United States. While special correspondent of the *London Times* in New York during the Civil War (strongly favoring the Southern cause), he unearthed a branch of the Fenian conspiracy in America.

McCarthy, Justin, 1830-. An Irish historian; born in Cork, Ireland. He was a Home-Rule member of Parliament after 1879, and, after the fall of Parnell, chairman of the Irish Parliamentary party. He spent three years in the United States, traveling, lecturing, and engaged in literary work, being (among other things) connected editorially with the *New York Independent*. He revisited the United States in 1886. Among his works are a "History of Our Own Times," "Modern England," and "The Story of Gladstone's Life."

McMaster, John Bach, 1852-. An American historian; born in Brooklyn, N. Y. He was a civil engineer, 1873-1877; instructor in civil engineering in Princeton College, 1877-1883; Professor of American History in the University of Pennsylvania after 1883. He wrote "Benjamin Franklin as a Man of Letters," "History of the People of the United States," "Bridge and Tunnel Centers," "Daniel Webster." He holds a high place among American historians.

Malherbe (Mall-er-bé), François de, 1555-1628. A French lyric poet and miscellaneous writer of great industry, born at Caen; is, from his correct though affected style, regarded as one of the reformers of the French literature, adding to its precision and clarity.

Malthus, Thomas Robert, 1766-1834. An English political economist; born in Albury, Surrey, England. He wrote "Essay on Population" and "Nature and Progress of Rent,"—the first a most important work for the economist, since it shows conclusively that population always has tended to outgrow subsistence.

Marlowe, Christopher, 1564-1593. English dramatist and poet, precursor of Shakespeare; son of a shoemaker at Canterbury; besides a love poem entitled "Hero and Leander," he was the author of seven plays, "Tamburlaine" in two parts, "Dr. Faustus," "The Jew of Malta," "Edward the Second," "The Massacre of Paris," and "Dido." He dealt solely in tragedy, and was too devoid of humor to attempt comedy; he may be called the creator of the English tragedy.

Marryat, Frederick, 1792-1848. Novelist, born in London; "Frank Mildmay," the first of his novels, proving a success, he resolved to devote the rest of his life to literature; his novels were numerous; "Peter Simple" and "Midshipman Easy" are reckoned the best.

Martial (Marcus Valerius Martialis), 40-104. A Latin epigrammatist; born in Bilbilis, Spain. His poems are interesting for their allusions to the persons and manners of the times, but abound with indelicacies. He died in Spain. He wrote "Epigrams."

Martineau, Harriet, 1802-1876. An English reformer, sister of James Martineau; born in Norwich, England. She visited the United States in 1834, aiding the abolitionists. She labored under the remarkable disability of being all her life without the senses of taste and smell, and at twenty became very deaf. She wrote "Eastern Life," "Deerbrook," "Letters on Mesmerism," "Western Travel," etc.

Martineau, James, 1805-1900. Rationalistic theologian, born in Norwich, brother of the preceding; began life as an engineer, took to theology, and became a Unitarian minister; was at first a follower of Bentham and then a disciple of Kant; at one time a materialist, he became a theist, and a most zealous advocate of theistic beliefs from the Unitarian standpoint; he was a thinker of great power, and did much both to elevate and liberate the philosophy of religion; his views are liberal as well as profound, and he is the author of the "Endeavours after the Christian Life," "Hours of Thought on Sacred Things," "Seat of Authority in Religion," "Essays," and "Unitarianism Defended."

Matthews, (James) Brander, 1852-. An American author; born in New Orleans, La. He was graduated at Columbia College in 1871, and from Columbia Law School in 1873. He soon turned to literature. In fiction steadily gained in reputation, his short studies of New York city life in the realistic vein being among the very best of their kind. Since 1892 he has been Professor of Literature in Columbia University. Among his works are "His Father's Son," "Aspects of Fiction," "Studies of the Stage," and "Philosophy of The Short Story."

Maupassant, Guy de, 1850-1893. A clever French romancer, born at Fecamp; gave himself to letters, producing novels, stories, lyrics, and plays, among them "A Life," "Pierre and Jean," and "Yvette."

Meredith, George, 1828-. An English poet and novelist; born in Hampshire, England. He was educated in Germany; studied law, but essayed a literary career with a volume of poems in 1851. He has written "Feverel," "Essay on Comedy," "The Egolist," and "Adventures of Harry Richmond."

Merimee, Prosper, 1806-1870. A French author, born in Paris, France; studied law, but he attached himself to literature under the nom de plume of Joseph L'Estrange. Other works followed in rapid succession. After the revolution of July, 1830, he was appointed secretary to the ministers of commerce and marine. Among his works are "Theater of Clara Gazul," "Chronicles of the Reign of Charles IX.," "Colomba," a popular novel, "Carmen," and "Don Pedro of Castile."

Mickiewicz, Adam, 1798-1855. A Polish poet, born in Lithuania, of a noble family; in 1834 published his great poem, "Sir Thaddeus," and in 1840 was appointed to a professorship of Slavic literatures in Paris. He wrote also "Crimean Sonnets," and "Wallenrod."

Mill, James, 1773-1836. Economist, born near Montrose, Scotland; the son of a shoemaker; bred for the Church; wrote a "History of British India," "Elements of Political Economy," and an "Analysis of the Human Mind," his greatest work.

Mill, John Stuart, 1806-1873. Logician and economist, born in London, son of the preceding; was educated pedantically by his father; published "System of Logic," and "Political Economy"; entered Parliament in 1865, but lost his seat in 1868, on which he retired to Avignon, where he died; he wrote the books on "Liberty," on "Utilitarianism," on "Comte," and on "Sir William Hamilton's Philosophy" and left an "Autobiography."

Miller, Cincinnatus Heine, 1841- Better known as Joaquin Miller. An American poet; born in Wabash district, Ind.; his checkered life included the extremes of being a California gold miner, editor of an Oregon newspaper, an Oregon lawyer and judge, a social lion in London, journalist at Washington, D. C., etc. His "Collected Poems" appeared in 1897.

Milman, Henry Hart, 1791-1868. Dean of St. Paul's; ecclesiastical historian; born in London; edited Gibbon's "Decline and Fall," wrote "History of the Jews," "History of Christianity to the Abolition of Paganism Under the Empire," and "History of Latin Christianity," all learned works; was professor of poetry at Oxford.

Milton, John, 1608-1674. An English poet; born in London, Eng. His father, a notary, was a man of cultivated mind, and gave him a careful education, which was continued at St. Paul's School and the University of Cambridge. He entered the latter in 1624, and quitted it in 1631 with the degree of M. A. His first polemical work was a treatise "Of Reformation." On the establishment of the Protectorate, Milton became Latin secretary to the Council of State and held office till the abdication of Richard Cromwell, 1659. In 1652, he had become totally blind, deliberately and heroically preferring, as he says, the loss of his sight to the desertion of his duty. The last short intervals of sight allotted him were devoted to the composition of the "Defense." In 1665, being in his 57th year, he completed "Paradise Lost." He wrote also "Hymn on the Nativity," "Comus," "Lycidas," "L'Allegro," "Il Penseroso," "Samson Agonistes," sonnets, "On His Blindness," "To Fairfax," "To Cromwell," "Areopagitica," a plea for freedom of the press, "On Shakespeare," and his second epic "Paradise Regained."

Mitchell, Donald Grant, 1822- Pseudonym Ik Marvel, an American author; born in Norwich, Conn.; was graduated at Yale in 1841; traveled in Europe; studied law in New York; in 1851 he published "The Reveries of a Bachelor" and his "Dream Life." In 1853 he became United States consul at Venice, and has since written many popular books.

Mitchell, Silas Weir, 1829- A distinguished American physician, poet and novelist; born in Philadelphia, Pa.; studied at the University of Pennsylvania; was graduated at Jefferson Medical College; practiced in Philadelphia and became prominent as a physiologist, especially as a neurologist and toxicologist. Among his works are "Dr. North and His Friends," "Hugh Wynne" (his best), and "In War Time."

Mitford, Mary Russell, 1786-1855. Authoress, born at Alresford, Hants; lived with her father, an extravagant physician, at Lyme Regis and London; she published poems in 1810-11-12, but, forced to earn a living, took to dramatic work, "Julian," "The Foscari," and "Rienzi," were successful if ephemeral tragedies; her best work was "Our Village," sketches of homely English life, written with much care.

Moliere, 1622-1673. The professional name of Jean Baptiste Poquelin, the greatest French dramatist; born in Paris, France. He is called by Voltaire the Father of French Comedy, and alone among French comic writers is classical. His works include "The

School of Husbands," "Tartuffe," "Don Juan," "The Misanthrope," "The School of Women," and "The Wise Women."

Mommsen, Theodor, 1817-1903. A German historian; born in Garding, Schleswig. He was made professor of ancient history at Berlin, 1858; member of the Prussian House of Delegates. His great work is "Roman History." He wrote besides, "Roman Chronology down to Cæsar" and "History of Roman Courage." His historical work incorporates the results of vast learning in widely severed fields. He died at Charlottenburg.

Montagu, Lady Mary Wortley, 1689?-1762. An English authoress; the eldest daughter of Evelyn, Duke of Kingston; born in Thoresby, Nottinghamshire, England. In 1712 she married Edward Wortley Montagu, whom she accompanied in 1716 on his embassy to Constantinople, from which place she wrote "Letters" to Pope, Addison, and other eminent literati of the time, which are very interesting and contain many curious facts respecting the manners of the Turks. She also first introduced the practice of inoculation into her native country. Her collected works have been published in six volumes; and her "Letters" certainly place her at the head of female epistolary writers in Great Britain. She died in England.

Montaigne, Michel de, 1533-1592. A sceptico-speculative thinker and moralist; born in the Chateau of Montaigne, Perigord; his fame rests on his "Essays," in which he records his observations of mankind.

Montesquieu, Charles de Secondat, Baron de, 1689-1755. A famous French writer; born in the castle of La Brède, near Bordeaux, France. In 1716 he became president of the Parliament of Bordeaux. The publication of the "Persian Letters" first made him famous as an author. His greatest work is the "Spirit of Laws," which occupied him twenty years; it was published in 1748, and secured to him a very high place among writers on political science. He died in Paris.

Montgomery, Robert, 1807-1855. Author of "The Omnipresence of Deity," and "Satan"; born at Bath, son of a clown; passed undistinguished through Oxford, and was minister of Percy Street Chapel, London; all his many works are forgotten save the above, which live in Macaulay's famous review.

Moore, Thomas, 1779-1852. An Irish poet; born in Dublin, Ireland. Author of "Lalla Rookh." His fame now rests chiefly on "National Airs," and "Irish Melodies." He was distinctively the poet of Ireland.

More, Hannah, 1745-1833. English authoress, born near Bristol; wrote dramas; a novel entitled "Celebs in Search of a Wife," and the tracts, "Village Politics," and "Cheap Repository Tracts."

More, Sir Thomas, 1478-1535. Chancellor of England; born in London; author of "Utopia," representing an ideal commonwealth; succeeded Wolsey as Chancellor, but resigned the seals of office because he could not sanction the king's action in the matter of his divorce, and was committed to the Tower for refusing to take the oath of supremacy. After twelve months, he was brought to trial and sentenced to be beheaded; he ascended the scaffold, and laid his head on the block in the spirit of a philosopher; was one of the wisest and best of men.

Morley, John, 1838- Politician and man of letters, born in Blackburn, Eng.; an advanced Liberal in both capacities; besides essays and journalistic work, has written biographies, particularly on men associated with politics and social movements, such as Voltaire, Rousseau, and Diderot, as well as Burke, whose biography he contributed to "English Men of Letters."

Morris, William, 1834-1896. Poet, art-worker, and socialist; born in Walthamstow, near London; son and heir of a wealthy merchant; studied at Oxford, where he became the lifelong bosom friend of Burne-Jones; of an artistic temperament, he devoted his working hours to decorative art, in particular designing wall papers; produced in 1858 "The Defence of Guenevere" and other Poems," in 1867 "The Life and Death of Jason," and from 1868 to 1870 his masterpiece, "The Earthly Paradise." Among other works he translated the "Æneid" and the "Odyssey" and gave a splendid rendering of some of the Norse legends.

Motley, John Lothrop, 1814-1877. An American historian; born in Dorchester, Mass.; was educated at Harvard University and Göttingen, Germany; entered political life as a member of the Massachusetts House of Representatives. He published, after ten years' labor and a journey to Europe, his great "History of the Rise of the Dutch Republic" in 1856, a work which was further developed in the "History of the United Nether-

lands." He was minister from the United States to Austria, and to Great Britain. He died in Dorchester, England.

Moulton, Louise Chandler, 1835- . . . An American poetess; born in Pomfret, Conn. She married William U. Moulton, a Boston publisher, and published children's stories, novels, essays, and poems.

Mulock, Dinah Maria. (See Craik.)

Murfree, Mary Noailles, 1850- . . . Pseudonym, Charles Egbert Craddock; an American novelist; born in Murfreesboro, Tenn. Her subjects deal largely with Tennessee. She wrote "A Spectre of Power," "The Mystery of White-Face," "In the Tennessee Mountains," etc.

Murger (moor-zhay), Henri, 1822-1861. French novelist and poet; born at Paris; is chiefly distinguished as the author of "Scenes de la Vie de Boheme," from his own experiences; wrote lyrics as well as novels and stories.

Musset (moo-say'), Alfred de, 1810-1857. The premier poet of modern French literature; born in Paris of good parentage; achieved his first signal success with the dramas "Andre del Sarto" and "The Caprices of Marianne"; in the same year began his famous *liaison* with George Sand, involving him in the ill-fated expedition to Venice, whence he returned in 1835 shattered in health and disillusioned. "Confessions of a Young Man of the Age" appeared in 1836; his writings are chiefly remarkable for the intense sincerity of feeling which animates them, and which finds its highest expression in his four great lyrical pieces, "The Nights"; of his prose works, "The Son of Titian," "Mademoiselle Mimi Pinson," and the "Confessions" are his best.

Napier, Sir William, 1785-1860. Brother of the conqueror of Sinde; served all through the Peninsular War, and wrote, besides the "Conquest of Sinde," the "History of the Peninsular War," a celebrated work, written with matchless graphic power.

Nepos, Cornelius, fl. time of Julius Cæsar. Roman historian; born at Pavia; was a contemporary and friend of Cicero; was the author of several historical works no longer extant, and the one still extant ascribed to him, entitled "De Viris Illustribus," is believed to be an abridgment of an earlier work by him.

Niebuhr (nee-boor), Barthold Georg, 1776-1831. Distinguished historian; born at Copenhagen; on the establishment of the University of Berlin in 1810, gave in connection with it a course of lectures on Roman history, by which he established his reputation as a historian. Among his works are "Roman History," "Lectures on Ancient History." He was the founder of modern scientific history study.

Nordan, Max Simon, 1849- . . . A German author; born in Budapest, Hungary; followed various avocations, studying and practicing medicine, traveling and writing for the press till 1880, when he went to Paris, and has since devoted himself to literature. He wrote a number of books, of which the best known, perhaps, in the United States is "Degeneration." He is a conspicuous figure in the Zionist movement.

Nye, Edgar Wilson, 1850-1896. An American humorist; born in Shirley, Me.; settled in Wyoming Territory; studied law, and was admitted to the bar in 1876. Afterward he removed to New York city, and became famous as a humorous lecturer and writer under the pseudonym of "Bill Nye." He died near Asheville, N. C.

Oehlenschlaeger (er-len-shlay-ger), Adam Gottlieb, 1779-1850. One of the greatest dramatic poets of the Scandinavian North; born in Vesterbro, near Copenhagen, Denmark. He commenced his career on the stage, but abandoned the profession for literature, and finally became professor of aesthetics in his native city. Among his greatest works are "The Death of Balder," "Hakon Jarl," "Palmatoke," and "Aladdin."

Oliphant, Mrs. Margaret (nee Wilson), 1828-1897. English authoress; began her literary career as a novelist; her reputation as such was assured by "Chronicles of Carlingford"; she wrote on history, biography, and criticism, the "Makers of Florence," "Makers of Venice," "Makers of Modern Rome," lives of Dante, Cervantes, and Edward Irving.

Omar Khayyam, (o-mar khy-yahm'). . . 1123. A Persian poet, astronomer, and mathematician; born in Nishapur in Khorasan. His scientific works, which were of high value in their day, have been eclipsed by his "Rubaiyat," or quatrains, a collection of about 500 epigrams in praise of wine, love, and pleasure, and at the same time depressingly pessimistic. He died in Nishapur.

O'Reilly, John Boyle, 1844-1890. An Irish-American

poet; born in Dowth Castle, County Meath, Ireland. In 1865 he enlisted in the 10th Hussars, in Ireland, for the purpose of spreading revolutionary doctrines among the soldiers. For this he was arrested, tried for treason, and sent for twenty years' penal servitude in Australia. The following year (1869) he escaped to America, going first to New York and afterward to Boston. In the latter city he found work on *The Pilot*, of which he subsequently became editor and principal owner. He wrote "Songs, Legends, and Ballads," "America," "Moondyne," "Stories and Sketches."

Ovid (Publius Ovidius Naso), 43 B. C.-18 A. D. Roman poet of Augustan age; born at Salmo; was the author, among other works, of the "Amores," "Fasti," and the "Metamorphoses"; the friend of Horace and Virgil, and the favorite of Augustus.

Page, Thomas Nelson, 1853- . . . An American novelist; born in Oakland, Va. He was educated at Washington and Lee University, and practiced law at Richmond, Va. His books are widely read and include "In Old Virginia," "Red Rock," "Gordon Keith," "The Old South," and "Pastime Stories."

Paine, Robert Treat, Jr., 1773-1811. An American poet; born in Taunton, Mass. During the greater part of his career he was engaged in various literary pursuits, though he was at one time in business, and later practiced law for a brief period. He is best remembered as the author of two songs, "Rise, Columbia," and "Adams and Liberty." He died in Boston.

Paine, Thomas, 1737-1809. An American political writer; born in England. At the outbreak of the Revolutionary War he, in 1774, emigrated to the United States; gave an impulse to the Revolution by his famous pamphlet called "Common Sense," in which he advocated the policy of separation and independence. He went to Paris in 1787. In September, 1792, he was elected a member of the French National Convention, acted with the Girondists, narrowly escaped death in the Reign of Terror, and brought out in 1795 his celebrated work entitled "The Age of Reason." He returned to the United States in 1802; died in New York.

Parkman, Francis, 1823-1883. An American historian; born in Boston, Mass.; was graduated at Harvard in 1844; studied law for two years; then traveled in Europe; and returned to explore the Rocky mountains. The hardships he endured among the Dakota Indians seriously injured his health, yet in spite of this and defective sight Parkman worked his way to recognition as a historical writer on the period of rise and fall of the French dominion in America. He wrote "Conspiracy of Pontiac," "Montcalm and Wolfe," "A Half Century of Conflict," "La Salle," "The Jesuits in North America," and "The Old Régime in Canada."

Parton, James, 1822-1891. An American writer; born in Canterbury, England. He wrote many valuable biographies, those of Franklin, Burr, and Jackson among them.

Paulding, James Kirke, 1779-1860. An American author; born in New York. He early showed a tendency to literature. In 1837, Van Buren appointed him Secretary of the Navy. Four years later he retired to a country residence at Hyde Park, N. Y., where he died.

Payne, John Howard, 1791-1852. An American dramatist; born in New York. At the age of eighteen he made his first appearance at the Park Theater. He also played in England and Ireland, a part of the time with Miss O'Neill. In 1842 was appointed United States consul to Tunis. He wrote, translated, and adapted over sixty plays, but is most famous as the author of "Home, Sweet Home," originally in the opera of "Clari."

Pemberton, Max, 1863- . . . An English novelist; born in Birmingham, England. He was a contributor to *Vanity Fair*, and editor of *Chums*, a boys' paper, and in charge of *Cassell's Magazine*. He has published a number of stories of adventures.

Percival, James Gates, 1795-1856. American poet and geologist; born at Kensington, Conn.; he was for a few months professor of chemistry at West Point, but retired and gave himself to literature and geology; his scientific works are valuable; "Prometheus and Chlo," appeared in 1822. "Dream of a Day," in 1843; he died at Hazel Green, Wisconsin.

Perrault (pay-ro), Charles, 1628-1703. French man of letters; born in Paris; distinguished as the author of imitable fairy tales, which have immortalized his name, as "Puss in Boots," "Cinderella," and "Bluebeard."

Persius, 34-62. Roman satirist; born in Etruria; wrote six short satires in the purity of a white-souled manhood, of much native vigor, though not equal to those of Hor-

ace and Juvenal, and that have commanded the regard of all scholars down to the present time.

Petrarch, Francesco, 1304-1374. Famous Italian lyric poet; born at Arezzo, in Tuscany; spent his youth in Avignon; intended for the profession of law, devoted his time to the study of Cicero and Virgil; met Laura, a lady of surpassing beauty, in the church of St. Clare there in 1327, conceived a passion for her which she could not return, and wrote sonnets in praise of her which have immortalized him. The historic reality of Laura has been doubted. Petrarch wrote more in Latin than in Italian but his fame rests upon the "Canzoniere," comprising sonnets and madrigals, and mainly love poetry.

Phædrus. A Latin fabulist, of the age of Augustus, born in Macedonia, and settled in Rome; originally a slave, was manumitted by Augustus; his fables, one hundred in number, were written in verse and are mostly verifications from *Æsop*.

Phelps, Elizabeth Stuart, 1844- American authoress; born at Andover; wrote "Gates Ajar," and other popular stories; advocate of social and temperance reform.

Pidgin, Charles Felton, 1844- An American statistician; born in Roxbury, Mass. He invented many machines for the mechanical tabulation of statistics, among them the electric adding and multiplying machine, addition register, and typewriter tabulator. He has written novels and musical compositions.

Pindar, 522-443 B. C. The great Greek lyric poet; born in or near Thebes, in Boeotia. Pindar excelled in all varieties of choral poetry, hymns to the gods, psalms, odes for processions, drinking songs, etc. But the only poems of his now extant are the "Epinkia," or triumphal odes, composed in celebration of victories at the great public games. Pindar attained the highest renown in his own age, and as a lyrical poet has no rival. When Thebes was destroyed by Alexander, the conqueror spared the house of Pindar.

Plautus, 254-184 B. C. A Latin comic poet, born in Umbria; he wrote about 130 comedies, but only twenty have survived, the plots mostly borrowed from Greek models; they were much esteemed by his contemporaries; they have supplied material for dramatic treatment in modern times.

Pliny (Gaius Plinius Secundus), The Elder, 23-79. A distinguished Roman jurist and naturalist; perished in the eruption of Mount Vesuvius which overwhelmed Pompeii and Herculaneum. He wrote "Natural History." **Pliny, the Younger (Gaius Plinius Cæcilius Secundus),** adopted son of the former, an eminent jurist and historian; born 62; wrote "The Panegyric" and "Epistles."

Plutarch, 46-125. Celebrated Greek biographer and moralist; born at Chæronea, in Boeotia; his fame rests on his "Parallel Lives" of forty-six distinguished Greeks and Romans, a series of portraits true to the life, and a work one of the most valuable we possess on the illustrious men of antiquity.

Poe, Edgar Allan, 1809-1849. An American poet and story writer; born in Boston. Left an orphan early, he was adopted by John Allan, of Richmond, Va., and at the age of eighteen left this home and published his first volume of verse at Boston. He was a cadet at the United States Military Academy, 1830-1831; and subsequently embarked on a literary career. He is one of the most remarkable characters in literature, gifted with great power of invention, vividness of imagination, and artistic skill. His work consists of criticism, prose tales, and poetry. His tales are remarkable for their imaginative vigor and finished art, notably "Ligeia," "The Fall of the House of Usher," "Eleonora," "The Mask of the Red Death," and "The Murders of the Rue Morgue." His best poems are "Valley of Unrest," "Lenore," "Helen," "City in the Sea," "Israfel," "The Raven," and "The Bells."

Polybius, 205-120 B. C. A Greek historian; born in Megalopolis, Greece. His great work is a general history of the extension of Rome from 266 B. C. to 146 B. C. Five only of his forty books are now extant, with some fragments of the rest, but these are among the most important literary remains of antiquity. He wrote several other works, but they have perished.

Pope, Alexander, 1684-1744. An English poet; born in London. His education was a desultory one. In 1711 he published his poem the "Essay on Criticism," which was followed by "The Rape of the Lock," a polished and witty narrative poem, founded on an incident of fashionable life. From 1715 to 1728 he was engaged on a poetical translation of Homer's works, the "Iliad"

being wholly from his pen, the "Odyssey" less than half. He wrote "Imitations of Horace," and "The Dunciad."

Prentice, George Denison, 1802-1870. An American journalist; born in Preston, Conn.; became editor of the Louisville Journal, 1830, and held that post till his death, making the paper famous for satiric wit and exuberant fun. He died in Louisville, Kentucky.

Prescott, William H., 1796-1859. An eminent American historian; born at Boston, Massachusetts; son of a lawyer; turned to literature as a profession; growing blind, the result of an accident at college, he fortunately inherited means, employed assistants, and with great courage in 1826 began to study Spanish history. "Ferdinand and Isabella," appearing in 1838, established his reputation in both worlds; "The Conquest of Mexico," his best work, was published in 1843, and "The Conquest of Peru" in 1847; he died of apoplexy at Boston before completing the "History of Philip II."

Procter, Bryan Waller, 1787-1874. English lyricist, known by his pseudonym as Barry Cornwall; born in London; is chiefly memorable as a friend of all the eminent literary men of two generations, such as Wordsworth, Lamb, and Scott on the one hand, and Carlyle, Thackeray, and Tennyson on the other; he was not a great poet.

Quintilian (Quintilianus Marcus Fabius), 35-97? A Roman rhetorician; native of Spain. His great work is entitled "On Oratory, an Art," and was written after his retirement, but during the reign of Domitian. It is the most complete course of rhetoric handed down from ancient times, and is distinguished for its elegance of style, as well as for sound judgment, cultivated taste, and various knowledge.

Rabelais (rah-bay'), Francois, 1490-1553. A great French humorist; born at Chilon; studied medicine, and for a time practiced it, particularly at Lyons; here he commenced the series of writings that have immortalized his name, his "Gargantua" and "Pantagruel" forming a succession of satires, in a vein of riotous mirth, on monks, priests, pedants, and all the incarnate solecisms of the time.

Racine, Jean, 1639-1699. The greatest French tragic poet; born in La Ferté-Milon, France. His tragedies, "Andromache," "Iphigenia," "Britannicus," "Bajazet," and "Phèdre" place him above all French dramatists except Molière. He wrote, by desire of Louis XIV. and Madame de Maintenon, the sacred dramas of "Æther" and "Athalie," two of his best works.

Ramsay, Allan, 1686-1758. A Scotch poet; born in Leadhills, Lanarkshire, Scotland. His fame reached its acme on the production of "The Gentle Shepherd," one of the finest dramatic pastorals ever penned. Ramsay died in Edinburgh.

Read, Ople, 1852- An American journalist; born in Nashville, Tenn. He established and edited for many years the *Arkansas Traveler*. His studies of Arkansas life have been widely read.

Read, Thomas Buchanan, 1822-1872. An American portrait painter and poet; born in Chester county, Pa.; among his poems are "Sheridan's Ride" and "Drifting."

Reade, Charles, 1814-1884. An English novelist; born in Ipsden House, Oxfordshire, England. He was educated at Oxford. The books by which he first became known were his "Peg Woffington" and "Christie Johnstone." "The Cloister and the Hearth" is his masterpiece.

Renan (reh-non'), Joseph Ernest, 1823-1892. A French writer; born in Regulus, France. In 1862 he was appointed professor of Hebrew, Chaldee, and Syriac in the Collège de France, but the skeptical views manifested in his "Life of Jesus" raised an outcry against him, and he was removed from his chair, to be restored again, however, in 1871. This work, the publication of which caused intense excitement throughout Europe, was the first part of a comprehensive work on the "History of the Origins of Christianity," written from the standpoint of one who disbelieves in the supernatural claims of Christianity. Renan's latest important work was the "History of the People of Israel till the Time of King David." Became a member of the French Academy, 1878.

Richardson, Samuel, 1689-1761. Novelist; born in Derbyshire, the son of a joiner; was apprenticed to a printer in London; set up in the business for himself, and from his success in it became Master of the Stationers' Company in 1754, and King's Printer in 1760; was fifty before he came out as a novelist; published his "Pamela" in 1740, his masterpiece, "Clarissa Harlowe," written in the form of letters, in 1748, and "Sir Charles Grandison" in 1753; they are all three novels of senti-

ment, are instinct with a spirit of moral purity, and are more praiseworthy than read.

Eichter, Jean Paul Friedrich, 1763-1826. Usually called Jean Paul simply; the best known of German humorists; born at Wunsiedel, in Bavaria; the son of a poor German pastor; had a scanty education, but his fine faculties and unwearied diligence supplied every defect; his works are numerous, and the chief are the novels "Hesperus," "Quintus Fixlein" and "Schoolmaster Wux," idylls, and "Levana," a work on pedagogy.

Ridpath, John Clark, 1840-1900. An American educator; born in Putnam county, Ind.; held a professorship in Baker University, Kansas. In 1869 he became Professor of English Literature at Asbury University, Indiana, and was elected its vice-president in 1879. In 1874-1875 he published a "History of the United States," which he supplemented with another in 1877. In 1876 he issued a "School History," and in 1879 an "English Grammar." Desiring to devote his whole time to literature he resigned his university offices.

Elley, James Whitcomb, 1853- . . . An American poet; born in Greenfield, Ind. His contributions to newspapers and magazines first attracted public attention about 1875. His writings soon became so popular that he devoted himself to literature and public readings of his work with great success. His poems are characterized by both humor and pathos and by their sympathy with the simplest phases of life. Those of the Hoosier type are especially popular. Among his works are "The Boss Girl and Other Stories," "Green Fields and Running Brooks," "The Eubaiyat of Doc, Livers," "Home Folks," and the "Book of Joyous Children."

Rogers, Samuel, 1763-1855. English poet; born near London; bred to banking, and all his life a banker—look to literature, produced a succession of poems; "The Pleasures of Memory," "Human Life," and "Italy," the chief.

Rollin, Charles, 1661-1741. A French historian; born in Paris. His best known work is the "Ancient History," often reprinted in France, England, and the United States. It is of small value.

Ronsard (de Ron-sar), Pierre de, 1524-1585. A French poet; born in Vendomois, France. After a short diplomatic career, he devoted himself to literary studies and became the chief of the band of seven poets afterwards known as the "Pleiade." Ronsard's popularity and prosperity during his life were very great. Henry II., Francis II., and Charles IX. esteemed him. He wrote "Odes," "Hymns," "The Amours," and "Franciad."

Rossetti, Gabriele, 1788-1854. An Italian poet and critic; he was elected Professor of Italian in King's College, London. His son, Gabriel Charles Dante Rossetti, 1828-1882, gained high reputation as poet and painter. He wrote "The Blessed Damosel," a poem of great simplicity and spiritual beauty; "My Sister's Sleep," "The House of Life," of one hundred and one sonnets; a prose work, "Hand and Soul"; and two remarkable ballads, "Sister Helen" and "The King's Tragedy."

Rostand, Edmond, 1868- . . . A French poet; born in Marseilles, France; his first play, "The Romanicists," was an instantaneous success and was followed by "Princess Lontaine," "The Samaritan," "Cyrano de Bergerac," and "L'Aiglon." The last two were translated into English and played in the United States. Rostand's versification is of remarkable beauty. In 1901, he was elected one of the 40 "immortals" of the French Academy—the youngest candidate ever receiving that honor.

Ruget de Lisle (roo-zhay' de leel), 1760-1836. Officer of the Engineers; born at Lons-le-Saulnier; immortalized himself as the author of the "Marseillaise"; was thrown into prison by the extreme party at the Revolution, but was released on the fall of Robespierre; fell into straitened circumstances, but was pensioned by Louis Philippe.

Rousseau (roo-so'), Jean Jacques, 1712-1778. A Swiss-French philosopher; one of the most celebrated and influential writers of the 18th century; born in Geneva, Switzerland. Went to Paris, then to the Hermitage, where he wrote a sort of novel, "Julia, or the New Heloise," which was published in 1760, being followed by "The Social Contract," a political work, and "Emile, or on Education," in 1762. Persecution, exaggerated by his own morbid sensibility, forced Rousseau to flee to England, where he was welcomed by Hume, Boswell and others, in 1766. A malicious letter by Horace Walpole unluckily aroused his suspicions of his English friends, and in May, 1767, he returned to France. He lived in

great poverty, supporting himself by copying music and publishing occasional works. His celebrated "Confessions" appeared at Geneva, in 1782. Rousseau wrote also "Letter on Providence" and "Dialogues."

Royce, Josiah, 1855- . . . An American educator and author; born in Grass Valley, Cal. He became Professor of the History of Philosophy in Harvard in 1892, and published: "A Primer of Logical Analysis"; "The Religious Aspect of Philosophy"; "The Conception of Immortality"; and many articles and lectures.

Ruckert, Friedrich, 1788-1866. German poet; born in Bavaria. His most popular books are the collection of lyrics entitled "Springtime of Love," and the reflective poems, "The Wisdom of the Brahman." He was a great interpreter of the Oriental spirit.

Ruskin, John, 1819-1900. An English author; born in London; he was Slade Professor of Fine Arts at Oxford. In "Modern Painters" he advocated a complete revolution in the received conventions of art and art criticism. Ruskin was the first art critic to place criticism upon a scientific basis. In 1851 he appeared as a defender of pre-Raphaelitism. About 1860 he began to write as a political economist and social reformer; his chief works in this sphere being "Unto this Last," "Munera Pulveris," and "Fors Clavigera," a periodical series of letters to the working men, and laborers of Great Britain. In this connection he founded, in 1876, the Guild of St. George; founded a linen industry at Kewick, and revived, in Langdale, hand loom weaving. Among his other works are "Crown of Wild Olives," "Sesame and Lilies," "Ethics of the Dust," "Queen of the Air," and "Stones of Venice."

Sadi, or Saadi, 1184-1291. Most celebrated didactic poet of Persia; born in Shiraz. In his youth he visited Hindustan, Syria, Palestine, Abyssinia, and made pilgrimages to Mecca and Medina. While in Syria he was taken by the Crusaders, and compelled to labor as a slave. After 50 years of wandering he returned to his native city, delighting everybody with his poems and sage precepts. "The Rose Garden" is his most popular book.

Sainte-Beuve (Sant-bur'), Charles Augustin, 1804-1869. A French writer, and one of the greatest of modern critics; born in Boulogne, France. He studied medicine at Paris, but abandoned that science in favor of literature, his first work of importance being on the French literature of the 16th century. In 1840 he was appointed conservator of the Mazarin Library, and in 1845 admitted a member of the French Academy. In 1852 he was appointed Professor of Latin Poetry in the College of France; he also lectured for some years on French literature at the Ecole Normale Supérieure. He wrote three volumes of poetry; died in Paris.

St. Pierre, Henri Bernardin de, 1737-1814. French novelist; born at Havre; an engineer by profession, was a disciple of Rousseau both sentimentally and speculatively; his chief work, "Paul and Virginia."

Sallust, Caius Callistus Crispus, 86-84 B.C. Roman historian. In 47 B.C. he was praetor-elect; in the following year accompanied Caesar to the African war, and was left as governor of Numidia. He returned with immense wealth, and after Caesar's death lived in luxurious retirement. Sallust wrote several historical works of which "Catilina" and "Jugurtha" are extant.

Sand, George, 1804-1876. Best known name of Madame Armandine Lucile Aurore Dupin Dudevant, one of the greatest of French novelists; born in Paris. In 1822 she married Baron Dudevant, to whom she bore a son and a daughter; but in 1831 separated from him, and took up her residence in Paris. In conjunction with Jules Sandeau, a young lawyer, she wrote "Rose and White," which was published in 1831, with the pseudonym Jules Sand. The reception it met with afforded her an opportunity of publishing a novel solely by herself—"Indiana," under the name of George Sand, which she ever after retained. In 1836 she obtained a judicial separation from her husband, with the care of her children. In 1854 she published "Story of My Life," a psychological autobiography. Her published works consist of upward of eighty separate novels, a large number of plays, and numerous articles in literary journals.

Sappho, fl. 600 B.C. Renowned Greek lyric poet; born in the island of Lesbos. She wrote nine books of poems, but besides some small fragments of them we have in complete form only "Hymn to Aphrodite" and "Blest as the Immortal Gods is He." In antiquity, as Homer was ever "The Poet" above all others, so Sappho was "The Poetess." She was called "The Tenth Muse."

Sardou', Victorien, 1831- . . . A French dramatist; born in Paris. He began play writing in early life, though intended originally for the medical profession; Among his plays are: "Cleopatra," "Thermidor," "Gismonda," "Madame Sans-Gêne," "Fedora," etc. He entered the Academy in 1878.

Saxe, John Godfrey, 1816-1887. An American humorous poet; born in Highgate, Vt. His most popular verses include "Rhyme of the Rail" and "The Proud Miss McBride," "Progress," "The Money King," "Fables and Legends of Many Countries."

Scheffel, Joseph Victor von, 1826-1886. German poet, bred to law, but abandoned it for literature; his first and best work, "Der Trompeter von Säckingen," a charming tale in verse of the Thirty Years' War, succeeded by "Gauedamus," a collection of songs and ballads familiar to all German students.

Schiller, Johann Christoph Friedrich von, 1759-1805. A German poet; born in Marbach, Württemberg; in his twenty-second year, wrote the tragedy of "The Robbers," which at once raised him to the foremost rank among the dramatists of his country. In 1789 he was appointed to the chair of history in the University of Jena, and besides lecturing to crowded audiences he published his "History of the Thirty Years' War," and engaged in various literary enterprises which had great influence on the literature of Germany. Settled at Weimar, in order to be near a theater and with Goethe; at intervals he published the following works: "Wallenstein," "Mary Stuart," "Maid of Orleans," and "William Tell." He died in Weimar, Germany.

Schreiner, Olive, 1862- . . . Authoress, daughter of a Lutheran clergyman at Cape Town; achieved a great success by "The Story of an African Farm" in 1883, which was followed in 1891 by "Dreams," also later "Dream Life and Real Life."

Scott, Sir Walter, 1771-1832. A British author; born in Edinburgh, Scotland. From the commencement of his literary career in 1796, when he published his translations of Burger's "Lenore" and "Wild Huntsman," to the year of his decease, he was constantly producing some literary work, and reaped an abundant harvest. His romances are universally known. His patrimonial estate was considerable; and in 1799 he obtained the prebend of sheriff of Selkirkshire, with about £300 (\$1,500). In 1811 he built a mansion on the Tweed, to which he gave the name of Abbotsford. In 1826 the great publishing house of Constable & Co. failed and with it the Ballantyne firm in which Scott was a partner. He regarded the Ballantyne debt as personal and, resolving to "owe no man a penny," he began at the age of fifty-five, the task of paying the creditors \$600,000. In two years his work had gained for them nearly \$200,000; but the severity of his labors permanently broke down his health, and he died before his aim was realized. But in 1847 by sale of copyrights his debts were all liquidated. Scott was the originator of the historical novel and has added greatly to our appreciation of history by such novels as "Ivanhoe," "Legend of Montrose," "Kenilworth," and "The Talisman." "Guy Mannerling," "Waverley," "Rob Roy," and "Heart of Midlothian," are also among his best novels. The "Lady of the Lake," "Marmion," and the "Lay of the Last Minstrel," constitute his best poetry.

Seneca, Lucius Annaeus, 57-65. Roman statesman, Stoic philosopher. He wrote "Natural Questions."

Shakespeare, William, 1564-1616. An English dramatist and poet, born in Stratford-on-Avon, Warwickshire, England. His birthplace, as pointed out by traditions, is the house in Henley street, Stratford, which belonged to his father. In his nineteenth year he married Anne Hathaway, daughter of a yeoman at the neighboring hamlet of Shottery, and eight years older than himself. He went to London about 1586, and lived there many years, leaving his wife and children at Stratford; he gained an honorable position as actor, playwright, and shareholder in the theater of Blackfriars, and afterward in that of the Globe; enjoyed the favor and patronage of Queen Elizabeth, James I., and the Earl of Southampton, the warm friendship of Ben Jonson, and the highest respect and admiration of his associates, not only for his pre-eminence as a poet, but for his honesty, geniality, and worth as a man. Of his end we have no other account than the short statement in the diary of the Rev. John Ward, vicar of Stratford, that "Shakespeare, Drayton, and Ben Jonson had a merry meeting, and it seems drank too hard, for Shakespeare died of a fever then contracted." The first collected edition of Shakespeare's plays was the folio of 1623. His poems of

"Venus and Adonis" and the "Rape of Lucrece" were published in 1593 and 1594 and were the only works which appeared with his name in his lifetime. Of the thirty-six plays (exclusive of "Pericles"), the dates of publication of only a few are known. The Two Gentlemen of Verona and "Love's Labor's Lost" were among the earliest; and "The Tempest," "Trollius and Cressida," "Henry VIII.," "Coriolanus," "Julius Caesar," and "Antony and Cleopatra," among the latest. The "Midsummer Night's Dream," "Merchant of Venice," "Romeo and Juliet," "Richard II.," "Richard III.," "Henry IV.," and "King John" were all produced before 1598. A copy of "Hamlet" is extant, bearing the date 1603. "Twelfth Night" was produced in 1601; "King Lear" was printed in 1607; "The Tempest" was written in 1611. The second folio edition of the collected plays appeared in 1632, and two others subsequently. It is said that by 1830 not less than eighty-two editions had been published, without including separate plays, and poems, and commentaries. Since then the number has been enormously increased.

Shelley, Percy Bysshe, 1792-1822. An English poet; son of Sir Timothy Shelley; born near Horsham, England. At Oxford he published anonymously a scholastic thesis entitled "Necessity of Atheism"; refusing either to acknowledge or deny it, was at once expelled. His first great poem, "Queen Mab," was followed by the "Revolt of Islam," a poem in the Spenserian stanza. In 1811 he eloped to Edinburgh with Harriet Westbrook, the daughter of a retired innkeeper. She was sixteen years of age, his own age being nineteen. The marriage turned out unhappily. In November, 1816, she committed suicide by drowning. Shelley was deeply affected by this event, but soon after married Mary Godwin; Shelley left England in March, 1818, and the whole short remainder of his life was passed in Italy. On July 8, 1822, he was sailing with a Mr. Williams in the Bay of Spezia, when both were drowned. He wrote also "Alastor," "Adonais," "Sensitive Plant."

Sheridan, Richard Brinsley Butler, 1751-1816. Dramatist and politician; born in Dublin; scored his first success with "The Rivals"; "The School for Scandal" and "The Critic" set flowing the tide of prosperity; turning his attention next to politics he entered Parliament, and two years later became Under-Secretary for Foreign Affairs; his great speech impeaching Hastings placed him in the front rank of orators; he died in poverty, but was accorded a burial in Westminster Abbey.

Sidney, Sir Philip, 1554-1586. Poet and one of the most attractive figures at Elizabeth's court; born at Penshurst, Kent; the son of Sir Henry Sidney, lord-deputy of Ireland; sent as ambassador in 1577 to the court of Vienna; in 1583 he received a knighthood; he received his death wound at the battle of Zutphen; his fame as an author rests securely on his euphuistic prose romance "Arcadia," his critical treatise "The Defense of Poesy," and above all on his exquisite sonnet-series "Astrophel and Stella."

Slonkiewicz (se-en-ke-viz), Henry, 1846- . . . A Polish author; born in Siedlce. He is the author of the historical novel "Quo Vadis," "With Fire and Sword," "Knights of the Cross," etc.

Sig'ourney, Lydia (Huntley), 1791-1865. An American author; born in Norwich, Conn. In her "Letters of Life" she enumerates forty-six distinct works wholly or partially from her pen, besides over 2,000 articles in prose and verse contributed by her to nearly 300 periodicals.

Slims, William Gilmore, 1806-1870. A prolific American writer, born at Charleston, South Carolina, turned from law to literature; "Southern Passages and Pictures" contains characteristic examples of his poetry, and of his novels "Woodcraft," "The Parisian," and "Beauchampe" may be mentioned.

Smith, Sidney, 1771-1845. An English clergyman; born in Woodford, Essex, England. In 1803 he removed to London; about the same time he married; he became renowned as one of the wittiest and most genial of men. He wrote "Letters on Catholics," "Three Letters to Singleton," and "Letters on American Debts."

Smollett, Tobias George, 1721-1771. Novelist; born at Dalquhurn, Dumbartonshire, Scotland, of good family; bred to medicine, but drifted to literature; achieved his first success in "Roderick Random," which was followed by "Peregrine Pickle," "Count Fathom," and "Humphrey Clinker"; wrote a "History of England," and a political lampoon, "The Adventures of an Atom."

Snorri, Sturluson, 1178-1241. An Icelandic poet and historian; born in Hvam, in the Dala district of Iceland. Snorri was the last and one of the greatest of the

Northern skalds. He wrote many panegyrics and heroic songs, and is believed to have been the author of part of the "Younger Edda." His principal work is the "Hælmakringle" ("ring of the world"), a collection of sagas.

Sophocles, 495-406 B. C. A Greek tragic poet; born in the Attic demus or village of Colonus. He was fifteen when the battle of Salamis was fought, and for his remarkable beauty and skill in music he was chosen to lead the chorus which sang the psalm of victory. The number of plays attributed to him without question was 113. Seven only are extant, viz., "Antigone," "Electra," "Trachinian Women," "King Œdipus," "Ajax," "Philoctetes," and "Œdipus at Colonus." These exhibit his art in its maturity, and sustain the verdict of ancient and modern critics that Sophocles carried the Greek drama to its highest perfection.

Southey, Robert, 1774-1843. An English poet; born in Bristol, England. In 1808 he took up his residence at Keswick, in Cumberland, he being thenceforth classed as one of the Lake poets. The latter years of his life were clouded by a mental imbecility. His chief poems are: "Joan of Arc," "A Vision of Judgment," "Roderick," "Thalaba," "Madoc," and "The Curse of Kehama." His prose is of most value, especially "Letters from England by Don Manuel Esprilla"; "The Doctor," containing "The Three Bishops"; and the lives of Wesley and of Nelson.

Spenser, Edmund, 1552-1599. One of England's greatest poets; details of his life are scanty. He wrote "Shepherd's Calendar," more rhythmical than any preceding poem in English; "Epithalamion," the finest English marriage hymn; "Faerie Queene," his great poem, in which he invented Spenserian stanza; "Four Hymns" in honor of love and beauty; and the "Prothalamion."

Spofford, Harriet Prescott, 1835- . . . An American authoress; born in Calais, Me.; was graduated at the Pinkerton Academy in Derry, N. H., in 1852. In 1859 she published "In a Cellar" in the *Atlantic Monthly*. This story made her reputation, and thereafter she became a contributor to the chief American periodicals.

Stael (*deh stah-l'*), **Madame de**, 1766-1817. Born in Paris, daughter of Necker, and only child; a woman of eminent ability, and an admirer of Rousseau; wrote "Letters" on his character and works; married the Baron de Stael-Holstein, the Swedish ambassador in Paris; her salon became the center of the literary and political activity of the time; the ambition of Napoleon excited her distrust, and forced her into opposition so expressed that in 1803 she was ordered to leave Paris; in 1802 she was left a widow, and soon after she went to Weimar, where she met Goethe and Schiller; by and by she returned to France and published "Corinne," her best novel; after this appeared her great epoch-making work on Germany, "De l'Allemagne," which was seized by the French censors and she was banished from France and settled in Switzerland.

Stedman, Edmund Clarence, 1833- . . . An American poet and banker; born in Hartford, Conn.; was a student at Yale, but did not graduate. He was a war correspondent of the *New York World* during the American Civil War. In 1869 he became a stock broker in New York city. The best known of his critical works are: "Victorian Poets," "Edgar Allan Poe," "Poets of America," and "The Nature and Elements of Poetry."

Stephen, Leslie, 1832- . . . Man of letters; born in London; became editor of the *Cornhill* and of the "Dictionary of National Biography"; author of "Hours in a Library," and "History of English Thought in the Eighteenth Century."

Sterne, Laurence, 1713-1768. English humorist; born at Clonmel, Ireland; in 1759 appeared the first two volumes of "Tristram Shandy," and in 1767 the last one; in 1768 his "Sentimental Journey"; and in the interim his "Sermons." Died in London of pulmonary consumption.

Stevenson, Robert Louis Balfour, 1850-1894. A British author; born in Edinburgh, Scotland; educated at the University of Edinburgh; studied law; wrote for periodicals till 1878, when his first book appeared; visited California in 1879. In 1888 he cruised in the Southern Pacific for his health; bought a tract of land ("Vallima" or "Five Streams") in Samoa, where he made his home. His chief works are "Treasure Island," "Dr. Jekyll and Mr. Hyde," "St. Ives," "Weir of Hermiston," his best, "Underwoods," and "Prince Otto."

Stockton, Francis Richard, 1834-1902. An American author; born in Philadelphia, Pa.; became an engraver and draughtsman; joined the editorial staff of *Scribner's Monthly* and became assistant editor of *St. Nicholas*;

His stories excel in original humor, and in agreeable absurdity of situation. The best are "The Lady or the Tiger?" "Rudder Grange," "The Hundredth Man," and "The Captain's Toll Gate."

Stowe, Harriet Elizabeth Beecher, 1811-1896. An American novelist, daughter of Lyman Beecher and sister of Henry Ward Beecher; born in Litchfield, Conn.; was married to Prof. Calvin Ellis Stowe; in 1864 she settled in Hartford, Conn. She published: "The Mayflower; or Sketches of the Scenes and Characters among the Descendants of the Pilgrims," "Uncle Tom's Cabin; or Life Among the Lowly," and a large number of other works. Her best known work, "Uncle Tom's Cabin" (suggested by the life of Josiah Henson) has been translated into nineteen languages, its sale exceeding that of any previous work of English fiction.

Sue, Marie Joseph Eugene, 1804-1857. A French novelist; born in Paris. His most famous works are: "The Mysteries of Paris" and "The Wandering Jew." In 1850 he was elected to the Constituent Assembly, and sat as an advanced radical. After the coup d'état by Napoleon III. in 1851 he left France and retired to Savoy.

Swift, Jonathan, 1667-1745. The greatest of English satirists; born in Dublin, Ireland. He was the posthumous son of Jonathan Swift, an Englishman; and was educated at Kilkenny and at Trinity College, Dublin. In 1701 he took his doctor's degree, and in 1704 he published anonymously his famous "Tale of a Tub," to which was appended the "Battle of the Books." In 1710 Swift began his "Journal to Stella," which constitutes a splendid commentary on his own history. He wrote many political pamphlets supporting the Tory policy of his day, the most powerful of which was "The Conduct of the Allies." His celebrated "Drapier's Letters" made him the idol of the Irish people. His famous "Gulliver's Travels" appeared in 1726. Swift did much to make public opinion a governing power in English politics. He died in Dublin, bequeathing the greatest part of his fortune to a hospital for lunatics and idiots.

Swinburne, Algernon Charles, 1837- . . . An English poet and essayist; son of Admiral Charles Henry Swinburne; born in London, England. His first productions were "Queen Mother" and "Rosamund." They were followed by two tragedies, "Atalanta in Calydon," and "Chastelard," and by "Poems and Ballads," reprinted as "Laus Veneris." He also wrote "A Study of Shakespeare," "Astrophel, and other Poems," "Essays and Studies," "The Tale of Balen," and "Rosamund, Queen of the Lombards."

Tacitus, Cornelius, 54?-117? Roman historian; born presumably at Rome. Of writings extant the chief are his "Life of Agricola," his "Germania," his "Histories," and his "Annals"; his "Agricola" is admired as a model biography, while his "Histories" and "Annals" are distinguished for their conciseness, their vigor, and their pregnancy of meaning.

Taine, Hippolyte Adolphe, 1829-1893. A French writer; born in Ardenne, France; was educated at the Ecole Normale. His "History of English Literature," one of the best and most philosophical works on the subject, appeared in 1864. His greatest work is "Beginnings of Contemporaneous France."

Talfourd, Sir Thomas Noon, 1795-1854. Lawyer and dramatist; born at Reading, England; was called to the bar in 1821, and practiced with notable success; was for some years a member of Parliament; author of four tragedies, of which "Ion" is the best known.

Tasso, Torquato, 1544-1596. An Italian epic poet; born in Sorrento, Italy. Tasso wrote numerous poems, but his fame rests chiefly on his "Rime," or lyrical poems, his "Aminta," and his "Jerusalem Delivered." His letters are also interesting.

Taylor, Bayard, 1825-1878. An American writer and traveler; born in Kennett Square, Chester county, Pa. He learned the trade of a printer; contributed to various magazines; made a journey through Europe on foot in 1844-1845; on his return published "Views Afoot in Europe," and in this way gained a position on the staff of the *New York Tribune*. He afterward traveled extensively. Resided in Germany for lengthened periods; was for some time United States secretary of legation at St. Petersburg, and latterly United States minister to Germany. He wrote books of travel, novels and poems.

Taylor, Jeremy, 1613-1667. "The modern Chrysostom;" born in Cambridge, England. In 1638 he was appointed rector of Uppingham in Rutlandshire. In the civil war, Taylor took the royal side, and so lost all his preferments. For many years he lived in retirement in Wales, busily engaged in writing books. In 1658 he

went, on the invitation of the Earl of Conway, to Ireland. Immediately after the Restoration he was made Bishop of Down and Connor, which see, as also that of Down, he held till his death at Lisburne.

Tegner, Esaias, 1782-1846. A popular Swedish poet; born at Kyrkerud; the son of a country parson. His poems, of which "Frithiof's Saga" is reckoned the finest in Swedish, have the finish of classic models, but are charged with the fire and vigor of modern romanticism.

Tennyson, Alfred, Lord, 1809-1892. An English poet; born in Somersby, England. His literary career may be said to date from 1830, when he published a volume entitled "Poems, chiefly Lyrical." It was not received with any great favor by the public. Its success was sufficient to encourage the poet to prepare a second collection, which appeared in 1833, and contained such poems as "A Dream of Fair Women," "Ehene," and others. It was not till 1842 that he again appealed to the public with a selection of his poems in two volumes. "The Idylls of the King" are his highest achievement. He received the laureateship upon the death of Wordsworth. Thereafter hardly a year passed without his adding some gem to our language. In 1855 the University of Oxford conferred on Tennyson the honorary degree of D.C.L. Among his later compositions are the dramas, "Queen Mary," "Harold," "The Cup." Tennyson was raised to the peerage in 1884 as Baron Tennyson of Aldworth, Sussex, and Freshwater, Isle of Wight. He died in Aldworth, England, and was buried in Westminster Abbey.

Terence, 185-159 B. C. Roman comic poet; born at Carthage; brought thence as a slave; educated by his master, a Roman senator, and set free; composed plays, adaptations of others in Greek by Menander and Apollodorus; they depict Greek manners for Roman imitation in a pure and perfect Latin style, and with great dramatic skill. The chief ones are "Andria," "Hecyra," "Eunuchus," "Phormio," and "Adelphi."

Terhune, Mary Virginia (Marion Harland), 1831- . . . An American authoress; born in Richmond, Va.; early began to write for the press. Was for several years the editor of *Babyhood* and *The Home Maker*; conducted departments in *Wide Awake* and *St. Nicholas*, and served on the editorial staff of the *Chicago Daily News*. Author of "Common Sense in the Household," "At Last," "Sunnybank," "Sketches of European Travel," "Our Daughters and What Shall We Do With Them?"

Thackeray, William Makepeace, 1811-1863. English novelist; born in Calcutta, India. Being well provided for, he chose the profession of an artist. He spent several years in France, Germany, and Italy, staying at Paris, Weimar, and Rome, but gradually became convinced that art was not his vocation, and, having lost his fortune, he resolved to turn his attention to literature. His first appearance in this sphere was as a journalist. In 1846-1848 his novel of "Vanity Fair" was published in monthly parts, with illustrations by himself; and long before its completion its author was unanimously placed in the first rank of British novelists. His next novel was "Pendennis," completed in 1850. In 1851 he delivered a course of lectures in London on the "English Humorists of the Eighteenth Century," which was repeated in Scotland and America. In 1855-1856 he delivered a series of lectures in the United States—"The Four Georges"—and afterward in England and Scotland. In 1860 he became editor of the *Cornhill Magazine*, but he retired from that post in 1862. Besides those mentioned, Thackeray's other great novels are "The Newcomes" and "Henry Esmond."

Thauct, Octave (than-ay), 1850- . . . Pseudonym of Alice French, an American novelist; born in Massachusetts.

Theocritus, flourished 280 B. C. A Greek poet; born at Syracuse. We have under his name thirty idylls or pastoral poems, of which, however, several are probably by other authors. Most of his idylls have a dramatic form and consist of the alternate responses of musical shepherds. His language is strong and harmonious.

Thompson, James Maurice, 1844-1901. An American author; born in Fairfield, Ind.; was state geologist of Indiana, 1885-1889; wrote nature studies. He published in book form "Hoosier Mosaics," "The Witchery of Archery," "A Tallahassee Girl," "Alice of Old Vincennes," his best novel, and "My Winter Garden."

Thomson, James, 1700-1743. The author of the "Seasons"; born, the son of the parish minister, at Ednam, Roxburghshire; was educated and trained for the ministry at Edinburgh University; his poem "Winter" had immediate success, and raised up a host of friends and patrons; the "Masque of Alfred," with its popular song

"Rule Britannia," and his greatest work, "The Castle of Indolence," were the outcome of his later years of leisure.

Thoreau, Henry David, 1817-1862. An American author; born in Concord, Mass. In 1845 he built for himself a hut in a wood near Walden pond, Concord, Mass., and there for two years lived the life of a hermit. Besides contributing to the *Dial* and other periodicals, he published "A Week on the Concord and Merrimack Rivers," and "Walden, or Life in the Woods." After his death appeared "Excursions in Field and Forest," "The Maine Woods," "Cape Cod," and "A Yankee in Canada." Thoreau was a friend of Emerson, and imbibed much of his spirit and method of thought. His best essays are "Miscellanies and Excursions," of remarkable style and substance. He died in Concord.

Thucydides, 460?-400? B. C. Historian of the Peloponnesian War; born in Athens, of a wealthy family; naval commander in 424 in the Peloponnesian War, but from neglect of duty was banished; returned from exile twenty years after; his great achievement is his history, all derived from personal observation and oral communication, the materials of which were collected during the war, and the whole executed in a style to entitle it to rank among the noblest literary monuments of antiquity. He was the greatest historian of ancient times.

Tieck, Ludwig, 1773-1853. German novelist; born in Berlin; was one of the founders of the Romantic school in Germany. Wrote novels and popular tales and dramas.

Timrod, Henry, 1829-1867. An American poet, born in Charleston, S. C.; died in Columbia, S. C.

Tocqueville, Alexis Clere de, 1805-1859. French economist; born at Verneuil, of an old Norman family; bred to the bar, and especially distinguished as the author of two works in high repute, "La Democratie en Amerique" and "L'Ancien Regime et la Revolution"; died at Cannes, leaving much of his work unfinished.

Tolstoy, Count Lyof Alekseevich, 1828- . . . A Russian novelist; born on the family estate of Yasnaya Polyana in the province of Tula, Russia. He served in the Crimean War, and afterward traveled extensively. In 1861 he took up permanent residence on his country estate. Among his earliest works are: "Detstvo" (Childhood), "Otrchestvo" (Boyhood), and "Iunost" (Youth); also "Cossacks," "Sevastopol," and a number of military sketches. "War and Peace" was published in 1865-1868; "Anna Karenina" in 1875-1876. His peculiar doctrines are promulgated in "My Confession," "In What My Faith Consists," etc.; many of them are forbidden in Russia. His later works are: "The Kreutzer Sonata," "Death of Ivan Ilych," and "Master and Man." Nearly all have been translated into English and most other modern languages.

Touge, Albion Winegar, 1838-1905. An American jurist and author; born in Williamsfield, O.; was graduated at Rochester University, N. Y., in 1862; admitted to the bar, 1864; served in the Civil War in the Union army, and was wounded on two occasions; at the close of the war commenced the practice of law at Greensboro, N. C., and at the southern loyalist convention at Philadelphia, 1866, drew up the report on the condition of the states lately in revolt. In 1868 he became judge of the Superior Court of North Carolina. Besides compiling "A Code of Civil Procedure for North Carolina," he wrote "A Fool's Errand," "Bricks Without Straw," etc. In 1897 he was appointed United States consul at Bordeaux, France.

Trollope, Anthony, 1815-1882. An English novelist; born in London, England. He was educated at Harrow and Winchester; in 1834 became a clerk in the post office, and in 1841 was appointed clerk to a post office surveyor in Ireland. His Irish experiences gave him material for his first novels. His first success was "The Warden"; followed by "Barchester Towers," etc. He also published accounts of his travels. He died in London.

Trowbridge, John Townsend, 1827- . . . An American author; born in Ogden, N. Y. He began his literary career in 1846 by writing for the magazines, and in 1850 became editor of *The Yankee Nation*, and co-editor with Lucy Larcom and Gail Hamilton, of *Our Young Folks*. Among his most popular works are: "Jack Hazard Stories," "Two Biddicut Boys," also several volumes of poems.

Tapper, Martin, 1810-1889. Author of "Proverbial Philosophy"; born in Marylebone; bred to the bar; wrote some forty works; the "Philosophy" had quite a phenomenal success.

Turgenev, Ivan Sergeyevich, 1818-1883. Russian

novelist. His fame rests on his "Yakoff Pasynkoff," "Rudin, Faust," "Asya," "Nobles' Nest," "On the Eve, First Love," and "Fathers and Sons." He has been called "the greatest prose artist of Russian letters."

Van Dyke, Henry Jackson, 1852- . An American educator; born in Germantown, Pa.; was graduated at Princeton University in 1875, at the Princeton Theological Seminary in 1877, and at Berlin University in 1878; and soon afterward assumed the pastorate of the United Congregational Church in Newport, R. I. He was chosen pastor of the Brick Presbyterian Church in New York city in 1882 and continued in that charge till 1900, when he resigned to become Professor of English Literature in Princeton University. His publications include: "The Reality of Religion," "The Poetry of Tennyson," "The Ruling Passion," and "The Blue Flower."

Vega Carpio, de, Lope Felix, 1562-1635. Known as Lope, Spanish dramatist; born in Madrid; served in the Armada; was secretary to the Duke of Alva; took orders and became a priest; wrote a heroic pastoral entitled "Arcadia" at the instance of the duke, and "La Dragon-ta" over the death of Drake as the destroyer of the supremacy of Spain on the sea; was a man of fertile inventiveness, and is said to have written 1,500 plays, besides no end of verses, and was called by Cervantes a "prodigy of nature." He wrote also "San Isidro."

Verne, Jules, 1828-1905. A French novelist; born in Nantes, France. He studied law for some time, but afterward began writing short pieces for the stage. His more popular works are: "Twenty Thousand Leagues under the Sea," "From the Earth to the Moon," "Across Africa in a Balloon," "Michel Strogoff," "To the Center of the Earth," "Round the World in Eighty Days," "The Mysterious Island," etc. Most of his works have been translated into English and German.

Vigny (deh-ven-yay), Alfred, Comte de, 1799-1863. French poet of the Romanticist school, born at Loches. He wrote "Poems" and "Poems Ancient and Modern," between 1821 and 1825. His strongest drama was "Chatterton," published in 1835; wrote also "Cinq-Mars," a long historic novel, and translated into French "Othello."

Virgil, 70-19 B. C. Great Latin poet; born near Mantua; author in succession of the "Eclogues," the "Georgics," and the "Æneid"; studied at Cremona and Milan, and at seventeen was sent to Rome to study rhetoric and philosophy; lost property he had in Cremona after the battle of Philippi; went to settle in Rome; here, in 37 B. C., he published his "Eclogues," a collection of ten pastorals, and gained the patronage of Mæcenas, under whose favor he was able to retire to a villa at Naples, where in seven years he, in 29 B. C., produced the "Georgics," in four books, on the art of husbandry, after which he devoted himself to his great work, the "Æneid," or the story of Æneas of Troy, an epic in twelve books, connecting the hero with the foundation of Rome, and especially with the Julian family, and which was finished in 19 B. C.; on his deathbed he expressed a wish that it should be burned, and left instructions to that effect in his will; he was one of the purest minded poets perhaps that ever lived.

Voltaire, Francois Marie Arouet de, 1694-1778. Great French "persifleur"; born in Paris; son of a lawyer; began his career as a satirist in the production of lampoons which cost him imprisonment in the Bastille. After a second imprisonment he left France in 1726 and went to England, where he stayed two years, and got acquainted with the literary free-thinking society there; on his return to Paris he engaged in some profitable commercial speculations and published his "Charles XII," which he had written in England; retired to the Chateau of Cirey, where he lived fifteen years with Madame du Châtelet, engaged in study and diligent with his pen; after her death made his famous visit to Frederick the Great, with whom before three years were out he quarreled, and from whom he was glad to escape, making his headquarters eventually within the borders of France at Ferney; now and again visited Paris, where on his last visit he was received with such raptures of adulation that he was quite overcome, and had to be conveyed home, and died two months after. He was a man of superlative adroitness of faculty, of great clearness and wit as a writer, and more than any other the incarnation of the spirit of his time.

Wallace, Lewis, 1827-1905. An American military officer and author; born in Brookville, Ind.; was lieutenant in the Mexican War in 1846-1847; took a distinguished part in the Civil War, in which he served in the campaigns in West Virginia and Kentucky; commanded a division at the capture of Fort Donelson; led the attack

in the second day's fight in the battle of Shiloh; took part in the subsequent advance on Corinth; saved Cincinnati, O., from capture by Gen. E. Kirby Smith; and was president of the court appointed to investigate the conduct of General Buell; in 1864 he commanded the Middle Department and the Eighth Army Corps, and in the battle of Monocacy prevented the capture of Washington and Baltimore by General Early. He was a member of the commission which tried the assassins of President Lincoln, and in the same year presided over the court which tried Captain Wirz, the commandant of the Andersonville prison. In 1866 he was sent to Mexico on a secret diplomatic mission to President Juarez; was governor of New Mexico in 1878-1881, and was United States Minister to Turkey in 1881-1885. When not engaged in public service he practiced law and devoted himself to literature. His publications include: "The Fair God," "Ben Hur, a Tale of the Christ," "The Prince of India," "The Life of Gen. Benjamin Harrison," etc.

Walpole, Horace, Earl of Oxford, 1717-1797. An English author; born in London. In 1741 he entered the House of Commons; in 1791 he succeeded his nephew in the peerage. He never took his seat in the House of Lords, and appears to have avoided using his title. The works of Horace Walpole are numerous; but his fame as a writer rests on his "Letters" and "Memoirs." The former are held to be unsurpassed in the English language. His romance "The Castle of Otranto" is also well known. He died in London.

Walton, Izak, 1593-1683. An English author; known as the father of angling; born in Stafford, England. Walton's fame is mainly based on his "Compleat Angler; or the Contemplative Man's Recreation," first published in 1653. Few more popular books exist, and the editions are consequently numerous. He died in Winchester, England.

Ward, Elizabeth Stuart Phelps. See **PHELPS.**

Ward, Mrs. Humphry (Mary Augusta Arnold), 1851- . An English novelist; born in Hobart Town, Tasmania; is a niece of Matthew Arnold; translated Amiel's "Journal," a suggestive record, but is best known by her romance "Robert Elsmere." She has written several later books, notably "Eleanor" and "Lady Rose's Daughter."

Warner, Charles Dudley, 1829-1900. American editor and author; born in Plainfield, Mass.; was graduated from Hamilton College in 1851; he was the author of such well known works as "Saunterings," "Backlog Studies," "Washington Irving," "On Horseback," and "Captain John Smith," and editor of "A Library of the World's Best Literature."

Watson, John ("Ian MacIaren"), 1850- . Till 1893 Dr. Watson was known as a popular preacher and able minister, and in that year he acquired additional distinction and wider fame by writing a series of Scotch Idylls for the *British Weekly*, under the title of "Beside the Bonnie Brier Bush"; they became widely popular in the United States and Great Britain. "The Days of Auld Lang Syne," a second series of Idylls, published in 1895, also reached a large circulation. A novel from Dr. Watson's pen, "Kate Carnegie and Those Ministers," was published in 1896. "The Upper Room" and "The Life of the Master" are perhaps his best known religious works.

Watson, William, 1858- . poet; born in Yorkshire; the first poem which procured him recognition was "Wordsworth's Grave"; among his later productions the most important is a volume entitled, "Odes and other Poems"; has also written an admirable volume of essays, "Excursions in Criticism."

Watts, Isaac, 1674-1748. An English hymnologist; born in Southampton, England. He wrote: "Hymns and Spiritual Songs," "Divine and Moral Songs for the Use of Children," "A Manual of Logic," several volumes of "Sermons," besides other works of less note. As a religious poet Watts has been always widely popular.

Wesley, Charles, 1707-1788. An English hymnist; born in Epworth, England; younger brother of John Wesley; wrote numerous hymns, large collections from which have been frequently published. Two of his sons, Charles and Samuel, were celebrated for musical genius.

Whately, Richard, 1787-1863. Archbishop of Dublin; born in London; is best known by his "Logic," for a time the standard work of the subject.

White, Richard Grant, 1821-1885. An American Shakespearean scholar; born in New York city. Among his published books are: "Memoirs of the Life of William Shakespeare, with an Essay towards the Expression of

His Genius," etc., "Words and their Uses." "The Riverside Shakespeare," an annotated edition of Shakespeare.

Whitman, Walt, 1819-1892. An American poet; born in West Hills, Long Island, N. Y.; became editor of the *Brooklyn Eagle*. Leaves of Grass, "Specimen Days and Collect" may be held to embrace the life work of Whitman as a writer. About the close of the war he received a subordinate clerkship under the government, and was summarily dismissed as the author of "an indecent book," though he fortunately obtained a similar post almost immediately. In 1874 he left Washington for Camden, N. J., where he lived till his death.

Whittier, John Greenleaf, 1807-1892. An American poet; born near Haverhill, Mass. The son of a poor farmer, who was also shoemaker, young Whittier obtained his education with that struggle which seems to foster genius, while the bodily frame, that so well served him till his decease, was developed and hardened by his healthy, outdoor life; was apprenticed to journalism; his poetry attracted the admiration of William Lloyd Garrison, who rode over from Newburyport to see Whittier when quite a lad, and became his lifelong friend. If Garrison may be called the preacher or prophet, Whittier must be wrenth the poet laureate of abolition. Apart from this strenuous and heroic struggle there is nothing epoch making in Whittier's life, literary or personal. His chief poems are: "Voices of Freedom," "Snow Bound" (his best), "In War Time," "The Tent on the Beach," "Poems of Nature."

Wieland, Christoph Martin, 1733-1813. A German poet and novelist; born near Biberach, a small village in Swabia; son of a pastor of the Pietist school; studied at Tübingen; became professor of philosophy at Erfurt and settled in Weimar in 1772 as tutor of the two sons of the Duchess Amalia. His best work is a heroic poem entitled "Oberon."

Wiggin, Kate Douglas (née Smith), 1857- . . . An American authoress; born in Philadelphia, Pa. She went to California in 1876, where she studied the kindergarten system in Los Angeles; later, she taught a year in Santa Barbara College; then went to San Francisco, where she organized the first free kindergarten in the West. In 1890 she organized the California Kindergarten Training School. She has written many stories and books on and for the kindergarten, also "Rebecca of Sunnybrook Farm," "Penelope's Progress," "Diary of a Goose Girl," "Timothy's Quest," and "The Birds' Christmas Carol."

Wilkins-Freeman, Mary Eleanor, 1862- . . . An American authoress, born in Randolph, Mass. Her works, studies of New England country life, are: "The Love of Parson Lord," "Understudies," "Portion of Labor," and "Wind in the Rose Bush." She was married to Dr. Charles M. Freeman, January 1, 1902.

Willis, Nathaniel Parker, 1806-1867. An American author; born in Portland, Me.; established the *American Monthly Magazine*, which was merged in the *New York Mirror*; traveled in France, Italy, Greece, European Turkey, Asia Minor, and finally England. His numerous published writings include: "Pencilings by the Way," "Inkings of Adventure," "People I Have Met," "Famous Persons and Places." His work is without enduring character.

Willson, John, 1785-1854. The well-known "Christopher North"; born in Paisley; son of a manufacturer, who left him a fortune of £50,000; lost his fortune and settled in Edinburgh, and wrote for *Blackwood's Magazine*; was in 1820 elected, over Sir William Hamilton, Professor of Moral Philosophy in Edinburgh University. He wrote "Noctes Ambrosianae," full of humor and pathos, and his best work: "Lights and Shadows of Scottish Life," "The Foresters," and "The Trials of Margaret Lyndsay."

Winter, William, 1836- . . . An American dramatic critic; born in Gloucester, Mass. He did journalistic work on the *Saturday Press*, *Vanity Fair*, the *Albion*, *Weekly Review*, and has been dramatic critic for the *New York Tribune* from 1865.

Wood, Mrs. Henry (née Price), 1820-1887. An English novelist; born in Worcestershire; her best novels, "The Channings" and "Mrs. Halliburton's Troubles," though her most popular, "East Lynne." She wrote some thirty, all popular, and deservedly so.

Woodworth, Samuel, 1785-1842. An American journalist; born in Scituate, Mass. He was one of the founders of the *New York Mirror*; edited the *Parthenon*; wrote a romantic history of the war, called "The Champions of Freedom," and several dramatic pieces. His famous poem is "The Old Oaken Bucket."

Wordsworth, William, 1770-1850. An English poet; born in Cockermouth, Cumberland. He was the son of an attorney and in 1787 was sent to St. John's College, Cambridge. He crossed to France in November, 1790, and exhibited vehement sympathy with the revolution, remaining in France for nearly a year. After his return, disregarding all entreaties to enter on a professional career, he published his "Evening Walk" and "Descriptive Sketches." Two years afterward he received a legacy of \$4,500 from Ransley Calvert. With this sum and the consecrated helpfulness of his sister Dorothy he contrived to keep house for eight years, while he gave himself to poetic effort as his high "office on earth." Coleridge induced the Wordsworths to go to Alfoxden, in his immediate neighborhood. Here the two poets held daily intercourse, and after a year they published "Lyrical Ballads" in literary co-partnership. After a winter spent in Germany, Wordsworth and his sister settled at Grasmere, where he proposed to write a great philosophical poem on man, nature, and society. Thenceforth his life was marked by few incidents. His best poems are: "The Excursion," odes on immortality and to Duty, "The Prelude," "Thanksgiving Ode," and "White Doe of Rylstone."

Xenophon, 430-357 B.C. A Greek historian and philosopher; Xenophon played an important part in the adventurous retreat known in history as the "Retreat of the Ten Thousand," the description of which he wrote in "Anabasis." His other works are, "Memorabilia," or Recollections of Socrates; "Hellenica," a continuation of Thucydides's history of the Peloponnesian War; and the "Cyropædia," or Education of Cyrus.

Yonge, Charlotte Mary, 1823-1901. Popular novelist; born at Otterbourne; has written "Cameos of History of England," "Landmarks of History," etc.

Young, Edward, 1683-1765. An English poet; author of "Night Thoughts."

Zangwill, Israel, 1864- . . . An English-Jewish novelist; born in London. He began life as a London teacher, and while teaching, graduated at the London University; has written novels, essays, and poems; among his works, the "Bachelors' Club," "Old Maids' Club," "Children of the Ghetto," "Dreams of the Ghetto," "The Master," "Without Prejudice," and "The Grey Wig."

Zola, Emile, 1840-1902. A French novelist; born in Paris, France; the son of an Italian engineer. After working for Paris publishers and writing for the press he attempted fiction with success. During 1897 and 1898 he took up with splendid courage the cause of Captain Dreyfus, whom he declared to have been illegally condemned, and was in consequence of his action prosecuted by order of the French government, and condemned to imprisonment. He escaped punishment by voluntary exile in England. Returning to Paris after the subsidence of the excitement caused by the Dreyfus case, he resumed his literary work; was accidentally killed by gas escaping from a coal fire.

Zschokke (tsch'ke), Johann Heinrich, 1771-1848. A German writer; born in Magdeburg; lived chiefly at Aarau, in Aargau, Switzerland, where he spent forty years of his life, and where he died; wrote histories and a series of tales, but is best known by his "Stunden der Andacht" (i. e. hours of devotion).

Portrait by Gilbert Stuart.

GEORGE WASHINGTON.

Book III.

History and Biography.

History and Biography.

Chronological Eras.—The year 1899 corresponds to the year 7407-8 of the Byzantine era; to 5659-60 of the Jewish era, the year 5650 beginning at sunset on September 4; to 2652 since the foundation of Rome according to Varro; to 2675 of the Olympiads (the third year of the 669th Olympiad beginning July 1, 1899); to 2559 of the Japanese era, and to the 32d year of the Meiji; to 1316-17 of the Mohammedan era or the era of the Hegira, the year 1317 beginning on May 12, 1899. The 125th year of the Independence of the United States of America begins on July 4, 1900.

Date of Beginning of Epochs, Eras, and Periods.

| NAME. | BEGAN. |

Divisions of Time.—The interval between two consecutive transits of a fixed star over any meridian or the interval during which the earth makes one absolute revolution on its axis is called a *Sidereal Day*, and is invariable, while the interval between two consecutive transits of the Sun over any meridian is called an *Apparent Solar Day*, and its length varies from day to day by reason of the variable motion of the earth in its orbit, and the inclination of this orbit to the equator, on which time is measured.

A *Mean Solar Day* is the average or mean of all the apparent solar days in a year. *Mean Solar Time* is that shown by a well-regulated clock or watch, while *Apparent Solar Time* is that shown by a well-constructed sundial; the difference between the two at any time is the *Equation of Time*, and may amount to 16

minutes and 21 seconds. The *Astronomical Day* begins at noon and the *Civil Day* at the preceding midnight. The *Sidereal* and *Mean Solar Days* are both invariable, but one day of the latter is equal to 1 day, 3 minutes, and 56.555 seconds of the former.

The interval during which the earth makes one absolute revolution round the Sun is called a *Sidereal Year*, and consists of 365 days, 6 hours, 9 minutes, and 9.6 seconds, which is invariable.

The *Tropical Year* is the interval between two consecutive returns of the Sun to the Vernal Equinox. If this were a fixed point, the *Sidereal* and *Tropical Years* would be identical; but in consequence of the disturbing influence of the moon and planets on the spheroidal figure of the earth, the Equinox has a slow, retrograde mean motion of 50.26 seconds annually, and the Sun returns to the Equinox sooner every year than he otherwise would by 20 minutes, 23.6 seconds; the *Tropical Year*, therefore, consists of 365 days, 5 hours, 48 minutes, and 46 seconds. The *Tropical Year* is not of uniform length; it is now slowly decreasing at the rate of .595 second per century, but this variation will not always continue.

Julius Caesar, in B. C. 45, was the first to reform the calendar by ordering that every year whose date number is exactly divisible by 4 contain 366 days, and all other years 365 days. The intercalary day was introduced by counting the sixth day before the Kalends of March twice; hence the name *bissextile*, from *bis*, twice, and *sex*, six. He also changed the beginning of the year from first of March, to the first of January, and also changed the name of the fifth month (*Quintilis*) to July, after himself. The average length of the Julian year is therefore $365\frac{1}{4}$ days, which, however, is too long by 11 minutes and 14 seconds, and this would accumulate in 400 years to about three days. The Julian Calendar continued in use until A. D. 1582, when the date of the beginning of the seasons occurred 10 days later than in B. C. 45, when this mode of reckoning time was introduced.

The Gregorian Year was introduced by Pope Gregory XIII. with the view of keeping the Equinox to the same day of the month. It consists of 365 days, but every year exactly divisible by 4 and the centennial years which are exactly divisible by 400 contain 366 days; and if in addition to this arbitrary arrangement the centennial years exactly divisible by 4,000 contain 366 days, the error in the Gregorian

system will amount to only one day in about 20 centuries. If, however, 81 leap years were intercalated in 128 years, instead of 32 as at present, the calendar would be practically exact, and the error would not amount to more than a day in 100,000 years. The length of the mean Gregorian Year may therefore be set down at 365 days, 5 hours, 49 minutes, 12 seconds. The Gregorian Calendar was introduced into England and her colonies in 1752, at which time the Equinox had retrograded 11 days since the Council of Nice in A. D. 325, when the festival of Easter was established and the Equinox occurred on March 21; hence September 3, 1752, was called September 14, and at the same time the commencement of the legal year was changed from March 25 to January 1, so that the year 1751 lost the months of January and February and the first 24 days of March. The difference between the Julian and Gregorian Calendars is now 12 days. Russia and the Greek Church still employ the Julian Calendar for civil and ecclesiastical purposes.

Standard Time.—Primarily, for the convenience of the railroads, a standard of time was established by mutual agreement in 1883, by which trains are run and local time regulated. According to this system, the United States, extending from 65° to 125° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour, commencing with the 75th meridian. The first (eastern) section includes all territory between the Atlantic coast and an irregular line drawn from Detroit to Charleston, S. C., the latter being its most southern point. The second (central) section includes all the territory between the last named line and an irregular line from Bismarck, N. D., to the mouth of the Rio Grande. The third (mountain) section includes all territory between the last-named line and nearly the western borders of Idaho, Utah, and Arizona. The fourth (Pacific) section covers the rest of the country to the Pacific coast. Standard time is uniform inside each of these sections, and the time of each section differs from that next to it by exactly one hour. Thus at 12 noon in New York city (eastern time), the time at Chicago (central time) is 11 o'clock A. M.; at Denver (mountain time), 10 o'clock A. M., and at San Francisco (Pacific time), 9 o'clock A. M. Standard time is 16 minutes slower at Boston than true local time, 4 minutes slower at New York, 8 minutes faster at Washington, 19 minutes faster at Charleston, 28 minutes slower at Detroit, 18 minutes faster at Kansas City, 10 minutes slower at Chicago, one minute faster at St. Louis, 28 minutes faster at Salt Lake City, and 10 minutes faster at San Francisco.

Old English Holidays.—These holidays, with their names, had their origin in mediæval England when the State religion was that of the Church of Rome, and they are still observed generally or in some parts of England, Scotland, and Ireland.

JANUARY 6. TWELFTH DAY, or Twelfth-tide, sometimes called Old Christmas Day, the same as Epiphany. The previous evening is Twelfth Night, with which many social rites have long been connected.

FEBRUARY 2. CANDLEMAS: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during the year.

FEBRUARY 14. OLD CANDLEMAS: St. Valentine's Day.

MARCH 25. LADY DAY: Annunciation of the Virgin. April 6 is old Lady Day.

JUNE 24. MIDSUMMER DAY: Feast of the Nativity of John the Baptist. July 7 is old Midsummer Day.

JULY 15. ST. SWITHIN'S DAY. There was an old superstition that if rain fell on this day it would continue forty days.

AUGUST 1. LAMMAS DAY: Originally in England the festival of the wheat harvest. In the Church the festival of St. Peter's miraculous deliverance from prison. Old Lammas Day is August 13.

SEPTEMBER 29. MICHAELMAS: Feast of St. Michael, the Archangel. Old Michaelmas is October 11.

NOVEMBER 1. ALLHALLOWMAS: Allhallows or All Saints' Day. The previous evening is Allhalloween, observed by home gatherings and old-time festive rites.

NOVEMBER 2. ALL SOULS' DAY: Day of prayer for the souls of the dead.

NOVEMBER 11: MARTINMAS: Feast of St. Martin. Old Martinmas is November 23.

DECEMBER 28. CHILDERMAS: Holy Innocents Day.

Lady Day, Midsummer Day, Michaelmas, and Christmas are quarter (rent) days in England, and Whitsunday, Martinmas, Candlemas, and Lammas Day in Scotland.

Shrove Tuesday, the day before Ash Wednesday, and Maundy Thursday, the day before Good Friday, are observed by the Church. Mothering Sunday is Mid-Lent Sunday, in which the old rural custom obtains of visiting one's parents and making them presents.

Legal Holidays in the Various States. ALABAMA.—Jan. 1 (New Year's Day), Jan. 19 (R. E. Lee's Birthday), Shrove Tuesday, Feb. 22 (Washington's Birthday), Good Friday, June 3 (Jefferson Davis's Birthday), July 4, Thanksgiving, and Christmas.

ARIZONA.—Jan. 1, Feb. 22, May 30 (Memorial

Day), Arbor Day, July 4, Election Day, Thanksgiving, and Christmas.

ARKANSAS.—Arbor Day, Thanksgiving, July 4, and Christmas.

CALIFORNIA.—Jan. 1, Feb. 22, May 30, July 4, First Monday in September (Labor Day), Sept. 9 (Admission Day), Christmas, Thanksgiving, day of general election and every day appointed by the president or the governor.

COLORADO.—Labor Day (only statutory holiday, but other big holidays generally observed).

CONNECTICUT.—Jan. 1, Feb. 12 (Lincoln's Birthday), Feb. 22, May 30, July 4, Good Friday, Labor Day, Christmas, and Thanksgiving.

DELAWARE.—Jan. 1, Feb. 22, July 4, Arbor and Bird Days, Labor Day, Thanksgiving, and Christmas.

FLORIDA.—Jan. 1, Jan. 19, Feb. 22, April 26 (Confederate Memorial Day), June 3, July 4, Thanksgiving, and Christmas.

GEORGIA.—Jan. 19, April 26, June 3, July 4, Labor Day, and Christmas.

IDAHO.—Jan. 1, Feb. 22, Friday following May 1, July 4, Election Day, Christmas.

ILLINOIS.—Jan. 1, Feb. 12, Feb. 22, May 30, July 4, Labor Day, Thanksgiving, and Christmas.

INDIANA.—Jan. 1, Feb. 22, May 30, Thanksgiving, and Christmas.

IOWA.—Jan. 1, Feb. 22, May 30, Labor Day, Thanksgiving, and Christmas.

KANSAS.—Feb. 22, May 30, and Labor Day.

KENTUCKY.—Jan. 1, Feb. 22, July 4, Labor Day, Thanksgiving, and Christmas.

LOUISIANA.—Jan. 1, Jan. 8 (anniversary of the Battle of New Orleans), Feb. 22, Mardi-Gras (day before Ash Wednesday), Good Friday, June 3, July 4, Nov. 1 (All Saints' Day), Labor Day (fourth Saturday in November), Thanksgiving, and Christmas.

MAINE.—Jan. 1, Feb. 22, May 30, July 4, Fast Day, Thanksgiving, and Christmas.

MARYLAND.—Jan. 1, Feb. 22, Good Friday, May 30, July 4, Thanksgiving, and Christmas.

MASSACHUSETTS.—Feb. 22, April 19 (Patriots' Day, Anniversary Battle of Lexington), May 30, July 4, Labor Day, Thanksgiving, and Christmas.

MICHIGAN.—Jan. 1, Feb. 22, May 30, July 4, Labor Day, and Christmas.

MINNESOTA.—Jan. 1, Feb. 12, Feb. 22, Good Friday, May 30, July 4, Thanksgiving, and Christmas, Arbor and Bird Days (designated by the governor).

MISSISSIPPI.—Jan. 1, Feb. 22, July 4, Thanksgiving, and Christmas.

MISSOURI.—Jan. 1, Feb. 22, May 30, July 4, Labor Day, Thanksgiving, and Christmas.

NEBRASKA.—Jan. 1, Feb. 22, April 22 (Arbor Day), May 30, July 4, Thanksgiving, and Christmas.

NEVADA.—Jan. 1, Feb. 22, May 30, July 4, Oct. 31 (Admission Day), General Election Day, Thanksgiving, and Christmas.

NEW HAMPSHIRE.—Feb. 22, May 30, July 4,

Labor Day, Fast Day, Thanksgiving, and Christmas.

NEW JERSEY.—Jan. 1, Feb. 12, Feb. 22, May 30, July 4, General Election Day, Thanksgiving, and Christmas.

NEW MEXICO.—Jan. 1, Feb. 22, May 30, Arbor Day (second Friday in March), Labor Day, Thanksgiving, Christmas, and Flag Day.

NEW YORK.—Jan. 1, Feb. 12, Feb. 22, May 30, July 4, Labor Day, Election Day, Thanksgiving, and Christmas.

NORTH CAROLINA.—Jan. 1, Jan. 19, Feb. 22, May 10 (Confederate Memorial Day), May 20 (Mecklenburg Declaration of Independence), July 4, October 12, Thanksgiving, and Christmas.

NORTH DAKOTA.—Jan. 1, Feb. 22, May 30, July 4, Election Day, Thanksgiving, and Christmas.

OHIO.—Jan. 1, Feb. 22, May 30, July 4, Thanksgiving, and Christmas.

OKLAHOMA.—Jan. 1, Feb. 22, Arbor Day, May 30, July 4, Labor Day, Thanksgiving, and Christmas.

OREGON.—Jan. 1, Feb. 22, May 30, July 4, Labor Day, Thanksgiving, and Christmas.

PENNSYLVANIA.—Jan. 1, Feb. 12, third Tuesday in February (local election), Feb. 22, Good Friday, May 30, July 4, Labor Day, November Election Day, Thanksgiving, and Christmas.

RHODE ISLAND.—Jan. 1, Feb. 22, second Friday in May, May 30, Labor Day, Election Day, Thanksgiving, and Christmas.

SOUTH CAROLINA.—Jan. 1, Feb. 22, May 10 (Confederate Memorial Day), July 4, Thanksgiving, and Christmas.

SOUTH DAKOTA.—Jan. 1, Feb. 22, May 30, July 4, Election Day, Thanksgiving, and Christmas.

TENNESSEE.—Jan. 1, Feb. 22, Good Friday, May 30, June 3, July 4, Labor Day, Election Day, and Thanksgiving.

TEXAS.—Jan. 1, Feb. 22, March 2 (Texas independence), April 21 (Battle of San Jacinto), July 4, Election Day, Thanksgiving, and Christmas.

UTAH.—Jan. 1, Feb. 22, Arbor Day, May 30, July 24 (Pioneers' Day), Labor Day, Thanksgiving, and Christmas.

VERMONT.—Jan. 1, Feb. 22, May 30, July 4, August 16 (Bennington Battle Day), Election Day, Thanksgiving, and Christmas.

VIRGINIA.—Jan. 1, Jan. 19, Feb. 22, July 4, Thanksgiving, and Christmas.

WASHINGTON.—Jan. 1, Feb. 12, Feb. 22, May 30, July 4, Election Day, Thanksgiving, and Christmas.

WEST VIRGINIA.—Jan. 1, Feb. 22, May 30, July 4, Labor Day, Election Day, Thanksgiving, and Christmas.

WISCONSIN.—Jan. 1, Feb. 22, May 30, July 4, Election Day, Thanksgiving, and Christmas.

WYOMING.—Jan. 1, Feb. 12, Feb. 22, May 30, Election Day, Thanksgiving, and Christmas.

SATURDAY HALF-HOLIDAYS.—After 12 o'clock noon. Legal holiday in Colorado and Louisiana (in cities and towns of 100,000 population and over), Delaware (Newcastle County only, in Wilmington throughout the year, and rest of county from June to September), District of Columbia, Maryland (Baltimore and Annapolis only), Michigan, Missouri (in cities of 100,000 or over), New Jersey, New York, Ohio (in cities of 50,000 or over), Pennsylvania, South Carolina (in Charleston County only), and Virginia.

There is no national holiday, not even the Fourth of July. Congress has at various times appointed special holidays. In the second session of the fifty-third Congress it passed an act making Labor Day a public holiday in the District of Columbia, and it has recognized the existence of certain days as holidays, for commercial purposes, but, with the exception named, there is no general statute on the subject. The proclamation of the President designating a day of Thanksgiving only makes it a legal holiday in those States which provide by law for it.

The Months and their Names.—January, the first month of the year, was among the Romans held sacred to Janus, from whom it derived its name, and was added to the calendar along with February by Numa in 713 B. C. It was not till the eighteenth century that January was universally adopted by European nations as the *first* month of the year, although the Roman's considered it as such as far back as 251 B. C.

February is the name given to the second month, in which were celebrated the Februa, or feasts to the manes of deceased persons.

March, the first month of the Roman year, and the third according to our present calendar, consists of 31 days. It was considered as the first month of the year in England until the change of style in 1752, and the legal year was reckoned from the 25th of March. Its last three days (old style) were once popularly supposed to have been *borrowed* by March from April, and are proverbially stormy.

To the fourth month of our year the Romans gave the name of *Aprilis*, derived from *aperire*, "to open," probably because it is the season when the buds begin to open. By the Anglo-Saxons it was called Eastermonth.

The name of the fifth month, May, is said to be derived from *Maia*, the mother of Mercury, to whom the Romans on the first day offered sacrifices. It was the third month of the Roman year.

June, the sixth month of the year in our calendar, but the fourth among the Romans, consisted originally of 26 days, to which four were added by Romulus, one taken away by Numa, and the month again lengthened to 30 days by Julius Cæsar.

The seventh month of the year in our calendar, and the fifth in the Roman calendar, was originally called *Quintilis* (the fifth). At first it contained 36 days, was reduced to 31, then to 30, but was restored to 31 days by Julius Cæsar, in honor of whom it was named July.

August, the eighth month of the year, was so named by the Emperor Augustus (B. C. 68

—A. D. 14), who commanded that his name should be given to the month. August was the sixth month of the Roman year and was previously called *Sextilis*.

September (Lat. *Septem*, seven) was the seventh month of the Roman calendar, but is the ninth according to our reckoning. The Anglo-Saxons called it *gerst-monath*, "barley-month."

October (Lat. *octo*, eight) was the eighth month of the so-called "year of Romulus," but became the tenth when (according to tradition) Numa changed the commencement of the year to January 1st, though it retained its original name.

November (Lat. *novem* nine) was among the Romans the ninth month of the year (the Ger. *Wind* month) at the time when the year consisted of ten months, and then contained 30 days. It subsequently was made to contain only 29, but Julius Cæsar gave it 31; and in the reign of Augustus the number was restored to 30, which number it has since retained.

December means the tenth month, and received that name from the Romans when the year began in March, and has retained its name since January and February were put at the beginning of the year.

The Origin of the Days of the Week.—The names of these are derived from Saxon idolatry. The Saxons had seven deities more particularly adored than the rest, namely: The Sun, the Moon, Tuisc, Woden, Thor, Friga, and Saeter.

Sunday being dedicated to the sun, was called by them *Sunandaeg*; his idol represented the bust of a man, with the face darting bright rays, holding a wheel before his breast, indicative of the circuit of the golden orb around our sphere.

Monday was dedicated to the moon, and was represented by a female on a pedestal, with a very singular dress and two long ears.

Tuesday was dedicated to Tuisc a German hero, sire of the Germans, Scythians, and Saxons. He was represented as a venerable old man, with a long, white beard, a scepter in his hand and the skin of a white bear thrown over his shoulders.

Wednesday was consecrated to Woden, or Odin, a supreme god of the northern nations, father of the gods and god of war. He was represented as a warrior in a bold martial attitude, clad in armor, holding in his right hand a broad, crooked sword and in his left a shield.

Thursday was consecrated to Thor, eldest son of Woden, who was the Roman Jupiter. He was believed to govern the air, preside over lightning and thunder, direct the wind,

rain, and seasons. He was represented as sitting on a splendid throne, with a crown of gold adorned with twelve glittering stars, and a scepter in his right hand.

Friday was sacred to Friga—Hertha or Edith—the mother of the gods and wife of Woden. She was the goddess of love and pleasure and was portrayed as a female with a naked sword in her right hand and a bow in her left hand, implying that in extreme cases women should fight as well as men.

Saturday was named in honor of Saeter, who is the Roman Saturnus. He was represented on a pedestal, standing on the back of a prickly fish called a perch, his head bare, with a thin, meager face. In his left hand he held a wheel and in his right a pail of water with fruits and flowers. The sharp fins of the fish implied that the worshipers of Saeter should pass safely through every difficulty. The wheel was emblematic of their unity and freedom, and the pail of water implied that he could water the earth and make it more beautiful.

Anniversaries.

DATES OF HISTORICAL EVENTS CUSTOMARILY OR OCCASIONALLY OBSERVED.

| | |
|-------------|--|
| Jan. | 1. Emancipation Proclamation by Lincoln, 1863. |
| Jan. | 8. Battle of New Orleans, 1815. |

| Sep. 11. | Battle of Lake Champlain, McDonough's victory, 1814. |
| Sep. 13. | Battle of Chapultepec, 1847. |
| Sep. 14. | City of Mexico taken by the U. S. troops, 1847. |
| Sep. 17. | Battle of Antietam, 1862. |
| Sep. 19-20. | Battle of Chickamauga, 1863. |
| Sep. 20. | Italians occupied Rome, 1870. |
| Oct. 7. | Battle of King's Mountain, N. C., 1780. |
| Oct. 8-11. | Great fire of Chicago, 1871. |
| Oct. 12. | Columbus discovered America, 1492. |
| Oct. 17. | Burgoyne surrendered at Saratoga, 1777. |
| Oct. 19. | Cornwallis surrendered at Yorktown, 1781. |
| Nov. 5. | Guy Fawkes Day in England. The Gunpowder Plot discovered, 1604. |
| Nov. 9. | Great fire of Boston, 1872. |
| Nov. 10. | Martin Luther born, 1483. |
| Nov. 25. | British evacuated New York, 1783. |
| Dec. 2. | Battle of Austerlitz, 1805. |
| Dec. 14. | Washington died, 1799. |
| Dec. 16. | Boston "Tea Party," 1773. |
| Dec. 16. | The great fire in New York, 1835. |
| Dec. 22. | Mayflower pilgrims landed at Plymouth Rock, 1620. |
| Dec. 25-26. | Battle of Trenton, N. J., 1776. |
| Dec. 29. | William Ewart Gladstone born, 1809. |

The First Day of the Year.

Readers of Parish Registers and other ancient documents are sometimes puzzled by the dates, and especially by the apparent discrepancies in the time when the year commenced. It began:—

- 7th to 14th Centuries, at Christmas.
- 12th Century, by the Church, on March 25.
- 14th Century, by Civilians, same time.

In 1752 the New Style was introduced, and 1753 commenced on the 1st of January. Previous to this two dates were used, one for the civil year, and the other for the historical; the former commenced March 25, and the latter January 1; thus we find the same event with two dates, e. g., Feb. 20, 1681-2. Another change was made in the calendar by the same Act, 24 Geo. II. c. 23; the day after September 2d was accounted the fourteenth, hence the difference between Old and New Michaelmas and other days.

General Councils.

| | A. D. |
|----------------------|---|
| Jerusalem..... | Against Judaizers..... 51 |
| Aries..... | Against the Donatists..... 314 |
| *Nica..... | First Ecumenical Council..... 325 |
| Constantinople..... | Arian..... 337 |
| Rome..... | Athanasian..... 342 |
| Sardis..... | Against Arians..... 347 |
| *Constantinople..... | Second Ecumenical..... 381 |
| *Ephesus..... | Third do..... 431 |
| *Chalcedon..... | Fourth do..... 451 |
| *Constantinople..... | Fifth do..... 553 |
| *Constantinople..... | Sixth do..... 681 |
| Nica..... | Seventh do..... 787 |
| Constantinople..... | Eighth do..... 879 |
| Rome..... | First Lateran..... 1123 |
| Rome..... | Second do..... 1139 |
| Rome..... | Third do..... 1179 |
| Rome..... | Fourth do..... 1215 |
| Lyons..... | Emperor Frederick deposed..... 1243 |
| Lyons..... | Temporary reunion of Greek and Latin Churches..... 1274 |
| Vienne..... | Fifteenth Ecumenical..... 1312 |
| Pisa..... | Popes elected and deposed..... 1409 |
| Constantino..... | Huss condemned to be burned..... 1414 |
| Basil..... | Eighteenth Ecumenical..... 1431 |
| Rome..... | Fifth Lateran..... 1512 to 1517 |
| Trent..... | Nineteenth Ecumenical..... 1545 to 1563 |
| Rome..... | Last Ecumenical..... 1870 |

* Only the six thus marked were indisputably General or Ecumenical. Some other councils, such as those summoned to Pavia and Siena, were designed to be Ecumenical, but led to no such result. The Great Church recognizes seven.

A READY REFERENCE CALENDAR.

| Wednesday | 31 Thursday | 31 Friday | 31 Saturday | 31 SUNDAY | 31 Monday | 31 Tuesday |

NOTE.—The letters in the list of "YEARS from 1753 to 1953" refer to the table headed with the MONTHS, the figures in which refer to the same figures at the head of the table of DAYS. For example: To know on what day July 4, 1902, will fall, look for 1902 in the table of YEARS. The letter g is attached. Look for the same letter in the table of MONTHS, and in a parallel line under July is the figure 7, which directs to column 7 in the table of DAYS below, in which it will be seen that July 4 falls on Wednesday.

A DICTIONARY OF MYTHOLOGY.

A/bas. A son of Meganira. He was turned into a newt, or water-lizard, for deriding the ceremonies of the Sacrifice.

Abeyrtus. Brother of Medea.

Achelo/us. A son of Oceanus and Terra. He had the power of assuming all shapes, and in a conflict with Hercules he turned himself into a serpent, and then into a bull, but he was finally defeated, and he then turned himself into a river, which has since been called Achelous.

Ach/eron. One of the rivers of the infernal regions to which the spirits of the dead resorted, and waited there till Charon the ferryman took them over.

Achil/les. The most valiant of the Greek heroes in the Trojan War. He was the son of Peleus, king of Thessaly. His mother, Thetis, plunged him, when an infant, into the Stygian pool, which made him invulnerable wherever the waters had washed him; but the heel by which he was held was not wetted, and that part remained vulnerable. He was shot with an arrow in the heel by Paris, at the siege of Troy, and died of his wound.

Acide/lia. A name given to Venus, from a fountain in Boetia.

A/cis. A Sicilian shepherd, loved by the nymph Galatea. One of the Cyclops who was jealous of him crushed him by hurling a rock on him. Galatea turned his blood into a river—the Aclis at the foot of Mount Etna.

Acte/on. The son of Aristæus, a famous huntsman. He intruded himself on Diana while she was bathing, and was changed by her into a deer, in which form he was hunted by his own dogs and torn in pieces.

Ado/nis. The beautiful attendant of Venus, who held her train. He was killed by a boar, and turned by Venus into an anemone.

Adraste/a. Another name of Nemeis, one of the goddesses of justice.

Adscripti/tit Dii. The gods of the second grade.

Æ/acus. One of the judges of hell, with Minos and Rhadamanthus.

Æcas/tor. An oath used only by women, referring to the Temple of Castor.

Æd/epol. An oath used by both men and women, referring to the Temple of Pollux.

Æge/on. A giant with fifty heads and one hundred hands, who was imprisoned by Jupiter under Mount Etna.

Æ/gis. The shield of Jupiter, so called because it was made of goat skin.

Æ/gle. The fairest of the Naiads.

Æt/lo. The name of one of the Harpies.

Æne/as. The son of Anchises and Venus. He was one of the few great captains who escaped the destruction of Troy. He behaved with great valor during the siege, encountering Diomed, and even Achilles himself. When the Grecians had set the city on fire Æneas took his aged father, Anchises, on his shoulders, while his son, Ascanius, and his wife, Creusa, clung to his garments. He saved them all from the flames. After wandering about during several years, encountering numerous difficulties, he at length arrived in Italy, where he was hospitably received by Latinus, king of the Latins. After the death of Latinus Æneas became king.

Æo/lus. The god of the winds. Jupiter was his reputed father, and his mother is said to have been a daughter of Hippotus.

Æsculapi/us. The god of physic, was a son of Apollo. He was physician to the Argonauts in their famous expedition to Colchis.

Æ/son. Father of Jason, and was restored to youth by Medea.

Æ/ta. A king of Colchis, was father of Medea.

Agamem/non. The son of Pliathenes and brother of Menelaus. He was king of the Argives. His brother's wife was the famous Helen, daughter of Tyndarus, king of Sparta; and when she eloped with Paris, Agamemnon was appointed leader of the Greeks in their expedition against Troy.

Aganip/pides. A name of the Muses, derived from the fountain of Aganippe.

Agla/ia. One of the Three Graces.

Ag/nl. The Hindoo god of lightning.

Ajax. One of the bravest of the Greek warriors in the Trojan war. His father was Telamon, and his mother Eriboea. Some writers say that he was killed by Ulysses; others aver that he was slain by Paris; while

others again assert that he went mad after being defeated by Ulysses, and killed himself. Another Ajax, son of Oileus, also took a prominent part in the Trojan War.

Aloes/tis. Wife of Admetus, who, to save her husband's life, died in his stead, and was restored to life by Hercules.

Alci/des. One of the names of Hercules.

Alceme/na. The mother of Hercules, was daughter of Electra, a king of Argos.

Alec/to. One of the Furies. She is depicted as having serpents instead of hair on her head, and was supposed to breed pestilence wherever she went.

Alec/tryon. A servant of Mars, who was changed by him into a cock because he did not warn his master of the rising of the sun.

Al/fadur. In Scandinavian Mythology the Supreme Being—Father of all.

Amal/the/a. The goat which nourished Jupiter.

Am/azons. A nation of women-soldiers who lived in Scythia. Hercules totally defeated them, and gave Hippolyte, their queen, to Theseus for a wife. The race seems to have been exterminated after this battle.

Ambarva/lia. Festivals in honor of Ceres, instituted by Roman husbandmen to purge their fields. At the spring festival the head of each family led an animal, usually a pig or ram, decked with oak boughs, round his grounds, and offered milk and new wine. After harvest there was another festival, at which Ceres was presented with the first fruits of the season.

Ambro/sia. Bacchanalian festivals.

Amphi/on. The son of Jupiter and Antiope. He was greatly skilled in music; and it is said that, at the sound of his lute, the stones arranged themselves so regularly as to make the walls of the city of Thebes.

Amphitri/te (or Salatia). The wife of Neptune, was a daughter of Oceanus and Terra. She was the mother of Triton, a sea god.

Amy/eus. King of Babrycia. He was a son of Neptune, and was killed by Pollux.

Anes/us. A son of Neptune, who left a cup of wine to hunt a wild boar, which killed him, and the wine was untasted. This was the origin of the proverb—"There's many a slip 'twixt cup and lip."

Ancil/ia. The twelve sacred shields. The first Ancile was supposed to have fallen from heaven in answer to the prayer of Numa Pompilius. It was kept with the greatest care, as it was prophesied that the fate of the Roman people would depend upon its preservation. An order of priesthood was established to take care of the Ancilia, and on 1st March each year the shields were carried in procession, and in the evening there was a great feast called Cœna Saliaria.

Androm/eda. The daughter of Oepheus, king of the Ethiopians, was wife of Perseus, by whom she was rescued when she was chained to a rock and was about to be devoured by a sea-monster.

Anem/one. Venus changed Adonis into this flower.

Anger/ia. Otherwise Volupia, was the goddess who had the power of dispelling anguish of mind.

Anna Peren/na. One of the rural divinities.

Ante/us. A giant who was vanquished by Hercules. Each time that Hercules threw him the giant gained fresh strength from touching the earth, so Hercules lifted him off the ground and squeezed him to death.

Anteros. One of the two Cupids, sons of Venus.

Antic/lea. The mother of Ulysses.

Anti/ope. Was wife of Lycus, king of Thebes. Jupiter, disguised as a satyr, led her astray and corrupted her.

Anu/bis (or Herman/ubis). "A god half a dog, a dog half a man." Called *Barker* by Virgil and other poets.

Aon/ides. A name of the Muses, from the country Aonia.

Aph/rodit/te. A Greek name of Venus.

Aplis. A name given to Jupiter by the inhabitants of the Lower Nile. Also the miraculous ox, worshiped in Egypt.

A/pla. King of Argivia. Afterwards called Serapis, the greatest god of the Egyptians.

Apol/lo. This famous god, sometime king of Arcadia, was the son of Jupiter and Latona. He was known by several names, but principally by the following: Sol (the sun); Cynthius, from the mountain called Cynthus in the Isle of Delos, and this same island being his native place obtained for him the name of Delius; Delphinus, from his occasionally assuming the shape of a dolphin. His name of Delphicus was derived from his connection with the splendid Temple at Delphi, where he uttered the famous oracles. Some writers

record that this oracle became dumb when Jesus Christ was born. Other common names of Apollo were Didymæus, Nomius, Pæan, and Phœbus. The Greeks called him Agniēs because the streets were under his guardianship, and he was called Pythius from having killed the serpent Python. Apollo is usually represented as a handsome young man without beard, crowned with laurel, and having in one hand a bow, and in the other a lyre. The favorite residence of Apollo was on Mount Parnassus, a mountain of Phocis, in Greece, where he presided over the Muses. Apollo was the accredited father of several children, but the two most renowned were Æsculapius and Phæton.

Apotheosis. The consecration of a god. The ceremony of deification.

Arach'ne. A Lydian princess, who challenged Minerva to a spinning contest, but Minerva struck her on the head with a spindle, and turned her into a spider.

Arca'dia. A delightful country in the center of Peloponnesus, a favorite place of the gods. Apollo was reputed to have been king of Arcadia.

Ar'cas. A son of Callisto, was turned into a he-bear; and afterwards into the constellation called Ursa Minor.

Areop'ag'us. The judges who sat at the Areopagus.

Areop'agus. The hill at Athens where Mars was tried for murder before twelve of the gods.

Arctau'sa. Was one of the nymphs of Diana. She fled from Alpheus, a river god, and was enabled to escape by being turned by Diana into a rivulet which ran underground. She was as virtuous as she was beautiful.

Argonaute. This name was given to the fifty heroes who sailed to Colchis in the ship Argo under the command of Jason, to fetch the Golden Fleece.

Arg'us. Was a god who had a hundred eyes which slept and watched by turns. He was charged by Juno to watch Io, but, being slain by Mercury, was changed by Juno into a peacock.

Ar'iad'ne. Daughter of Minos, king of Crete. After enabling Theseus to get out of the Labyrinth by means of a clew of thread, she fled with him to Naxos, where he ungratefully deserted her; but Bacchus wooed her and married her, and the crown of seven stars which he gave her was turned into a constellation.

Ar'ion. Was a famous lyric poet of Methymna, in the island of Lesbos, where he gained great riches by his art.

Arista'rus. Son of Apollo and Cyrene, was the god of trees; he also taught mankind the use of honey, and how to get oil from olives. He was a celebrated hunter. His most famous son was Actæon.

Ar'ma'ta. One of the names of Venus, given to her by Spartan women.

Ar'temia. This was the Grecian name of Diana, and the festivals at Delphi were called Artemisia.

Aru'spices. Sacrificial priests.

Ascal'aphus. Was changed into an owl, the harbringer of misfortune, by Ceres, because he informed Pluto that Proserpine had partaken of food in the infernal regions, and thus prevented her return to earth.

Asca'nus. The son of Æneus.

Ascol'i'a. Bacchanalian feasts, from a Greek word meaning a leather bottle. The bottles were used in the games to jump on.

As'o'pus. A son of Jupiter, who was killed by one of his father's thunderbolts.

Asabi'nus. The Ethiopian name of Jupiter.

Astar'te. One of the Eastern names of Venus.

Aste'ria. Daughter of Œnus, was carried away by Jupiter, who assumed the shape of an eagle.

Astre'a. Mother of Nemesis, was the goddess of justice; she returned to heaven when the earth became corrupt.

Atalan'ta. Daughter of Œneus. The oracle told her that marriage would be fatal to her, but, being very beautiful, she had many suitors. She was a very swift runner, and, to get rid of her admirers, she promised to marry any one of them who should outstrip her in a race, but that all who were defeated should be slain. Hippomenes, however, with the aid of Venus, was successful. That goddess gave him three golden apples, one of which he dropped whenever Atalanta caught up to him in the race. She stopped to pick them up, and he was victorious and married her. They were both afterwards turned into lions by Cybele, for profaning her temple.

At'e. The goddess of revenge, also called the goddess of discord and all evil. She was banished from heaven by her father Jupiter.

Athe'na. A name obtained by Minerva as the tutelary goddess of Athens.

Atlas. King of Mauritania, now Morocco, in Africa. He was also a great astronomer. He is depicted with the globe on his back, his name signifying great toil or labor. For his inhospitality to Perseus that king changed him into the mountain which bears his name of Atlas. A chain of mountains in Africa is called after him, and so is the Atlantic Ocean.

At'reus. The type of fraternal hatred. His dislike of his brother Thyestes went to the extent of killing and roasting his nephews, and inviting their father to a feast, which Thyestes thought was a sign of reconciliation, but he was the victim of his brother's detestable cruelty.

At'ropos. One of the three sisters called *The Fates*, who held the shears ready to cut the thread of life.

A'tys. Son of Œneus, was born dumb, but when in a fight he saw a soldier about to kill the king, he gained speech, and cried out, "Save the king!" and the string that held his tongue was broken.

A'tys. A youth beloved by Aurora, and was slain by her father, but, according to Ovid, was afterwards turned into a pine tree.

Aug'eas. A king of Elis, the owner of the stable which Hercules cleansed after three thousand oxen had been kept in it for thirty years. It was cleansed by turning the river Alpheus through it. Aug'eas promised to give Hercules a tenth part of his cattle for his trouble, but, for neglecting to keep his promise, Hercules shot him.

Au'gury. This was a means adopted by the Romans for forming a judgment of futurity by the flight of birds, and the officiating priest was called an augur.

Auro'ra. The goddess of the morning, "Whose rosy fingers open the gates of day."

She was daughter of Sol, the sun, and was the mother of the stars and winds.

Aus'ter. The south wind, a son of Jupiter.

Aver'nus. A poisonous lake, referred to by poets as being at the entrance of the infernal regions, but it was really a lake in Campania, Italy.

Averrunc'us Deus. A Roman god, who could divert people from evil doing.

Be'al. A god of the Phœnicians.

Be'al-Pe'or. A Moabitish god, associated with licentiousness and obscenity. The modern name is Belphegor.

Bac'chantes. The priestesses of Bacchus.

Bac'chus. The god of wine, and the son of Jupiter and Semele. He is said to have married Ariadne, daughter of Minos, king of Crete, after she was deserted by Theseus. The most distinguished of his children is Hymen, the god of marriage.

Ba'lios. A famous horse given by Neptune to Peleus as a wedding present, and afterwards given to Achilles.

Baasar'ides. The priestesses of Bacchus were sometimes so called.

Bellia'ma. A goddess of the Gauls. The name means the Queen of Heaven.

Beller'ophon. A hero who destroyed a monster called the Chimæra.

Bello'na. The goddess of war, and wife of Mars. The 24th March was called Bellona's day, when her votaries cut themselves with knives and drank the blood of the sacrifice.

Be'lus. The Chaldean name of the sun.

Berecyn'thia. A name of Cybele, from a mountain where she was worshiped.

Bi'formis. A name of Bacchus, because he was accounted both bearded and beardless.

Bo'na De'a. "The bountiful goddess," whose festival was celebrated by the Romans with much magnificence.

Bo'nus Even'tus. The god of good success, a rural divinity.

Bo'reas. The north wind, son of Astræus and Aurora.

Brah'ma. The great Indian deity, represented with four heads looking to the four quarters of the globe.

Bris'eus. A name of Bacchus, referring to the use of grapes and honey.

Bront'es. One of the Cyclops. He is the personification of a blacksmith.

Bubo'na. Goddess of herdsmen, one of the rural divinities.

Bud'dha. A pagan deity, the Vishnu of the Hindoos.

Byb'lis. A niece of Sol, mentioned by Ovid. She shed so many tears for unrequited love that she was turned into a fountain.

Cab/iri. The mysterious rites connected with the worship of these deities were so obscene that most writers refer to them as secrets which it was unlawful to reveal.

Ca'o'dae'mon. Greek name of an evil spirit.

Ca'cus. A three-headed monster and robber.

Cad'mus. One of the earliest of the Greek demigods. He was the reputed inventor of letters, and his alphabet consisted of sixteen letters. It was Cadmus who slew the Boeotian dragon, and sowed its teeth in the ground, from each of which sprang up an armed man.

Cadu'ceus. The rod carried by Mercury. It has two winged serpents entwined round the top end. It was supposed to possess the power of producing sleep, and Milton refers to it in "Paradise Lost" as the "opiate rod."

Calli'o. An Arcadian nymph, who was turned into a she-bear by Jupiter. In that form she was hunted by her son Arcas, who would have killed her had not Jupiter turned him into a he-bear. The nymph and her son form the constellations known as the Great Bear and Little Bear.

Calli'ope. The Muse who presided over epic poetry and rhetoric. She is generally depicted using a stylus and wax tablets, the ancient writing materials.

Cal'pe. One of the pillars of Hercules.

Calyp'so. Queen of the island of Ogygia, on which Ulysses was wrecked, and where he was persuaded to remain seven years.

Ca'ma. The Indian god of love and marriage.

Camil'lus. A name of Mercury, from his office of minister to the gods.

Can'ache. The name of one of Actæon's hounds.

Can'o'ba. The Indian Apollo.

Can'o'pus. The Egyptian god of water, the conqueror of fire.

Cap'is or Cap'ula. A peculiar cup with ears, used in drinking the health of the deities.

Capitol'i'na. A name of Jupiter, from the Capitoline hill, on the top of which a temple was built and dedicated to him.

Capri'edes. Pan, the Egi'pan, the Satyrs, and Fauns were so called from having goats' feet.

Cassan'dra. A daughter of Priam and Hecuba, who was granted by Apollo the power of seeing into futurity, but having offended that god he prevented people from believing her predictions.

Cassio'pe'ia. The Ethiopian queen who set her beauty in comparison with that of the Nereides, who thereupon chained her to a rock and left her to be devoured by a sea-monster, but she was delivered by Perseus.

Casta'lia. One of the fountains in Mount Parnassus, sacred to the Muses.

Cast'alides. A name of the Muses, from the fountain Castalia or Castalus.

Cas'tor. Son of Jupiter and Leda, twin brother of Pollux, noted for his skill in horsemanship. He went with Jason in quest of the Golden Fleece.

Cau'ther. In Mohammedan mythology, the lake of paradise, whose waters are as sweet as honey, as cold as snow, and as clear as crystal; and any believer who tastes thereof is said to thirst no more.

Cel'eno. One of the Harpies, progenitor of Zephyrus, the west wind.

Cen'taur. A huntsman who had the fore part like a man, and the remainder of the body like a horse. The Centaurs lived in Thessaly.

Ceph'alus. Married to Procris, whom he accidentally slew by shooting her, while she was secretly watching him, he thinking she was a wild beast. Cephalus was the type of constancy.

Cerav'nus. A Greek name of Jupiter, meaning The Fulminator, from his thunderbolts.

Cerberus. Pluto's famous three-headed dog, which guarded the gate of the infernal regions, preventing the living from entering, and the inhabitants from going out.

Ce'res. Daughter of Saturn, the goddess of agriculture, and of the fruits of earth. She taught Triptolemus how to grow corn, and sent him to teach the inhabitants of the earth.

Ce'stus. The girdle of Venus, which excited irresistible affection.

Cha'os. Allegorically represented the confused mass of matter supposed to have existed before the creation of the world, and out of which the world was formed.

Char'on. The son of Nox and Erebus. He was the ferryman who conveyed the spirits of the dead, in a boat, over the rivers Acheron and Styx to the Elysian Fields. "Charon's toll" was a coin put into the hands of the dead with which to pay the grim ferryman.

Charyb'dis. A dangerous whirlpool on the coast of Sicily. Personified, it was supposed to have been a woman who plundered travelers, but was at last killed by Hercules. Scylla and Charybdis are generally spoken of together to represent alternative dangers.

Ch'e'mos. The Moabitish god of war.

Chimæ'ra. A wild illusion, personified in the monster slain by Bellerophon. It had the head and breast of a lion, the body of a goat, and the tail of a serpent. It used to vomit fire.

Chi'ron. The centaur who taught Achilles hunting, music, and the use of medicinal herbs. Jupiter placed him amongst the stars, where he appears as Sagittarius the Archer.

Chlo'ris. The Greek name of Flora, the goddess of flowers.

Chou. An Egyptian god corresponding to the Roman Hercules.

Chro'nos. Time, the Grecian name of Saturn.

Cir'ce. The daughter of the sun. The knowledge of poisonous herbs enabled her to destroy her husband, the King of the Sarmatians, for which act she was banished. When Ulysses landed at Æcea, where she lived, she turned all his followers into swine.

Cisse'ta. The name of one of Actæon's hounds.

Cither'ides. A name of the Muses, from Mount Othliron.

Clio. One of the Muses, daughter of Jupiter and Mnemosyne. She presided over history.

Cloac'ina. The Roman goddess of sewers.

Clo'tho. One of the Fates. She was present at births, and held the distaff from which was spun the thread of life. See Atropos and Lachesis.

Clowns of Ly'cia. The. Changed into frogs by Latona, because they refused to allow her to drink at one of their streamlets.

Clio's'cia'na. A name of Venus, given to her at the time of the reconciliation of the Romans and the Sabines, which was ratified near a statue of the goddess.

Cly'temne'stra. Wife of Agamemnon, slew her husband and married Ægisthus. She attempted to kill her son Orestes, but he was delivered by his sister Electra, who sent him away to Strophius. He afterwards returned and slew both Clytemnestra and Ægisthus.

Cly't'e. A nymph who got herself changed into a sunflower because her love of Apollo was unrequited. In the form of this flower she is still supposed to be turning towards Sol, a name of Apollo.

Cneph. In Egyptian mythology the creator of the universe.

Cocy'tus. The river of Lamentation. One of the five rivers of the infernal regions.

Cœ'culus. A violent robber, a son of Vulcan.

Cœ'las. Also called Uranus (or Heaven), the most ancient of the gods.

Colli'na. One of the rural deities, the goddess of hills.

Co'mus. The god of revelry. He presided over entertainments and feasts.

Con'cord. The symbol of Concord was two right hands joined, and a pomegranate.

Concor'dia. The goddess of peace. One of the oldest Roman goddesses. She is represented as holding a horn of plenty in one hand, and in the other a sceptre, from which fruit is sprouting forth.

Conan'al'ia. Games sacred to Neptune.

Con'sus. A name given to Neptune as being the god of counsel.

Cophe'i'na. A legendary king of Africa, who disliked women, but ultimately fell in love with a "beggar-maid," as mentioned in *Romeo and Juliet*.

Co'pia. The goddess of plenty.

Co'ran. One of Actæon's hounds was so named.

Coro'nis. A consort of Apollo and mother of Æsculapius. Another Coronis was daughter of a king of Phocis, and was changed by Athena into a crow.

Corybæn'tes. Priests of Cybele. They obtained the name because they were in the habit of striking themselves in their dances.

Cory'don. A silly love-sick swain mentioned by Virgil.

Cory'thaix. A name given to Mars, meaning Shaker of the Helmet.

Coty'to. The Athenian goddess of immodesty.

Cu'pid. The god of love, the son of Jupiter and Venus. He is represented as a naked, winged boy, with a bow and arrows and a torch. When he grew up to be a man he married Psyche.

Cuvera. The Indian god of wealth, corresponding to the Greek Pluto.

Cybele. The mother of the gods, and hence called Magna Mater. Sæ was wife of Saturn. She is sometimes referred to under the names of Ceres, Rhea, Ops, and Vesta.

Cy/clops or Cy/clopes. The gigantic, one-eyed workmen of Vulcan, who made Jove's thunderbolts. Hesiod gives their names as Argos, Brontes, and Steropes.

Cygnus. The bosom friend of Phaëton. He died of grief on the death of his friend, and was turned into a swan.

Cyl/laros. One of Castor's horses. The color is mentioned as being coal black, with white legs and tail.

Cyl/lo. The name of one of Actæon's hounds, which was lame.

Cy/llopes. A name given to one of Actæon's hounds, which limped.

Cyn/oure. One of the nurses of Jupiter, turned by the god into a conspicuous constellation.

Cypar/sus. A boy of whom Apollo was very fond; and when he died he was changed, at Apollo's intercession, into a cypress tree, the branches of which typify mourning.

Cy/pris. A name of Venus, because she was worshipped in the island of Cyprus.

Cy/th'era. A name of Venus, from the island to which she was wafted in the shell.

Dactyl. Priests of Cybele. They were given the name, because, like the fingers, they were ten in number.

Dædalus. A great architect and sculptor. He invented the wedge, the axe, the level, and the gimlet, and was the first to use sails. Dædalus also constructed the famous labyrinth for Minos, King of Crete.

Dægon. A god of the Philistines, half man, half fish, like the mermaid, Milton describes him as "Upward man and downward fish."

Dæhak. The Persian devil.

Dætyas. In Hindoo mythology the devils or evil gods.

Dan'æ. A daughter of Acrisius and Eurydice. She had a son by Jupiter, who was drifted out to sea in a boat, but was saved by Polydeutes and educated.

Dana'us. King of Argos. The father of fifty daughters, who, all but one, at the command of their father, slew their husbands directly after marriage. For this crime they were condemned to the task of forever trying to draw water with vessels without any bottoms.

Daph'ne. The goddess of the earth. Apollo courted her, but she fled from him, and was, at her own request, turned into a laurel tree.

Dædanus. A son of Jupiter, who built the city of Dardania and by some writers was accounted the founder of Troy.

Deian'ra. Daughter of Ceneus, wife of Hercules. See Hercules.

De'lius. A name of Apollo, from the island in which he was born.

Del'phi. A town on Mount Parnassus, famous for its oracle, and for a temple of Apollo.

Del'phos. The place where the temple was built from which the oracle of Apollo was given.

De'marus. The Phœnician name of Jupiter.

De'mogor'gon. The tyrant genius of the soil or earth, the life and support of plants. He was depicted as an old man covered with moss, and was said to live underground. He is sometimes called the king of the elves and fauns.

Deuce'lion. One of the demigods, son of Prometheus and Pyrrha. He and his wife, by making a ship, survived the deluge which Jupiter sent on the earth, circa 1503 B. C.

Dian'a. Goddess of hunting and of chastity. She was the sister of Apollo, and daughter of Jupiter and Latona. She was known among the Greeks as Diana or Phœbe, and was honored as a triform goddess. As a celestial divinity she was called Luna; as a terrestrial, Diana or Dictynna; and in the infernal regions, Hecate.

Dictyn'na. A Greek name of Diana as a terrestrial goddess.

Dido. A daughter of Belus, King of Tyre. It was this princess who bought a piece of land in Africa as large as could be encompassed by a bullock's hide, and, when the purchase was completed, cut the hide into strips, and so secured a large tract of land. Here she built Carthage; and Virgil tells that when Æneas was shipwrecked on the neighboring coast, she received him with every kindness, and at last fell in love with him. But Æneas did not reciprocate her affections, and this so grieved her that she stabbed herself.

Dives Pa'ter. Father of the Day, a name of Jupiter.

Dil Sæto'li. Composed the second class of gods.

They were Coelus, Saturn, Genius, Oreus, Sol, Bacchus, Terra, and Luna.

Din'dyme'ne. A name of Cybele, from a mountain where she was worshipped.

Diome'des. The cruel tyrant of Thrace, who fed his mares on the flesh of his guests, was overcome by Hercules, and was given to the same horses as food.

Dio'ne. A poetic name of Venus.

Diony'sia. Festivals in honor of Bacchus.

Diony'sus. A name of Bacchus, either from his father Jupiter (Dios), or from his nurses, the nymphs called Nyse.

Dios'curi. Castor and Pollux, the sons of Jupiter.

Di'ra. A name of the Furies.

Dia. A name of Pluto, god of hell, signifying riches.

Discor'dia. Sister of Nemesis, the Furies, and Death, was driven from heaven for having sown discord among the gods.

Dodo'na. A celebrated oracle of Jupiter.

Dodonæ'us. A name of Jupiter, from the city of Dodona.

Dols'bra. The knife used by the priests to cut up the sacrifices.

Door'ga. A Hindoo goddess.

D'ria. Daughter of Oceanus, and sister of Nereus, two of the marine deities. From these two sisters sprang the several tribes of water nymphs.

Do'to. One of the Nereids or sea nymphs.

Dra'co. One of Actæon's hounds.

Dragon. Seven headed. See Geryon.

Dry'ada. Rural deities, the nymphs of the forests, to whom their votaries offered oil, milk, and honey.

Dweur'gar. Scandinavian god of the Echo—a pigmy.

E'acus. Son of Jupiter and Egina, one of the judges of the infernal regions, who was appointed to judge the Europeans.

Eb'lis. The Mohammedan evil genius.

Echid'na. A woman having a serpent's tail.

Echno'bas. One of Actæon's hounds.

Ech'o. A nymph who fell in love with Narcissus. But when he languished and died she pined away from grief and died also, preserving nothing but her voice, which repeats every sound that reaches her.

"Off by Echo's tedious tales misled." Ovid.

Egeon. A giant sea-god, who assisted the Titans against Jupiter.

Ege'ria. A nymph who is said to have suggested to Numa all his wise laws. She became his wife, and at his death was so disconsolate, and shed so many tears, that Diana changed her into a fountain.

E'gil. The Vulcan of northern mythology.

Egip'ans. Rural deities who inhabited the forests and mountains, the upper half of the body being like that of a man, and the lower half like that of a goat.

E'gis. The shield of Minerva. It obtained its name because it was covered with the skin of the goat Amalthea, which nourished Jupiter.

Eleusin'ian Mysteries. Religious rites in honor of Ceres, performed at Eleusis in Attica.

Elys'ium or the Elysian Fields. The temporary abode of the just in the infernal regions.

Empyre'an, The. The fifth heaven, the seat of the heathen deity.

Endym'ion. A shepherd who acquired from Jupiter the faculty of being always young. One of the lovers of Diana.

Enyo. The Grecian name of Bellona, the goddess of war and cruelty.

E'os. The Grecian name of Aurora.

E'ous. One of the four horses which drew the chariot of Sol, the sun. The word is Greek, and means red.

Eph'ial'tea. A giant who lost his right eye in an encounter with Hercules, and the left eye was destroyed by Apollo.

Er'ato. One of the Muses, the patron of light poetry; she presided over the triumphs and complaints of lovers, and is generally represented as crowned with roses and myrtle, and holding a lyre in her hand.

Erebus. Son of Chaos, one of the gods of Hades, sometimes alluded to as representing the infernal regions.

Erga'tia. A name given to Minerva. It means the work-woman, and was given to the goddess because she was credited with having invented spinning and weaving.

Erie'theus. Fourth King of Athens, the son of Vulcan.

Erin'nys. A Greek name of the Furies. It means Disturber of the Mind.

Erisich/thom. He was punished with perpetual hunger because he defiled the groves of Ceres and cut down one of the sacred oaks.

Er/oa. The Greek god of love.

Ereos/tratus. The rascal who burnt the temple of Diana at Ephesus, thereby hoping to make his name immortal.

Eryx/ina. A name of Venus, from Mount Eryx in Sicily.

Erythro/oa. The Grecian name of one of the horses of Sol's chariot.

E/thon. One of the horses which drew the chariot of Sol—the sun. The word is Greek and signifies hot.

Et/na. A volcanic mountain, beneath which, according to Virgil, there is buried the giant Typhon, who breathes forth devouring flames.

Eu/dromos. The name of one of Actæon's hounds.

Eume/ides. A name of the Furies, meaning mild, and referring to the time when they were approved by Minerva.

Euphro/syne. One of the three Graces. See Graces.

Eu/rus. The east wind. A son of Æolus.

Eury/ale. One of the Gorgons, daughter of Phorcus and Ceto.

Euryd/loe. Wife of Orpheus, who was killed by a serpent on her wedding night.

Euryth/ion. A seven-headed dragon. See Geryon.

Eu/terpe. One of the Muses, the patroness of instrumental music. The word means agreeable.

Eu/ryhe. An expression meaning "Well done, son." Jupiter so frequently addressed his son Bacchus by those words that the phrase at last became one of his names.

Fame. A poetical deity, represented as having wings and blowing a trumpet. A temple was dedicated to her by the Romans.

Fates or Paros. The three daughters of Necessity. Their names were Clotho, who held the distaff; Lachesis, who turned the spindle; and Atropos, who cut the thread with the fatal shears.

Fauns. A rural divinity, half man and half goat. They were very similar to the Satyrs. The Fauns attended the god Pan, and the Satyrs attended Bacchus.

Favo/nius. The wind favorable to vegetation, that is, Zephyr—the west wind.

Fe/bris. (Fever). One of the evil deities, worshiped that she might not do harm.

Ft/raus. A name of Pluto, from the part of the funeral rites which consisted of purifications.

Fero/nia. The Roman goddess of orchards; was patroness of enfranchised slaves. Some authors think Feronia is the same as Juno.

Fi/des. The goddess of faith and honesty, who had a temple in the Capitol of Rome.

Flath/in/nia. In Celtic mythology, Paradise.

Fleece, Golden. See Golden Fleece, Argonauts, and Jason.

Flora. Goddess of flowers and gardens; was wife of Zephyrus. She enjoyed perpetual youth. Her Grecian name was Chloris.

Flora/ila. Licentious games instituted in honor of the goddess Flora.

Fortu/na. The goddess of fortune, who had a temple erected to her by Servius Tullius. She was supposed to be able to bestow riches or poverty on mankind, and was esteemed one of the most potent of the ancient goddesses.

Fraud. One of the evil deities; was represented as a goddess with a human face and a serpent's body, and in the end of her tail was a scorpion's sting. She lived in the river Ocyrtus, and nothing but her head was ever seen.

Frey. The Scandinavian god of fertility and peace. The patron god of Sweden and Iceland.

Frey/ja. The Scandinavian Venus. The goddess of love.

Fri/ga. The Saxon goddess of earthly enjoyments. The name Friday is derived from her. In Scandinavian mythology she is the goddess of marriage.

Fro. The Scandinavian god of tempests and winds.

Furies, The. The three daughters of Acheron and Nox. They were the punishers of evil doers. Their names were Tisiphone, Megæra, and Alecto, and were supposed to personify rage, slaughter, and envy.

Gabriel. In Jewish mythology, the prince of fire and thunder, and the angel of death to the favored people of God.

Galatæ/a. A sea nymph. Polyphemus, one of the

Cyclops, loved her, but she disdained his attentions and became the lover of Actis, a Sicilian shepherd.

Ga/il. Priests of Cybele who used to cut their arms with knives when they sacrificed, and acted so like madmen that demented people got the name of Gallantes.

Gan/eam. The Indian Mercury. The god of wisdom and prudence.

Ganga. One of the three Indian river goddesses.

Gan/yne/de. A beautiful Phrygian youth, son of Tros, King of Troy. He succeeded Hebe in the office of cup-bearer to Jupiter. He is generally represented sitting on the back of a flying eagle.

Ganta/ma. The chief deity of Burmah.

Genil. Domestic divinities. Every man was supposed to have two of these genii accompanying him; one brought him happiness, the other misery.

Gen/itor. A Lycian name of Jupiter.

Ge/ryon. A triple-bodied monster who lived at Gades, where his numerous flocks were guarded by Orthos, a two-headed dog, and by Eurythion, a seven-headed dragon. These guardians were destroyed by Hercules, and the cattle taken away.

Glan/ous. A fisherman who became a sea-god through eating a seaweed, which he thought invigorated the fishes and might strengthen him.

Glauko/pis. A name given to Minerva, because she had blue eyes.

Gno/mes. A name given to Plato to the invisible deities who were supposed to inhabit the earth.

Gnos/sis. A name given to Ariadne, from the city of Gnosus in Crete.

Golden Fleece, The. A ram's hide, sometimes described as white, and at other times as purple and golden. It was given to Phryxus, who carried it to Colchis, where King Æta entertained Phryxus, and the hide was hung up in the grove of Mars. Jason and forty-nine companions fetched back the golden fleece.

Gopy/a. Indian mythological nymphs.

Gorgons, The. Three sisters, named Stheno, Euryale, and Medusa. They petrified every one they looked at. Instead of hair, their heads were covered with vipers. Perseus conquered them, and cut off the head of Medusa, which was placed on the shield of Minerva, and all who fixed their eyes thereon were turned into stone.

Graces, The. The attendants of Venus. Their names were Aglaia, so called from her beauty and goodness; Thalia, from her perpetual freshness; and Euphrosyne, from her cheerfulness. They are generally depicted as three cheerful maidens with hands joined, and either nude or only wearing transparent robes,—the idea being that kindnesses, as personified by the Graces, should be done with sincerity and candor, and without disguise. They were supposed to teach the duties of gratitude and friendship, and they promoted love and harmony among mankind.

Gradi/us. A name given to Mars by the Romans. It meant the warrior who defended the city against all external enemies.

Gra/gus. The name by which Jupiter was worshiped in Lycia.

Grap/sios. A Lycian name of Jupiter.

Ha/da. The Babylonian Juno.

Hades. The Greek name of Pluto, the god of hell, the word signifying hidden, dark, and gloomy; the infernal regions; sometimes written, *Ades*.

Halcy/one. One of the Pleiades; was a daughter of Atlas and Pellone.

Halcy/ons. Sea birds, supposed to be the Greek kingfishers. They made their nests on the waves, and during the period of incubation the sea was always calm. Hence the modern term "Halcyon days."

Hamadry/ades. Wood-nymphs, who presided over trees.

Haroc/ris. The Egyptian god, whose eyes are the sun and moon.

Har/pies. Animals with the heads and breasts of women, the bodies of birds, and the claws of lions. Their names were Aello, Ocyptete, and Celeno. They were loathsome creatures, living in filth and poisoning everything they came in contact with.

Harp/kruti. The Egyptian name of the god Harpocrates.

Harpo/rates. Son of Isis; was the god of silence and meditation. He is usually represented as a young man holding a finger of one hand to his lips, while in the other hand he holds a cornucopia.

Ha/sis. The Syrian war god.

He/be. The goddess of youth. She was cup-bearer to Jupiter and the gods, until she had an awkward fall at

a festival, and so displeased Jupiter that she was deprived of her office, and Ganymede was appointed in her stead.

Hec/ate. There were two goddesses known by this name, but the one generally referred to in modern literature is Hecate, or Proserpine, the name by which Diana was known in the infernal regions. In heaven her name was Luna, and her terrestrial name was Diana.

Hec/aba. The mother of Paris; was allotted to Ulysses after the destruction of Troy, and was afterwards changed into a hound.

Hel/ena. When a child was so beautiful that Theseus and Perithus stole her, but she was restored by Castor and Pollux. She became the wife of Menelaus, king of Sparta, but eloped with Paris, and thus caused the Trojan War. After the death of Paris she married Deiphobus, his brother, and then betrayed him to Menelaus. She was strangled by order of Polyxus, king of Rhodes.

Hel/ades. The daughters of Sol, and the sisters of Phaeton, at whose death they were so shocked that they stood mourning till they became metamorphosed into poplar trees, and their tears were turned into amber.

Hel/icon. A mountain in Boeotia sacred to the Muses, from which place the fountain Hippocrene flowed.

Hellco/nides. A name of the Muses, from Mount Helicon.

Hellop/olis. In Elysium; was the city of the sun.

Hel/ios. The Grecian sun-god, who went home every evening in a golden boat which had wings.

Heliotrope. Clytie was turned into this flower by Apollo.

Hel/ie. Drowned in the sea, into which she fell from off the back of the golden ram, on which she and Phryxus were escaping from the oppression of their stepmother Ino. The episode gave the name of the Hellespont to the part of the sea where Helle was drowned, and it is now called the Dardanelles.

Hemph/ta. The Egyptian god Jupiter.

Hephæstos. The Greek Vulcan.

He/ro. The Greek name of Juno.

Her/cules. The son of Jupiter and Alcmena. The goddess Juno hated him from his birth, and sent two serpents to kill him, but though only eight months old he strangled the snakes. As he became older he was set by his master Eurystheus what were thought to be twelve impossible tasks, which have long been known as the "Twelve Labors of Hercules." They were:—

First. To slay the Nemean Lion.

Second. To destroy the Hydra which infested the marshes of Lerna.

Third. To bring to Eurystheus the Arcadian Stag with the golden horns and brazen hoofs.

Fourth. To bring to his master the Boar of Erymanthus.

Fifth. To cleanse the stable of King Augeas, in which three thousand oxen had been kept for thirty years, and which had never been cleaned out.

Sixth. To destroy the Stymphalides, terrible carnivorous birds.

Seventh. To capture the Bull that was desolating Crete.

Eighth. To capture the mares of Diomedes, which breathed fire from their nostrils, and ate human flesh.

Ninth. To procure the girdle of Hippolyta, queen of the Amazons.

Tenth. To bring to Eurystheus the flesh-eating oxen of Geryon, the monster king of Gades.

Eleventh. To bring away some of the golden apples from the garden of the Hesperides.

Twelfth. To bring up from Hades the three-headed dog, Cerberus.

All these tasks he successfully accomplished, and, besides, he assisted the gods in their wars with the giants.

Her/mæ. Statues of Hermes (Mercury), which were set up in Athens for boundaries, and as direction marks for travelers.

Hermæthæ/næ. Statues of Mercury and Minerva placed together.

Her/mes. A Greek name of the god Mercury.

Hermi/one. Daughter of Mars and Venus, who was turned into a serpent, and allowed to live in the Elysian fields. There was another Hermione, daughter of Menelaus; she was betrothed to Orestes, but was carried away by Pyrrhus, the son of Achilles.

He/ro. A priestess of Venus, with whom Leander was so enamored that he swam across the Hellespont every night to visit her, but at last was drowned, when Hero threw herself into the sea and was drowned also.

Hesper/ides. Three daughters of Hesperus, King of Italy. They kept in their garden the golden apples which Juno gave Jupiter on their wedding day.

Hes/perus. Brother of Atlas; was changed into the evening star.

Hes/tia. The Greek name of Vesta.

Hil/dur. The Scandinavian Mars.

Hippocam/pus. The name of Neptune's favorite horse.

Hippocrene/nides. A name of the Muses, from the fountain of Hippocrene (the horse fountain), which was formed by a kick of the winged horse Pegasus.

Hippoly/ta. Queen of the Amazons, daughter of Mars. Her father gave her a famous girdle, which Hercules was required to procure (see Hercules). She was conquered by Hercules, and given by him in marriage to Theseus.

Hippoly/tus. Son of Theseus and Hippolyte; he was killed by a fall from a chariot, but was raised to life again by Diana, or, as some say, by Æsculapius.

Hippo/za. A rural divinity, the goddess of horses.

Ho/ræ. The daughters of Sol and Chironia.

Horten/sia. A name of Venus, because she looked after plants and flowers in gardens.

Ho/rus. A name of Sol, the Egyptian day god.

Hostil/ina. A rural divinity; goddess of growing corn.

Hyacin/thus. A boy greatly loved by Apollo, but he was accidentally slain by him with a quail. Apollo caused to spring from his blood the flower Hyacinth.

Hy/ades. Seven daughters of Atlas and Æthra, who form a constellation which, when it rises with the sun, threatens rain.

Hy/dra. A famous monster serpent, which had many heads. It was slain by Hercules.

Hyge/ia. The goddess of health, a daughter of Æsculapius and Epione. She was represented as a young woman feeding a serpent, which is twined round her arm.

Hy/ias. A beautiful boy beloved by Hercules. The nymphs were jealous of him, and spirited him away while he was drawing water for Hercules.

Hy/men. The Grecian god of marriage, either the son of Bacchus and Venus, or, as some say, of Apollo and one of the Muses. He was represented as a handsome youth, holding in his hand a burning torch.

Hyper/ion. Son of Cælus and Terra. The model of manly beauty, synonymous with Apollo. The personification of the sun.

Hypermines/tra. One of the fifty daughters of Danaus, who were collectively called the Danaides. She was the one who refused to kill her husband on the wedding night.

Ib/lees. The Arabian Satan.

Icar/us. Son of Dædalus, who, with his father, made himself wings with which to fly from Crete. They were fixed to the shoulders by wax. Icarus flew too near the sun, and the heat melting the wax, caused the wings to drop off, and he fell into the sea and was drowned.

Ichnobæ/te. One of Actæon's hounds; it means tracker.

Idæ/a. A name of Cybele, from Mount Ida, where she was worshipped.

Idæ/an Mother. Cybele was sometimes so called.

Idæ/ia. A name of Venus, from Mount Idalus.

Imper/ator. A name of Jupiter, given to him at Præneste.

I/nachus. One of the earliest of the demigods or heroes.

In/cubus. A Roman name of Pan, meaning The Night-mare.

Indig/etes. Deified mortals, gods of the fourth order. They were peculiar to some district.

In/dra. The Hindoo Jupiter; his wife was Indrati, who presides over the winds and thunder.

In/nus. A name of Pan, the same as Incubus.

I/no. Second wife of Athamas, King of Thebes, father of Phryxus and Helle. Ino had two children, who could not ascend the throne while Phryxus and Helle were alive. Ino therefore persecuted them to such a degree that they determined to escape. They did so on a ram, whose hide became the Golden Fleece (see Phryxus and Helle). Ino destroyed herself, and was changed by Neptune into a sea-goddess.

Ino/a. Festivals in memory of Ino.

Instrumental Music. See Euterpe.

I/o. A daughter of Inachus, and a priestess of Juno at Argus. Jupiter courted her, and was detected by Juno, when the god turned Io into a beautiful heifer. Juno demanded the beast of Jupiter, and set the hundred-eyed Argus to watch her. Jupiter persuaded Mercury to de-

stroy Argus, and Io was set at liberty, and restored to human shape. Juno continued her persecutions, and Io had to wander from place to place till she came to Egypt, where she became wife of King Osiris, and won such good opinions from the Egyptians that after her death she was worshipped as the goddess Isis.

Iola'us. Son of Iphicles; assisted Hercules in conquering the Hydra, by burning with hot irons the place where the heads were cut off; and for his assistance he was restored to youth by Hebe. Lovers used to go to his monument at Phocis and ratify their vows of fidelity.

Io'thun. Celtic mythological monsters, or giants.

Iph'ielus. Twin brother of Hercules, and father of Iolaus.

Iphigeni'a. A daughter of Agamemnon. He made a vow to Diana, which involved the sacrifice of Iphigenia, but just at the critical moment she was carried to heaven, and a beautiful goat was found on the altar in her place.

I'ris. Daughter of Thaumas and Electra; was the attendant of Juno, and one of the messengers of the gods. Her duty was to cut the thread which detained expiring souls. She is the personification of the rainbow.

I'ris. Wife of Osiris.

I'tys. Killed by his mother Progne when six years old, and given to his father Tereus as food. The gods were so enraged at this that they turned I'tys into a pheasant, Progne into a swallow, and Tereus into an owl.

Ixi'on. Son of Phlegyas, King of the Lapithæ. For attempting to produce thunder, Jupiter cast him into hell, and had him bound to a wheel, surrounded with serpents, which is forever turning over a river of fire.

Jan'i. A place in Rome where there were three statues of Janus, and it was a meeting place for usurers and creditors.

Jan'itor. A title of Janus, from the gates before the doors of private houses being called Janus.

Janus. A king of Italy said to have been the son of Cœlus, others say of Apollo; he sheltered Saturn when he was driven from heaven by Jupiter. Janus presided over highways, gates, and locks, and is usually represented with two faces.

Jap'etus. Son of Cœlus and Terra, husband of Clymene. He was looked upon by the Greeks as the father of mankind. See Iapetus.

Ja'son. Son of Æson, king of Iolcos; he was brought up by the centaur Chiron. His uncle Æta sent him to fetch the Golden Fleece from Colchis (see Argonauts). He went in the ship Argo with forty-nine companions, the flower of Greek youth. With the help of Juno they got safe to Colchis, but the King Ætes promised to restore the Golden Fleece only on condition that the Argonauts performed certain services. Jason was to tame the wild fiery bulls, and to make them plow the field of Mars; to sow in the ground the teeth of a serpent, from which would spring armed men who would fight against him who plowed the field of Mars; to kill the fiery dragon which guarded the tree on which the Golden Fleece was hung. The fate of Jason and the rest of the Argonauts seemed certain; but Medea, the king's daughter, fell in love with Jason, and with the help of charms which she gave him he overcame all the difficulties which the king had put in his way. He took away the Golden Fleece and Medea also. The king sent his son Absyrtus to overtake the fugitives, but Medea killed him, and strewn his limbs in his father's path, so that he might be delayed in collecting them, and this enabled Jason and Medea to escape. After a time Jason got tired of Medea, and married Glauce, which cruelty Medea revenged by killing her children before their father's eyes. Jason was accidentally killed by a beam of the ship Argo falling on him.

Jocasta (otherwise Epicasta). Wife of Laius, King of Thebes, who in after life married her own son, Œdipus, not knowing who he was, and, on discovering the fatal mistake, hanged herself.

Jove. A very general name of Jupiter.

Judges in Hell, The. Rhadamanthus for Asiatics; Æacus for Europeans; Minos was the presiding judge. See Triptolemus.

Jugatin'us. One of the nuptial deities.

Juno. Daughter of Saturn and Ops, *alias* Cybele. She was married to Jupiter, and became queen of all the gods and goddesses, and mistress of heaven and earth. Juno was the mother of Mars, Vulcan, Hebe, and Lucina. She prompted the gods to conspire against Jupiter, but the attempt was frustrated, and Apollo and Neptune were banished from heaven by Jupiter. Juno is the goddess of marriage, and the protectress of married women; and she had special regard for virtuous women.

Jupiter. Son of Saturn and Cybele (or Ops);

born on Mount Ida, in Crete, and nourished by the goat Amalthæa. When quite young Jupiter rescued his father from the Titans; and afterwards, with the help of Hercules, defeated the giants, the sons of earth, when they made war against heaven. Jupiter was worshipped with great solemnity under various names by most of the heathen nations. The Africans called him Ammon; the Babylonians, Belus; and the Egyptians, Osiris (see Jove). He was represented as a majestic personage seated on a throne, holding in his hands a scepter and a thunder-bolt; at his feet stood a spread eagle.

Kali. A Hindoo goddess, after whom Calcutta is named.

Ka'loc. One of the chief of the Mexican gods.

Kam'a. The Hindoo god of love.

Keb'la. The point of the compass to which worshippers look during their invocations. Thus the Sol or Sun worshippers turn to the east, where the sun rises, and the Mohammedans turn towards Mecca.

Ke'deril. In Mohammedan mythology, is a god corresponding to the English St. George, and is still invoked by the Turks when they go to war.

Ki'un. The Egyptian Venus.

Kneph. An Egyptian god, having a ram's head and a man's body.

Krish'na. An Indian god, the revenger of wrongs; also called the Indian Apollo.

Kro'do. The Saxon Saturn.

Ku'ma'ra. The war god of the Hindoos.

Ku'vera. The Hindoo god of riches.

La'be. The Arabian Circe, who had unlimited power of metamorphosis.

Lach'esis. One of the three Fates or Parcæ. She spun the thread of life.

Lactura. One of the goddesses of growing corn.

La'don. The dragon which guarded the apples in the garden of the Hesperides. Also the name of one of Actæon's hounds. Also the river to which Syrinx fled when pursued by Pan, where she was changed into a reed, and where Pan made his first pipe.

La'laps. One of Diana's hunting dogs, which, while pursuing a wild boar, was petrified. Also the name of one of Actæon's hounds.

Laksh'mi. Hindoo goddess of wealth and pleasure. One of the wives of Vishnu.

Lam'ia. An evil deity amongst the Greeks and Romans, and the great dread of their children, whom she had the credit of constantly enticing away and destroying.

Lam'pos. One of Aurora's chariot horses, the other being Phaeton.

Lao'o-on. One of the priests of Apollo, who was, with his two sons, crushed to death by serpents, because he opposed the admission of the wooden horse to Troy.

Loom'edon. Son of Ilius, a Trojan king. He was famous for having, with the assistance of Apollo and Neptune, built the walls of Troy.

Lap'is. The oath stone. The Romans used to swear by Jupiter Lapis.

Lap'ithus. Son of Apollo. His numerous children were called Lapithæ, and they are notorious for their fight with the centaurs at the nuptial feast of Perithus and Hippodamia.

Le'ros and Pena'tes. Sons of Mercury and Lara, or, as other mythologists say, of Jupiter and Lamia. They belonged to the lower order of Roman gods, and presided over homes and families.

Lato'na. Daughter of Cœus and Phœbus, mother of Apollo and Diana. Being admired so much by Jupiter, Juno was jealous, and Latona was the object of the goddess's constant persecution.

Laver'na. The goddess of thieves.

Le'da. The mother of Orestes and Pollux, their father being Jupiter, in the shape of a swan. After her death she received the name of Nemesis.

Lem'u'eres. The specters of departed souls. Milton, in his "Ode to the Nativity," says—
"Lemures moan with midnight plaint."

They are sometimes referred to as the Manes of the dead.

Lerna. The lake near Argos where Hercules conquered the Hydra.

Le'the. One of the rivers of the infernal regions, of which the souls of the departed are obliged to drink to produce oblivion or forgetfulness of everything they did or knew while alive on the earth.

Leucoth'œs. The name of Ino after she was transformed into a sea nymph.

Leva/na. The deity who presided over newborn infants.

Lisk/ura. Mount Parnassus.

Lil/issa. Queen of fays and fairies.

Lilith/na. The chief of the funeral deities.

Lilge/a. A Greek siren or sea nymph.

Lilith. A Jewish myth, who is a great enemy to newborn children. She was said to have been Adam's first wife, but, refusing to submit to him, was turned from Paradise and made a specter.

Lil/na. The goddess of the art of weaving.

Lil/dor. A lover in the shape of a shepherd, like Corydon; a love-sick swain.

Lof/ten. The Scandinavian god who guards friendship.

Lof/na. The Scandinavian goddess who reconciles lovers.

Loke. The Scandinavian Satan, the god of strife, the spirit of evil.

Lof/ta. A daughter of Neptune, who fled from Priapus, and only escaped from him by being transformed into a lotus plant.

Lof/elan. The impersonation of folly, changed into an ass.

Lof/ifer. The morning star.

Lof/na. The goddess who presides at the birth of children. She was a daughter of Jupiter and Juno.

Lod. In ancient British mythology the king of the Britons.

Lof/na. The name of Diana as a celestial divinity. See Diana and Hecate.

Lof/perna, or Pan. The Roman god of fertility; his festival day was 15th February, and the festivals were called Lupercalia.

Lycoson/ian Food. Execrable viands, such as were supplied to Jupiter by Lycoson. To test the divine knowledge of the god he served up human flesh, which Jove discovered, and punished Lycoson by turning him into a wolf.

Lycian Clowns. Turned into frogs by Latona or Ceres.

Lymni/ades. Nymphs who resided in marshes.

Lyn/ousa. One of the Argonauts. The personification of sharp-eyedness.

Lyre. This musical instrument is constantly associated with the doings of the ancient deities. Amphion built the walls of Thebes by the music of his lyre.

Moen/ades. Priestesses of Bacchus.

Mel/ha/soor. The Hindoo god of evil.

Mel/ta. The mother of the Grecian Mercury.

Mam/mon. The money god.

Mel/nes. The souls of the departed. The god of funerals and tombs.

Mel/na. A name of Venus, meaning sea-foam, from her having been formed from the froth of the sea.

Mars. The god of war, the son of Jupiter and Juno. Venus was his favorite goddess, and amongst their children were Cupid, Anteros, and Harmonia. In the Trojan war Mars took the part of the Trojans, but was defeated by Diomedes.

Mel/aya. The name of the piper who challenged Apollo to a musical contest, and, being defeated, was flayed to death by the god. He was the supposed inventor of the flute.

Mel/rat. The Hindoo god of tempestuous winds.

Mel/ra. One of the rural deities who protected the growing corn at time of ripening.

Max/imus. One of the appellations of Jupiter, being the greatest of the gods.

Mede/a. Wife of Jason, chief of the Argonauts.

Meda/na. One of the Gorgons. Minerva changed her beautiful hair into serpents. She was conquered by Perseus, who cut off her head, and placed it on Minerva's shield. Every one who looked at the head was turned into stone.

Melge/ra. One of the three Furies.

Mello/na. One of the rural divinities, the goddess of bees.

Melpom/ene. One of the Muses, the goddess of tragedy.

Mel/des. An Egyptian god like Pan. He was worshipped in the form of a goat.

Memela/na. A Spartan king. The elopement of his wife Helen with Paris was the origin of the siege of Troy.

Mel/nu. The Hindoo god of law.

Mer/cury. The son of Jupiter and Maia; was the messenger of the gods, and the conductor of the souls of the dead to Hades. He was the supposed inventor of weights and measures, and presided over orators and merchants.

Mel/ra. The abode of the Hindoo god Vishnu. It is at the top of a mountain eighty thousand leagues high. The Olympus of the Indians.

Mil/das. A king of Phrygia, who begged of Bacchus the special gift that everything that he touched might be turned into gold. The request was granted, and as soon as he touched his food it also was turned to gold, and for fear of being starved he was compelled to ask the god to withdraw the power he had bestowed upon him. He was told to bathe in the river Pactolus. He did so, and the sands which he stood on were golden forever after. It was this same king who, being appointed to be judge in a musical contest between Apollo and Pan, gave the Satyr the palm; whereupon Apollo, to show his contempt, bestowed on him a pair of asses' ears. This gave rise to the term "Midas-eared," as a synonym for ill-judged, or indiscriminate.

Mil/lo. A celebrated Croton athlete, who is said to have felled an ox with his fist, and to have eaten the beast in one day.

Mimallo/nes. The "wild women" who accompanied Bacchus, so called because they mimicked his actions.

Mil/mir. In Scandinavian mythology the god of wisdom.

Miner/va. The goddess of wisdom, war, and the liberal arts; is said to have sprung from the head of Jupiter fully armed for battle. She was a great benefactress of mankind, and patroness of the fine arts. She was the tutelary deity of the city of Athens.

Mil/nes. The principal of the three judges of hell, before whom the spirits of the departed appeared and heard their doom.

Mil/otaur. The monster, half man, half bull, which Theseus slew.

Milth/ra. A Persian divinity, the ruler of the universe, corresponding with the Roman Sol.

Mnemoe/nye. Mother of the Muses and goddess of memory. Jupiter courted the goddess in the guise of a shepherd.

Mosk/ibat. The recording angel of the Moham-medans.

Mel/loch. A god of the Phœnicians to whom human victims, principally children, were sacrificed. Moloch is figurative of the influence which impels us to sacrifice that which we ought to cherish most dearly.

Mel/mus. The god of sarcasm. The god who blamed Jove for not having made a window in man's breast, so that his thoughts could be seen. His bitter jests occasioned his being driven from heaven in disgrace.

Mone/ta. A name given to Juno by those writers who considered her the goddess of money.

Moon. The moon was, by the ancients, called *Hecate* before and after setting; *Asiarte* when in crescent form; *Diana* when in full.

Mor/phenus. The god of sleep and dreams, the minister of Somnus.

Mora. Death, a daughter of Nox.

Mun/in. The Scandinavian god of memory, represented by the raven that was perched on Odin's shoulder.

Musca/rinus. A name given to Jupiter because he kept off the flies from the sacrifices.

Mel/nes. The Nine daughters of Jupiter and Mnemoe/nye. They presided over the arts and sciences, music and poetry. Their names were, Calliope, Clio, Erato, Thalia, Melpomene, Terpsichore, Euterpe, Polyhymnia, and Urania. They principally resided in Mount Parnassus, at Helicon.

My/thras. The Egyptian name of Apollo.

Nai/ads. The Beautiful nymphs of human form who presided over springs, fountains, and wells. They resided in the meadows by the sides of rivers. Virgil mentions *Egle* as being the fairest of them.

Nan/di. The Hindoo goddess of joy.

Nar/ae. The name of the infernal regions amongst the Hindoos.

Nar/ra/yan. The mover of the waters. The Hindoo god of tides.

Narcis/sus. Son of Cepheus and the Naiad Liriope; a beautiful youth, who was so pleased with the reflection of himself which he saw in the placid water of a fountain that he could not help loving it, imagining that it must be some beautiful nymph. His fruitless endeavors to possess himself of the supposed nymph drove him to despair, and he killed himself. There sprang from his blood a flower, which was named after him, *Narcissus*.

Nar/tromd. The Scandinavian place of eternal punishment, corresponding with Hades.

Nat/lo. A Roman goddess who took care of young infants.

Nemesis. The goddess of vengeance or justice, one of the infernal deities. Her mother was Nox. She was supposed to be constantly traveling about the earth in search of wickedness, which she punished with the greatest severity.

Nephele. Grecian festivals in honor of Mnemosyne, the mother of the Muses.

Neptune. God of the sea, a son of Saturn and Cybele, and brother of Jupiter and Pluto. He quarreled with Jupiter because he did not consider that the dominion of the sea was equal to Jupiter's empire of heaven and earth; and he was banished from the celestial regions, after having conspired with Pluto to dethrone Jupiter.

Nereides. The Aquatic nymphs. They were daughters of Nereus and Doris, and fifty in number. They are generally represented as beautiful girls riding on dolphins, and carrying tridents in the right hand.

Nereus. A sea deity, husband of Doris. He had the gift of prophecy, and foretold fates; but he had also the power of assuming various shapes, which enabled him to escape from the importunities of those who were anxious to consult him.

Nessus. The name of the Centaur which was destroyed by Hercules for insulting Dejanira.

Neptor. A grandson of Neptune, his father being Neleus, and his mother Chloris. Homer makes him one of the greatest of the Greek heroes. He was present at the famous battle between the Lapithæ and the Centaurs, and took a leading part in the Trojan war.

Nidhogg. In Scandinavian mythology the dragon who dwells in Nastrond.

Niflheim. The Scandinavian hell. It was supposed to consist of nine vast regions of ice beneath the North Pole, where darkness reigns eternally. See Nastrond.

Niobe. A daughter of Tantalus, and the personification of grief. By her husband Amphion she had seven sons and seven daughters. By the orders of Latona the father and sons were killed by Apollo, and the daughters (except Chloris) by Diana. Niobe, being overwhelmed with grief, escaped further trouble by being turned into a marble statue.

Nemius. A lawgiver; one of the names of Apollo. This title was also given to Mercury for the part he took in inventing beneficent laws.

Noraa. Three Scandinavian goddesses, who wove the woof of human destiny.

Nox. The daughter of Chaos, and sister of Erebus and Mors. She personified night, and was the mother of Nemesis and the Fates.

Nun/dina. The goddess who took charge of children when they were nine days old—the day on which the Romans named their children.

Nuptia/ia. A title of Juno. When the goddess was invoked under this name, the gall of the victim was taken out and thrown behind the altar, signifying that there should be no gall (bitterness) or anger between married people.

Nurriel. In Hebrew mythology the god of hailstorms.

Nyctelius. A name given to Bacchus, because his festivals were celebrated by torchlight.

Nymphs. This was a general name for a class of inferior female deities who were attendants of the gods. Some of them presided over springs, fountains, wells, woods, and the sea.

Nysæ. The names of the nymphs by whom Bacchus was nursed.

Nysæus. A name of Bacchus, because he was worshipped at Nysa.

Nysus. A king of Megara who was invisible by virtue of a particular lock of hair. This lock his daughter Scylla cut off, and so betrayed her father to his enemies. She was changed into a lark, and the king into a hawk, and he still pursues his daughter, intending to punish her for her treachery.

Oan/nes. An eastern god, represented as a monster, half man, half fish. He was said to have taught men the use of letters in the daytime, and at night to have retired to the depth of the ocean.

Obam/bou. A devil of African mythology.

Oceanides. Sea nymphs, daughters of Oceanus and Tethys. Their numbers are variously estimated by different poets: some saying there were as many as three thousand, while others say there were as few as sixteen. The principal of them are mentioned under their respective names, as Amphitrite, Doris, Metis, etc.

Oceanus. Son of Coelus and Terra, and husband of Tethys. Several mythological rivers were called his sons, as Alpheus, Peneus, etc., and his daughters were called the Oceanides.

Oerid/ion. A king of Rhodes, who was deified after his death.

Ocy/pete. One of the Harpies, who infected everything she touched. The word means swift of flight.

Ocy/roe. A daughter of Chiron, who had the gift of prophecy. She was metamorphosed into a mare.

O'din. In Scandinavian mythology the god of the universe, and reputed father of all the Scandinavian kings. His wife's name was Friga, and his two sons were Thor and Balder.

Oed/ipus. A son of Laius, King of Thebes, best known as the solver of the famous enigma propounded by the Sphinx.

Oeno/ne. Wife of Paris, a nymph of Mount Ida, who had the gift of prophecy.

Ogy/gia. An island, the abode of Calypso, in the Mediterranean Sea. It was so beautiful in sylvan scenery that even Mercury (who dwelt on Olympus) was charmed with the spot.

Ole/nus. A daughter of Vulcan, wife of Lethæa, a woman who thought herself more beautiful than the goddesses, and as a punishment she and her husband were turned into stone statues.

Olymp/ius. A name of Jupiter, from Olympia, where the god had a splendid temple, which was considered to be one of the seven wonders of the world.

Olymp/us. The magnificent mountain on the coast of Thessaly, six thousand feet high, where the gods were supposed to reside. There were several other smaller mountains of the same name.

Oly/raa. A river near Thermopylæ, which, it is said, attempted to extinguish the funeral pile on which Hercules was consumed.

Omopha/gia. A Bacchanalian festival at which some uncooked meats were served.

Om/phale. The Queen of Lydia, to whom Hercules was sold as a bondsman for three years for the murder of Iphitus. Hercules fell in love with her, and led an effeminate life in her society, wearing female apparel, while Omphale wore the lion's skin.

Ona/rus. A priest of Bacchus, said to have married Ariadne after she had been abandoned by Theseus.

Onu/va. The Venus of the ancient Gauls.

Ops/ia. Roman festivals in honor of Ops, held on 14th of the calends of January.

Ops. Mother of the gods, a daughter of Coelus and Terra. She was known by the several names of Bona Dea, Rhea, Cybele, Magna Mater, Proserpine, Tellus, and Thya; and occasionally she is spoken of as Juno and Minerva. She personified labor, and is represented as a comely matron, distributing gifts with her right hand, and holding in her left hand a loaf of bread. Her festival was the 14th day of the January calends.

Oræ/a. Certain sacrifices offered to the goddesses of the seasons to invoke fair weather for the ripening of the fruits of the earth.

Orbo/na. The goddess of orphans.

O'reads. Mountain nymphs, attendants on Diana.

Orgies. Drunken revels. The riotous feasts of Bacchus were so designated.

Ort/on. A famous handsome giant, who was blinded by Enopion for a grievous wrong done to Merope, and he was expelled from Chios. The sound of the Cyclopes' hammers led him to the abode of Vulcan, who gave him a guide. He then consulted an oracle, and had his sight restored, as Longfellow says, by fixing

"His blank eyes upon the sun."

He was afterwards slain by Diana and placed amongst the stars, where his constellation is one of the most splendid.

Orithy/ia. A daughter of Erechtheus, whose lover, Boreas, carried her off while she was wandering by the river Ilissus. Her children were Zetes and Calais, two winged warriors who accompanied the Argonauts.

Or'muzd. In Persian mythology the creator of all things.

O'ros. The Egyptian Apollo.

Or'pheus. Son of Apollo and the muse Calliope. He was married to Eurydice; but she was stung by a serpent, and died. Orpheus went down to Hades to claim her, and played so sweetly with his lute that Pluto allowed Eurydice to return to the earth with Orpheus, but on condition that he did not look behind him until he had reached the terrestrial regions. Orpheus, however, in his anxiety to see if she were following him, looked round, and Eurydice disappeared from his sight, instantly and forever.

Osi/ris. The Egyptian god of the sun; he was worshipped under the form of an ox.

Os/sa. One of the mountains which the giants piled on the top of Olympus to enable them to ascend to heaven and attack the gods.

Pactolus. The river in Lydia where Midas washed himself by order of Bacchus, and the sands were turned to gold.

Pæon. A name given to Apollo, from *pæon*, the hymn which was sung in his honor after he had killed the serpent Python.

Pææmon, or **Melicerta**, a sea god, son of Athamas and Ino.

Pæon. The goddess of shepherds and protectress of flocks; her festivals were called *Pællia*.

Pælla/diana. A famous statue of the goddess Pallas (Minerva). She is sitting with a spear in her right hand, and in her left a distaff and spindle. Various accounts are given of the origin of it. Some writers say it fell from the sky. It was supposed that the preservation of the statue would be the preservation of Troy; and during the Trojan War the Greeks were greatly encouraged when they became the possessors of it.

Pælla, or **Minerva.** The name was given to Minerva when she destroyed a famous giant named Pallas.

Pæon. The Arcadian god of shepherds, huntmen, and country folk, and chief of the inferior deities; usually considered to have been the son of Mercury and Penelope.

Pandora. According to Hesiod, the first mortal female. Vulcan made her of clay, and gave her life. Venus gave her beauty; and the art of captivating was bestowed upon her by the Graces. She was taught singing by Apollo, and Mercury taught her oratory. Jupiter gave her a box, the famous "Pandora's Box," which she was told to give to her husband, Epimetheus, brother of Prometheus. As soon as he opened it there issued from it numberless diseases and evils which were soon spread all over the world, and from that moment they have afflicted the human race. It is said that Hope alone remained in the box.

Pantheon. The temple of all the gods, built by Agrippa at Rome, in the reign of Augustus.

Papremis. The Egyptian Mars.

Parce. The Goddesses who presided over the destiny of human beings. They were also called the Fates, and were three in number, Atropos, Clotho, and Lachesis.

Paris. Son of Priam, king of Troy, and his mother was Hecuba. It had been predicted that he would be the cause of the destruction of Troy, and his father therefore ordered him to be strangled as soon as he was born; but the slave who had been intrusted with this mission took the child to Mount Ida, and left it there. Some shepherds, however, found the infant and took care of him. He lived among them till he had grown to man's estate, and he then married Oenone, a nymph of Ida. At the famous nuptial feast of Peleus and Thetis, Discordia, who had not been invited, attended secretly; and when all were assembled, she threw amongst the goddesses a golden apple, on which was inscribed, "Let the fairest take it." This occasioned a great contention, for each thought herself the fairest. Ultimately, the contestants were reduced to three, Juno, Pallas (Minerva), and Venus; but Jove himself could not make these three agree, and it was decided that Paris should be the umpire. He was sent for, and each of the goddesses courted his favor by offering all sorts of bribes. Juno offered him power, Pallas wisdom, and Venus promised him the most beautiful woman in the world. Paris gave the golden apple to Venus. Soon after this episode Priam owned Paris as his son, and sent him to Greece to fetch Helen, who was renowned as being the most beautiful woman in the world. She was the wife of Menelaus, king of Sparta; but during his absence Paris carried Helen away to Troy, and this gave rise to the celebrated war between the Greeks and the Trojans, which ended in the destruction of Troy. Paris was among the 676,000 Trojans who fell during or after the siege.

Parnassides. A name common to the Muses, from Mount Parnassus.

Parnassus. The mountain of the Muses in Phocis, and sacred to Apollo and Bacchus. Anyone who slept on this mountain became a poet. It was named after one of the sons of Bacchus.

Parthenon. The temple of Minerva (or Pallas), at Athens. It was destroyed by the Persians, and rebuilt by Pericles.

Parthenos. A name of Juno, and also of Minerva.

Paripha. The reputed mother of the Minotaur killed by Theseus. She was said to be the daughter of Sol and Perseus, and her husband was Minos, king of Crete.

Pæthæa. Sometimes there are four Graces spoken of; when this is so, the name of the fourth is Pæthæa.

Pævan. Hindoo god of the winds.

Pegæus. The famous winged horse which was said to have sprung from the blood of Medusa when her head

was cut off by Perseus. His abode was on Mount Helicon, where, by striking the ground with his hoof, he caused water to spring forth, which formed the fountain afterwards called Hippocrene.

Pæleus. A king of Thessaly, who married Thetis, one of the Nereids.

Pæliæ. A son of Neptune and Tyro. He usurped the throne of Orestheus, which Jason was persuaded to relinquish to take the command of the Argonautic expedition. On the return of Jason, Medea, the sorceress, undertook to restore Pæliæ to youth, but required that the body should first be cut up and put in a caldron of boiling water. When this had been done, Medea refused to fulfil her promise.

Pæliæ. The name of the spear of Achilles, which was so large that none could wield it but the hero himself.

Pælion. A well-wooded mountain, famous for the wars between the giants and the gods, and as the abode of the Centaurs, who were expelled by the Lapithæ.

Pælopt. Son of Tantalus, king of Phrygia. His father killed him, and served him up to be eaten at a feast given to the gods, who, when they found out what the father of Pelops had done, restored the son to life, and he afterwards became the husband of Hippodamia.

Pæna/tes. Roman domestic gods.

Perseph'one. The Greek name of Proserpine.

Per'seus. A son of Jupiter and Danaë, the daughter of Acrisius. His first famous exploit was against the Gorgon, Medusa. He was assisted in this enterprise by Pluto, who lent him a helmet which would make him invisible. Pallas lent him her shield, and Mercury supplied him with wings. He made a speedy conquest of the Gorgons, and cut off Medusa's head, with which he flew through the air, and from the blood sprang the winged horse Pegasus. As he flew along he saw Andromeda chained to the rock, and a sea-monster ready to devour her. He killed the monster, and married Andromeda. When he got back, he showed the Gorgon's head to King Polydectes, and the monarch was immediately turned into stone.

Phæ'eton. A son of Sol, or, according to most mythologists, of Phœbus and Clymene. Anxious to display his skill in horsemanship, he was allowed to drive the chariot of the sun for one day. The horses soon found out the incapacity of the charioteer, became unmanageable, and overturned the chariot. There was such great fear of injury to heaven and earth, that Jove, to stop the destruction, killed Phæton with a thunderbolt.

Phæ'on. A boatman, who received from Venus a box of ointment, with which, when he anointed himself, he grew so beautiful that Sappho became enamored of him; but when the ointment had all been used Phæon returned to his former condition, and Sappho, in despair, drowned herself.

Philoctetes. Son of Peleus, and one of the companions of Jason on his Argonautic expedition. He was present at the death of Hercules, and received from him the poisoned arrows which had been dipped in the blood of the Hydra. These arrows, an oracle declared, were necessary to be used in the destruction of Troy, and Philoctetes was persuaded by Ulysses to go to assist at the siege. He appears to have used the weapons with great dexterity and with wonderful effect, for Paris was among the heroes whom he killed.

Philomela. A daughter of Pandion, king of Athens, who was transformed into a nightingale.

Phleg'ethon. A river of fire in the infernal regions. It was the picture of desolation, for nothing could grow on its parched and withered banks.

Phlegon (earth loving). One of the four chariot horses of Sol.

Phlegyas. Son of Mars and father of Ixion and Coronis. For his impiety in desecrating and plundering the temple of Apollo at Delphi, he was sent to Hades, and there was made to sit with a huge stone suspended over his head, ready to be dropped on him at any moment.

Phœbus. A name of Apollo, signifying light and life.

Phorc'us. A son of Neptune, father of the Gorgons.

Pleum'nus. A rural divinity, who presided over the manuring of lands, called also Sterentus.

Piv'cus. A son of Saturn, father of Faunus; was turned into a woodpecker by Circe, whose love he had not requited.

Pier'ides. A name of the Muses, derived from Pieria, a fountain near Mount Olympus, where they were supposed to have been born. Also, the daughters of Pierus, a king of Macedonia, who settled in Boeotia. They challenged the Muses to sing, and were changed into magpies.

Pilum/aus. A rural divinity, who presided over the corn while it was being ground.

Plith/ous. A son of Ixion and great friend of Theseus, king of Athens.

Plith/o. The goddess of Persuasion, daughter of Mercury and Venus. She is sometimes referred to under the name of Suada.

Pleiades, The. Seven daughters of Atlas and Pleione. Their names were Electra, Alcyone, Celano, Maia, Sterope, Taygete, and Merope.

Pluto. King of the infernal regions. He was a son of Saturn and Ops, and husband of Proserpine, daughter of Ceres. He is sometimes referred to under the name Dis, and he personifies hell. His principal attendant was the three-headed dog Cerberus, and about his throne were the Eumenides, the Harpies, and the Furies.

Plutus. The god of riches; was son of Jason and Ceres. He is described as being blind and lame; blind because he so often injudiciously bestows his riches, and lame because fortunes come so slowly.

Pluvius. A name of Jupiter, because he had the rain in his control.

Podalir/ius. A famous surgeon, a son of Esculapius, who was very serviceable among the soldiers in the Trojan war.

Poll/ear. Son of Siva, the Hindoo god of wisdom.

Pollux. Twin brother of Castor. Their father was Jupiter and their mother Leda. He and his brother form the constellation Gemini. His Greek name was Polydeuces.

Polybo/tes. One of the giants who made war against Jupiter.

Polydootes. Turned into stone when Perseus showed him Medusa's head.

Polyhym/nia. Daughter of Jupiter and Mnemosyne. One of the Muses, who presided over singing and rhetoric.

Polyph/mus. One of the most celebrated of the Cyclopes, a son of Neptune. He captured Ulysses and twelve of his companions, and it is said that six of them were eaten. The rest escaped by the ingenuity of Ulysses, who destroyed the Cyclop's one eye with a firebrand.

Polyx/ena. Daughter of Priam, king of Troy. It was by her treachery that Achilles was shot in the heel.

Pomona. The Roman goddess of fruits and gardens.

Portunus (Palemon). Son of Ino; was god of harbours.

Posed/don. A name of Neptune.

Prac/riti. The Hindoo goddess of nature.

Pri/am. The last king of Troy.

Pri/pus. The guardian of gardens and god of natural reproduction; was son of Venus and Bacchus.

Pri/ca. Another name of Vesta.

Pro/oris. Daughter of the king of Athens.

Prometheus. Son of Japetes and father of Deucalion. He presumed to make clay men, and animate them with fire which he had stolen from heaven. This so displeased Jupiter that he sent him a box full of evils, which Prometheus refused; but his brother Epimetheus, not so cautious, opened it, and the evils spread over all the earth. Jupiter then punished Prometheus by commanding Mercury to bind him to Mount Caucasus, where a vulture daily preyed upon his liver, which grew in the night as much as it had been reduced in the day, so that the punishment was a prolonged torture. Hercules at last killed the vulture and set Prometheus free.

Proserpine. A daughter of Jupiter and Ceres. Pluto carried her off to the infernal regions and made her his wife. She was known by the names of "the Queen of Hell," Hecate, Juno Inferna, and Libitina.

Proteus. A marine deity, who could foretell events and convert himself at will into all sorts of shapes.

Psyche. The wife of Cupid. The name is Greek, signifying the soul or spirit.

Pygmalion. A famous sculptor, who had resolved to remain unmarried, but he made such a beautiful statue of a goddess that he begged Venus to give it life. His request being granted, Pygmalion married the animated statue.

Pylo/tis. A Greek name of Minerva.

Py/aemon. One of the chiefs of the Cyclopes.

Py/rois (luminous). One of the four chariot horses of Sol.

Py/thia. The priestess of Apollo at Delphi, who delivered the answers of the oracle. Also the name of the games celebrated in honor of Apollo's victory over the Python.

Py/thon. A famous serpent killed by Apollo.

Quadratus. A surname given to Mercury, because some of his statues were four-armed.

Quadrifrons. Janus was sometimes depicted with four faces instead of the usual two, and he was then called Janus Quadrifrons.

Qu/ies. The Roman goddess of rest; she had a temple just outside the Collina gate of Rome.

Quir/ius. A name given to Mars during war time; and Virgil refers to Jupiter under the same name.

Ra/ma. A Hindoo god, who was the terrestrial representative of Vishnu.

Rem/bha. The Hindoo goddess of pleasure.

Rhadaman/thus. A son of Jupiter and Europa; was the judge of the Asiatics in the infernal regions.

Rhamnus/a. A name of Nemesis, from Rhamnus, a town in Attica, where she had a temple in which was her statue, made of one stone ten cubits high.

Rhe/a. The Greek name of Cybele.

Rim'mon. A Phrygian god of whom Milton says—

"... Rimmon, whose delightful seat
Was fair Damascus, on the fertile banks
Of Abana and Pharpar, lucid streams."

Rom/ulus. The traditional founder of Rome. He was a son of Mars and Rhea, and twin brother of Remus. The infants were thrown into the Tiber, but were miraculously saved and suckled by a she-wolf till they were found by Faustulus, a shepherd, who brought them up. Remus was killed in a quarrel with his brother, and Romulus became the famous emperor.

Rumi/a Dea. The Roman goddess of babes in arms.

Runci/a. The goddess of weeding or cleansing the ground.

Sa/ga. The Scandinavian goddess of history.

Sal/amanders. The geni who, according to Plato, lived in fire.

Sal'il. The priests of Mars who had charge of the sacred shields.

Salmone/us. A king of Elis who, for trying to imitate Jupiter's splendors, was sent by the god straight to the infernal regions.

Sa/ius. The Roman god of health.

Sappho. A celebrated poetess, a native of Lesbos, who flourished B. C. 610. Her only connection with the goddesses of the time is that the Greeks called her "the tenth Muse."

Sat/urn. King of the Universe; was father of Jupiter, Neptune, and Pluto. These gods quarreled among themselves as to the division of their father's kingdom, which ended in Jupiter having heaven and earth, Neptune the sea, and Pluto the infernal regions.

Saturna/ia. Festivals held in honor of Saturn about the 16th or 18th of December. Principally famous for the riotous disorder which generally attended them.

Satur/nus. A name given to Jupiter, Neptune, and Pluto, as sons of Saturn.

Satyavra/ta. The Hindoo god of law. The same as Menu.

Sat/yrs. The attendants of Silenus, who were similar in most respects to the fauns who attended Pan.

Scyl/ia. A beautiful nymph who excited the jealousy of Neptune's wife, Amphitrite, and was changed by the goddess into a frightful sea monster, which had six fearfully ugly heads and necks, and who, rising unexpectedly from the deep, used to take off as many as six sailors from a vessel, and carry them to the bottom of the sea. An alternative danger with Charybdis.

Scyl/ia. A daughter of Nysus, who was changed into a lark for cutting off a charmed lock of her father's hair.

Seges/ta. A rural divinity who protected corn during harvest time.

Sem. The Egyptian Hercules.

Sem/ele. The mother of Bacchus, who was born in a miraculous manner after Jupiter had visited her, at her special request, in all his terrible splendor. She was deified after her death and named Thyone.

Semi-Dei. The demi-gods.

Semo/nes. Roman gods of a class between the "immortal" and the "mortal," such as the Satyrs and Fauns.

Septe/rion. A festival held in honor of Apollo, at which the victory of that god over the Python was grandly represented.

Sera/pla. The Egyptian Jupiter, and generally considered to be the same as Osiris.

Serpent. The Greeks and Romans considered the serpent as symbolical of guardian spirits, and as such were often engraved on their altars.

Sesha, or Ananta. The Egyptian Pluto.

Sile/nus. A Bacchanalian demi-god, the chief of the Satyrs. He is generally represented as a fat, drunken old man, riding on an ass, and crowned with flowers.

Sírens, The. Sea nymphs, who by their music allured mariners to destruction. To avoid the snare when nearing their abode, Ulysses had the ears of his companions stopped with wax, and had himself tied to the mast of his ship. They thus sailed past in safety; but the Sirens, thinking that their charms had lost their powers, drowned themselves.

Sis'ypheus. Son of Æolus and Enaretta. He was condemned to roll a stone to the top of a hill in the infernal regions, and, as it rolled down again when he reached the summit, his punishment was perpetual.

Si'va. In Hindoo mythology the "changer of form."

Sleip'ner. The eight-legged horse of Odin, the chief of the Scandinavian gods.

Sol. The sun. The worship of the god Sol is the oldest on record, and though he is sometimes referred to as being the same as the god Apollo, there is no doubt he was worshiped by the Egyptians, Persians, and other nations long before the Apollo of the Greeks was heard of.

Som'nus. The god of sleep, son of Nox (Night). He was one of the infernal deities, and resided in a gloomy cave, void of light and air.

Sos'pita. A name of Juno, as the safeguard of women.

So'ter. A Greek name of Jupiter, meaning deliverer.

Sphinx. The. A monster having the head and breasts of a woman, the body of a dog, the tail of a serpent, the wings of a bird, the paws of a lion, and a human voice. She lived in the country near Thebes, and proposed to every passer-by the following enigma: "What animal is that which walks on four legs in the morning, two at noon, and three in the evening?" Edipus solved the riddle thus: "Man is the animal; for when an infant he crawls on his hands and feet, in the noontide of life he walks erect, and as the evening of his existence sets in he supports himself with a stick." When the sphinx found her riddle solved she destroyed herself.

Stere'n'tius. The Roman god who invented the art of manuring lands.

Stér'opes. One of the Cyclopes.

Stymphali'des. The carnivorous birds destroyed in the sixth labor of Hercules.

Styx. A noted river of hell, which was held in such high esteem by the gods that they always swore, "By the Styx," and such an oath was never violated.

Sua'da. The goddess of Persuasion.

Surade'vi. The Hindoo goddess of wine.

Su'rya. The Hindoo god corresponding to the Roman Sol, the sun.

Sylpha. Genii who, according to Plato, lived in the air.

Sylves'ter. The name of Mars when he was invoked to protect cultivated land from the ravages of war.

Syr'inx. The name of the nymph who, to escape from the importunities of Pan, was by Diana changed into reeds, out of which he made his celebrated pipes, and named them "The Syrinx."

Tac'ita. The goddess of Silence.

Tan'talus. Father of Niobe and Pelops, who, as a punishment for serving up his son Pelops as meat at a feast given to the gods, was placed in a pool of water in the infernal regions; but the waters receded from him whenever he attempted to quench his burning thirst. Hence the word tantalizing.

Tar'tarus. An inner region of hell, to which the gods sent the exceptionally depraved.

Telch'i'nes. Priests of Cybele, who were famous magicians.

Tel'ius. A name of Cybele, wife of Saturn.

Temple. An edifice erected to the honor of a god or goddess, in which the sacrifices were offered.

Tenth Muse. Sappho was so called.

Ter'eus. A son of Mara. He married Progne, daughter of the king of Athens, but became enamored of her sister Philomela, who, however, resented his attentions, which so enraged him that he cut out her tongue. When Progne heard of her husband's unfaithfulness she took a terrible revenge (see Itys). Progne was turned into a swallow, Philomela into a nightingale, Itys into a pheasant, and Tereus into a hoopoe, a kind of vulture,—some say an owl.

Terremi'na. A name of Diana, alluding to her tri-form divinity as a goddess of heaven, earth, and hell.

Tér'minus. The Roman god of boundaries.

Terpsich'ore. One of the nine Muses; she presided over dancing.

Terra. The earth; one of the most ancient of the Grecian goddesses.

Thales'tria. A queen of the Amazons.

Thali'a. One of the nine Muses; she presided over festivals and comedy.

Thali'a. One of the Graces.

Tham'yris. A skillful singer, who presumed to challenge the Muses to sing, upon condition that if he did not sing best they might inflict any penalty they pleased. He was, of course, defeated, and the Muses made him blind.

The'la. A daughter of Cœlus and Terra; wife of Hyperion.

The'mis. A daughter of Cœlus and Terra, and wife of Jupiter; was the Roman goddess of laws, ceremonies, and oracles.

The'seus. One of the most famous of the Greek heroes. He was a son of Ægeus, king of Athens.

The'tis. A sea goddess, daughter of Nereus and Doris. Her husband was Peleus, king of Thessaly, and she was the mother of the famous Achilles, whom she rendered all but invulnerable by dipping him into the river Styx. See Achilles.

Thor. The Scandinavian war god (son of Odin), who had rule over the Aerial regions, and, like Jupiter, hurled thunder against his foes.

Thor's Belt. A girdle which doubles his strength whenever the war god puts it on.

Toth. The Mercury of the Egyptians.

Thya'des. Priestesses of Bacchus, who ran wild in the hills, wearing tiger skins and carrying torches.

Thyr'sus. A kind of javelin.

Time (or Saturn). The husband of Virtue and father of Truth.

Tisiph'one. One of the Furies.

Ti'tan. Elder brother of Saturn, who made war against him, and was ultimately vanquished by Jupiter.

Ti'tans. The supporters of Titan in his war against Saturn and Jupiter.

Titho'nus. The husband of Aurora. At the request of his wife the gods granted him immortality, but she forgot at the same time to ask that he should be granted perpetual youth. The consequence was that Tithonus grew old and decrepit, while Aurora remained as fresh as the morning. The gods, however, changed him into a grasshopper, which is supposed to moult as it gets old, and grows young again.

Tit'yus. A son of Jupiter. A giant who was thrown into the innermost hell for insulting Diana. He, like Prometheus, has a vulture constantly feeding on his ever-growing liver.

Triptol'emus. A son of Oceanus and Terra. He was a great favorite of the goddess Ceres, who cured him of a dangerous illness when he was young, and afterwards taught him agriculture.

Triteri'ca. Bacchanalian festivals.

Tri'tons. Sons of Triton, a son of Neptune and Amphitrite. They were the trumpeters of the sea gods, and were depicted as a sort of mermen—the upper half of the body being like a man, and the lower half like a dolphin.

Tropho'nus. One of Jupiter's most famous oracles.

Troy. The classic poets say that the walls of this famous city were built by the magic sound of Apollo's lyre.

Truth. A daughter of Time, because Truth is discovered in the course of Time. Democritus says that Truth lies hidden at the bottom of a well.

Tutel'ina. A rural divinity—the goddess of granaries.

Ty'phon. A monster with a hundred heads who made war against the gods, but was crushed by Jove's thunderbolts, and imprisoned under Mount Etna.

Ty'phon. In Egyptian mythology the god who tried to undo all the good work effected by Osiris.

Ul'ler. The Scandinavian god who presided over archery and duels.

Ulys'ses. A noted king of Ithaca, whose exploits in connection with the Trojan war, and his adventures on his return therefrom, are the subject of Homer's *Odyssey*. His wife's name was Penelope, and he was so much endeared to her that he feigned madness to get himself excused from going to the Trojan war; but his artifice was discovered, and he was compelled to go. He was of great help to the Grecians, and forced Achilles from his retreat and obtained the charmed arrows of Hercules from Philoctetes, and used them against the Trojans. He enabled Paris to shoot one of them at the heel of Achilles, and so kill that charmed warrior. During his wanderings on his homeward voyage he was taken prisoner by the Cyclopes, and escaped, after blinding Polyphemus, their chief. At Æolia he obtained all the winds of heaven, and put them in bags; but his companions, thinking that the bags contained treasure which they could rob him of when they got to Ithaca, cut them and let out the winds, and the ships were immedi-

ately blown black to Æolia. After Circe had turned his companions into swine on an island where he and they were shipwrecked, he compelled the goddess to restore them to their human shape again. As he passed the islands of the Sirens he escaped their allurements by stopping the ears of his companions with wax, and fastening himself to the mast of his ship. His wife Penelope was a pattern of constancy; for, though Ulysses was reported to be dead, she would not marry anyone else, and had the satisfaction of having her husband return after an absence of about twenty years.

Un'dine. A water nymph, or syph.

Unx'ia. A name of Juno, relating to her protection of newly-married people.

Ura'nia. A daughter of Jupiter and Mnemosyne—one of the Muses, who presided over astronomy.

Ura'nus. The Greek name of Cæus; his descendants are sometimes called Uranids.

Ur'gus. A name of Pluto, signifying the Impeller.

Ut'gard Lo'ki. In Scandinavian mythology the king of the giants.

Valhal'ia. The Scandinavian temple of immortality, inhabited by the souls of heroes slain in battle.

Va'lli. The Scandinavian god of archery.

Vallo'nia. The goddess of valleys.

Varu'na. The Hindoo Neptune—generally represented as a white man riding on a sea horse, carrying a club in one hand and a rope in the other.

Vejo'vis. "Little Jupiter"—a name given to Jupiter when he appeared without his thunder.

Ve'nus. The goddess of beauty, and mother of love. She is said to have sprung from the foam of the sea, and was immediately carried to the abode of the gods on Olympus, where they were all charmed with her extreme beauty. Vulcan married her, but she permitted the attention of others of the gods, and notably of Mars, their offspring being Hermione, Cupid, and Anteros. After this she left Olympus and fell in love with Adonis, a beautiful youth, who was killed when hunting a wild boar. Venus indirectly caused the Trojan war, for, when the goddess of discord had thrown among the goddesses the golden apple inscribed "To the fairest," Paris adjudged the apple to Venus, and she inspired him with love for Helen, wife of Menelaus, King of Sparta. Paris carried off Helen to Troy, and the Greeks pursued and besieged the city (see Helen, Paris, and Troy). Venus is mentioned by the classic poets under the names of Aphrodite, Cypris, Urania, Astarte, Paphia, Cythera, and the laughter-loving goddess. Her favorite residence was at Cyprus. Incense alone was usually offered on her altars, but if there was a victim it was a white goat. Her attendants were Cupids and the Graces.

Verti'cor'dia. A Roman name of Venus, signifying the power of love to change the hard hearted. The corresponding Greek name was Epistrophia.

Vertum'nus. God of spring, or, as some mythologists say, of the seasons; the husband of Pomona, the goddess of orchards.

Ves'ta. Daughter of Saturn and Cybele; was the goddess of fire. She had under her special care and protection a famous statue of Minerva, before which the Vestal Virgins kept a fire or lamp constantly burning.

Ves'tal Vir'gins. The priestesses of Vesta, whose chief duty was to see that the sacred fire in the temple of Vesta was not extinguished. They were always selected from the best families, and were under a solemn vow of chastity, and compelled to live perfectly pure lives.

Via'lis. A name of Mercury, because he presided over the making of roads.

Vio'tory. A goddess, the daughter of Styx and Acheron, generally represented as flying in the air holding out a wreath of laurel. See Nicephorus.

Vi'dor. A Scandinavian god, who could walk on the water and in the air. The god of silence (corresponding with the classic Harpocrates).

Vir'tue. A goddess worshipped by most of the ancients under various names. The way to the temple of honor was through the temple of virtue.

Vish'nu. The Preserver, a principal Hindoo god.

Vul'can. The god of fire; was the son of Jupiter and Juno. He offended Jupiter, and was by him thrown out of heaven; he was nine days falling, and at last dropped into Lemnos with such violence that he broke his leg, and was lame forever after. Vulcan was married to Venus. He is supposed to have formed Pandora out of clay. His servants were the Cyclopes. He was the patron deity of blacksmiths.

Vulca'nia. Roman festivals in honor of Vulcan, at which the victims were thrown into the fire and burned to death.

Wo'den. The Anglo-Saxon form of the Scandinavian god Odin; Wednesday is called after him.

Xan'thus. The name of the wonderful horse of Achilles.

Ya'ma. The Hindoo devil, generally represented as a terrible monster of a green color, with flaming eyes.

Ygdra'sil. The famous ash tree of Scandinavian mythology, under which the gods held daily council.

Y'mir. The Scandinavian god corresponding to Chaos of the classics.

Zeph'yr. The god of flowers, a son of Æolus and Aurora; the west wind.

Ze'tes. With his brother Calais, drove the Harpies from Thrace.

Ze'thus. Twin brother of Amphion.

Zeus. The Greek name of Jupiter.

THE HALL OF FAME.

March 5, 1900, the Council of New York University accepted a gift of \$100,000 from a donor whose name was withheld, for the erection and completion on University Heights, New York city, of a building to be called "The Hall of Fame for Great Americans." A structure was accordingly built in the form of a semi-circle, 506 feet long, 15 feet wide, and 170 feet high, connecting the University Hall of Philosophy with the Hall of Languages. Within the colonnade 150 panels, each 2 by 8 feet, are to be placed, to bear the names of Americans deemed the greatest in their respective fields.

Under the rules adopted only persons born on what is now United States territory and who shall have been dead ten or more years are eligible to be chosen, and they must be selected from fifteen classes of citizens, to wit: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and architects, lawyers and judges, musicians, painters and sculptors, physicians and surgeons, rulers and statesmen, soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inscribed on the tablets at the beginning, and five additional names every fifth year thereafter, until the year 2000, when the 150 inscriptions will be completed. Should there be a failure to select the entire fifty names at the beginning, the vacancies shall be filled in a following year.

The rules prescribed that the Council should invite nominations from the public. Every nomination seconded by a member of the University Senate should be submitted to an electorate of one hundred eminent citizens, selected by the Council, each of whom must vote for fifty of the candidates.

In October, 1900, the University Senate received the ballots of the judges. Of the one hundred judges selected, ninety-seven voted. The number of names which had been submitted to them was 252. Of these each judge returned a vote for fifty. The rule required that no candidate receiving less than fifty-one votes could be accepted. The returns showed that but twenty-nine candidates received the required number and were chosen. These were as follows: George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, Ulysses S. Grant, John Marshall, Thomas Jefferson, Ralph Waldo Emerson, Henry W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, Samuel F. B. Morse, David G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, Robert E. Lee, Peter Cooper, Eli Whitney, John J. Audubon, Horace Mann, Henry Ward Beecher, James Kent, Joseph Story, John Adams, William E. Channing, Gilbert Stuart, Asa Gray.

Provision has been made for an additional hall, having thirty panels, to contain the names of foreign born Americans; also for a Hall of Fame for women. Eleven names were added in 1905, as follows: J. R. Lowell, J. G. Whittier, Gen. W. T. Sherman, J. Q. Adams, James Madison, John Paul Jones, Louis Agassiz, Maria Mitchell, Mary Lyon, and Emma Willard.

OUTLINES OF HISTORY.

Prehistoric Ages.—Sir J. Lubbock distinguishes four prehistoric ages, as follows : 1. The Paleolithic or Early Stone Age. 2. The Neolithic or Polished Stone Age. 3. The Bronze Age. 4. The Iron Age. In the Stone Age man knew nothing of pottery or agriculture and had no domestic animals except the dog. In the Bronze Age arms and cutting instruments were made of bronze. In the Iron Age bronze was superseded by iron.

On this page no dates have been recorded for the events first tabulated, and only their approximate order has been attempted. Dates and names on this page must be used with a large allowance for myth and uncertainty.

| B.C. | FROM THE DELUGE TO THE TIME OF CYRUS | | | |

DICTIONARY OF BIOGRAPHY.

ABBREVIATIONS: *Am.*, American; *Br.*, British; *Dan.*, Danish; *Eng.*, English; *fl.*, flourished; *Fr.*, French; *Ger.*, German; *Gr.*, Greek; *Ir.*, Irish; *It.*, Italian; *Nor.*, Norwegian; *Port.*, Portuguese; *Prus.*, Prussian; *Rom.*, Roman; *Russ.*, Russian; *Scot.*, Scottish; *Sp.*, Spanish; *Sw.*, Swedish.

The numbers after each name indicate the years of birth and death.

An interrogation mark denotes that the date is doubtful. After the names of the popes, the first date indicates the time of accession unless otherwise stated.

Where the pronunciation is obvious, and follows regular English rules, no phonetic spelling is given, but in cases where doubt as to place of accent might arise, the accented syllable is marked. Where the pronunciation departs from regular English rules, as in many foreign names, the correct pronunciation is approximated by phonetic spelling, in parentheses following the name. In some instances, diacritical marks in accordance with the system used in Webster's Dictionary are employed to indicate the pronunciation more exactly.

See, also, the "Dictionary of Authors" for biographical information concerning those whose most noted achievements have been distinctly in the line of literary productions.

Abbas I (*ab-bas'*), The Great, 1557-1628. Shah of Persia. Wrested throne from his father at age of 18; defeated the Uzbeks at Herat, 1597; overthrew Turks and Tartars at Sultanieh, 1618; captured Bagdad, 1623; noted for magnificent court and important reforms.

Abbas-Mirza (*ab-bas' meer'za*), 1783-1833. A Persian prince; led Persian army in the unsuccessful wars of 1813 and 1826 against Russia when Persia lost her territories in the Caucasus and Armenia.

Abbasides (*ab-bas'ee-dees*), The. Caliphs of Bagdad. The most celebrated dynasty of Saracen rulers, flourished at Bagdad and Damascus 749-1258.

Abbate (*ab-bat'e*), 1512-71. Ital. painter and fresco artist, follower of Raphael and Correggio.

Abbe, Cleveland, 1838. . . . Am. astronomer; meteorologist to U. S. weather bureau; initiated adoption of present standard time; author of several publications on meteorology.

Abbey, E. A., 1852. . . . Am. figure painter and illustrator, ranking among the strongest colorists and most intellectual painters of America. His important work, "The Search for the Holy Grail," decorates a room in the Boston Public Library.

Abbott, O. C., 1843. . . . Am. naturalist, archaeologist, author of numerous books on outdoor observation, among which are, "A Naturalist's Rambles," "In Nature's Realm."

Abbott, Lyman, 1835. . . . Am. clergyman and editor, son of Jacob A. Abbott. Succeeded Henry Ward Beecher at Plymouth Church, editor of the *Outlook*.

Abd-el-Kader (*abd'-el-kaw'-der*), 1807-83. Emir of Algeria, soldier and patriot.

Abelard (*Eng. pron. ab'e-lard*), Pierre, 1079-1142. Fr. philosopher, theologian, and teacher, the boldest thinker of his time; celebrated for his romantic love of Heloise, his pupil, noted for her beauty and attainments. Their mutual constancy under most painful circumstances of separation as shown by their correspondence still preserved, has made the loves of Heloise and Abelard immortal.

Abercrombie, John, 1780-1844. Eminent Scotch physician, author of philosophical works.

Abercromby, James, 1706-61. British general in America, unsuccessful military career, ended with his repulse at Ticonderoga, 1758.

Abercromby, Sir Ralph, 1784-1801. Distinguished British general, successful in Flanders, 1795, West Indies, 1796, operated with great credit in Holland, 1799, defeated French in battle of Alexandria, 1801, where he was mortally wounded.

Abernethy, John, 1764-1831. Eminent Eng. surgeon, pupil of Hunter, author of important medical works.

Abraham. Born about 2000 B. C., died at age of 175. Hebrew prince and patriarch. The Father of the Hebrews.

Abruzzi (*a-brooz'se*), Prince Luigi Amadeo, Duke of the 1873. . . . Ital. traveler and Arctic explorer; his expedition of 1899-1900 attained the northernmost latitude yet reached, 86° 33'.

Abt (*abt*), Franz, 1819-85. German song writer and musical conductor; a prolific composer; published about 600 books of music. His songs are remarkable for simplicity and clearness of melody.

Abu-bekr (*ah-boo-beck'r*), 570-634. The first caliph. The father of Ayesha, wife of Mohammed; upon the death of Mohammed, 632, he was made the caliph or successor of the Prophet.

Abu-bekr, Mohammed, 1100-85. Famous Ar. physician, poet, philosopher and mathematician; born in Andalusia, died in Morocco.

Abujassar (*jaw'-sar*), called El Sadik, "The Righteous," 699-765. A caliph, author of works on alchemy, augury and omens, and most prominent Arabian representative of the so-called art of prophesying from cabalistic tablets.

Abulfazl (*ah-bool-faz'l*), Sixteenth Century. Vizier and historiographer of Akbar, the great Mongol emperor.

Abulfeda (*a-bool-fay'da*), 1273-1331. Moslem prince and historian, patron of literature and science, author of "An Abridgment of the History of the Human Race" from the creation to 1322.

Achard (*ah'art*), Franz Karl, 1758-1821. Ger. chemist, founder of beet sugar industry.

Adams, Charles Francis, 1807-86. Am. diplomat and statesman, arbitrator for the United States at Geneva in 1871 in the case of the Alabama Claims against England; son of John Quincy Adams.

Adams, John, 1735-1826. First vice-president and second president of the United States; minister for the colonies in Holland; one of the negotiators of treaty of peace with Great Britain, 1782; defeated for the presidency by Jefferson, 1800, he retired to private life.

Adams, John Quincy, 1767-1848. Son of John Adams; sixth president of the United States, defeated by Jackson, 1828; elected to the House in 1830, his oratory gained for him the title of "Old Man Eloquent"; member of the House until 1848, in which year, while in his seat at the Capitol, he received a stroke of paralysis which caused his death.

Adams, Samuel, 1722-1803. Governor of Massachusetts, one of the popular leaders of the Revolution; signer of the Declaration of Independence.

Adanson (*ad'-on'son*), Michel, 1727-1806. Fr. naturalist and physicist, one of the first to recognize electrical nature of lightning. Most important work was in botany.

Adler, Felix, 1851. . . . Ger.-Am. educator and reformer, graduated at Columbia University, 1870, studied at Berlin and Heidelberg, Professor of Hebrew at Cornell University, 1874, and in 1876 founded "Society of Ethical Culture." His principal literary works are "Creed and Deed" and "The Education of Children."

Adrian I., pope from 772-795; II., 867-72; III., 884-5; IV., 1154-9; V., 1276, dies same year; VI., 1521-3.

Æschines (*æsk'-neez*), 389-314 B. C. A Gr. orator, rival of Demosthenes; overthrown by the latter's famous speech "On the Crown," and went into exile 330 B. C.

Æsop (*æf'-op*), 619?-564? B. C. Gr. writer of fables, said to have been a slave but liberated by his master on account of his talents. There is so much obscurity and conflict concerning his life and writings, that many doubt that he ever existed. Whatever the facts may be, his name soon became attached to the best fables which are the common property of the Indo-European peoples.

Affre (*affr'*), Denis Auguste, 1799-1848. Archbishop

of Paris, killed while trying to conciliate the insurgents during the insurrection of 1848.

Agardh (*ah'gard*), Karl Adolph, 1785-1859. Swedish botanist. His work on Algae, "Systema Algarum," is an important contribution to botanical knowledge.

Agassiz (*ag'ass-ee*), Alexander, 1807-73. . . . Am. naturalist and capitalist, only son of Louis. Graduated at Harvard, 1835. With his knowledge of geology and engineering he developed the Calumet and Hecia copper mines, south of Lake Superior, bringing him great wealth, which he has devoted to zoological research, donating over one million dollars to endowment of the Harvard Museum of Comparative Zoology; author of several zoological works, mostly on deep sea animals.

Agassiz, Louis, 1807-73. Distinguished Swiss-Am. naturalist, born in Switzerland; educated at German Universities; studied under Cuvier at Paris; professor of natural history, Neuchâtel, 1832-46; lectured at Boston, 1846, which led to his appointment to the professorship of natural history, Harvard, 1848, still held by him at his death. Pre-eminently a teacher of great force, clearness, and enthusiasm; whose lectures, everywhere in demand, were the inspiration of a new era in American biological research. Founded the Museum of Comparative Zoology, Cambridge, 1858. Author of important zoological works.

Agriocola (*ag-ric-o-la*), Cneius Julius, 37-92. Roman general; was the first to effect complete conquest of Britain, to circumnavigate the island, and to establish some degree of civilization.

Agrippa, Marcus Vipsanius, 63-12 B. C. Roman general and statesman, commanded fleet of Octavianus in battle of Actium.

Aguinado (*ah-ge-naul-do*), Emilio, 1870- . . . Leader of Filipino insurrections against Spain and the United States. Educated at Dominican College in Manila. Became prominent in the uprising of 1896, went into exile at Hong Kong on condition of a large payment from Spain. Returned in 1898, ostensibly to aid the United States against Spain, but after battle of Manila, organized widespread insurrection, which he managed with great ability. Established a provisional government and in 1899 made an unsuccessful attack on U. S. forces at Manila; continued unsuccessful warfare until captured by Gen. Fred Funston, March 23, 1901.

Akbar (*ak'ber*), 1542-1605. Emperor of Hindustan, the greatest of modern Asiatic rulers.

Akers, Benj. P., 1825-66. Am. sculptor. It is said that the character of Kenyon in Hawthorne's "Marble Faun" is drawn after Akers. Among his noted works are "Una and the Lion," "Milton," "The Dead Pearl Diver" and "Isaiah."

Aladdin, fl., 1375. Son of Osman and organizer of the Janissaries.

Alaric (*al'ar-ic*), 350?-410. The greatest chief of the Visigoths. Invaded Italy, captured Rome 410.

Albani (*al-bah'nee*), Francesco, 1578-1660. Ital. painter of the Caracci school, follower of Guido Reni, sometimes styled the Anacreon of painting.

Albati (*al-ba-tee*), 850-929. Famous Arab astronomer; computed the length of the year to within two minutes.

Albert or **Albert Francis**, Prince of Saxe-Coburg-Gotha, 1819-61. Consort of Queen Victoria.

Albert, Count of Bollstadt, 1193-1280. Ger. philosopher, styled Albertus Magnus. Noted for his learning and efforts to spread the doctrines of Aristotle.

Albert (*Fr. pron. di-bâr'*), Eugene F. C. d., 1864- . . . Pianist and composer. Pupil of Liszt. Ranks among the most eminent pianists of the world.

Albert, Joseph, 1824-86. Ger. photographer; inventor of the "Albertype" process.

Albo (*al-bo*), Marietta, 1823-94. It. contralto. Next to Malibran the great contralto of the 19th century.

Albuquerque (*al-bo-ker'-ke*), Alfonso, The Great. Viceroy of the Portuguese Indies. Conquered Malacca, Ceylon, and the Sunda Isles, and established the Portuguese power in the East Indies.

Alcibiades (*al-si-bi'-a-dees*), 450-404 B. C. Athenian politician and general, educated by his uncle, Pericles; a brilliant and successful soldier, banished from Athens, but recalled after defeating his enemies, again exiled, and finally put to death by order of the thirty tyrants of Athens.

Alcmaeon (*alk-mee'-on*). Gr. physician and naturalist, sixth century B. C.; the first to practice dissection.

Alcuin (*al'-kwin*), 735-804. The greatest scholar of the 8th century; adviser and confidant of Charlemagne. Founded schools and wrote many learned works.

Aldrovandi (*al-dro-van'-de*), Ulysse, 1522-1605. It. nat-

uralist, professor of botany at Bologna; published many volumes on birds, and other animals.

Alexander, the Great, 356-323 B. C. King of Macedon; taught by Aristotle; ascended the throne of Macedon 336, destroyed Thebes and was chosen commander of the Greeks against Persia; invaded Asia Minor in 334, defeating Darius on the banks of the Granicus; in 333 he almost annihilated the Persian army at the battle of Issus; cut the Gordian knot and caused the Ammonian oracle to declare him the son of Jupiter Ammon; captured Tyre in 332, and, having invaded Egypt, founded Alexandria; in 331 he defeated Darius at Arbela; elated by his success, he claimed the homage due to a god, stabbing his foster-brother Clitus for refusal to pay such homage; invaded India in 327, advancing as far as the Hyphasis; his death is said to have been caused by excessive drinking.

Alexander Nevski (*nel'-ské*), 1220-63. Russ. hero and saint; won a great victory over the Swedes on the Neva, whence his surname Nevski. Peter the Great built a magnificent convent on the battle field and founded a knightly order in his honor.

Alfred, the Great, 849-901. King of Wessex, England, 871-901; a wise ruler, zealous scholar, and patron of learning; called the founder of the Anglo-Saxon race.

Allen, Ethan, 1737-99. Am. soldier, famous for his capture of Fort Ticonderoga, 1775, where he forced the commander to surrender "in the name of the Almighty God and Continental Congress."

Allston, Washington, 1779-1843. Eminent Am. painter, sometimes called the "American Titian."

Alma Tadema (*al'-ma tad'-ma*), Lourens, 1836- . . . Dutch painter, born in Holland, studied at Antwerp under Leys, but has lived in London since 1870. His art is devoted mostly to depicting life and manners of the Greeks and Romans.

Altdorfer (*al'-dor-fer*), Albrecht, 1490-1538. Bavarian painter and engraver. Celebrated pictures are: "The Victory of Alexander at Arbela," and "Adoration of the Shepherds."

Alva, Fernando Alvarez, Duke of, 1508-63. Sp. general, commander in the Netherlands, where he left a record of cruelty unequalled in modern times.

Alvarado (*al'-va-rah'-do*), Pedro de, . . . 1541. Sp. adventurer (companion of Cortez) and conqueror of Guatemala.

Alvarez (*al'-var'-eth*), Jose, 1768-1827. Sp. sculptor, son of a stone mason; student at Granada and Paris, and later lived at Rome, where he associated with Canova and Thorwaldsen. His group "Saragossa" at Madrid assures his permanent fame.

Amari (*a-mah'-re*), Michele, 1806-69. It. historian. His masterpiece is "The War of the Sicilian Vespers."

Ambrose, Saint, 340-397. Bishop of Milan. One of the most celebrated of the ancient Fathers of the Church.

Ames, Fisher, 1758-1808. Am. orator and statesman. **Ames**, Oakes, 1804-73. Am. manufacturer and legislator; builder of the Union Pacific Railroad.

Amherst, Jeffrey, Baron, 1717-97. Br. general in America, commanded at siege of Louisburg, 1757, replaced Abercrombie and successfully led expedition against Ticonderoga and Crown Point, 1759. Field Marshal of England, 1796.

Ampere (*ang-pay'r*), Andre Marie, 1775-1836. Distinguished Fr. physicist.

Anaxagoras, 500-428 B. C. Gr. philosopher, the last great representative of the Ionian school. He turned philosophy from thought about things to a consideration of Thought itself.

Anaximander, 610-546 B. C. Gr. mathematician and philosopher; introduced the sundial into Greece and is said to have invented maps.

Andrassy (*on'-drash'-she*), Gyula, Count, 1823-90. Hungarian statesman.

Andre, John, 1751-80. Eng. spy, hanged for connection with the Arnold treason.

Andrews, Elisha Benjamin, 1844- . . . Am. educator and author. Graduated Brown University 1870, President Brown University 1889-98, Superintendent of schools Chicago 1898-1900, President University of Nebraska 1900- . . . Author of many text books and also published "Wealth and Moral Law," "An Honest Dollar" and "History of the U. S."

Andros, Sir Edmund, 1637-1714. Br. colonial governor of New England, 1687 and of Virginia, 1692.

Angelico, Fra, 1387-1455. A gifted Italian painter who passed his life in a convent. His paintings of religious subjects are of a high order, and show great beauty and skill.

Anne, 1664-1714. Queen of Great Britain and Ireland, last of the Stuarts.

Anthony, Susan B., 1820- Am. reformer; was first active in anti-slavery and total abstinence movements, but since the Civil War has devoted herself entirely to the woman suffrage movement; published an extensive "History of Woman Suffrage," 1881-87.

Antipater (an-ti-pa-ter), 400-319 B.C. Distinguished Gr. general under Philip of Macedon and Alexander the Great.

Antisthenes (an-tis'the-ness) of Athens; b. about 440 B.C. The founder of the Cynic School of Greek philosophy.

Antoinette (ong-twah-net') Marie, 1755-93. Queen of Louis XVI. of France; guillotined during the French Revolution.

Antonius, Marcus (Mark Antony), 83-30 B.C. Rom. general and statesman, who with Octavianus defeated Brutus and Cassius at Philippi; after uniting with Cleopatra in Egypt was overthrown by Octavianus in naval battle of Actium.

Antony, Saint, of Thebes, 251-356. Egyptian founder of monachism, and perhaps most popular saint in the Catholic church.

Apelles (a-pel-less) 4th century B.C. The most celebrated painter of ancient times, probably a native of Asia Minor; studied at Ephesus; became the friend of Alexander the Great, who sat to no other painter.

Aquinas (a-kwi-nas) Thomas, Saint (The Angelic Doctor), 1224-74. Theologian, teacher, and writer; educated at Naples, member of the Order of St. Dominic; the greatest of the schoolmen of the Middle Ages. His teachings are the basis of Roman Catholic theology and philosophy.

Arago (ar-a-go') Dominique Francis, 1786-1853. Celebrated Fr. astronomer and physicist; made many important discoveries in electro-magnetism.

Aram, Eugene, 1704-59, Eng. scholar; executed for the murder of one Daniel Clark, whom he is said to have killed to procure means for prosecuting his studies; chief character in one of Bulwer's novels.

Archimedes (ar-ki-med-es), 287-212 B.C. Greek geometrician; the greatest mathematician of antiquity; born in Sicily, studied at Alexandria, was killed at the fall of Syracuse. Among his works still extant are important treatises on plane and solid geometry, arithmetic, and mechanics. Invented the spiral pump called "Archimedes' Screw."

Arditi (ar-dee-tee) Luigi, 1822- It. composer and musical conductor; conducted opera many seasons in New York and London; was Patti's favorite conductor; wrote famous waltz songs sung by Patti and other prima donnas, and composed the operas "The Spy," "The Brigands," and "The Corsair."

Argyle (ar-gill) Archibald Campbell, eighth earl, 1598-1661. Scot. Covenanter; defeated by Montrose; executed for treason.

Aristides (ar-is-ti-dees) called the Just, 550-467 B.C. Gr. general and statesman; commanded at the great battles of Marathon, Salamis, and Platea. Was chief archon of Athens and leading rival of Themistocles.

Aristippus (ar-ist-tip-pus) Gr. philosopher born in Africa about 435 B.C.; pupil but only partially a follower of Socrates; founded the Cyrenaic or Hedonistic school of philosophy, which declares that pleasure is the supreme good.

Aristotle (ar-is-totl), The Stagirite, 384-22 B.C. Gr. philosopher; pupil of Plato; instructor of Alexander the Great. Founded analytic philosophy. Left a vast number of writings, bearing upon almost every important field of knowledge. The extent of his researches was enormous, and his influence on human thought has continued to the present day. He was the first to develop a definite method of reasoning. His analysis and clear distinction of ideas have had an incalculable influence in advancing scientific inquiry.

Arianus, 256-336. Patriarch of Alexandria, and the father of Arianism.

Arkwright, Sir Richard 1732-92. Eng. manufacturer, originated the modern factory, invented the spinning jenny and one of the first to use steam power.

Arminius (Hermann), 16 B.C.-21 A.D. Ger. hero; defeated the Romans 9 A.D. near the Lippe.

Arnaut (ar-no') Henri, 1641-1721. Historian, pastor, and leader of the Waldenses (Vaudois).

Arnold, Benedict 1740-1801. Am. general and traitor; his plot to deliver West Point into the hands of the British was followed by the capture of Major Andre, and he himself barely escaped; he became a colonel in the British army.

Arnold of Brescia (bresh'a). It. clerical reformer, executed by Frederick I.

Arnold, Thomas 1795-1842. English educator and historian; the famous master of Rugby.

Arnold von Winkelried (ar-noid-tun-vin'kle-ried) -1380. Swiss patriot who broke the Austrian phalanx at the battle of Sempach by throwing himself against the points of their spears.

Artedi (ar-tay-da) Peter, 1705-35. Swedish naturalist; friend of Linnaeus; author of an important work on fishes.

Artemisia (ar-te-miz'h-i-a), 350 B.C. Queen of Caria; erected a magnificent monument to her husband Mausoleus, whence the word mausoleum.

Artevelde (ar-te-vel-deh), Jacob van, 1290-1345. A popular leader of the Flemings, captain general of Ghent.

Artevelde, Phillip van, son of Jacob, 1340-1382. Leader of the Flemings, defeated and slain in battle against Charles VI. at Roosebeke.

Arthur, Chester Alan, 1831-86. Twenty-first president of the United States; born at St. Albans, Vermont; read law, was admitted to the bar, and began practice in New York city; 1860, quartermaster general on the staff of Governor Morgan; 1871, collector of the port of New York, but superseded, 1878, by General Merritt; 1880, nominated for vice-president by the Republicans and elected; succeeded to the presidency on the death of Garfield.

Arundel (ar-un-del), Thomas Howard, Earl of, 1592-1646. English art collector widely known for his collection called the "Arundel Marbles."

Ashburton, Alexander Baring, Baron 1774-1848. English financier and statesman; negotiated the "Ashburton Treaty" with the United States; head of the great Baring banking house.

Asbury, Francis, 1745-1816. First Methodist bishop ordained in the United States; father of Methodism in America.

Aspa/sia of Miletus, -432? B.C. Mistress of Pericles, the Athenian law not permitting a citizen to marry a foreigner; Socrates called himself one of her disciples.

Astor, John Jacob, 1763-1848. Am. merchant, native of Germany; settled in New York city and entered the fur trade, establishing trading posts in the northwest as far as the Pacific, and founding Astoria in 1811; he made extensive investment in real estate, and when he died he left property amounting to thirty millions.

Athanasius, Saint, 293-373. Bishop of Alexandria, founder of Greek orthodoxy; most noted theologian of the fourth century.

Atkinson, Edward, 1827- Am. economist, has published many books on banking, railways, money, the tariff, and other economic subjects.

Attila, (at-ti-la) -453. King of the Huns, called the "Scourge of God," conquered and devastated a large part of the Roman Empire.

Auber (a-bur'), Daniel F. E., 1782-1871. Famous Fr. composer, founder of grand opera; best known work the opera "Fra Diavolo."

Augereau (ozh-ro'), Pierre Francois Charles, Duke of Castiglione. Distinguished general, one of Napoleon's marshals and a peer of France.

Audubon, John James, 1780-1851. Am. ornithologist; spent many years in studying and illustrating from life the birds of America.

Augustine, Saint 354-430 Latin father of the Church and founder of Roman Catholic theology.

Augustus Cæsar, 63 B.C.-14 A.D. First emperor of Rome.

Averroes (a-ver-ro-es), 1126-98. Famous Arabic philosopher and jurist, born at Cordova; commentator of Aristotle.

Avicenna, 980-1037. Great Arabic physician and philosopher, author of a system of medicine, and of treatise on metaphysics.

Avogadro (a-vogah-dro), Amadeo, 1776-1856. Italian physicist; author of scientific treatises; celebrated for first formulating a fundamental principle of chemistry known as Avogadro's rule.

Babbage, Charles, 1792-1871. An English mathematician and inventor of a calculating machine; born near Teignmouth, England. Died in London.

Baber, 1483-1530. The founder of the Mogul empire in Hindustan, a descendant of Tamerlane; thrice invaded India, and became at length master of it in 1526; left memoirs; his dynasty lasted for three centuries.

Bach, Johann Sebastian, (bäk), 1685-1750. Celebrated Germany musician, born at Eisenach, Upper Saxony, entered the choir of Saint Michael's, Lüneburg, as a

soprano singer. In 1708 he became court musician at Weimar; the following year organist at Arnstadt, and in 1708 court organist at Weimar. In 1717 he was made Director of Concerts, and six years afterward Director of Music and Cantor to St. Thomas' school, Leipzig, an appointment which he held to his death. With the exception of Handel, Bach had no rival as an organist.

Backhuysen, Ludolph, 1681-1709. A Dutch painter, famous for his sea-pieces and skill in depicting seaviews; was an etcher as well as painter.

Bacon, Roger, 1214-1294. A Franciscan monk; born at Ilchester, Somerset; a fearless truth seeker of great scientific attainments; accused of magic, convicted and condemned to imprisonment, from which he was released only to die; suggested some scientific inventions, such as the telescope and gunpowder, and wrote some eighty treatises on scientific subjects.

Baedeker, Karl, 1801-1859. A German publisher; originator of a celebrated series of guidebooks for travelers.

Baflin, William, 1584?-1622. An English navigator and discoverer. In 1615 he took service as pilot of the *Discovery* in search of a northwest passage, and made a careful examination of Hudson Strait. His recorded latitudes and notes of the tides are in remarkable agreement with those of a later date. In the following year, with Captain Bylot, he discovered, charted, and named Smith Sound, and several others, and explored the large inlet now associated with his name. His last voyages, 1616-1621, were to the East. At the siege of Ormuz, which the English were helping the Shah of Persia to recover from the Portuguese, he was killed.

Bailey, Liberty Hyde, 1858- . . . An American horticulturist and editor; born in South Haven, Mich.

Bailly, Jean Sylvain, 1736-1793. A French astronomer and statesman; born in Paris. The Revolution drew him into public life. As mayor of Paris his moderation and impartial enforcement of the law failed to commend themselves to the people, and his forcible suppression of mob violence, July 17, 1791, aroused a storm which led to his resignation. He was condemned by the Revolutionary Tribunal, and executed.

Baird, Spencer Fullerton, 1823-1887. A distinguished American naturalist; born at Reading, Pa. His writings treat nearly every branch of American natural history. He died at Wood's Holl, Mass.

Bajazet (baj-a-zet'), or Bayazet I., 1347-1403. An Ottoman sultan. He was the first of his family who assumed the title of sultan. After defeating Hungarians, Poles, and French at Nicopolis on the Danube, September 28, 1396, Bajazet is said to have boasted that he would feed his horse on the altar of St. Peter at Rome. His progress, however, was arrested by a violent attack of the gout. Bajazet was preparing for an attack on Constantinople, when he was interrupted by the approach of Timur the Great, by whom he was defeated at Angora. He was taken captive, and died about nine months afterward, at Antioch in Pisidia.

Baker, Edward Dickerson, 1811-1861. An American soldier and politician; born in London, England; came to the United States in youth; was sent to Congress in 1844. He served under General Scott in the war with Mexico and was elected United States Senator from Oregon in 1860. He entered the Federal army at the outbreak of the Civil War, and was killed at the battle of Ball's Bluff.

Baker, Sir Samuel White, 1821-1893. A distinguished English traveler; born in London. Discovered lake Albert Nyanza, 1864. On his return home he was received with great honor and was knighted. In 1869, being raised to the dignity of pasha, he returned to Africa as head of an expedition sent by the Khedive of Egypt to suppress the slave trade and to annex and open up to trade a large part of the newly explored country. In 1879 he explored the island of Cyprus, and subsequently he traveled in Asia and America.

Balboa, Vasco Nunez de, 1475-1517. A Castilian noble; conducted an expedition to Darien; discovered the Pacific; took possession of territory in the name of Spain; put to death by a new governor, from jealousy of the glory he had acquired and the consequent influence in the state.

Baldwin I., 1069-1118. King of Jerusalem; succeeded his brother Godfrey de Bouillon; made himself master of most of the towns on the coast of Syria; contracted a disease in Egypt; returned to Jerusalem, and was buried on Mount Calvary.

Baldwin, James Mark, 1861- . . . An American psychologist, born in Columbia, S. C.; educated at Princeton College, Leipzig, Berlin, and Tübingen Universities.

Balfe, Michael William, 1806-1870. Composer; born in Dublin; in 1828 he wrote the music for a ballet, "La Perouse," performed at Milan; and in 1827 he sang in the Italian Opera at Paris with great applause, his voice being a pure, rich baritone. In 1833 he returned to England, and in 1846 was appointed conductor of the London Italian Opera; author of several operas, "The Bohemian Girl" being the most successful. He died at Rowney Abbey, his estate in Hertfordshire.

Balfour, Arthur James, 1848- . . . A British statesman; born in Scotland; entered Parliament in 1874; was private secretary to his uncle, the Marquis of Salisbury, in 1878-1880, and accompanied him to the Berlin Congress; was member of Parliament for Hertford in 1874, and for the East Division of Manchester in 1886; president of the Local Government Board in 1886; Secretary for Scotland in 1886, with a seat in the Cabinet; Lord Rector of St. Andrew's University in 1886; Secretary for Ireland in 1887-1891; member of the Gold and Silver Commission in 1887-1888; Lord Rector of Glasgow University in 1890; Chancellor of Edinburgh University in 1891; First Lord of the Treasury in 1891-1892; became the leader of the Conservative opposition in the House of Commons in 1892. In 1896 he again became First Lord of the Treasury and leader of the House. He was an effective speaker. As Chief Secretary for Ireland, he was successful. He passed the Crimes Act and Law Act, secured a free grant for railways, made a tour of investigation and created the Congested Districts Board. On the resignation of Lord Salisbury, Mr. Balfour became prime minister, July 12, 1902.

Balliol (bal'yo), John de, 1249-1314. Son of the following; laid claim to the Scottish crown on the death of the Maid of Norway in 1290; was supported by Edward I., and did homage to him for his kingdom, but rebelled, and was forced publicly to resign the crown; died in 1314 in Normandy, after spending some three years in the Tower.

Balliol, Sir John de, . . . -1299. Of Norman descent; a guardian to the heir to the Scottish crown in the minority of Alexander III.; founder of Balliol College, Oxford.

Ballou, Hosea, 1796-1861. An American Universalist clergyman, journalist, and historian, born in Vermont; was the first president of Tufts College, and was very successful as editor of the *Universalist Magazine*. He died at Somerville, Mass.

Balmaceda, Jose Manuel, 1840-1891. A Chilean statesman; early distinguished as a political orator; advocated in Congress separation of Church and State; as Premier in 1884, introduced civil marriage; elected President in 1886. A conflict with the Congressional Party, provoked by his alleged cruelties and official dishonesty, and advocacy of the claim of Senor Puentes as his successor, resulted in Balmaceda's overthrow and suicide.

Banks, Sir Joseph, 1744-1820. A zealous naturalist, particularly in Botany; a collector, in lands far and wide, of specimens in natural history; left his collection and a valuable library and herbarium to the British Museum.

Banks, Nathaniel Prentiss, 1816-1894. An American legislator and soldier; born in Waltham, Mass. At first a factory worker; he studied law, and became successively a member of the State and National Legislatures. He was speaker of Congress in 1866, and in 1867 he was elected governor of his native state. On the outbreak of the Civil War, he took a command in the army, at first on the Potomac, then at New Orleans, and finally on the Red river. Relieved of his command in 1864, he re-entered Congress.

Banquo, . . . -1066. A famous Scottishthane. Legend says that in conjunction with Macbeth, cousin of Duncan, the king, he obtained a victory over the Danes, who had landed on the Scottish coast. Macbeth, shortly afterward, violently dethroned Duncan, and caused him to be secretly assassinated. Banquo, though not an accomplice, was a witness of the crime; and, being subsequently regarded by Macbeth with fear and suspicion, the latter invited him and his son to supper, and hired assassins to attack them on their return home during the darkness of night. Banquo was slain, but the youth made his escape. Shakespeare has interwoven this occurrence with the theme of his tragedy of "Macbeth."

Barbarossa (i. e., Red-beard), Horuk, 1473-1513. A native of Mitylene; turned corsair; became sovereign of Algiers by the murder of Selim the emir, who had adopted him as an ally against Spain; was defeated twice by the Spanish general Gomez and slain.

Barberini. A celebrated Florentine family, which,

since the pontificate of Maffeo Barberini (Urban VIII., 1623 to 1644), has occupied a distinguished place among the nobility of Rome.

Barclay de Tolly, Michael, 1761-1818. A Russian general and field marshal, of Scottish descent, and of the same family as Robert Barclay the Quaker; distinguished in successive Russian wars; made commander-in-chief; commanded the Russians at Dresden and Leipzig, and led them into France in 1815; he was afterwards Minister of War at St. Petersburg, and elevated to the rank of prince.

Baring, Sir Francis, 1740-1810. Founder of the great banking firm of Baring Brothers & Co.; amassed property, value of it said to have been nearly seven millions.

Bar-meides. Flourished ninth century; a Persian family celebrated for their magnificence, and one that in the end met with the cruellest fate. Yahya, one of them, eminent for ability and virtue, was chosen by the world-famous Haroun-al-Raschid on his accession to the caliphate to be his vizier; and his four sons rose along with him to such influence in the government as to excite the jealousy of the caliph so much that he had the important members of the family either executed or thrown into prison and forbade mention of their names on pain of death.

Barnard, Edward Emerson, 1857-. An American astronomer; born in Nashville, Tenn.; was astronomer in Lick Observatory, California, in 1887-1895, and then became Professor of Astronomy in Chicago University and Director of the Yerkes Observatory. His principal discoveries are the fifth satellite of Jupiter in 1892, and sixteen comets. He has made photographs of the Milky Way, the comets, nebulae, etc.

Barnato, Barney, 1852-1897. A South African speculator. His real name is believed to have been Bernard Isaac. He was born in London, England, of Hebrew parents. He began business there as a dealer in diamonds, and in five years earned enough to buy shares in the Kimberly diamond mines. He established a partnership with Cecil Rhodes, and when, in 1886, gold was discovered, secured possession of the greater part of the region. He committed suicide by jumping from the deck of the steamer *Scot* bound from Cape Town to Southampton.

Barnes, Albert, 1796-1870. An American Presbyterian minister; born in Rome, N. Y.; he was best known by his "Notes" on the New Testament (of which over one million volumes are said to have been circulated), Isaiah, Job, Psalms, etc. He died at Philadelphia.

Barnveldt (bar-neh-velt), Jan van Olden, 1547-1619. Grand Pensionary of Holland, of a distinguished family; studied law at the Hague, and practiced as an advocate there; fought for the independence of his country against Spain; concluded a truce with Spain, in spite of the Stadtholder Maurice, whose ambition for supreme power he courageously opposed; being an Arminian, took sides against the Gomarist or Calvinist party, to which Maurice belonged; was arrested, tried, and condemned to death as a traitor and heretic, and died on the scaffold at seventy-one years of age, with sanction, too, of the Synod of Dort.

Barras, Paul Francois Jean Nicolas, Comte de, 1755-1829. A French Jacobin; born in Provence, July 14, 1759, he took part in the attack upon the Bastille, and August 10, 1792, upon the Tuileries. In 1792 he was elected a member of the National Convention, and voted for the unconditional death of Louis XVI. In February, 1795, he was appointed commander-in-chief, and in that capacity, declared Paris in a state of siege, when the assembly was attacked by the populace. Afterward, when the convention was assailed, Bonaparte, by Barras' advice, was appointed to command the artillery; and that general decisively repressed the royalist movement. For his services, Barras had been named one of the Directory, and he took a prominent part in the changes which that body underwent until Napoleon's coup d'etat, which effectually overthrew the power of Barras and his colleagues.

Barrett, Lawrence, 1838-1891. An American actor; born in Paterson, N. J.; he supported Mr. Burton, Charlotte Cushman, Edwin Booth, and other eminent actors. He served as a captain in the 28th Massachusetts Infantry in the early part of the Civil War. Later he was engaged by Mr. Booth to play Othello to his Iago. After this he became an associate manager of the Varieties Theater, in New Orleans, where for the first time he played the parts of Richelieu, Hamlet, and Shylock. He gained steadily in distinction both as manager and actor. He died in New York city.

Barry, Elizabeth, 1658-1718. An English actress, was said to be the daughter of Colonel Barry, a promi-

nent royalist in the civil war. She was known as "the great Mrs. Barry," and is said to have created over 100 roles. She died in London.

Barthol'di, Frederic Auguste, 1834-. A French sculptor; born in Colmar, Alsace; principal works: the "Lion of Belfort"; statue of Lafayette, in Union Square, New York; bronze group of Lafayette and Washington, in Paris; and the colossal figure in New York harbor, "Liberty Enlightening the World."

Bartolommeo, Fra, 1475-1517. A celebrated Florentine painter of sacred subjects; born at Florence; "St. Mark" and "St. Paul" are among his best productions.

Barton, Clara, 1830-. An American philanthropist; born in Oxford, Mass. On the outbreak of the Civil War became a volunteer nurse in the army hospitals and on the battlefield. On the breaking out of the Franco-Prussian War, in 1870, she aided the Grand Duchess of Baden in preparing military hospitals, assisted the Red Cross Society, and, at the request of the authorities, superintended the distribution of work to the poor of Strasburg, in 1870, after the siege, and in 1872 did a like work in Paris. At the close of the war, she was decorated with the Golden Cross of Baden and the Iron Cross of Germany. On the organization of the American Red Cross Society in 1881, she was made its president. In 1889 she had charge of movements in behalf of sufferers from the floods at Johnstown, Pa.; in 1892 distributed relief to the Russian famine sufferers; in 1896 personally directed relief measures at the scenes of the Armenian massacres; in 1898 took relief to the Cuban reconcentrados, and performed field work during the war with Spain; and in 1900 undertook to direct the relief of sufferers at Galveston, but broke down physically. In 1903 she undertook the reorganization of the Red Cross Society in the United States.

Bartram, John, 1699-1777. An American botanist, born in Chester county, Pa.; died at Kingsessing, near Philadelphia, Pa.

Barre (Bar-re), Antoine Louis, 1796-1875. A French sculptor, born in Paris.

Bascom, John, 1827-. An American educator and philosophical writer, born at Geneva, N. Y. He was President of the University of Wisconsin in 1874-1877, and became Professor of Political Science in Williams College. He retired in 1901.

Bashkirtseff, Marie, 1860-1884. A precocious Russian young lady of good family, but of a delicate constitution, who traveled a good deal with her mother, noted her impressions, and left a journal of her life, which created, when published after her death, an immense sensation from the confessions it contained.

Bastian, Adolf, 1825-. A German traveler and ethnologist. He has traveled very extensively and his numerous writings throw light on almost every subject connected with ethnology or anthropology, as well as psychology, linguistics, non-Christian religions, geography, etc.

Bastien-Lepage, Jules, 1849-1884. A French painter, born at Damvilliers. He died at the height of his fame.

Bates, Edward, 1793-1869. An American lawyer; born in Belmont, Va. He was Attorney-General of the United States in Lincoln's first administration; and had been a candidate for the presidential nomination in 1860. He died in St. Louis, Mo.

Bayard, or more properly **Bayart, Pierre du Terrail, Chevalier de**, 1476-1524. Called the "knight without fear and without reproach"; born in the castle of Bayard, near Grenoble; was one of the most spotless characters of the Middle Ages.

Bayle, Pierre, 1647-1706. Born at Carla, France; first Catholic, then Protestant, then skeptic; Professor of Philosophy at Sedan, then at Rotterdam, but was at length deprived of his authority to teach there; known chiefly as the author of the famous "Dictionnaire Historique et Critique."

Bazaine, Francois Achille, 1811-1888. A French military officer; born in Versailles. He served in Algeria, in Spain against the Carlists, in the Crimean War, and joined the Mexican expedition as general of a division, in 1862, and in 1863 was made commander-in-chief. He commanded the Army in the Franco-Prussian War, when he capitulated at Metz, after a seven weeks' siege, with an army of one hundred and seventy-five thousand men. For this act he was tried by court-martial in 1871, found guilty of treason, and condemned to death. This sentence was commuted to twenty years' imprisonment in the Isle of St. Marguerite, from which he escaped and retired to Spain. He died in Madrid.

Beaconsfield, Benjamin Disraeli, Earl of, 1804-1881. An English statesman and author; born in Lon-

don. In 1833, he reached the summit of his ambition, becoming premier on the resignation of Lord Derby, but being in a minority after the general election he had to give up office the following December. In 1874 he again became prime minister with a strong Conservative majority, and he remained in power for six years. This period was marked by his elevation to the peerage. In the spring of 1880 Parliament was rather suddenly dissolved, and the new Parliament showing an overwhelming Liberal majority, he resigned office, though he still retained the leadership of his party. Not long after this he published "Endymion."

Beauharnais (bo-arnay'), Eugene de, 1781-1824. Son of Josephine, wife of Napoleon I.; adopted by the latter; served with distinction in the Napoleonic wars. Beauharnais was wounded at Acre; contributed to the victory of Marengo; was created Prince of the Empire in 1805, and Viceroy of Italy. He served in the campaign of 1809, defeated the Austrians at Raab, and distinguished himself at Wagram. His military talents were particularly evinced in the retreat from Moscow, and in the following campaigns of 1813-1814. To Beauharnais may be mainly ascribed the victory of Lützen.

Beauharnais, Hortense Eugénie, 1783-1837. Sister of the preceding, ex-queen of Holland; wife of Louis Bonaparte, brother of Napoleon; mother of Napoleon III.

Beauregard, Pierre Gustave Toutant, 1818-1893. An American military officer; born in New Orleans, La. He distinguished himself in the Mexican War, where he won the brevet of major; was appointed commander of the Confederate forces at Charleston, S. C., and there opened the hostilities of the Civil War by bombarding Fort Sumter. He attempted to aid General Joseph E. Johnston in opposing General Sherman, but surrendered with the former to the latter. After the war he became president of the New Orleans, Jackson, and Mississippi Railroad Company, Adjutant-General of the State, and a manager of the Louisiana State Lottery. In 1866 the chief command of the Rumanian army was tendered him, and in 1869 that of the army of the Khedive of Egypt, both of which he declined. He died in New Orleans.

Becket, Thomas a, 1119-1170. Archbishop of Canterbury; born in London of Norman parentage; entered the Church; was made Lord Chancellor; had a large and splendid retinue, but, on becoming Archbishop, cast all pomp aside and became an ascetic, and devoted himself to the vigorous discharge of the duties of his high office; King Henry II. grew restive under his opposition to the Constitutions of Clarendon. Four knights, to please the king, shed his blood on the steps of the altar of Canterbury Cathedral, for which outrage the king did penance at his tomb.

Bequerel (bek-rel'), Antoine Cesar, 1783-1878. A French physician and member of the Institute; born in Châillon-sur-Loing. In early life he served in the French army in Spain as an officer of engineers. He invented a method of electrolyzing. He died in Paris. His son, **Alexandre Edmond**, also an eminent physicist, was born in Paris, 1820. Besides his conjoint labors with his father, he made important researches on the nature of light and its chemical effects, on phosphorescence, on the conductivity and magnetic properties of many substances. He died in Paris, 1891.

Bedford, John, Duke of, 1390-1435. Brother of Henry V.; protector of the kingdom and regent of France during the minority of Henry VI., whom, on the death of the French king, he proclaimed King of France. The enthusiasm created by Joan of Arc turned the tide against him and hastened his death. Previous to this, however, he prevailed over the dauphin. Bedford was a devoted patron of letters.

Beecher, Henry Ward, 1813-1887. An American clergyman; born in Litchfield, Conn.; was graduated from Amherst in 1834; studied in Lane Theological Seminary, near Cincinnati, Ohio; and began ministerial duty as pastor of a church in Lawrenceburg, Ind., removing to Indianapolis in 1839. From 1847 until his death he was pastor of Plymouth Congregational Church in Brooklyn. He was one of the editors of the *Independent* and of the *Christian Union* (now the *Outlook*). He was also a prominent anti-slavery orator, as well as a famous lecturer. He died in Brooklyn, N. Y.

Beethoven (bay-to-ven), Ludwig van, 1770-1827. One of the greatest musical composers; born in Bonn, of Dutch extraction; the author of symphonies and sonatas that are known over all the world; showed early a most precocious genius for music; commenced his education as a musician at four; trained at length under the tuition of his illustrious predecessor, Haydn; revealed the

most wonderful musical talent; quitted Bonn and settled in Vienna; attracted the attention of Mozart; about the age of thirty was attacked with deafness that became total and lasted for life; continued to compose all the same, to the admiration of thousands; during his last days was a prey to melancholy; during a thunderstorm he died.

Behring or Berling, Vitus, 1680-1741. A Danish explorer; born in Denmark; entered the service of Russia while still young; became a captain-commander in 1722, and in 1725 was sent by the Empress Catharine in charge of an expedition (planned by Peter the Great before his death), the object of which was to determine if Asia and America were united. Crossing Siberia he sailed from the river of Kamchatka in July, 1728, and reached lat. 67° 18' N., having passed through the strait, since called after him, without knowing it. Discovering that the land trended greatly to the west he concluded that the continents were not united, and returned; without, however, seeing America. In another voyage, in 1741, he touched upon the American coast, in lat. 58° 21' N., and gave name to Mount St. Elias. In returning his ship was cast upon an island, since named after him, an outlier of the Aleutian group, and here he and many of his crew perished.

Belisarius, 505-565. A general under the Emperor Justinian, born in Illyria; defeated the Persians, the Vandals, and the Ostrogoths; was falsely accused of conspiracy, but acquitted and restored to his dignities by the emperor.

Bell, Alexander Graham, 1847- . . . Inventor of the telephone; was born in Edinburgh. He was educated at Edinburgh and in London, and settled in Canada in 1870. In 1872 he came to the United States and introduced for the education of deaf mutes the system of visible speech contrived by his father. He became Professor of Vocal Physiology in Boston University, and at the Philadelphia Exhibition, in 1876, exhibited his telephone, designed and partly constructed some years before. He was also the inventor of the photophone, of the graphophone, and of kindred instruments.

Bell, John, 1797-1869. An American statesman, born near Nashville, Tenn. Member of Congress from 1827 to 1841; Speaker in 1834, and Secretary of War in 1841. He sat in the United States Senate from 1847 to 1859, and in 1860 was nominated for the Presidency by the "Constitutional Union" Party. He afterwards took no active share in politics, and died at Cumberland Ironworks.

Bellini, Gentile, 1427-1506. The son of Jacopo Bellini; was distinguished as a portrait painter; decorated, with his brother, the council chamber of the ducal palace; one of his finest pictures was the "Preaching of St. Mark."

Bellini, Giovanni, 1426-1516. Brother of the preceding; produced a great many works; the subjects religious, all nobly treated; had Giorgione and Titian for pupils; among his best works are "The Transfiguration," "Feast of the Gods," "Blood of the Redeemer."

Bellows, Henry Whitney, 1814-1882. An American Unitarian clergyman and writer; born at Walpole, N. H.; was chief founder and long an editor of the *Christian Inquirer*; chief originator of the United States Sanitary Commission, and its president during the Civil War. He was an effective preacher and public speaker. He died in New York.

Bendire, Charles Emil, 1836-1897. A German-American military officer and ornithologist; born in Darmstadt, Germany; came to the United States in 1852, and entered the army in 1854. He served through the Civil War. After the war he was transferred to the West. During his stay in the West he applied himself to the study of ornithology, and collected a vast amount of material in various branches of natural history. In 1870 he began to collect the eggs of North American birds, which finally numbered more than eight thousand specimens, and this collection he presented to the United States National Museum. He is the author of "The Life Histories of North American Birds, with Special Reference to their Breeding Habits and Eggs."

Benedict, Saint, 480-543. The founder of the Order of the Benedictine Monks; was born at Nursia, in the Dukedom of Spoleto, in Italy.

Benjamin, Judah Philip, 1811-1884. An American lawyer; born in St. Croix, West Indies; was of English parentage and of Jewish faith. Admitted to the bar in New Orleans; elected to the United States Senate in 1852 and 1858. At the beginning of the Civil War, he resigned from the Senate and declared his adhesion to the State of Louisiana. In 1861 he accepted the office of Attorney-General in the Cabinet of Jefferson Davis, and afterward became successively Confederate Secretary of

War and Secretary of State. After the war he went to London, England, where he was admitted to the bar in 1866. He gained a successful practice, and in 1872 was formally presented with a silk gown. He wrote a "Treatise on the Law of Sale of Personal Property." He died in Paris.

Benjamin, Park, 1809-1864. An American journalist, poet, and lecturer; born at Demerara, British Guiana. He studied law originally. His poems, of a high order of merit, have never been collected. He died in New York.

Bennett, James Gordon, 1795-1872. An American journalist; born at New Mill, Scotland; trained for the Catholic priesthood; emigrated, a poor lad of nineteen, to America; got employment in a printing office in Boston as proof reader; started the New York *Herald* in 1835 as both proprietor and editor, an enterprise which brought him great wealth and success.

Bentham, Jeremy, 1748-1832. An English jurist; born in London. He was called to the bar, but did not practice, and, having private means, devoted himself to the reform of civil and criminal legislation. He died in London, leaving his body for dissection.

Benton, Thomas Hart, 1782-1858. An American statesman; born near Hillsboro, N. C.; settled in Tennessee, where he studied law, and was elected to the Legislature. In 1812 he raised a regiment of volunteers, and also served on General Jackson's staff. After the war, he started a newspaper in St. Louis, by which he became involved in several duels. On the admission of Missouri as a state, he was chosen United States Senator in 1820, and, in this post, during thirty years' continuous service, took a leading part in public affairs. He died in Washington.

Bergerac (ber-zhak'), Savinien Cyrano de, 1619-1655. A French author; born in Perigord; distinguished for his courage in the field, and for the number of his duels, more than a thousand, most of them fought on account of his monstrously large nose. His writings are often crude, but full of invention, vigor, and wit. He was made the hero of a drama bearing his name, written by Edmond Rostand, the French playwright.

Berkeley, George, 1685-1753. Irish Protestant prelate; founded the philosophy of subjective idealism.

Berlichingen (ber-lik-ing-en), Goetz von, 1480-1562. Surnamed "The Iron Hand"; a brave but turbulent noble of Germany, the story of whose life was dramatized by Goethe.

Berlioz (ber-le-oz'), Hector, 1803-1869. A French composer; born in La Cote St. Andre. He forsook medicine to study music at the Paris Conservatoire, where he gained the first prize in 1830 with his cantata, "Sardanapale." He died in Paris.

Bernadotte, Jean Baptiste Jules, 1764-1844. A French general, afterwards raised to the Swedish throne. In 1798 he married Mademoiselle Clary, sister-in-law of Joseph Bonaparte. The following year he became for a short time Minister of War, and on the establishment of the Empire was raised to the dignity of Marshal of France, and the title of Prince of Ponte-Corvo. On the death of the Prince of Holstein-Augustenburg, the heir apparent to the Swedish crown was offered to the Prince of Ponte-Corvo, who accepted with the consent of the Emperor, went to Sweden, abjured Catholicism, and took the title of Prince Charles John. In the maintenance of the interests of Sweden, a serious rupture occurred between him and Bonaparte, followed by his accession. In 1812, to the coalition of sovereigns against Napoleon. At the battle of Leipzig, he contributed effectually to the victory of the allies. At the close of the war became King of Sweden on the death of Charles XIII., in 1818, under the title of Charles XIV. During his reign agriculture and commerce made great advances, and many important public works were completed. He was succeeded by his son Oscar.

Bernard, Claude, 1813-1878. A distinguished French physiologist; born at St. Julien; discovered that the function of the pancreas is the digestion of ingested fats; that of the liver the transformation into sugar of certain elements in the blood, and that there are nervous centers in the body which act independently of the great cerebro-spinal center.

Bernard, Saint, 1091-1153. Abbot of Clairvaux; born at Fontaines, in Burgundy; pronounced one of the grandest figures in the church militant; founded in 1115 a monastery at Clairvaux, in Champagne; drew around him disciples who rose to eminence as soldiers of the cross; prepared the statutes for the Knights-Templars; defeated Abelard in public debate and procured his condemnation; founded many monasteries; awoke Europe to a second crusade.

Bernhardt, Rosine Sarah, 1844- . . . A French actress; born in Paris. At an early age her Jewish parents placed her in a convent at Versailles. When fourteen years old she left the convent, and entered the Paris Conservatoire, and there studied tragedy and comedy. Her first great success was as Marie de Neuberg, in Victor Hugo's "Ruy Blas." Becoming very popular by her representations, notably in "Andromaque" and "Le Sphinx," she was soon recognized as the foremost actress in French tragedy. Made successful appearances in the United States, and visited Switzerland, Holland, South America, Italy, Algeria, Australia, etc. In 1899 she appeared in a new rendering of "Hamlet" in Paris, and scored a most flattering triumph. She has also done considerable work in painting, sculpture, and literature.

Bernini (ber-nee'nee), Giovanni Lorenzo, 1598-1680. An Italian painter, sculptor, and architect; born at Naples; produced his "Apollo and Daphne" at eighteen, his masterpiece; designed the colonnade of St. Peter's.

Bernoulli, James, John, Daniel. Swiss mathematicians, born at Basel, of Dutch origin. John, 1667-1748, is the most celebrated; was professor first at Groningen and then at Basel; one of the discoverers of exponential calculus and the method of integrating rational fractions, as well as the minimum line.

Berthelot (ber-let'), Pierre Eugene Marcellin, 1827- . . . A French chemist, born in Paris; in 1878 he became president of the committee on explosives which introduced smokeless powder. His labors also led to the discovery of dyes extracted from coal tar.

Berthier (ber-tyer'), Alexander, 1753-1815. Prince of Neuchatel and Wagram, Marshal, Vice-Constable of France, etc.; born in Versailles; killed himself.

Berthollet (ber-to-let'), Count, 1748-1822. A famous chemist, native of Savoy, to whom we owe the discovery of the bleaching properties of chlorine, the remarkable salt called chlorate of potash, and many improvements in the manufactures.

Berze'lius, Johan Jakob, Baron, 1779-1848. A celebrated Swedish chemist, one of the creators of modern chemistry; instituted the chemical notation by symbols based on the notion of equivalents; discovered aluminum, and shared with Davy the honor of propounding the electro-chemical theory; he ranks next to Linnæus as a man of science in Sweden.

Bessemer, Sir Henry, 1813-1898. An English inventor; born in Charlton, Hertfordshire; began modeling and designing patterns when eighteen years old; chose engineering as a profession, and, after long and costly experiments, announced in 1856 his discovery of a means of rapidly and cheaply converting pig iron into steel, by blowing a blast of air through the iron when in a state of fusion. For this discovery the Institution of Civil Engineers awarded him the Gold Telford Medal, and several foreign governments honored him with valuable tokens. In the United States appreciation of his great discovery took the form of erecting industrial cities and towns under his name. He was elected President of the Iron and Steel Institute of Great Britain in 1871; knighted by the Queen in 1879; and received the freedom of the city of London in 1880. He died in London.

Bessey, Charles E., 1845- . . . An American botanist; born in Milton, O.; educated at Harvard University; Professor of Botany in the Iowa Agricultural College in 1870-1884; Professor of Botany in the University of Nebraska since 1884. He was also President of the Society for the Promotion of Agricultural Science in 1883-1885; President of the Nebraska Academy of Sciences in 1891; Acting Chancellor of the University of Nebraska in 1888-1891; Fellow of the American Association for the Advancement of Science.

Bewick, Thomas, 1753-1823. A distinguished wood-engraver; born in Northumberland; apprenticed to the trade in Newcastle; showed his art first in woodcuts for his "History of Quadrupeds," the success of which led to the publication of his "History of British Birds," in which he established his reputation both as a naturalist, in the truest sense, and as an artist.

Bichat (be-shah'), Marie Francois Xavier, 1771-1802. French physiologist; the greatest physician of his time and founder of general anatomy.

Biddle, John, 1615-1662. Father of the modern Unitarianism; born in Wotton-under-Edge, in Gloucestershire, England; was educated at Oxford. He was repeatedly imprisoned for his anti-Trinitarian views. To save his life, Cromwell banished him to one of the Scilly Isles in 1655. Here he remained three years, until the

Protector liberated him in 1658. He then continued to preach his opinions till the death of Cromwell, and also after the Restoration, when he was committed to jail in 1662, and died a few months after.

Biela, Wilhelm, Baron von, 1782-1856. An Austrian army officer, born in Roslau, Prussia; known for his discovery of the comet bearing his name. He died in Venice.

Bierstadt, Albert, 1830-1902. An American painter; born near Dusseldorf, Germany; removed with his parents to New Bedford, Mass., in 1831; began to paint in oils in 1851, and in 1858 returned to Dusseldorf to study his art, spending a winter in Rome, traveling in Italy and Switzerland, and returning to the United States in 1857. In 1861 he finished his painting, "Laramie Peak," and in 1863 "View of the Rocky Mountains—Lander's Peak." These at once gave him a high reputation. He died in New York city.

Bigelow, Jacob, 1787-1879. An American physician; born in Sudbury, Mass.; graduated at Harvard College, and began medical practice in Boston in 1810. He early became known as a botanist, and a number of plants were named for him by Sir J. E. Smith. He died in Boston.

Bigelow, Poultney, 1855- . . . An American journalist; born in New York; graduated at Yale University and at the Columbia Law School, and was admitted to the bar. Later he took a journey around the world in a sailing ship, which was wrecked on the coast of Japan. He traveled in China, Africa, the West Indies, and Demerara. He has made canoe voyages on the principal waters of Europe, and was the first person to take a canoe through the Iron Gates of the Danube.

Binney, Horace, 1780-1875. An American lawyer; born in Philadelphia; was graduated at Harvard, and for many years was at the head of the Pennsylvania bar. He had a number of distinguished cases in his career, the most noted one being the defense of the city of Philadelphia against the executors of Stephen Girard. He was also an advocate of the United States Bank. He wrote many valuable papers, and was the author of "The Leaders of the Old Bar of Philadelphia" and "The Privilege of the Writ of Habeas Corpus under the Constitution." He died in Philadelphia.

Blot (be-ol), Jean Baptiste, 1774-1862. An eminent French mathematician, astronomer, and physicist; born at Paris; Professor of Physics in the College of France; took part in measuring an arc of the meridian along with Arago; made observations on the polarization of light, and contributed numerous memoirs to scientific journals; wrote works on astronomy.

Bishop, Sir Henry Rowley, 1786-1855. An English composer; born in London; composer and director of music in Covent Garden Theater for fourteen years; produced sixty pieces, of which "Guy Rannier" and "The Miller and His Men" were most popular; was for a brief space Professor of Music in Edinburgh University, and eventually held a similar chair in Oxford.

Bismarck-Schoenhausen, Eduard Leopold, Prince von, 1815-1898. Born at Schönhausen; stirred to enter civil life by the events of 1848; took a bold stand against revolutionary ideas and measures; conceived the idea of freeing the several states of Germany from foreign control, and welding them into one under the crown of Prussia. Summoned in 1862 by King William to be his minister of foreign affairs; his influence was at first distrusted, but the annexation of Schleswig by force of arms in 1864 raised him into general favor. His next feat, the humiliation of Austria in 1866, and the consequent erection of a German Confederation, with Prussia at its head, made him the idol of the nation. His treatment of Napoleon III. provoked the latter into a declaration of war, and to an advance on the part of the French against Berlin. To the surprise of nearly all Europe, the Germans proved to be a nation of soldiers, marshaled as army never was before, and beat the French ignominiously back from the Rhine. Count Bismarck had the satisfaction of seeing the power of France that had threatened, as well as that of Austria, helpless; the German empire restored under a Hohenzollern king; and himself installed as chancellor of the monarch he had served so well. Nothing he did after this—though he reformed the coinage, codified the law, established protection, increased the army, and repressed Socialism—equaled this great feat, and for this a grateful nation must ever honor his name.

Bizet (be-zay) Georges, 1838-1875. An operatic composer; born at Paris; his greatest work, "Carmen"; died of heart disease shortly after its appearance.

Black, Jeremiah Sullivan, 1810-1888. An American

lawyer; born in Glades, Pa. In 1857 he was appointed Attorney-General of the United States by President Buchanan, and in 1860-1861 was United States Secretary of State. On the accession of President Lincoln he retired from public life. He died in York, Pa.

Blackie, John Stuart, 1809-1895. A Scottish author; born in Glasgow; died in Edinburgh.

Blackstone, Sir William, 1723-1780. An English jurist; born in London. In 1744 he was elected fellow of All Souls' College, Oxford, and in 1746 was called to the bar; but, having attended the Westminster law courts for seven years without success, he retired to Oxford. Here he gave lectures on law, which suggested to Mr. Viner the idea of founding a professorship at Oxford for the study of the common law; and Blackstone was, in 1758, chosen the first Vinerian Professor. In 1765 he published the first volume of his famous "Commentaries on the Laws of England."

Blackwood, William, 1787-1834. A Scotch publisher; born at Edinburgh. He started as a bookseller in 1804, and soon became also a publisher. After his death the business, which had developed into a large publishing concern, was carried on by his sons, and the magazine he founded is still a leading periodical.

Blaine, James Gillespie, 1830-1893. An American statesman; born in Brownsville, Pa. In 1854 he removed to Augusta, Me., and engaged in journalism. He was one of the founders of the Republican party. In 1862 he was elected to the House of Representatives of the National Congress. He became Speaker of the House in 1863, and held that office for six years; was a member of the Senate from 1876 to 1881; was Secretary of State. He was defeated for the presidency in 1884 by Grover Cleveland. Besides his numerous speeches and writings on the public questions of his day, his best known work is his "Twenty years of Congress," a historical production of great and permanent value. He died in Washington, D. C.

Blair, Hugh, 1718-1800. A Scotch clergyman and educational writer; born in Edinburgh; was noted for the eloquence of his sermons, and also for "Lectures on Rhetoric," which attained great popularity.

Bland, Richard P., 1835-1899. An American legislator; born near Hartford, Ky.; practiced law in Missouri, California, and Utah, and was engaged for some time in mining. He was a member of Congress in 1873-1895, and from 1897 till his death. In 1896 he was a conspicuous candidate for the presidential nomination in the Democratic National Convention. Mr. Bland was best known as the leader of the Free Silver movement in the Lower House of Congress and the author of the Bland Silver Bill. He died in Lebanon, Mo.

Blashfield, Edwin Howland, 1848- . . . An American artist; born in New York city; studied in Paris under Leon Bonnat; and began exhibiting in the Paris Salon in 1874. He returned to the United States in 1881, and has since distinguished himself by the execution of large decorative works.

Blavatsky, Helene Petrovna, 1831-1891. A noted theosophist; born in Yekaterinoslav, Russia; founded the Theosophical Society in New York in 1875. She died in London.

Blouet (bloo-ay), Paul (Max O'Rell), 1848-1903. A French lecturer and author; born in Brittany, France. During his early life he was an officer of cavalry in the French army, but in 1872 went to England and became a teacher. After the publication of his first book, "John Bull and His Island," he abandoned teaching and devoted himself to literature. He made several lecturing tours of the United States. Died in Paris.

Blucher (bloo-ker), 1742-1819. Prussian field-marshal, familiarly named "Marshal Forward"; born at Rostock; served first in the Swedish army, then in the Prussian; distinguished as a leader of cavalry, and met with varying fortune; at the age of seventy commanded the center of the Allied Army in 1813; distinguished himself at Lützen and Leipzig; pursued the French across the Rhine; pressed forward to Paris at the time of Napoleon's abdication; defeated by Napoleon at Ligny, June 16, 1815; arrived on the field of Waterloo just as the French were preparing to make their last charge, and contributed to decide the fate of the day.

Blumenbach, Johann Friedrich, 1752-1840. A German naturalist; born in Gotha. He advocated the doctrine of the unity of the human species, which he divided into five varieties, — Caucasian, Mongolian, Negro, American, and Malay. He died in Göttingen.

Boabdil (bo-ab-deel'), . . . -1537. The last Moorish King of Granada; dethroned his father, Abu-l-Hasan, in 1481, and two years later was defeated and taken prisoner

by the Castilians near Lucena. He was set free on condition of paying tribute, and returned to Granada to struggle with his father and with his heroic uncle, El Zagal, for the throne. Going to Africa, he there hung away his life in battle.

Bodley, Sir Thomas, 1544-1612. The founder of the Bodleian Library at Oxford; was born at Exeter. Died in London.

Boerhaave (bore'hav), Hermann, 1668-1738. A celebrated Dutch physician, one of the most influential medical authorities living in the eighteenth century; born in Voorhout, near Leyden.

Boethius, Anicius Manilius Severinus, 480?-524? A Roman statesman and philosopher, called "the last of the classic writers"; Theodoric King of the Ostrogoths, then master of Italy, loaded him with marks of favor and esteem, and raised him to the first offices in the empire. Later, however, he was accused of a treasonable correspondence with the court of Constantinople. He was arrested, imprisoned, and executed.

Bogardus, James, 1800-1874. An American inventor; born in Catskill, N. Y.; early showed the bent of his mind for improvements in the construction of eight-day clocks, and by the invention of a delicate engraving machine. The dry gas meter is his invention; invented a pyrometer, a deep sea sounding machine, and a dynamo-meter; died in New York.

Boleyn, or Bullen (bool'en), Anne, 1501-1536. Second wife of Henry VIII. and mother of Elizabeth; after a three years' residence at the French Court became maid of honor to Queen Catherine; attracted the admiration of Henry; was married to him, and became queen; charged with adultery and conspiracy, was found guilty and beheaded.

Bolingbroke, Henry St. John, Viscount, 1678-1751. An English statesman and political writer; born in Battersea, near London. He died in Battersea.

Bolívar, Simón, 1783-1830. A South American military officer and statesman (named El Libertador, from his having rescued central South America from the Spanish yoke); born in Caracas. At Venezuela he entered upon his career as a lieutenant-colonel in the service of the newly founded republic. At length, in 1821, the Independent troops were successful in the battle of Carabobo, where the Royalists lost upward of 6,000 men, and which decided the cause against Spain. On August 30 of the same year a republican constitution was adopted, and decreed to continue, as then defined, till 1834. Bolívar was chosen President, and he turned his attention to the internal administration of the country. In 1822 he assisted the Peruvians to obtain their independence, and was declared their liberator, and invested with supreme authority. On February 10, 1825, however, he convoked a congress, and resigned his dictatorship. He now visited the upper provinces of Peru, which, calling a convention at Chuquisaca, gave the name of Bolivia to their country, in his honor, appointed him Perpetual Protector, and invited him to draw up a constitution. On May 25, 1826, he presented his Bolivian code to the Congress of Bolivia, which was afterward adopted, with some dissatisfaction, however, although it was also subsequently adopted by the Congress of Lima, where, under its provisions, he himself was elected President for life. He now set out for Venezuela, where disaffection and party strife were at their height. His conduct here was misconstrued, and he was supposed to be assuming the powers of a dictator. In 1829 new disturbances arose, and in 1830 a convention was called for the purpose of framing a new constitution for Colombia. The proceedings were begun by Bolívar, who once more tendered his resignation, his last act in relation to public affairs. He died at Santa Marta, near Cartagena.

Bonaparte, Charles Louis Napoleon (Napoleon III.), 1808-1873. Son of Louis Bonaparte; emperor of the French; as claimant to the throne of France, attempted in 1836 to take Strasburg, but was banished; imprisoned in Ham, 1840, for an attempted insurrection at Boulogne, but escaped to England, 1844; returning to France after revolution of 1848, he was elected President, gained support of the army, and, abolishing popular representation by the *coup d'état* of 1851, was declared Emperor; in 1853 he married Eugénie, Countess de Montijo. Having surrendered at Sedan, after the decisive battle of the Franco-German War, he was deposed and retired to Chislehurst, in England.

Bonaparte, Joseph, 1768-1844. Eldest brother of Napoleon; born at Corte, in Corsica. After the coronation of Napoleon was made commander-in-chief of the army of Naples; in 1805, ruler of the Two Sicilies, and in 1806 King of Naples. In 1808 Joseph Bonaparte was sum-

marily transferred by his brother to the throne of Spain, and Murat took his place as King of Naples. After the defeat of the French at Vittoria in 1812, he returned to his estate at Morfontaine, in France. After Waterloo Joseph sailed to the United States, became an American citizen, and lived for some years at Bordentown, N. J. In 1832 he returned to Europe, and died at Florence.

Bonaparte, Louis, 1778-1846. Third brother of Napoleon. After rising from one honor to another, he was made King of Holland in 1806; Holland was incorporated with the French Empire in 1810, and he returned to Paris in 1814, where he was coldly received by the Emperor.

Bonaparte, Napoleon (Napoleon I.), 1769-1821. Emperor of the French and greatest of modern generals; born at Ajaccio, Corsica. Attended military school, 1779 to 1784. Entered army as sub-lieutenant in 1785, and in 1792 had risen to the rank of captain of artillery. In 1793 he distinguished himself at the reduction of Toulon, held by the English and Spaniards, and was commandant of the artillery. His success won for him a commission as brigadier-general. In the summer of 1794, on the remodeling of the army, he was suspended and placed upon half-pay, the reason given by the authorities being that he was too young to command the artillery of an army. In the fall, on the breaking out of an insurrection led by the National Guard, the convention recalled Napoleon, who gained a brilliant victory after a brief but bloody engagement. This virtually made him commander-in-chief of the army of the interior. In 1798 he was appointed to the command-in-chief of the army of Italy, and in the same year he married Josephine de Beauharnais. In his very first campaign Napoleon appeared a consummate general. In a few weeks he gained four victories, conquered Lombardy and captured Mantua, almost annihilating three Austrian armies. He then turned his arms against the Pope, compelling him to pay 15,000,000 francs and surrender many valuable works of art. After defeating another Austrian army sent to Italy, Napoleon concluded a treaty securing his success. In 1798 he was given command of a powerful expedition into Egypt, the intention being to strike at the power of Great Britain, and gained decisive victories over the Mamelukes and Turkish auxiliaries. Returning to France he overthrew the Directory and was elected first consul. In 1800 he gained the great victory of Marengo. Made peace with England, 1802, granted general amnesty, established public order, re-established the Catholic faith (1801), and produced his Civil Code. Napoleon became emperor in 1804, and engaged in war with England, Russia, Sweden, and Prussia. Divorced from Josephine in 1809, he married Maria Louise, daughter of the emperor of Austria, in 1810. In 1812 occurred the ill-fated Russian campaign, Napoleon's loss being estimated at 380,000 men. Beaten at Lepsic, 1813, he made a disastrous retreat. In 1814 the allies entered Paris, compelled Napoleon to abdicate and sent him to Elba, granting him the sovereignty of that island, but holding him as a prisoner. Returning again to France, he was enthusiastically received and raised an army of about 125,000, but was completely defeated at Waterloo, 1815. He abdicated again, and, unable to carry out his intention of embarking for America, surrendered to the captain of a British man-of-war. Carried to the island of St. Helena, he died there in 1821.

Bonar, Horatius, 1806-1889. A celebrated Scotch hymnist; born in Edinburgh; wrote "Hymns of Faith and Hope," many of which have been taken into the hymnals of most of the Protestant churches. He also wrote more than twenty volumes on theological and religious subjects.

Bonaventura, Saint, 1221-1274. An Italian friar of the Order of St. Francis; born in Tuscany. He died from sheer ascetic exhaustion.

Bonheur (bo-nur'), Rosa (or Rosalie), 1822-1899. Fr. painter of animals, born at Bordeaux; brought up in poverty from ill-fortune; taught by her father; exhibited when she was nineteen; her best known works are the "Horse Fair" and the "Hay Harvest in Auvergne."

Boniface, Winifred, Saint. Apostle of Germany, 680-755.

Bonner, Edmund (Bloody Bonner), 1500-1569. Bishop of London, noted for persecution of Protestants.

Bonnivard (bo-ne-var'), François de, 1496-1570. Hero of Byron's "Prisoner of Chillon."

Boone, Daniel, 1735-1820. American pioneer; born in Pennsylvania, but removed in boyhood to North Carolina; he visited Kentucky, hitherto unexplored, and signalized himself by his many daring exploits against the Indians.

Booth, Edwin Thomas, 1838-1893. An American

actor; born near Belair, Md.; the fourth son of Junius Brutus Booth. When sixteen years of age, he made his first appearance on the stage, in the part of Tressel, his father acting as Richard III. He visited England (1861-1862), and in 1864 produced "Hamlet" at New York for 100 nights consecutively. In 1869 he opened a splendid theater in New York, whose building cost over \$1,000,000, but which involved him in pecuniary ruin. He revisited California in 1876, and in the spring of 1877 was able to settle with his creditors, having earned during the season over \$600,000. Booth visited Great Britain and Germany in 1880 and 1882, and was everywhere received with enthusiasm.

Booth, John Wilkes, 1839-1865. An American actor; born in Harford county, Md.; another son of Junius Brutus Booth. He sided with the Confederates in the Civil War, and to avenge the defeat of their cause he formed a conspiracy against the life of President Lincoln. He mortally wounded the President, while the latter was attending a performance in Ford's Theater, in Washington, on April 14, 1865; broke his leg in escaping from the building; and concealed himself in Virginia till the 26th, when, on being discovered, and refusing to surrender, he was shot.

Booth, Junius Brutus, 1796-1852. An Anglo-American tragedian; born in the parish of St. Pancras, London. He received a classical education, but early manifested a predilection for the stage, and when seventeen years of age appeared in some unimportant parts. Subsequently he played Richard III. at Covent Garden, a part in which he suddenly became famous. In 1821 he came to the United States, where for the ensuing thirty years he followed his profession with much success. He died suddenly on board a Mississippi river steamer.

Booth, William, 1829- . . . Founder and General of the Salvation Army; was born at Nottingham, England, educated there, and from 1850 to 1861, acted as minister of the Methodist New Connection. From the first he was zealous in holding evangelistic services, but the new departure which led to the creation of the Salvation Army on military lines began in 1865 with mission work among the lower classes in the East End of London. Since 1878 Booth's movement has been known as the Salvation Army, of which he has continued to be the main spring and the controlling power, directing its movements at home and abroad from his headquarters in London.

Borchgrevink, Carsten Egebert, 1864- . . . A Norwegian explorer and lecturer; born in Christiania, his mother being English and his father a Scandinavian. He went to sea at an early age, but returned to go to college. In 1888 he went to Australia, joined the Survey Department, and scaled Mount Lindsay. In 1894-1895 he was in Antarctic waters, a region fully explored by him in 1898, when he attempted to reach the South Pole, without success. In 1899 (Feb. 17) he had, however, reached Robertson Bay. Returning to London in 1900 he reported having reached lat. 78° 50' S., long. 146° E., the farthest point south ever reached by man.

Borghese (bor-pay-zay), Princess Marie Pauline, 1780-1825. The beautiful sister of Napoleon; born in Ajaccio; died in Florence; she left many legacies, and a donation, the interest of which was to enable two young men of Ajaccio to study medicine and surgery. The rest of her property she left to her brothers, the Count of St. Leu and the Prince of Montfort. The whole property amounted to 2,000,000 francs.

Borgia (bor'ja), Cesare, 1478-1507. The natural son of Pope Alexander VI., and of a Roman lady named Vanozza. He was raised to the rank of Cardinal in 1492, but afterward divested himself of the office, and was made Duc de Valentinois by Louis XII. At the head of a body of mercenaries, carried on a series of petty wars, made himself master of the Romagna, attempted Bologna and Florence, and had seized Urbino when Alexander VI. died, 1503. Borgia was arrested and carried to Spain. He at length made his escape to his brother-in-law, the King of Navarre, and was killed before the castle of Blano. He was charged with the murder of his elder brother, of the husband of his sister Lucretia, and the stiletto or secret poisoning was freely used against those who stood in his way. With all his crimes he was a patron of art and literature.

Borgia, Lucretia, 1480-1523. Daughter of Pope Alexander VI., and sister of Cesare Borgia. She was accused of almost every species of crime; but several modern writers maintain that the charges against her are false or much exaggerated. She patronized art and literature.

Borromeo, Carlo, Saint, 1538-1584. Italian cardinal.

Bossuet, Jacques Benigne, 1627-1704. Fr. prelate and controversialist, and considered the greatest of Christian orators; first attempted philosophical treatment of history.

Botha, Louis, 1838- . . . A Boer commander; born in Greytown, Natal. He began life as a farmer, and, as a young man, had a share in the establishment of the Transvaal Republic. Later he fought in the Kafir campaign. He was elected to the Volksraad at Pretoria. Upon the outbreak of the Boer War with England in 1899, he was given a subordinate command, and, upon the death of General Joubert, March, 1900, became commander of the Boer forces. He demonstrated great capacity by his victories at Spion Kop and Colenso.

Böttger, or Bottiger, Johann Friedrich, 1682-1719. A German alchemist, the inventor of the celebrated Saxon or Meissen porcelain; born in Schleiz. He found refuge in Saxony, where the Elector erected a laboratory for him, and induced him to turn his attention to the manufacture of porcelain, resulting in the invention associated with his name. He died in Dresden.

Botticelli (bot-te-chel'lee), Sandro, or Alessandro, 1447-1510. A celebrated painter of the Florentine school; began as a goldsmith's apprentice; a pupil of Fra Lippo Lippi; the best known examples of his art are on religious subjects, though he was no less fascinated with classical-mythological conceptions; is distinguished for his attention to details and for delicacy, particularly in the drawing of flowers.

Bougainville (boo-gan-veel'), Louis Antoine de, 1732-1811. A French navigator; born in Paris; voyaged around the world, which occupied him two years and a half; his "Travels" as described by him in "Un Voyage autour du Monde," had a remarkably stimulating effect on the imagination of the "philosophes."

Bouguereau (boog-ro'), Adolphe, 1825-1905. A distinguished French painter; born at Rochelle; his subjects, both classical and religious, as well as portraits.

Boulanger (boo-lan-jay'), Georges Ernest Jean Marie, 1837-1891. A French soldier; born in Rennes. After a successful career in Algeria and in the East he became Minister of War. In the ministerial crisis of 1887 he lost his portfolio, and was appointed to the command of the 13th Army Corps, but was retired March 28, 1888. In January, 1889, he was elected Deputy to the National Assembly by 81,000 majority. A coup d'état was expected, but in August, 1889, he was charged with embezzlement, treason, and conspiracy, and found guilty by the Senate; the elections in the twelve cantons were annulled, and he was sentenced to deportation. He died in Brussels.

Bourdaloue (boor-da-loo') Louis, 1632-1704. A Jesuit and one of the greatest preachers France ever produced. The extreme popularity of his sermons induced his superiors to call him to Paris, and he became the favorite preacher of Louis XIV.

Bourne, Hugh, 1772-1852. Founder of the sect of Primitive Methodists; born in Staffordshire, England. In the course of his life he visited Scotland, Ireland, Canada, and the United States, where his ministrations were attended with great success.

Bowditch, Nathaniel, 1773-1838. American mathematician; born at Salem, Massachusetts; a practical scientist; published "Practical Navigator," translated the "Mecanique Celeste" of Laplace, accompanied with an elaborate commentary.

Boyle, The Hon. Robert, 1627-1691. A distinguished natural philosopher; devoted his life and contributed greatly to science, especially chemistry, as well as pneumatics; was one of the originators of the "Royal Society"; refused the presidency of the Royal Society, and declined a peerage.

Bozzaris (bot'zah-ri), Marcos, 1790-1823. Patriotic leader in Greek war for independence.

Braddock, Edward, 1695?-1755. A British soldier; born in Perthshire, Scotland; was appointed major-general in 1754. Nine months later he sailed as commander against the French in America; leaving the baggage behind, he pushed forward with a chosen force to invest Fort Duquesne, on the present site of Pittsburgh, Pa.; was attacked by a party of about 900 French and Indians. No less than 63 out of 86 officers, and 914 out of 1,373 men engaged, were either killed or wounded. The French loss was trifling. Braddock was carried from the field, and died at Great Meadows.

Bradford, William, 1588-1657. An American colonial governor and author; born in Austerfield, Yorkshire, England. He was one of the signers of the celebrated compact on the Mayflower; and, in 1621, on the death of the first governor, John Carver, was elected to the same

office, which he continued to fill (with the exception of five years when he declined re-election) until his death. His administration was remarkably efficient and successful, especially in dealing with the Indians. He died in Plymouth, Mass.

Bragg, Braxton, 1817-1876. An American military officer; born in Warren Co., N. C.; served with distinction under General Taylor in the Mexican War; at the outbreak of the Civil War, he became a Brigadier-General in the Confederate army. On Johnston's death he was appointed to his command, with the full rank of General, and succeeded General Beauregard as commander of the Department, in June of the same year. Of this last command he was relieved in December, 1863. After the war he was chief engineer of the State of Alabama, and superintended the improvements in Mobile Bay. He died in Galveston, Texas.

Brahe (bråh), Tycho, 1546-1601. A Danish astronomer, of noble birth; spent his life in the study of the stars; discovered a new star in Cassiopeia.

Brahms, Johannes, 1838-1897. A distinguished composer; born at Hamburg; settled in Vienna; the appearance of compositions of his was an event in the musical world; approaches Beethoven as no other does.

Breckinridge, John Cabell, 1821-1875. Vice-President of the United States; born near Lexington, Ky. He sat in Congress in 1851-1856, and in 1856 was elected Vice-President with James Buchanan as President. In 1860 he was the pro-slavery candidate for the presidency, but was defeated by Abraham Lincoln. United States Senator from March to December, 1861.

Brewer, David Josiah, 1837-. An American jurist; born in Smyrna, Asia Minor; graduated at Yale College; he studied law in the office of his uncle, David Dudley Field, and was admitted to the bar in New York city in 1858. Removing to Kansas, he became prominent in his profession. He was judge of the Supreme Court of Kansas, 1870-1884, and was appointed United States Judge for the eighth circuit in 1884. He rendered a memorable decision on the Kansas Prohibition Law, affirming the right of liquor manufacturers to compensation, for which he was severely criticised by the Prohibitionists. President Harrison elevated him to the Supreme Court of the United States in 1889. He was made a member of the Venezuelan Commission by President Cleveland in 1896, and was chosen its chairman.

Brewster, Sir David, 1781-1868. An eminent Scottish natural philosopher; born at Jedburgh; specially distinguished for his discoveries in light, his studies in optics, and for his optical inventions, such as the kaleidoscope and the stereoscope; wrote a *Life of Newton*, as well as *Lives of Euler, Kepler, and others of the class*; Principal of the United Colleges of St. Andrew, and afterwards Vice-Chancellor of Edinburgh.

Brian (surnamed *Boromhe*), 926-1014. King of Ireland; continued for many years to rule his dominions with vigor and prosperity. Having, however, disputed with Maelmora, the King of Leinster, Maelmora revolted, and, inviting Danes to his assistance, brought on the battle of Clontarf, in which King Brian fell, after gaining a glorious victory over the united forces of the invaders and revolting natives.

Bridget, Saint, 453-528. An Irish saint; born at Dundalk; takes rank in Ireland with St. Patrick and St. Columba. Also the name of a Swedish saint in the fourteenth century; founded a new order and seventy-two monasteries of the order.

Bridgman, Laura, 1820-1889. An American blind mute; born in Hanover, N. H. At two years of age both sight and hearing were entirely destroyed by fever. In 1839 Dr. Howe, of Boston, undertook her care and education at the deaf and dumb school. The first attempt was to give her a knowledge of arbitrary signs, by which she could interchange thoughts with others. Then she learned to read embossed letters by touch; next, embossed words were attached to different articles, and she learned to associate each word with its corresponding object. Her touch grew in accuracy as its power increased; she learned to know people almost instantly by the touch alone. In a year or two more she was able to receive lessons in geography, algebra, and history. She learned to write a fair, legible, square hand, and to read with great dexterity, and at last even to think deeply, and to reason with good sense and discrimination.

Bright, John, 1811-1889. An English statesman; born in Lancashire. When the Anti-Corn Law League was formed in 1839 he was one of its leading members, and, with Mr. Cobden, engaged in an extensive free trade agitation throughout the kingdom. He is credited with having exercised a greater influence upon the conduct of

public affairs in England and abroad than perhaps any other man. He was the greatest English orator of modern times.

Brockhaus, Friedrich Arnold, 1772-1828. A German publisher; born at Dortmund; a man of scholarly parts; began business in Amsterdam, but settled in Leipzig; publisher of the famous "Conversations Lexikon," and a great many other important works.

Brooks, Phillips, 1835-1893. An American clergyman and bishop of the Episcopal Church; born in Boston. He was an impressive pulpit orator, had great spiritual force, and published many volumes of sermons and lectures. He died in Boston.

Brougham (broo-am), Henry Peter, Lord Brougham and Vaux, 1778-1868. A British statesman, orator, and author; born in Edinburgh. In 1802 he helped to found the *Edinburgh Review*. The article on Byron's "Hours of Idleness," provoked the poet to write his "English Bards and Scotch Reviewers." In 1810 Brougham entered Parliament, where his remarkable eloquence gave him at once a commanding place. He was counsel for Queen Caroline in George IV.'s suit against her, winning a decisive victory, which raised him to the height of fame and popularity. He became Lord Chancellor in 1830, and was at the same time created a baron. He died in Cannes, France.

Brown, John, 1800-1859. An American opponent of slavery; born in Torrington, Conn. He early conceived a hatred for slavery, and, having removed to Osawatomie, Kan., in 1855, he took an active part against the pro-slavery party. In the summer of 1859 he rented a farmhouse about six miles from Harper's Ferry, and organized a plot to liberate the slaves of Virginia. On October 16, he, with the aid of about twenty friends, surprised and captured the arsenal at Harper's Ferry, but was wounded and taken prisoner by the regular troops next day, and was tried and executed at Charlestown.

Brown, Robert, 1778-1858. A Scotch botanist; born in Montrose. In 1801 he was appointed naturalist to Flinders' surveying expedition to Australia. He returned with nearly four thousand species of plants. He died in London.

Brown-Sequard, Edouard, 1818-1894. A Franco-American physiologist and physician; was born in Mauritius, his father being a sea captain from Philadelphia, who married on the island a lady named Séquard. The son studied in Paris, and graduated M.D. in 1840. He devoted himself mainly to physiological research, and received numerous prizes, French and British, for the results of valuable experiments on blood, muscular irritability, animal heat, and the spinal cord.

Bruce, Robert, 1274-1329. The heroic king of Scotland, who totally defeated the English under Edward II. at Bannockburn.

Brummel, George Bryan, 1778-1840. The sometime famous Beau Brummel; born in London. On his father's death, inheriting a fortune of about \$150,000, he began his career as a man of fashion, and became the intimate associate of the Prince of Wales (afterward George IV.). He it was who inaugurated the reign of dandyism, and for a period of twenty years exercised almost despotic sway over English society in the matter of dress. His fortune being soon swallowed up, he maintained his position in society by his success at play, and the indescribable charm of his manner and conversation. After a rupture with the prince, his influence gradually declined; and oppressed by debt, and the falling off of former friends, he retired to Calais, and afterward to Caen, where he was appointed British consul, and where he died.

Bruno, Saint, 1030-1101. Born at Cologne; retired to a lonely spot near Grenoble with fourteen others, where they lived in cells apart, and met only on Sundays; founder of the Carthusian Order of Monks, the first house of which was established in the solitude of Chartreuse.

Brutus, Lucius Junius. Flourished 500 B.C.; Roman patriot.

Brutus, Marcus Junius. 85-42 B.C.; one of Cæsar's assassins.

Bryan, William Jennings, 1860-. An American political leader; born in Salem, Ill. He was graduated at Illinois College in 1881, preparing subsequently for the bar at Union College, Chicago. In 1887 he removed to Lincoln, Neb., and was elected to Congress in 1890, and again in 1892. Four years later he was nominated for the presidency of the United States by the Democratic National Convention at Chicago. He advocated the free and unlimited coinage of silver by the United States at a ratio of 16 to 1, regardless of the action of the other nations. The presidential campaign

resulted in his defeat. During the war with Spain, he became colonel of a regiment of volunteers, stationed in Florida. In 1900, he again appeared as Democratic candidate for the presidency upon a platform of free silver, opposition to trusts, and anti-imperialism, and was again defeated by William McKinley. Colonel Bryan continues to retain large influence in his party.

Buchanan, James, 1791-1868. Fifteenth president of the United States; born in Pennsylvania; admitted to the bar, 1812; member of Congress, 1821-31; minister to Russia, 1823-4; United States Senator, 1845-46; secretary of State, 1845-9; minister to England, 1853-6; signed Ostend Manifesto, 1854; president 1857-61; in his last message, President Buchanan censured the Northern people for the imminent disruption of the Union, holding that neither the executive nor Congress had power to coerce a state.

Buckland, Francis Trevelyan, 1826-1880. An English naturalist; born in Oxford; he founded the journal, *Land and Water*, of which he was editor. He was an authority on fish culture, and as such was consulted by foreign governments. He was a resolute opponent of Darwinism.

Buckle, Henry Thomas, 1821-1862. An English historian; born in Kent. His chief work, a philosophic "History of Civilization," of which only two volumes were completed. He died, while traveling, at Damascus.

Buddha (or Boodha), Gautama, 624-523 B. C. Hindoo reformer; founder of Buddhism.

Buell, Don Carlos, 1818-1898. An American military officer; born near Lowell, O. He was graduated at West Point, and served in the Mexican War. Until the Civil War broke out he was assistant adjutant-general of various departments, when he was made a Brigadier-General of Volunteers and attached to the Army of the Potomac. In November, 1861, he succeeded General W. T. Sherman in command of the Department of the Ohio. He died near Rockport, Ky.

Buffon, George Louis Leclerc, Count de, 1707-1788. One of the most celebrated naturalists; born in Montbard, Burgundy; his appointment, as superintendent of the Royal Garden (now the Jardin des Plantes), in 1739, gave his mind a decided turn toward that science in which he immortalized himself. The most perfect part of his work is the "History of Quadrupeds"; the weakest, the "History of Minerals," in which his imperfect acquaintance with chemistry and his inclination to hypothesis led him into many errors. His last days were disturbed by a painful disease, which did not, however, prevent the prosecution of his great plan. He died in Paris.

Bull, Ole Bornemann, 1810-1880. A Norwegian violinist; born in Bergen. He secured great triumphs both throughout Europe and in the United States by his wonderful playing. He lost all his money in a scheme to found a colony of his countrymen in Pennsylvania, and had to take again to his violin to repair his broken fortunes. He afterward settled in Cambridge, Mass., and had also a summer residence in his native city, where he died.

Buelow, Friedrich Wilhelm, Baron von, 1755-1816. A Prussian general; served his country in the war with revolutionary France; defeated the French under the Empire in several engagements, and contributed to the victory at Waterloo.

Bunsen, Christian Karl Josias, Chevalier, 1791-1860. A distinguished German statesman and diplomat; born in Korbach; died in Bonn.

Bunsen, Robert Wilhelm, Eberhard, 1811-1899. A German chemist; born in Göttingen; among his many discoveries and inventions are the production of magnesium in quantities, magnesium light, spectrum analysis, and the electric pile and the burner which bears his name. He died in Heidelberg.

Burke, Edmund, 1729-1797. Irish orator, statesman, and writer; prominent as the ablest member of the Commons to oppose the ministry's American policy; impeached Warren Hastings in 1788.

Burgoyne, John, 1722-1792. English general, distinguished as sent especially to subdue the revolt in the American colonies, and after a victory or two, being obliged to capitulate to General Gates at Saratoga, fell into disfavor; devoted his leisure to poetry and the drama.

Burne-Jones, Sir Edward, 1833-1898. Artist, born at Birmingham, of Welsh descent; he was one of the foremost, if not the foremost, of the artists of his day; imbued with ideas that were specially capable of art-treatment.

Burnside, Ambrose Everett, 1824-1881. American general.

Burr, Aaron, 1756-1836. American statesman and lawyer. In 1800 Burr and Jefferson were the Democratic candidates for president and vice-president; receiving the same number of votes, the House gave the higher office to Jefferson. Burr's course in endeavoring to supplant Jefferson cost him the regard of his party. Unsuccessful as candidate for governor of New York in 1804, Burr attributed his defeat to Alexander Hamilton, whom he killed in a duel. After the expiration of his term as vice-president, Burr was tried for treason, charged with the subversion of federal authority, and with raising an expedition for the conquest of Mexico, but acquitted.

Bushnell, Horace, 1802-1876. An American clergyman and noted writer on religion, morality, and other topics; born near Litchfield, Conn.; died in Hartford.

Butler, Benjamin Franklin, 1818-1886. American politician, lawyer, and general; born in New Hampshire; military governor of New Orleans in 1862, ruling with vigor and efficiency and preserving the city from the yellow fever; went to Congress as a Republican in 1866, and was re-elected for several terms; elected governor of Massachusetts in 1882 by the Democrats, but defeated for the same office a year later.

Butler, Joseph, 1692-1752. An eminent English divine; born at Wantage; became preacher at the Rolls, where he delivered his celebrated "Sermons"; made dean of St. Paul's and finally bishop of Durham; his great work, "The Analogy of Religion, Natural and Revealed, to the Constitution and Course of Nature."

Cabet (Ca-bay), Etienne, 1788-1856. A French communist; born in Dijon, and educated for the bar, but turned his attention to literature and politics. Cabet sent a French colony to the Red river in Texas, but the colonists who went out in 1848 found Texas anything but a Utopia. Their ill fortune did not deter Cabet from embarking at the head of a second band of colonists. On his arrival he learned that the Mormons had just been expelled from Nauvoo, Ill., and that their city was left deserted. The Icarians established themselves there in 1850. Cabet's efforts, however, were not successful. He was finally obliged to leave Nauvoo and retire to St. Louis, where he died.

Cabot, John, . . . -1498? A Venetian pilot; born at Genoa; settled in Bristol; entered the service of Henry VII., and discovered part of the mainland of North America, at Labrador, about 1497.

Cabot, Sebastian, 1475-1557. Son of the preceding; born in Venice; he is thought to have led an English expedition in search of the northwest passage in 1517; led an expedition to America, 1528; did much to open up to England trade with Asia.

Cabrera, 1810-1877. A Spanish general; born at Tortosa, Catalonia; a zealous supporter of the claims of Don Carlos; died in England; he was an unscrupulous adversary.

Cade, Jack, . . . -1450. The leader of a popular insurrection in the reign of Henry VI. of England. He collected 20,000 followers, chiefly Kentish men, who in June, 1450, flocked to his standard, that they might claim redress for the grievances so widely felt. Cade defeated a detachment of the royal forces at Seven Oaks, and obtained possession of London, the king having retired to Kenilworth; but, Cade having put Lord Say to death, and laid aside the appearance of moderation which he had at first assumed, the citizens rose, gave his followers battle, dispersed them, and put Cade to death.

Cæsar, Calus Julius, 100-44 B. C. The greatest of Roman generals. Elected consul 60 B. C.; formed a secret alliance with Pompey and Crassus known as the first triumvirate. Beginning the Gallic War in 58 B. C., he subdued in the course of one campaign both the Helvetii and the Germans under Ariovistus. Pompey having become his enemy through jealousy, Cæsar crossed the Rubicon 49 B. C., and in a short time became master of Italy; having conquered all his enemies, and subdued Spain and Africa, he was made dictator for life, and received from the senate the title of Imperator. Although beloved by the masses, the patricians feared and hated him, and the result of a conspiracy of Cassius, Brutus and others was his assassination.

Calliari (kal'ya-ree), Paul, 1524-1588. Also known under the name of Paul Veronese, a painter of Verona; his portraits are spirited and noble, and his coloring splendid. He died in Venice.

Calliostro (kal-yos'tro), Alessandro, Count of, (real name Giuseppe Balsamo), 1743-1796. A celebrated charlatan; born in Palermo, Italy. The discovery of the philosopher's stone, the preparation of a precious elixir

vite, etc., were the pretenses by means of which he extracted considerable sums from credulous people. He died in the summer of 1795 in the Castle of St. Leo, in the States of the Church.

Calhoun, John Caldwell, 1782-1850. Am. statesman; born in South Carolina; elected to Congress, 1811; Secretary of War, 1817; Vice-President, 1825-32, resigning to enter the Senate; Secretary of State, 1844; returned to the Senate, 1845; Calhoun was an avowed champion of slavery and states' rights.

Caligula, Calus Cæsar, 12-41. Emperor of Rome; cruel and sensual; built a temple to himself; assassinated.

Calixtus, George, 1586-1656. A Lutheran theologian of an eminently tolerant type; born at Schleswig; accused of heresy, or rather apostasy, for the liberal spirit in which he had learned to treat both Catholics and Calvinists, and for considering the Apostles' Creed a broad enough basis for Christian union and communion.

Callimachus, fl. 400 B.C. Greek architect, inventor of the Corinthian order.

Calvert, George, Lord Baltimore, 1580?-1632. An English colonist, born in Yorkshire; was for some time Secretary of State to James I.; raised to the Irish peerage, his title being from Baltimore, a fishing village of Cork. He had previously obtained a grant of land in Newfoundland, but, as this colony was much exposed to the attacks of the French, he left it, and obtained another patent for Maryland. He died before the charter was completed.

Calvin, John, 1509-1564. Fr. theologian; established Presbyterian form of church government; the fundamental principle of his theology is that of predestination to eternal happiness or misery by the absolute decree of God.

Cambaceres (kon-bah-say-raz'), Jean Jacques de, 1753-1824. A French peer; born in Montpellier; drew up a "Plan of a Civil Code," which became the basis of the "Napoleonic Code." On the abdication of Napoleon, in 1814, Cambaceres withdrew into private life, but, on the return of the emperor from Elba, he was promoted to the office of Minister of Justice. He died in Paris.

Cambrougne (kon-bron'), Pierre Jacques Etienne de, 1770-1842. French general; born near Nantes; served under the Republic and the Empire; accompanied Napoleon to Elba in 1814; commanded a division of the Old Guard at Waterloo; fought to the last; though surrounded by the enemy and summoned to surrender, refused, and was taken prisoner; is credited with the saying, *La garde meurt, et ne se rend pas*, "The Guard dies, but does not surrender."

Cameron, James Donald, 1833-. . . An American capitalist and politician; born in Harrisburg, Pa.; was graduated at Princeton College in 1852. In 1876 President Grant appointed him Secretary of War, and in 1877 he succeeded his father as United States Senator from Pennsylvania, retiring from the Senate in 1897.

Cameron, Simon, 1799-1889. An American statesman; born in Donegal, Pa. From 1845 to 1849 he was United States Senator from Pennsylvania, and in 1856 was again elected United States Senator. In 1861 he was appointed Secretary of War by President Lincoln. In January, 1862, he resigned from the cabinet, and was appointed minister to Russia. In November of the same year he resigned, and lived in retirement till 1866, when he was again elected to the United States Senate. In 1877 he retired from the Senate in favor of his son, James Donald Cameron. He died in Maytown, Pa.

Campbell, Alexander, 1788-1866. Irish founder of the denomination of "Christians," or "Disciples of Christ."

Camphausen, Wilhelm, 1818-1885. A German painter; born in Düsseldorf. He was specially famous for battle pieces.

Canby, Edward Richard Sprigg, 1819-1873. American army officer; born in Kentucky; served in the Mexican War; commanded the United States troops in New York city during the draft riots of 1863; succeeded General Banks in the command of the army in Louisiana, 1864; became Brigadier-General, 1866. He was treacherously shot by an Indian while negotiating for the removal of the Modocs from Northern California.

Candolle (kon-doll'), Augustin Pyrame de, 1778-1841. An eminent botanist; born at Geneva, of Huguenot descent; studied in Paris; attracted the attention of Cuvier and Lamarck, whom he assisted in their researches; his great contribution to botanical science is connected with the classification of plants.

Canning, George, 1770-1827. A distinguished British statesman and orator; born in London; studied for the bar; entered Parliament as a protegee of Pitt, whom he strenuously supported; after the death of Pitt, became

Minister of Foreign Affairs; under Portland distinguished himself by defeating the schemes of Napoleon; on the death of Liverpool was made Prime Minister; after a period of unpopularity became popular by adopting, to the disgust of his old colleagues, a liberal policy.

Canova, Antonio, 1757-1822. A great Italian sculptor; born in Treviso; his first great work, which established his fame, was the group of "Theseus and the Minotaur," which was by-and-by succeeded by his "Cupid and Psyche," distinguished by a tenderness and grace quite peculiar to him, and ere long by "Perseus," perhaps the triumph of his art; his works were numerous, and brought him a large fortune.

Cannute, or Cnut, . . . 1035. King of England and Denmark; succeeded his father, and confirmed the Danish power in England. He died at Shaftesbury, leaving Norway to his eldest son, Sweyn; to the second, Harold, England; to the third, Hardicnut, Denmark.

Capet (ka-pet'), Hugues, 928?-996? Founder of the Capetian (third) dynasty of French monarchs. He was Count of Paris, and usurped the throne on the death of Louis V., the last of the Carolingian line. The Capets are said to have given one hundred and eighteen rulers to Europe, fourteen kings to France, and a smaller number to Spain, Portugal, Naples and Sicily, Hungary and Navarre; also three emperors to Constantinople, and dukes to Brittany, Burgundy, Lorraine, and Parma.

Cardan, Jerome, 1501-1576. Italian physician and mathematician; born at Pavia; was far-famed as a physician; studied and wrote on all manner of known subjects, made discoveries in algebra, believed in astrology, left a candid account of himself entitled "De Vita Propria"; was the author of "Cardan's Formula," a formula for the solution of cubic equations; he is said to have starved himself to death so as to fulfill a prophecy he had made as to the term of his life.

Carey, Henry Charles, 1793-1879. An American economist, born in Philadelphia; trained in his father's publishing house, he accumulated a competence from the business and retired to devote himself to study. The "Essay on the Rate of Wages" and "The Principles of Political Economy" won him an authoritative international position. He died in Philadelphia.

Carnegie, Andrew, 1837-. . . Ironmaster; born in Dunfermline, Scotland; son of a weaver; made a large fortune by his iron and steel works at Pittsburgh, and has liberally endowed institutions and libraries, both in America and his native country. Author of "Triumphant Democracy," "The Empire of Business," etc.

Carnot (kar-not'), Marie Francois, 1797-1894. French civil engineer and statesman; born in Limoges. Finance Minister in 1886 and 1887; became President in 1887; was assassinated at Lyons by an anarchist in 1894.

Carroll, Charles, 1737-1832. The last surviving signer of the Declaration of American Independence; born in Annapolis, Md. He studied at Paris, became a member of the Inner Temple at London; returned to his native country in 1764; was elected to Congress in 1775, and, along with the other members, signed the Declaration. In 1804, he withdrew to private life in Carrollton, his patrimonial estate. He died in Baltimore.

Carson, Christopher, 1809-1868. Commonly called Kit; an American trapper and scout; born in Kentucky. He served under General Fremont in his Rocky Mountain expeditions, and fought in the Mexican and Civil Wars, attaining the rank of brevet brigadier-general. He died at Fort Lynn, Col.

Cartier (kar-tey'), Jacques, 1494-1557. A French navigator; born at St. Malo; made three voyages to North America in quest of a northwest passage, at the instance of Francis I.; took possession of Canada in the name of France, by planting the French flag on the soil.

Cartwright, Edmund, 1743-1823. An English inventor; born in Marnham. In 1785 he brought his invention, the first power loom, into action. He died in Hastings.

Cartwright, Peter, 1785-1872. An American clergyman; born in Virginia. In 1824 removed to Illinois, where he labored for nearly half a century. He also sat in the State Legislature there, and in 1846 was defeated by Abraham Lincoln in an election for Congressman. He died near Pleasant Plains, Ill.

Carver, John, 1575?-1621. A "Pilgrim Father," the first governor of the Plymouth colony; born in England. He joined the Leyden colony of English exiles about 1608, and assisted in securing a charter from the Virginia Company and in selecting and equipping the *Mayflower*. He was selected governor after the *Mayflower* reached Plymouth, and established by a treaty peaceful relations with the Indians.

Casaubon, Isaac, 1559-1614. An eminent classical scholar and commentator; born in Geneva; Professor of Greek at Geneva and Montpellier, and afterwards royal librarian at Paris, invited thither by Henry IV., who pensioned him.

Casimir-Perier, 1847- . . . President of the French Republic; born in Paris; a man of moderate views and firm character; was premier in 1883; succeeded Carnot in 1894; resigned 1895, because, owing to misrepresentation, the office had become irksome to him.

Castlereagh, Robert Stewart, Viscount, 1769-1822. Second marquis of Londonderry; British statesman; prominent in suppressing the Irish rebellion of 1798; committed suicide.

Castro, Joao de, 1500-1548. Portuguese naval commander and navigator.

Catherine, Saint, 1347-1380. Italian nun at Siena; mediator between the rival popes in the great schism.

Catherine I., 1682-1727. Empress of Russia; succeeded to the throne on the death of her husband, Peter the Great.

Catherine II., the Great, 1729-1796. Empress of Russia; born at Stettin; daughter of Prince of Anhalt-Zerbst; "a most clever, clear-eyed, stout-hearted woman"; became the wife of Peter III., a scandalous mortal, who was dethroned and then murdered, leaving her empress; ruled well for the country, and, though her character was immoral and her reign despotic and often cruel, her efforts at reform, the patronage she accorded to literature, science, and philosophy, and her diplomatic successes, entitle her to a high rank among the sovereigns of Russia; she reigned from 1762 to 1796, and it was during the course of her reign, and under the sanction of it, that Europe witnessed the three partitions of Poland.

Catherine of Aragon, 1485-1536. Queen of Henry VIII. of England; divorced.

Catherine de Medicis, 1519-1589. Queen of Henry II. of France; opponent of the Huguenots.

Catiline, Lucius Sergius, 107-62 B.C. Roman conspirator.

Cato, Marcus Portius (the Elder), 234-149 B.C. Roman statesman and author.

Cato, Marcus Portius (the Younger), 95-46 B.C. Opponent of Caesar; famed for purity and nobility; committed suicide.

Cavaignac (kah-van-yak'), Louis Eugene, 1802-1857. A French officer; he was appointed Governor-General of Algeria by the provisional government of the republic, 1848, but in May of the same year was recalled and made minister of war; in the following December was municipal rival of Louis Napoleon for the presidency.

Cavaller (kah-vai-yay'), Jean, 1679-1740. Leader of the Camisards; born at Ribaulte; fought for religious freedom against Louis XIV.; passed over to England; served against France, and was governor of Jersey.

Cavendish, Henry, 1731-1810. Natural philosopher and chemist; born at Nice, of the Devonshire family; the first to analyze the air of the atmosphere, determine the mean density of the earth, discover the composition of water, and ascertain the properties of hydrogen.

Cavour (kah-voor'), Camillo, Count di, 1810-1861. A distinguished Italian statesman. He contributed largely to the unification of Italy, and, as Prime Minister from 1852 to his death, framed and had adopted laws guaranteeing liberty of the press, religious toleration, and free commerce.

Caxton, William, 1422-1491. An English printer and scholar; his "Recuyell (collection) of the Histories of Troy," translated by him from the French, appears to have been printed in 1474, most probably at Bruges in Belgium. It was the first book printed in the English tongue. He set up a printing office in Westminster, 1477; and on November 18 of that year issued "The Dictes and Sayings of the Philosophers," folio, a work ever memorable as the first book printed in England.

Cecilia, Saint. Fl. second century; Roman martyr; patroness of music.

Cenci (chen'-chee), Beatrice, 1576-1599. "The beautiful paricide"; daughter of Count Francesco Cenci, a notorious Italian libertine. It has been supposed that she became the victim of her father's lust, and vainly imploring the protection of Pope Clement VIII., she, with other members of the family, was charged with a conspiracy to assassinate her father, and despite their protestations of innocence all were executed. A portrait of Beatrice in the Barberini Gallery, Rome, is familiar to all visitors.

Cesno'n, Luiga Palma di, 1832- . . . An American archaeologist; born in Piedmont, Italy. He served in the Italian War with Austria and came to the United

States in 1860, serving in the Civil War. He was United States Consul at Cyprus, where he made extensive archaeological discoveries. In 1878 he became a trustee and director of the Metropolitan Museum of Art, in New York city.

Chailin (sha-yu), Paul E. du, 1838-1903. An American of French descent, celebrated for his travels in Central Africa; he was the first to positively verify the existence of the gorilla.

Chalmers, Thomas, 1780-1847. A noted Scotch divine; born in Fife, in 1780. He may be regarded as the founder of the Free Church of Scotland. He died in Morning-side.

Chamberlain, Joseph, 1836- . . . An English statesman; born in London; was mayor of Birmingham from 1873 to 1876, and chairman of the Birmingham school board from 1874 to 1876. After unsuccessfully contesting Sheffield against Mr. Roebuck in 1874, he was returned for Birmingham without opposition in June, 1876. He soon made his mark in Parliament; he came to be regarded as the leader of the extreme Radical party and of the Liberal-Unionists when the Duke of Devonshire went to the Upper House. Lord Salisbury sent him to Washington as commissioner on the Canadian fishery dispute, and in 1895 he was made Colonial minister in the Unionist Cabinet. As such he had to face the troubles in South Africa, and to cherish closer fellow-feeling with the Colonies. He carried the Australian Federation measure in Parliament, and later had to face opposition from within the Liberal party. After the Boer War he visited South Africa and made himself personally acquainted with the situation there. His recent advocacy of "fair trade," or a modified protective tariff, caused great disturbance in the ministry and its supporters, and in September, 1908, Mr. Chamberlain resigned as a member of the Cabinet.

Champlain, Samuel de, 1567-1685. A French navigator; born at Brouage, in Saintonge; was founder of Quebec, and French governor of Canada; wrote an account of his voyages.

Champollion (shon-pol-yon'), Jean Francois, 1790-1832. A celebrated French Egyptologist; early gave himself to the study of Coptic and Egyptian antiquities; was the first to decipher the hieroglyphics of ancient Egypt, a great discovery; conducted a scientific expedition to Egypt in 1828, and returned in 1830 with the fruits of his researches; a chair of Egyptology was in consequence instituted in the College of France, and he was installed as the first professor; his writings on the science, of which he laid the foundation, are numerous.

Charlemagne (sharl'-mane), 742-804. Son and successor to Pepin le Bref, and grandson of Charles Martel; King of France. He conquered a large part of Spain and Italy, and all of Germany to the Oder river, being crowned Emperor of the West by the Pope in 800. He was the most enlightened as well as the most energetic European sovereign of the century.

Charles. The name of numerous European emperors, kings, and lesser potentates, Germany having had seven rulers bearing this name; Sweden fifteen kings (the last Charles acceding in 1859); Spain four, France ten, Naples four, Navarre three, England two, Sardinia four, and Hungary two kings. The name was also borne by Dukes of Baden, Lorraine, Savoy, and Burgundy.

Charles II. (the Bald—Charles I., of France), 823-877. Emperor of Germany; incapable; was crowned emperor by the Pope, Charles III. (the Fat), 859-888. Charles IV., 1316-1378. Emperor of Germany and King of Bohemia.

Charles V., 1500-1558. Emperor of Germany; King of Spain as Charles I.; in 1521, summoned the Diet of Worms to check the progress of Luther's doctrines; in 1527, warring with Francis I. of France, and Pope Clement VII., Rome was sacked and the Pope made prisoner; convened the Diet of Augsburg to suppress the Reformation, but the Protestants having united, liberal terms were granted them; in 1535, defeated Barbarossa and captured Tunis, liberating thousands of Christian slaves; defeated in 1552 by the Protestant forces under Maurice of Saxony, he signed the treaty of Passau, establishing the Protestant church on a firm basis; three years later he retired to the monastery of St. Yuste.

Charles I. (Charles Stuart), 1600-1649. King of England; beheaded, after attempting to subdue his rebellious subjects. **Charles II.**, 1630-1685. Witty, but careless and voluptuous; the habeas corpus act was passed during his reign.

Charles XII., 1682-1718. King of Sweden, ascended the throne in 1697; a league being formed against him by Russia, Denmark, and Poland soon after, he besieged

Copenhagen, forced Denmark to make peace, and beat the Russians; he then invaded Poland, compelling King Augustus to resign; invading Russia, he was badly defeated at Pultowa; he fled to Turkey, but soon returned; marching into Norway, he was killed at the siege of Frederickshald.

Charles Martel, 689-741. The illegitimate son of the Duke of Austrasia, who by his bravery and wisdom became Duke of the Franks. His son, Pepin le Bref, was made King of France, and was the founder of the illustrious Carolingian line of kings, the name being taken from Charles Martel.

Chase, Salmon Portland, 1808-1873. American statesman and jurist.

Chatham, William Pitt, Earl of ("the Great Commuer"), 1708-1778. English statesman and orator; opposed taxation of American colonies.

Cherubini, Luigi Zenobio Salvatore, 1760-1842. Director in the French Conservatory and instructor of hundreds of eminent musicians; born in Florence; in the interval from 1780 to 1788, he composed eleven Italian operas, including "Iphigenia in Aulide,"—the most successful of the series. He died in Paris.

Chevreul, Michel Eugene, 1786-1889. A French chemist. He wrote various works on chemistry, dyeing, etc.

Chippendale, Thomas. Flourished eighteenth century. An English cabinetmaker; little is known of his life. The style of furniture named from him was less heavy and severe than that of his successors, and was rather elaborate, delicate, and baroque, with classical tendencies.

Chitty, Joseph, 1776-1843. An English lawyer and legal writer. He achieved eminence as a barrister in London, but his celebrity rests mainly upon his legal works. He died in London.

Choate, Rufus, 1799-1859. A distinguished American lawyer and statesman. He served with distinction in the lower house of Congress, and from the death of Daniel Webster was recognized as the ablest and most eloquent advocate of the country.

Chopin (sho-pan'), Frederick, 1809-1849. An eminent musical composer and pianist; born in Poland; died in Paris.

Chouteau (sho-to'), Auguste, 1739-1829. An American pioneer; born in New Orleans, La. He was from his early youth a fur trader, and with his brother Pierre founded the city of St. Louis in 1764. He died in St. Louis.

Chouteau, Pierre, 1749-1849. An American pioneer; born in New Orleans. With his brother Auguste he set out in 1763, joining a government expedition. He stopped in the heart of an unsettled country and founded, with his brother, the city of St. Louis. He died in St. Louis.

Christina, 1626-1689. Queen of Sweden; daughter and only surviving child of Gustavus Adolphus; received a masculine education, and was trained in manly exercises; governed the country well, and filled her court with learned men; her royal duties becoming irksome to her, she declared her cousin her successor, resigned the throne, and turned Catholic; her cousin dying, she claimed back her crown, but her subjects would not now have her; retired to Rome, where she spent twenty years of her life engaged in scientific and artistic studies, and died.

Chrysostom, John, Saint ("Golden-mouthed"), 344?-407. A celebrated Greek father of the church; born in Antioch; died at Comana, in Pontus.

Cid (sid). Flourished eleventh century. Means "my Lord"; applied to Ruy or Rodrigo Diaz, Count of Bivar (El Cid Campeador); a champion of Christian and Spanish royalty against the Moors.

Cimabue, c. 1240-1302. A Florentine painter and founder of the Florentine school, which ranked among its members such artists as Michael Angelo, Raphael, and Leonardo da Vinci; was the first to leave the stiff traditional Byzantine forms of art and copy from nature and the living model, though it was only with the advent of his great disciple, Giotto, that art found beauty in reality; his "Madonna," in the Church of Santa Maria, has been long regarded as a marvel of art, and of all the "Mater Dolorosas" of Christianity, Ruskin does not hesitate to pronounce his as the noblest.

Cincinnatus, Lucius Quintus, 520-488 B. C. Roman patriot and dictator; elected consul while cultivating a farm, having lost his property; conquered the Æqui; twice chosen dictator, and, at the expiration of each term of office, he returned to the plow.

Cinq-Mars (sank-mar), Henri, Marquis de, 1620-1642. A French courtier, a favorite of Louis XIII.; a man

of handsome figure and fascinating manners; died on the scaffold for conspiring with his friend Orleans against Richelieu.

Clarke, Adam, 1762-1832. An English theologian; celebrated for his "Commentary on the Bible."

Claude, Jean, 1619-1687. A French Protestant controversial divine; a powerful antagonist of Bossuet and other Catholic writers.

Claude Lorrain, 1600-1682. A great landscape painter; born at Chamagne, of poor parents; went to Rome; became servant and color-grinder to Tassi, who instructed him in his art; by assiduous study of nature in all her aspects attained to fame; was eminent in his treatment of aerial perspective, and an artist whom it was Turner's ambition to rival.

Claudius I., Tiberius Drusus, 10 B. C.-54 A. D. Sur-named Germanicus; nephew of Tiberius; emperor of Rome from 41 to 54; born at Lyons; raised by soldiers to the imperial throne, a post which he filled with honor to himself and benefit to the state. Agrippina had him poisoned to make way for her son Nero.

Clay, Henry, 1777-1852. American statesman and orator; "The Great Pacificator;" born in Virginia; removed to Kentucky, 1797; practiced law; elected to Kentucky legislature in 1803, and in 1806 chosen to fill a short term in the United States Senate; reappointed to the Senate, 1809, and sent to the House of Representatives, 1811, of which body he was made speaker; re-elected speaker, 1813; signed treaty of Ghent, 1814; re-elected speaker four times; in 1824, he was one of four candidates for the presidency; when the election devolved on the House, his influence decided the contest in favor of J. Q. Adams; a bloodless duel between Clay and Randolph in 1826, was the result of charges against Clay growing out of this election; elected to the Senate in 1831; in 1832, defeated for the presidency as the candidate of the anti-Jackson party; again elected to the Senate, 1836, but resigned, 1842; Whig candidate for the presidency in 1844; re-elected senator, 1848. To Clay is due the credit for the "Missouri Compromise," believed to have postponed for ten years the Civil War.

Clemens, Titus Flavius (Clement of Alexandria). Flourished second and third century. One of the Greek fathers of the church; had Origen for pupil; brought up in Greek philosophy; converted in manhood to Christianity; his "Stromata," or "Miscellanies," contains facts and quotations found nowhere else.

Cleopatra (kle-o-pay'tra), 69-30 B. C. Daughter of Ptolemy Auletus, and Queen of Egypt, notorious for her beauty and licentiousness. She captivated Julius Caesar when about twenty, and bore him a son. After his death she persuaded Marc Antony to repudiate his wife Octavia, and bore him several children. After the defeat of Antony at Actium, she despaired of making terms with Augustus, and put an end to her life by poison.

Cleveland, Grover, 1837-. . . An American statesman; twice president of the United States; born in Caldwell, Essex county, N. J.; son of a Presbyterian clergyman. He settled in Buffalo and studied law, and in 1863 became assistant district attorney of Erie county, N. Y. After becoming in succession sheriff and mayor of Buffalo, he was chosen governor of New York in 1882. In 1884 he received the Democratic nomination for the presidency, and was elected, defeating James G. Blaine. He was renominated in June, 1888, but was defeated by Benjamin Harrison, November 6 following. After a successful law practice of four years he was again nominated by the Democratic National convention of 1892, and elected by very large majorities. Some of the measures of his administration were: The settlement of the Venezuelan boundary question with Great Britain; the consolidating of post offices in large centers so as to increase the scope of the civil service; rules; and most notably the conclusion in January, 1897, of a general arbitration treaty with Great Britain, which, however, was rejected by the Senate. He married Frances Folson in June, 1886.

Clinton, De Witt, 1769-1828. An American lawyer and statesman; born in Little Britain, N. Y. Was United States Senator from New York; candidate for president; was the chief originator of the Erie canal; died in Albany, N. Y.

Clinton, Sir Henry, 1738?-1796. A British general; was sent in 1775, with the rank of Major-General, to America, where he distinguished himself in the battle of Bunker Hill. He defeated the Americans at Long Island, but had to evacuate Philadelphia to General Washington. In 1782 he returned to England. He died in Gibraltar.

Clive, Robert, Lord, 1725-1774. An English general who rose from ensign through his gallantry and talents

to the viceroyalty of India. He distinguished himself by winning several victories from the French in 1751, and in 1757 routed Suraj-ad-Dowlah with an army of sixty-five thousand, at the head of an English force of only three thousand. Toward the close of his life he became insane.

Clootz, Anacharsis, 1755-1794. Baron Jean Baptiste de Clootz; a French Revolutionary; born near Cleves; was one of the founders of the worship of Reason, and styled himself the "Orator of the human race"; was guillotined under protest in the name of the human race.

Clovis. The name of three kings of France. **Clovis I.**, son and successor of Childeric I.; king of the Franks; born 467; died 511; he was the real founder of the French monarchy; driving the Romans from Gallia, and defeating the Alemanni, he married the Christian princess Clotilda, of the house of Burgundy, and soon after embraced Christianity with three thousand of his subjects. On his death his kingdom was divided among his four sons. **Clovis III.**, born 657; reigned as a child five years, under the tutelage of Pepin d'Heristal, mayor of the palace; died 695.

Cobb, Howell, 1815-1868. An American statesman; born in Georgia. He represented Georgia in the lower house of Congress, and was elected Speaker in 1849; was Governor of his state, and Secretary of the Treasury under President Buchanan; resigned when Georgia seceded; was president of the Confederate Congress and a Major-General in the Confederate army.

Cobden, Richard, 1804-1865. A great English political economist and the Apostle of Free Trade; born near Midhurst, Sussex; on the formation of the Corn Law League in 1838, gave himself heart and soul to the abolition of the Corn Laws; became member of Parliament; on the conversion of Sir Robert Peel to Free Trade principles saw these laws abolished in 1846; for his services in this cause he received the homage of his country as well as of Continental nations, but refused all civic honors.

Coddington, William, 1601-1678. The founder of the colony of Rhode Island; born in England; removed from Plymouth colony in 1638 to Aquidneck, where he founded a colony to be governed "by the laws of the Lord Jesus Christ." Aquidneck was incorporated in the charter with Rhode Island in 1647; in 1649 he himself was chosen governor, and again in 1674.

Coke, Sir Edward, 1552-1634. A great English jurist and author of law books.

Colbert (kohl-bair'), Jean Baptiste, Marquis de Seignelay, 1619-1683. A French peasant who became Controller-General of Finance, on recommendation of Mazarin. **Colbert, Jean Baptiste**, 2d, his son, 1651-1690, succeeded him as Minister of Marine, and raised the French navy to its greatest efficiency.

Colburn, Warren, 1793-1833. A distinguished American mathematician; born in Massachusetts. His "First Lessons in Intellectual Arithmetic" was immensely popular in America and England.

Cole, Thomas, 1801-1848. An American landscape painter; born in Lancashire, England. He painted "The Voyage of Life," showing childhood, youth, manhood, and old age. Very popular and well known through engravings. He died in Catskill, N. Y.

Colfax, Schuyler, 1823-1885. An American statesman; grandson of Gen. William Colfax, commander of Washington's Life Guards; born in New York city. Removing to Indiana, he was elected to the lower house of Congress, became Speaker in 1863, and was elected Vice-President on the ticket with General Grant, 1868.

Coligny (ko-le'ne), Gaspard de, 1517-1572. French admiral; born at Chatillon; a leader of the Huguenots; on St. Bartholomew's Eve he fell a victim to the conspiracy.

Collier, Jeremy, 1650-1726. An English divine; refused to take oath at the Revolution; was imprisoned for advocating the rights of the Stuarts; wrote with effect against "The Profaneness and Immorality of the Stage," as well as an "Ecclesiastical History of Great Britain," and a volume called, "Practical Discourses," published in 1725.

Collyer, Robert, 1823-. . . An American clergyman; born in Keighley, Yorkshire, England. He came to the United States in 1849, being then a Wesleyan preacher and a blacksmith, but became a Unitarian and preached some years in Chicago, where he founded Unity Church in 1860. He was made pastor of the Church of the Messiah, New York city, in September, 1879, and pastor emeritus in 1896.

Colt, Samuel, 1814-1862. An American inventor; born in Hartford, Conn. He perfected a revolver and patented it in 1835. Its great success led to the erection by

him at Hartford of one of the most extensive weapon factories in the world. He died in Hartford.

Columba, Saint, 521-597. A native of Ireland. About 563 he landed in the island of Hy, now called Iona, and founded his church; traversed the whole of Northern Scotland, preaching the Christian faith and founding monasteries; the Columban Church was in some points of doctrine and ceremonial opposed to that of Rome, to which it owed no allegiance. He died in Iona.

Columbus, Christopher (It.: Cristoforo Colombo; Sp.: Cristoval Colon), 1446-1506. Genoese navigator; became a sailor at the age of twenty-eight; began living in Lisbon at the age of thirty; was employed in several expeditions to the west coast of Africa; meditated reaching India by a western route, and unsuccessfully solicited the aid of John II. of Portugal; but finally Ferdinand and Isabella of Spain furnished him two small vessels, and another was added by the efforts of friends; with one hundred and twenty men he set sail from Palos, August 3, 1492, and discovered the island of San Salvador, October 12 of same year; supposing that he had reached India, he called the natives Indians; after visiting Cuba and Hayti, he returned to Spain, where he was received triumphantly; in 1493 he again sailed across the Atlantic, this time with seventeen ships, and discovered Dominica and Española; in 1498 he made his third voyage, with six vessels, discovering the mainland at the mouth of the Orinoco; in 1499, complaints having been made to the court of the conduct of Columbus at Española, he was carried to Spain in chains by Francisco de Bobadilla; Columbus's last voyage to America was made in 1502, to Honduras; he died neglected.

Comenius, John Amos, 1592-1670. A Moravian educational reformer; his two most famous books are his "Janua Linguarum" and his "Orbis Sensualium Pictus."

Comte (kont), Isidore Auguste Marie Francois Xavier, 1798-1857. A French philosopher; born in Montpellier. He invented a religion which consists in referring the whole harmony of existence to, and concentrating its essence in, one great Being, whom he termed Humanity. He died in Paris.

Condé (kon-day). The name of a French family, the younger branch of the Bourbons, who took their name from the town of Condé, Department of Nord. The greatest of these was Louis, Prince of Condé, born in 1621, who fought a drawn battle with William of Orange, afterward William the Third, of England, at Senef in 1674, and died in 1686.

Condillac (kon-de-yak'), Etienne Bonnot, 1715-1780. A French philosopher; born at Grenoble; commenced as a disciple of Locke, but went further; he lived as a recluse, and had Rousseau and Diderot for intimate friends.

Condorcet (kon-dor-say'), Marquis de, 1743-1794. A French mathematician and philosopher; his works are voluminous, and the best known is his "Exquis du Progres de l'Esprit Humain"; he was not an original thinker, but a clear expositor.

Confucius, or Kong-Foo-Tse, 551-478 B. C. Chinese philosopher; the son of a soldier; he was married at nineteen; commenced public teaching at twenty-two; became, in 499 B. C., governor of Chungtu, and soon after retired from public life, devoting his time to study, travel, and the dissemination of his doctrines. The philosophy of Confucius relates to the present life only; he placed great importance upon the outward forms of politeness, being the first to enunciate, in substance, the golden rule; his influence has been enormous, his teachings affecting a great portion of humanity for twenty-three centuries.

Conger, Edwin Hurd, 1843-. . . An American diplomatist; born in Knox County, Illinois. He was elected to Congress in 1884 and twice re-elected, as a Republican. In 1891 he was appointed Minister to Brazil, serving four years. In 1897 he was again appointed to that post and, in the following year, was transferred to China. He was at his post throughout the Chinese crisis of 1900, in Peking, being imprisoned with his family and the entire diplomatic corps in the British legation compound from June 20 to August 15. He narrowly escaped slaughter at the hands of the Boxers.

Conkling, Roscoe, 1829-1888. An American legislator; born in Albany, N. Y.; sat in Congress as a Republican, and was elected to the United States Senate. He became an influential member of his party; in 1876 he received ninety-three votes for the presidential nomination, and in 1880, by his support of Grant and his personal opposition to Blaine, divided the Republicans into two sections. In 1881 he and his colleague, Thomas C. Platt, suddenly

resigned from the Senate. Conkling afterward practiced law in New York city.

Constable John, 1776-1837. An eminent landscape painter; born in Suffolk, England; his works were more generously appreciated in France than in his own country, where they had to stand comparison with those of Turner; enormous prices have been given of late for his best pictures; some of his best works adorn the walls of the National Gallery.

Constant, Benjamin, 1845-1902. A highly popular French painter of the Realistic school; born at Paris; his first picture was "Hamlet and the King"; afterwards he took chiefly to Oriental subjects, which afforded the best scope for his talent; occupies a high place in the modern French school.

Constant de Rebecque, Henry Benjamin de, 1760-1830. A French politician, of liberal constitutional principles; born at Lausanne, of Huguenot parents; was expelled from France in 1802, along with Mme. de Staël, for denouncing the military ascendancy of Napoleon; translated Schiller's "Wallenstein"; he was a supporter of Louis Philippe, and a rationalist in religion, and declared himself opposed to the supernatural element in all religions.

Constantine I. (the Great), 272-337. Emperor of Rome; embraced Christianity, and transferred his court from Rome to Byzantium, thenceforth called Constantinople.

Cook, Joseph, 1838-1901. An American lecturer and author; born in Ticonderoga, N. Y. In 1874 he began a series of "Monday Lectures" in Boston, which, endeavoring to harmonize science and religion, and discussing social and political questions, became very popular; and in 1880 he began an extended lecturing tour around the world.

Cooper, Peter, 1791-1883. A manufacturer and philanthropist; born in New York city; apprenticed to a carriage maker; engaged in furniture manufacture; mover in laying the Atlantic cable; took great interest in education; founded Cooper Institute.

Cope, Edward Drinker, 1840-1897. An American naturalist and comparative anatomist; born in Philadelphia. He received the Bigsby gold medal of the Geological Society of London in 1879, in recognition of his services in the field of vertebrate paleontology.

Copernicus (Kopernik), Nicholas, 1473-1543. German astronomer; father of modern astronomy; disproved the Ptolemaic theory; in his great work, "The Revolution of the Celestial Orbs," the first copy of which was handed to him on the day of his death, he demonstrated that the sun is the center of the system.

Copley, John Singleton, 1737-1815. An American portrait and historical painter; born in Boston; Benjamin West was his patron; went to England in 1775; painted portraits of the king and the queen; began the historical works on which his fame chiefly rests, perhaps the most widely known of which is the "Death of Chatham," now in the National Gallery, London.

Coquelin (kok-lan'), Benoit Constant, 1841- . . . A French actor; born in Boulogne; made his debut at the Theatre Francais, Dec. 7, 1860. For over a quarter of a century he played there with unbroken success. He appeared in 1887 in London, in 1888 in South America and the United States.

Corday (kor-day') d'Armands, Charlotte, 1768-1793. Granddaughter of the dramatist Cornelle; born in Normandy, France; stung to patriotic desperation by the atrocities of Marat, she obtained access to his house by a pretense, and while in the act of handing him a false list of suspects she stabbed him to the heart. She was guillotined, preserving her fortitude to the last.

Cornelius, Peter von, 1783-1867. A German painter; born in Düsseldorf. He studied the great masters, especially Raphael. In 1811 he went to Rome, where, in conjunction with Overbeck, Velt, and other associates, he may be said to have founded a new school of German art, and revived fresco painting in imitation of Michael Angelo and Raphael. In 1841 he was invited to Berlin by Frederick William IV., who intrusted him with the painting of the royal mausoleum or Campo Santo. He died in Berlin.

Cornell, Ezra, 1807-1874. An American philanthropist; born in Westchester Landing, N. Y. He accumulated a large fortune and is best known as the founder of Cornell University. He began life as a mechanic and miller at Ithaca, N. Y., and subsequently became a contractor for the erection of telegraph lines. He died in Ithaca.

Cornwallis, Lord, 1738-1805. An English general and statesman; saw service in the Seven Years' and the American wars; besieged in the latter at Yorktown,

was obliged to capitulate; became Governor-General of India, and forced Tippecoo Sahib to submit to humiliating terms; as Lord-Lieutenant of Ireland crushed the rebellion of 1798; re-appointed Governor-General of India; died there.

Corot (ko-ro'). Jean Baptiste Camille, 1796-1875. A celebrated French landscape painter.

Correggio, Antonio Allegri da, 1494-1534. Italian painter; known as "the divine"; his work excels in harmony, grace, and sweetness of color and form.

Cortez, Hernando, 1485-1547. Spanish conqueror of Mexico.

Corwin, Thomas, 1794-1865. An American statesman and orator; born in Bourbon county, Ky. He was successively a member of Congress, Governor of Ohio, United States Senator, Secretary of the Treasury, member of Congress, and United States Minister to Mexico. He died in Washington, D. C.

Cotta, Johann Friedrich Baron von, 1764-1832. A German bookseller. He was the publisher for many great writers in Germany, including Goethe, Schiller, the Humboldts, and others.

Coues, Elliott, 1842-1899. An American naturalist; born in Portsmouth, N. H. He was connected with the Smithsonian Institution and was author of "Key to North American Birds," etc.

Cousin (coo-zan'), Victor, 1792-1867. A French philosopher; born in Paris; founder of an eclectic school; had a considerable following; retired from public life after 1849, and died at Cannes; he left a number of philosophic works behind him, the best known among us being "Discourses on the True, the Beautiful, and the Good."

Coverdale, Miles, 1467-1568. An English prelate, and one of the earliest reformers. He published the first entire English Bible, 1535.

Cowper, William, 1781-1800. A popular English poet; born at Great Berkhamstead, Hertford, of noble lineage; his greatest poem, "The Task."

Cox, Kenyon, 1856- . . . An American painter; born in Warren, O.; he studied in Paris under Durant and Gérôme, settling in New York in 1882 as a portrait and figure artist. He did two decorations in the Library of Congress and similar works elsewhere.

Cox, Palmer, 1840- . . . An American artist and writer for young people; born in Quebec. Since 1875 his home has been in New York. He is best known as the originator of the "Brownies," a series of funny pictures and verse for children.

Cox, Samuel Sullivan, 1824-1889. An American statesman and author; born in Zanesville, O.; he served in Congress, and became minister to Turkey; he died in New York; a statue was erected to his memory in New York city by the letter carriers, whose interests he had advocated in Congress.

Cranmer, Thomas, 1489-1556. Archbishop of Canterbury; born in Nottinghamshire; recommended himself to Henry VIII. by favoring his divorce, writing in defense of it, and pleading for it before the Pope; a zealous promoter of the Reformation. By Henry's will he was appointed one of the council of regency to Edward VI. On the accession of Mary, he was committed to the Tower, along with Latimer and Ridley. He suffered martyrdom as his fellow-reformers had done, opposite Balliol College, Oxford.

Crawford, Thomas, 1814-1857. An American sculptor; born in New York; died in London. Among his works are the bronze statue of Beethoven in Boston Music Hall, an equestrian statue of General Washington at the Capitol, Richmond, Va., and a number of marble and bronze pieces in the Capitol, Washington, D. C.

Crichton (kri-ton), James, 1560-1585. An accomplished Scotchman; said to have been assassinated at Mantua. He was surnamed Admirable from his great natural gifts and accomplishments.

Crittenden, John Jordan, 1787-1863. An American legislator; born in Woodford county, Ky.; he was elected to the United States Senate. He resigned but subsequently was re-elected twice. In 1848 he became governor of Kentucky. Through his influence the state remained loyal to the Union in the Civil War. He died near Frankfort, Ky.

Crockett, David, 1786-1836. An American pioneer, hunter, politician, and humorist; born in Limestone, Tenn. He was member of Congress from Tennessee; served in the Texan War; and was one of the eccentric characters of the Southwest; he was killed at Fort Alamo, San Antonio, Texas.

Croesus (kre'sus), 590-548 B.C. The last king of Lydia; famed for his immense riches; valuable counselor

of Cambyses, King of Persia, and of Cyrus, by whom Croesus was defeated and captured.

Cromwell, Oliver, 1599-1659. English general and leader of the political and religious revolution in England; entered the Parliamentary army, in 1642, as captain of cavalry; rapidly promoted, and commanded at Marston Moor, 1644; commanded right wing at Naseby, 1645, and became leader of the Independents; transferred the custody of the king from Parliament to the army, 1647; won the battle of Prestonpans, 1648; signed the death warrant of Charles I., 1649; made commander-in-chief, 1649; and defeated the Scotch royalists at Dunbar, 1650, and at Worcester under Charles II., 1651; dissolved Parliament in 1653; and was proclaimed by the army Lord Protector of the Commonwealth.

Cronje (kron'ya), Piet, 1835- . . . A Boer military commander; born near Pretoria in 1835; he has been prominent in all the history of the South African Republic. Bred to farm life, he entered politics, refused office under British annexation, commanded a brigade in the war of 1880-1881, became a member of the Transvaal executive government, and captured Sir John Willoughby and his force after the Jameson raid of 1896. During the war with England in 1899-1902, Cronje rose to the military leadership of the Boers, and held out heroically with an inferior force till forced to surrender to Lord Roberts at Klip River, near Paardeberg, Orange Free State. He was exiled to St Helena in May, 1900, being released at the end of the war.

Crookes, Sir William, 1832- . . . An English physicist and chemist; born in London; he invented the radiometer and the theoscope, and announced his discovery of a method of separating gold and silver from their ores; recognized as an expert on sanitary matters.

Crosby, Howard, 1826-1891. An American clergyman and scholar; born in New York city. In 1863 he was made pastor of the Fourth Avenue Presbyterian Church in New York city; was in 1877 a delegate to the first Presbyterian General Council, held in Edinburgh. Dr. Crosby was one of the founders and president of the Society for the Prevention of Crime.

Cruden, Alexander, 1701-1770. A Scotch writer; born in Aberdeen. His "Concordance to the Old and New Testaments" is the familiar authority on the subject. He died in London.

Cruikshank, George, 1792-1878. An English pictorial satirist; born in London; his illustrations for Hone's political squibs and pamphlets, and especially those dealing with the Queen Caroline trial, attracted much attention; he illustrated a number of Dickens's works. In his later years he devoted himself to oil-painting.

Cumberland, William Augustus, Duke of, 1721-1765. Second son of George II.; was defeated at Fontenoy by the French in 1745; defeated the Pretender next year at Culloden; earned the title of "The Butcher" by his cruelties afterwards; was beaten in all his battles except this one.

Cunard, Sir Samuel, 1787-1865. Founder of an English steamship line; born in Halifax, Nova Scotia, where his father, a Philadelphia merchant, had settled. Becoming early a successful merchant and ship owner, he went to England in 1838, joined with George Burns, Glasgow, and David M'iver, Liverpool, in founding the British and North American Royal Mail Steam Packet Company, and obtained a contract from the British government for the mail service between Liverpool and Halifax, Boston, and Quebec. The first passage was that of the *Britannia* in 1840. From its small but successful beginning, Cunard's undertaking soon developed into one of the vastest of private commercial concerns. He died in London.

Cushing, Caleb, 1800-1879. An American jurist, statesman, and diplomatist; born in Salisbury, Mass. He was United States Plenipotentiary to China; Attorney-General; counsel before the Geneva Arbitration Tribunal; minister to Spain. He died in Newburyport, Mass.

Cushman, Charlotte Saunders, 1816-1876. An American actress; born in Boston; appeared first in opera, and as "Lady Macbeth" in 1835. In 1844 she accompanied Macready on a tour throughout the Northern states and afterward appeared in London. Miss Cushman retired from the stage in 1875, and died in Boston.

Custer, George Armstrong, 1839-1876. American soldier; born in New Rumley, O.; served with distinction during the Civil War. He afterward had various cavalry commands in the West, and several times defeated hostile Indians. With a force of 600 men, he attacked a body of Sioux, afterward found to number some 6,000, encamped on the Little Big Horn, in Montana, and he and five companies of his command were destroyed.

Cuvier, Georges C. L. F., Baron, 1769-1832. French naturalist; the greatest of zoölogists and founder of comparative anatomy.

Cyrus, surnamed the Great, or the Elder, . . . -530 B. C. Founder of the Persian empire; began his conquests by overthrowing his grandfather Astyages, king of the Medes; subdued Croesus, king of Lydia; laid siege to Babylon and took it, and finished by being master of all western Asia.

Cyrus, surnamed the Younger, . . . -401 B. C. Second son of Darius II.; conspired against his brother Artaxerxes Mnemon, was sentenced to death, pardoned, and restored to his satrapy in Asia Minor; conspired anew, raised a large army, including Greek mercenaries, marched against his brother, and was slain at Cunaxa, of which last enterprise and its fate an account is given in the "Anabasis" of Xenophon.

Czerny (zair'ne), Carl, 1791-1857. An Austrian pianist and musical composer; born in Vienna. Among his pupils were Liszt, Thalberg, and other distinguished musicians.

Daguerre (da-gair'), Louis Jacques Mande, 1789-1851. French artist; inventor of the daguerreotype.

Dahlgren, John Adolphe, 1809-1870. An American naval officer; born in Philadelphia, Pa.; rose through the grades to the rank of rear-admiral. He rendered efficient service in suppressing blockade-running during the Civil War. He invented the Dahlgren gun; died in Washington, D. C.

Dallas, George Miffin, 1792-1864. Born in Pennsylvania; elected to the U. S. Senate, 1831; Attorney-General of Pennsylvania, 1833-35; appointed minister to Russia, 1837, and in 1844 elected Vice-President of the U. S. Sent as minister to Great Britain, 1856.

Dalton, John Call, 1825-1889. An American physiologist; born in Chelmsford, Mass. He was successively Professor of Physiology at the University of Buffalo, at the Vermont Medical School, at the Long Island College Hospital, and at the New York College of Physicians and Surgeons. He served as an army surgeon throughout the Civil War. Died in New York city.

Dana, Charles Anderson, 1819-1897. American journalist; born in Hinsdale, N. H. In 1847 he became managing editor of New York *Tribune* with which he remained until 1862. In 1863-64 he was in the service of the United States government, as Assistant Secretary of War under President Lincoln. In 1867 Mr. Dana, with several associates, purchased the New York *Sun*, which achieved great success under his editorship.

Dana, James Dwight, 1813-1896. An American scientist; born in Utica, N. Y. His researches into geology made him famous. He died in New Haven.

Dandolo, Enrico, 1105-1205. Doge of Venice, to which high office he was chosen when in his eighty-seventh year. He carried on the war with the Moans and undertook, with the Crusaders, in 1202, the siege of Constantinople, at which he greatly distinguished himself. He declined to become emperor of the conquered territory.

Danton (don-ton'), George Jacques, 1759-1794. A French revolutionist. He played a very important part during the first years of the French Revolution. Robespierre hated him, and succeeded in bringing about his downfall. Condemned to death as an accomplice in a conspiracy for the restoration of monarchy.

Darius I. (surnamed Hystaspis), . . . -485 B. C. King of Persia. He was wise and successful in his civil policy, but was defeated in an invasion of Scythia, and also at Marathon, Greece. **Darius II. (Nothus),** a natural son of Artaxerxes Longimanus; deposed the usurper Sogdianus, and became King of Persia, 424 B. C.; died 405. **Darius III.,** called Codomannus, the last of the ancient Persian kings, succeeded Arses 336 B. C. Defeated by Alexander the Great at Issus and Arbela. Darius was assassinated by Bessus, one of his satraps, while escaping from the battlefield. Statira, daughter of Darius, became one of the wives of Alexander.

Darley, Felix Octavius Carr, 1822-1888. An American artist; born in Philadelphia. His illustrations of literary masterpieces gave pleasure to thousands, and made him famous. He died in Claymont, Del.

Darling, Grace, 1815-1842. A young maiden, daughter of the lighthouse keeper of one of the Farne Islands, who with her father, amid great peril, saved the lives of nine people from the wreck of the *Forfarshire*, on September 7, 1838.

Darnley, Henry Stuart, Lord, 1546-1567. A Scottish noble, of the Royal blood of England and Scotland; became the second husband of Mary, Queen of Scots, 1565. His open profligacy alienated her affections, and it is

believed by many historians she connived at his assassination, which was planned and carried out by the Earl of Bothwell.

Darwin, Charles Robert, 1809-1882. English naturalist; elaborator of the theory of evolution; in his "Origin of Species by Means of Natural Selection," published in 1859, he propounds the theory that all species have been determined by a series of gradual changes in natural descent; in his "Descent of Man," he infers that "man is descended from a hairy quadruped furnished with a tail and pointed ears, probably arboreal in its habits."

Darwin, Erasmus, 1781-1802. English physician and naturalist.

David, King of Israel, eleventh century, B. C. Born in Bethlehem; slew Goliath with a stone and a sling; was anointed by Samuel; succeeded Saul as king; conquered the Philistines; set up his throne in Jerusalem, and reigned from thirty to forty years; suffered much from his sons, and was succeeded by Solomon.

David, Felicien, 1810-1876. A French composer; born at Vaucuse; author, among other compositions, of "The Desert," a production which achieved an instant and complete triumph.

David, Jacques Louis, 1748-1825. Regenerator of the modern French school of painting; born in Paris. In the Revolution he was a violent Jacobin and wholly devoted to Robespierre. Several of the scenes of the Revolution supplied subjects for his brush. He was appointed first painter to Napoleon about 1804; and after the second restoration of Louis XVIII. he was included in the decree which banished all regicides from France, when he retired to Brussels, where he died.

David, Pierre Jean, 1789-1856. A French sculptor; born in Angers (hence commonly called David d'Angers). He executed a great number of medallions, busts, and statues of celebrated persons of all countries, among whom we may mention Washington and Lafayette. He died in Paris.

Davies, Charles, 1796-1876. An American mathematician; born in Washington, Conn. He was educated at the United States Military Academy and was appointed Professor of Mathematics there in 1823. He held the same post subsequently at Columbia College and in the University of New York. He died in Fishkill Landing, N. Y.

Davis, David, 1815-1886. An American jurist; born in Cecil county, Md.; he was appointed an Associate Justice of the Supreme Court of the United States. He resigned in 1877 to enter the United States Senate, of which he became president *pro tem.* In 1881, and retired in 1883. He died in Bloomington, Illinois.

Davis, Jefferson, 1806-1889. American statesman and president of the Southern Confederacy; born in Kentucky; graduate of West Point; served in Black Hawk and Mexican wars; appointed to United States Senate from Mississippi, 1847; Secretary of War, 1853-1857; re-elected Senator, 1857; inaugurated provisional president of the Confederate States, 1861, and elected for six years, 1862; imprisoned in Fortress Monroe for two years after the fall of Richmond.

Davitt, Michael, 1846- Founder of the Irish Land League; born near Straid, County Mayo, Ireland; supplied with funds from the United States, he began an anti-landlord crusade in Ireland, which culminated in the foundation of the Irish Land League. Davitt was henceforward in frequent collision with the government, and from February, 1881, to May, 1882, was imprisoned in Portland. Mr. Davitt was elected to the British Parliament in 1883 and 1886.

Davout (day-voot'), Louis Nicholas, 1770-1823. A Marshal of France. He studied with Napoleon at Brienne, and accompanied Napoleon in his Italian campaigns and in his expedition to Egypt. In 1804 he was made a marshal of the empire. The victories of Ulm and Wagram were mainly due to him. After the battle of Waterloo he lived in retirement till 1819, when he took his seat in the Chamber of Peers. He died in Paris.

Davy, Sir Humphry, 1778-1829. English chemist, inventor of the safety lamp.

Decatur, Stephen, 1779-1820. American naval commander; defeated the Algerines; killed in a duel.

De Haas, Maurice Frederick Hendrick, 1832-1895. A Dutch marine painter; born in Rotterdam; in 1857 he was made artist to the Dutch navy, and in 1859 he went to New York, where he lived till his death. His best known American work is "Farragut Passing the Forts."

De Kalb, John, Baron, 1721-1780. German general; accompanied Lafayette to America, and served under Washington; killed at battle of Camden.

Delacroix (d'lah-kroah'), Eugene, 1798-1863. A French painter, chief of the Romantic school; born near Paris. In 1827 he was chosen by the Institute to fill the place of Delaroche. He was an artist of great versatility.

Delaroche (d'lah-rosh'), Hippolyte (familiarily styled Paul), 1797-1856. A French painter; born in Paris. His signal merits consist in correct drawing, brilliant and harmonious color, and great distinctness and perspicuity in treatment, rendering the story of his pictures at once intelligible. He died in Paris.

Delaware, or Delawarr, Thomas West, 1577-1618. An American colonial governor; born in England. He succeeded his father as third Lord Delaware in 1602 and some years later was appointed governor of Virginia.

Del Sarto, Andrea Vanucchi, 1487-1531. Florentine painter.

Democritus, 460-361 B. C. "The laughing philosopher of Greece."

De Morgan, Augustus, 1806-1871. An eminent English mathematician; born in Madras, South India; wrote treatises on almost every department of mathematics, on arithmetic, algebra, trigonometry, differential and integral calculus, the last pronounced to be "the most complete treatise on the subject ever produced in England."

Demosthenes, 385?-322 B. C. Athenian orator; conquered an impediment in his speech, and by perseverance and determination became the greatest of orators; opposed Philip of Macedon, against whom he delivered his "Philippics"; condemned to death by Antipater, he committed suicide by poison.

Denis (den-ee'), Saint, fl. 3d century. The first bishop of Paris; martyred about 272 in the Valerian persecution. St. Denis is the tutelary saint of France.

Derby, Edward Geoffrey Smith-Stanley, 14th Earl of, 1799-1869. A distinguished orator, statesman, and publicist, the head of the ancient house of Stanley, descended from the blood-royal of England and Scotland. He was for years the Parliamentary leader of the Conservatives. Succeeded Earl Russell as Prime Minister, 1852.

Descartes (day-kahrt'), Rene, 1596-1650. French philosopher and mathematician; represented the revolt against scholasticism, re-examining all questions and discarding the authority of great names. "I think, therefore I am," was the basis of his philosophy.

Desmoulins (day-moo-lahn'), Benoit Camille, 1760-1794. A French revolutionist. In 1793 he gave his vote for the death of the king. Having become closely connected with Danton and the party of opposition to Robespierre, and inveighing against the reign of blood and terror, he was arrested on the order of the latter, tried and executed.

De Soto, Hernando, 1500-1542. A Spanish explorer; served under Pizarro in Peru, and afterward commanded an expedition which landed on the Florida coast, and from there marched inland, discovering the Mississippi river, on the banks of which he died of fever.

Desaillines (day-sa-lem'), Jean Jacques, 1758?-1806. The first emperor of Hayti, an African negro; assassinated by Christophe and Pétion; was the favorite officer of Toussaint l'Ouverture, and succeeded him in command; proclaimed himself emperor in 1804.

De Wet, Christian, 1853?- A Boer military officer; born in Dewetsdorp, Orange Free State (now Orange River Colony); was bred a farmer and made a small fortune; became a member of the Volksraad. Though practically without military experience, he served ably in the Boer-British War of 1899-1902, attaining the rank of general and outwitting the pursuit of Kitchener and Roberts in the summer of 1900, and of the former in the early part of 1902. His stand at Sanna's Post was highly praised by military experts.

Dewey, George, 1837- An American naval officer; born in Montpelier, Vt.; was appointed a cadet at Annapolis, in the class which graduated in 1858; when the Civil War broke out was commissioned a lieutenant and assigned to the *Mississippi*. His first serious taste of war was when the West Gulf squadron, early in 1862, forced a passage up the Mississippi river ahead of Farragut. In 1896 he was promoted to Commodore, and at the beginning of 1898 was given command of the Asiatic squadron; with his squadron he left Mrs Bay, China, April 27, 1898, with orders to "capture or destroy the Spanish squadron," which was then supposed to be in Manila bay, under command of Admiral Montojo. The squadron entered the channel of Manila at 11.30 p. m., Saturday, April 30, and early on Sunday morning, May 1, sank, burned, or

captured all the ships of the Spanish squadron in the bay, silenced and destroyed three land batteries, obtained complete control of the bay, so that he could take the city, the chief port of the Philippine Islands, at any time, and all without losing a single man, and having only nine slightly wounded. In recognition of this achievement, Commodore Dewey received the thanks of Congress, which awarded to him a magnificent sword, and medals to his men. As a further recognition of his achievement, Commodore Dewey was (May 7, 1898) promoted to be a Rear-Admiral, and subsequently (March 3, 1899) was made Admiral of the Navy under an act of Congress, approved March 2, 1899, restoring that rank for the especial purpose of enabling the country to adequately honor the hero of Manila bay. In 1901 he was president of the Schley Court of Inquiry, and in 1902 was appointed commander-in-chief of the united squadrons and fleets mobilized for extraordinary maneuvers.

De Witt, Jan. 1625-1672. A Dutch statesman; born at Dort; like his father, Jacob De Witt, before him, was a declared enemy of the House of Orange, and opposed the Stadtholdership, and for a time he carried the country along with him, but during a war with England his influence declined, the Orange party prevailed, and elected the young Prince of Orange, William III., Stadtholder. De Witt and his brother Cornelius were murdered at last by the populace.

Diaz (dee-as), Porfirio, 1830-. A Mexican statesman; born in Oaxaca; received a classical education at the Oaxaca Institute, and had begun studying law when the war with the United States broke out; served through that struggle in the National Guard, and on the conclusion of peace made a study of military science. On Santa Ana's accession to the dictatorship, he left the army and practiced law; but returned and bore a conspicuous part in the revolution of 1854; took the field to oppose the French troops and was taken prisoner, but made his escape. Maximilian's troops till forced to surrender a second time at Oaxaca in 1855; besieged and captured Puebla in 1867, and immediately marched on Mexico city, which surrendered to him June 21. In 1872 and 1876 he led revolutions against the government, and after three severe battles occupied the capital in the latter year. In 1877 he was elected president to fill the unexpired term of the fugitive president, Lerdo. According to the "plan of Tuxtepec" which he had proclaimed, he was ineligible to succeed himself. His secretary, General Gonzalez, was elected president, and General Diaz was appointed Chief Justice of the Supreme Court, and elected Governor of Oaxaca. In 1884 he was re-elected President; in 1886 his partisans secured the abolition of the law prohibiting a second consecutive presidential term, and he was thereafter continuously re-elected, his sixth term expiring Nov. 30, 1904. His government of Mexico has been an era of marvelous progress and pacification, and he is justly regarded as one of the greatest living Americans.

Diderot (dee-dro'), Denis, 1713-1784. French philosopher and novelist; chief editor of "The Encyclopedia," and librarian of Catherine of Russia.

Diemen, Anton Van, 1593-1645. A Dutch administrator; having gone to India, he speedily rose to the highest dignities; and was at length made Governor-General. Abel Tasman, whom he sent with a vessel to the South Seas in 1642, gave the name of Van Diemen's Land to the island now called Tasmania.

Diocletian (Calus Valerius Aurelius Diocletianus), 244-305. A Roman general; proclaimed emperor by the imperial guard after the assassination of Numerianus, 284; divided the empire with Maximian, and governed Asia and Egypt. In 303, he signed an edict against the Christians.

Diogenes (di-oh'-nee), 412-323 B. C. A distinguished cynic; born in Sinope, Asia Minor; died at Corinth. He spent most of his life in Athens, where he lived upon alms, and taught his philosophy from a tub.

Dioscorides. Flourished first century; a Greek physician; born in Cilicia; left a treatise in five books on materia medica, a work of great research, and long the standard authority on the subject.

Dollinger, 1799-1890. A Catholic theologian; born in Bamberg, Bavaria; head of the old Catholic party in Germany; wrote extensively on theological and ecclesiastical topics; lived to a great age, and was much honored to the last.

Domenichino (do-main-e-kee'no), 1581-1641. A distinguished Italian painter; his true name was Donnicco Zampieri. His "Communion of St. Jerome," in the Vatican, is considered among the finest works of the Masters.

Dom'nic, Saint, 1170-1221. The founder of the order

of the Dominicans; born in Old Castle; died in Bologna; was canonized in 1234 by Pope Gregory IX. St. Dominic is usually considered the founder of the Inquisition, but this claim is denied, on the ground that two Cistercian monks were appointed inquisitors in 1198.

Domitian (do-mish'-yan), 85?-96. Roman emperor; his vanity was wounded by the non-success of his arms, and his vengeful spirit showed itself in a wholesale murder of the citizens; many conspiracies were formed against his life, and he was at length murdered by an assassin, abetted by his wife.

Donatello (properly, Donato di Betto Bardi), 1383-1466. One of the revivers of the art of sculpture in Italy; born and died in Florence.

Donizetti (do-nid-zet'-te), Gaetano, 1797-1848. An eminent Italian musical composer.

Dore (do-ray'), Paul Gustave, 1833-1883. A French draughtsman and painter; born in Strassburg, he distinguished himself greatly as an illustrator of books; his illustrations of the Bible and Milton's "Paradise Lost" are of high excellence; in later years Doré also won fame as a sculptor.

Doria (do'-ra), Andrea, 1468-1560. A distinguished Genoese; he belonged to a family which gave his native city several doges and admirals, and was the ablest naval commander of the age, commanding both the French and Papal fleets.

Dorr, Thomas Wilson, 1805-1854. Born in Providence, R. I.; the leader of Dorris Rebellion. He died in Providence.

Dow or Douw, Gerard, 1613-1675. A distinguished Dutch genre painter; born at Leyden; a pupil of Rembrandt; his works, which are very numerous, are the fruit of a devoted study of detail and are remarkable for their delicacy and perfection of finish.

Douglas (daw'-as), A Scotch baronial house of ancient and brilliant fame, descended from Sir James, the bosom friend of King Robert Bruce. They were long known as the "King Makers of Scotland." Archibald, Fourth Earl of Angus, surnamed "The Great," led 10,000 of his clan to the field of Flodden, 1513, where two of his sons were killed.

Douglas, Stephen Arnold, 1813-1861. An American statesman; born in Vermont. He represented Illinois in both branches of the United States Congress, defeating Abraham Lincoln in a memorable contest for the Senate, 1858. In 1860 the national Democratic convention divided on matters pertaining to slavery; Douglas receiving the regular nomination for the presidency, while seceding members nominated John C. Breckinridge. Lincoln was his successful competitor.

Douglas, Frederick, 1817-1895. An American lecturer and journalist; the son of a negro slave; born in Tuckahoe, Md. He taught himself to read and write, and was employed by the Anti-Slavery Society as one of their lecturers. In 1845 he published his autobiography, and afterwards made a successful lecturing tour in England. In 1871 he was appointed secretary of the commission to Santo Domingo; in 1872, presidential elector; and in 1876 marshal for the District of Columbia. He was commissioner of deeds for that district, 1881-1886; and United States minister to Haiti in 1889-1891. He died in Washington, D. C.

Dow, Neal, 1804-1897. An American temperance reformer; born in Portland, Me. He was the author of the bill which prohibited the manufacture and sale of intoxicating liquors in the state of Maine, widely known as the "Maine Law." During the Civil War he was colonel of a Maine regiment, and a brigadier-general of volunteers.

Dozy, Reinhart, 1820-1883. A Dutch Orientalist and historian; born in Leyden.

Draco (dray'-ko), Flourished seventh century B. C. Was the first lawgiver of Athens. His code was written 621 B. C. The laws were severe, and popularly said to have been written in blood.

Drake, Sir Francis, 1540-1595. An English naval hero; first English circumnavigator of the globe.

Drake, Friedrich, 1805-1882. A German sculptor; born at Pyrmont; executed numerous statues and busts, among others, busts of Oken, Ranke, Bismarck, and Moltke; his chief works are the "Eight Provinces of Prussia," represented by large allegorical figures, and the "Warrior crowned by Victory."

Draper, John William, 1811-1882. A chemist, physiologist, and man of letters; born at Liverpool; settled in the United States; wrote on chemistry, physiology, and physics generally, as well as works of a historical character, such as the "History of Intellectual Development of Europe," and the "History of the Conflict between Science and Religion," an able book.

Dreyfus (dri'fus), Alfred, 1859- . . . A French military officer; born in Alsace. In 1889 he became a captain. He was arrested in 1894 charged with selling military secrets to Germany and Italy. He was convicted, and on January 5, 1895, publicly degraded from his rank in the presence of five thousand troops. His sentence included life imprisonment on the Isle du Diable, off the coast of French Guiana, where he was rigidly confined till 1899, when the French Court of Cassation ordered a re-trial of the Dreyfus case. He was accordingly brought back to France, re-tried by court martial and again convicted. The French government granted him a pardon almost immediately. He published "Five Years of My Life."

Dreyse (dri'zeh), Johann Nikolaus von, 1787-1867. A German inventor; born in Sommerda, near Erfurt, in Prussia. In 1827 he invented a muzzle-loading, and in 1836 a breech-loading, needle-gun, which was adopted in the Prussian army in 1840. In 1864 Dreyse was ennobled.

Drouet (dru'ay'), Jean Baptiste, 1768-1824. A violent Jacobin and member of the Council of the Five Hundred; was postmaster at St. Menesould when Louis XVI., attempting flight, passed through the place, and by whisper of surmise had the progress of Louis and his party arrested at Varennes, June 21, 1791, for which service he received honorable mention and due reward in money; was taken captive by the Austrians at last; perched on a rock one hundred feet high, descended one night by means of a paper kite he had constructed, but was found at the foot helpless with leg broken.

Du Chaillu (du sha-yu'), Paul Belloni, 1838-1903. A French-American explorer and writer; born in New Orleans, La. His travels in Africa, in which he discovered the gorilla and the pigmies, are detailed in "A Journey to Ashango Land" and "My Apingi Kingdom." "The Land of the Midnight Sun" deals with Norway. "The Viking Age" is a more ambitious work, intended to recreate the old Norse civilization. He also wrote many books for the young. See CHAILLU.

Duguay-Trouin (doo-gay-troo-ahn'), Rene, 1673-1736. A distinguished French naval officer. He defeated the Dutch and English; captured Rio de Janeiro in 1711.

Du Guesclin (du gah-klan'), Bertrand, 1314-1380. Constable of France, and among the ablest military commanders of the age. He twice drove the English out of nearly every point they occupied in France, although defeated and captured by Edward the Black Prince.

Duncan I. Flourished eleventh century. King of Scotland, son of Beatrix, daughter of Malcolm II., murdered by Macbeth, Thane of Cawdor.

Dunois (doo'noave), Jean de (Bastard of Orleans), 1403-1468. French national hero; natural son of the Duke of Orleans; defeated the English at Montargis in 1427, and assisted at the siege of Orleans in 1429; expelled the English from Normandy and Guienne, and was created Count d'Orleans.

Duns Scotus, John, 1265-1308. A learned Scotch theologian. He became professor at Oxford and Paris, and founded the school of Scotists, opposed to the Thomists, followers of St. Thomas Aquinas.

Dunstan, Saint, 925?-988. An English monk who was made Archbishop of Canterbury, and obtained great political influence, which he subsequently lost.

Dupont, Samuel Francis, 1803-1865. An American naval officer; born in Bergen Point, N. J. During the Mexican War he saw much active and gallant service on the California coast. He was promoted to Rear-Admiral in August, 1862. He greatly contributed to the organization of the naval school at Annapolis. He died in Philadelphia.

Dupleix (doo'pley'), Joseph, 1697-1764. A French merchant, who rose to be governor of the French settlements in India, and received the dignity of marquis; jealousy at home, however, led to his recall, and he was left to end his days in neglect and poverty.

Duquesne (doo'kein'), Abraham, Marquis, 1610-1688. A French admiral. He successively defeated the Spaniards, Dutch, and Danes, winning a signal victory over the celebrated Dutch admiral, De Ruyter, near Mersena, 1676, the latter losing his life in the battle.

Durer (doo'rair), Albrecht, 1471-1528. A German engraver and painter. He is considered one of the earliest etchers.

Duse (doo'sa), Eleonora, 1859- . . . An Italian actress; born in Vigevano. She has played in all the principal countries of Europe and visited the United States. She has been twice married and divorced.

Dvorak (dvor'zhakk), Antonin, 1841-1904. A Bohemian composer; born near Muhlhausen. Attention was

first called to him by what remains his best work, a "Stabat Mater," the most modern and one of the finest settings of this hymn. He came to the United States in 1892, and became Director of the National Academy of Music in New York city.

Dwight, Timothy, 1752-1817. An American theologian; grandson of Jonathan Edwards, and much esteemed in his day both as a preacher and a writer; his "Theology Explained and Defended," in five volumes, was very popular at one time, and was frequently reprinted.

Eads, James Buchanan, 1820-1887. An American engineer; born in Lawrenceburg, Ind. He early designed some useful boats for raising sunken steamers, and in 1861, when called to advise the national government, constructed within one hundred days eight ironclad steamers for use on the Mississippi and its tributaries. He afterward built a number of other ironclads and mortar-boats, which were of considerable service to the North. His steel bridge across the Mississippi at St. Louis, with its central arch embracing a clear span of 520 feet, ranks deservedly among the notable bridges of the world; his works for improving the South Pass of the Mississippi delta were successfully completed in 1875-1879; and his great plan for deepening the river as far as the mouth of the Ohio by means of jetties has been demonstrated to be entirely practicable. In 1884 he received the Albert medal of the Society of Arts, being the first American citizen to whom this honor had been awarded.

Early, Jubal Anderson, 1816-1894. An American military officer; born in Franklin county, Va.; served in the Florida and Mexican Wars. During most of the years 1838-1861, he practiced law in his native state. On the outbreak of the Civil War he entered the Confederate service as a colonel. In 1864, after some successes, he was defeated by Sheridan in several battles; and, Custer having also routed him at Waynesboro, in March, 1865, he was relieved of his command a few days later. He subsequently returned to the practice of law.

Eastlake, Sir Charles Locke, 1793-1865. An English artist, critic, and historian of art; born in Plymouth. He died in Pisa, Italy.

Eckhart, Meister, 1260-1327. A German philosopher and divine, profoundly speculative and mystical; entered the Dominican order, and rapidly attained to a high position in the Church.

Eck, John, properly Maier, 1486-1543. A German theologian, of Swabian birth; a violent antagonist of Luther and Luther's doctrines; in his zeal went to Rome, and procured a papal bull against both; undertook at the Augsburg Diet to controvert Luther's doctrine from the Fathers, but not from the Scriptures; was present at the conferences of Worms and Regensburg.

Edison, Thomas Alva, 1847- . . . American inventor; born in Milan, O. He invented a commercial stock indicator, and the proceeds of this invention, which at once came into wide use, enabled him to establish a laboratory at Newark, N. J., afterward removed to Menlo Park, and then to its present location at West Orange, N. J. From this beginning he became known to all the world as one of the greatest inventors of the nineteenth century. More than three hundred patents have been issued on his inventions; among his more important inventions may be named the phonograph, a telephone for long distance transmission, a system of duplex telegraphy (which he subsequently developed into quadruplex and sextuplex transmission), the carbon telephone transmitter, the microtasmeter, the radio-telephone, the megaphone, the incandescent electric lamp, the kinetoscope, and a storage battery for street railway cars and automobiles. In 1878 he was made Chevalier of the Legion of Honor by the French government, a commander of the Legion in 1889, and was the recipient of the insignia of a grand officer of the Crown of Italy bestowed the same year by King Humbert.

Edward I. (Longshanks), 1239-1307. King of England; conquered Wales. **Edward II., 1284-1327.** Defeated by Bruce at Bannockburn; deposed by the queen and her favorite, Roger de Mortimer, 1326; murdered the following year. **Edward III., 1312-1377.** Son of Edward II.; proclaimed king in 1327; executed Mortimer, and imprisoned the queen-mother; carried on war with France and won the great victory of Crecy. **Edward IV., 1441-1483.** **Edward V., 1470-1483.** Ascended the throne at the age of thirteen, assassinated two months later. **Edward VI., 1537-1553.**

Edward, Prince of Wales (the Black Prince), 1330-1376. Son of Edward III.; participated in invasion of France,

commanding the main body of the English at Crecy; won the battle of Poitiers.

Edwards, Jonathan, 1703-1758. A celebrated divine; born at East Windsor, Conn.; was elected to the presidency of Princeton College; wrote an acute and original work, "The Freedom of the Will," a masterpiece of cogent reasoning; has been called the "Spinoza of Calvinism."

Edwin, . . . -633. King of Northumbria in the seventh century; through the influence of his wife Ethelburga, Christianity became the established religion in the kingdom during his reign; fortified Edinburgh, which bears his name.

Es'mont, Lamoral, Count of, 1522-1568. Born in Hainault; became attached to the court of Charles V., by whom, for distinguished military and diplomatic services, he was appointed governor of Flanders; fell into disfavor for espousing the cause of the Protestants of the Netherlands, and was beheaded in Brussels by the Duke of Alva.

Eiffel (i'fel), Gustave, 1832- . . . A French engineer; born in Dijon, and in 1858 was intrusted with the construction of the large iron bridge over the Garonne at Bordeaux, and was one of the first to introduce caissons worked with compressed air. In the huge framework erected for Bartholdi's "Statue of Liberty" may be seen the germ of the idea which afterward assumed the form of the colossal iron structure on the Champ-de-Mars in Paris, with which his name is identified.

Eldon, John Scott, Earl of, 1751-1838. An English jurist, lord chancellor for many years; born in Newcastle. In 1821 he was created an earl by George IV. He died in London; as a lawyer he was a master of English jurisprudence; as a politician he was opposed to reform.

Eliot, Charles William, 1834- . . . Educator; born in Boston, Mass.; was graduated in the Harvard class of 1853. The following year he was appointed tutor in mathematics, and gave himself to the study of chemistry; in 1858 was made assistant professor of chemistry and mathematics in the Lawrence Scientific School of the college. In 1863 he went to Europe for study of chemistry and to investigate the educational institutions of that continent, and while at Vienna was chosen in 1865 professor of analytical chemistry in Massachusetts Institute of Technology, which post he filled for a period of four years and again went to Europe and spent fourteen months in further investigation, mainly in France. Dr. Thomas Hill having resigned the presidency of Harvard College, Mr. Eliot was in 1869 chosen to that office, which he has since filled. During his administration many notable changes in the government of the college have occurred, its scope has broadened and a great increase in the number of its professors and students is seen, while its wealth by gifts and benefactions has greatly increased, so that now it successfully competes with the great European universities in its curriculum. Mr. Eliot was given the honors of LL.D. by Williams and Princeton colleges in 1869 and by Yale in 1870, and is an honored member of many scientific and literary bodies, and has written and, in connection with Professor F. H. Storer, published two excellent manuals on chemistry, besides other notable productions; he is recognized as among the chief educators of his time.

Eliot, John, 1604-1690. The apostle of the Indians; born in Essex, England; entered the Church of England, but seceded and emigrated to New England; became celebrated for his successful evangelistic expeditions among the Indians during his lifelong occupancy of the parsonate at Roxbury.

Elizabeth, 1533-1603. Queen of England; the daughter of Henry VIII. and of Anne Boleyn; born in Greenwich. Upon the death of Mary, November 17, 1558, ascended the throne; she restored, or may be said to have established, the Protestant religion; assisted projects for English colonization of America; repulsed the Spanish Armada; encouraged literature, and made England respected abroad. Personally she had serious faults, and her execution of Mary, Queen of Scots, is a blot on her name, but her reign was an oasis of glory compared with the rule of the sovereigns who immediately preceded her, and those who followed her up to William and Mary.

Elizabeth, 1709-1762. Empress of Russia; daughter of Peter the Great and Catherine I.; assisted Maria Theresa in the War of the Austrian Succession; opposed Frederick the Great in the Seven Years' War; indolent and licentious, she left the affairs of the state mainly in the hands of favorites.

Elizabeth, Saint, 1207-1231. A very pious, but also a very fanciful young woman; daughter of Andreas II., King of Hungary; her husband, a Thuringian landgraf, going to the Crusade, "where he died straightway," Carlyle guesses, "partly the fruit of the life she led him; lodging beggars, sometimes in her very bed; continually breaking his night's rest for prayer and devotional exercises of undue length; weeping one moment, then smiling in joy the next; meandering about, capricious, melodious, weak, at the will of devout whim mainly"; went to live at Marburg after her husband's death.

Ellenborough, Edward Law, Earl of, 1790-1871. An English Conservative statesman; entered Parliament in 1813; held office under the Duke of Wellington and Sir Robert Peel; appointed Governor-General of India; subsequently First Lord of the Admiralty and Indian Minister under Lord Derby.

Elliot, Daniel Giraud, 1835- . . . An American zoologist; born in New York; traveled in Europe, Africa, and parts of Asia in 1856-1878; subsequently in Canada, Alaska, South America, and the greater part of the United States. He afterward became curator of zoölogy for the Field Columbian Museum at Chicago.

Ellsworth, Oliver, 1745-1807. An American jurist; born in Windsor, Conn.; sent as delegate from Connecticut to the first Continental Congress; made judge of the Connecticut Superior Court in 1784. He was a member of the convention that framed the Federal Constitution, and influential in organizing Congress and the Judiciary. In 1796 he was appointed Chief Justice, and in 1799 made member of a diplomatic commission to France with Patrick Henry and William R. Davie. On account of ill health he sent home his resignation as Chief Justice, but in 1807 was appointed Chief Justice of Connecticut.

Elsevir, Louis, 1540?-1617. Dutch printer at Leyden. **Bonaventure**, 1583-1652?, son, and **Abraham**, 1592-1652, grandson, of Louis. Dutch printers and publishers at Leyden and Amsterdam, of exquisite editions of the classics, which are highly prized for their accuracy.

Emmanuel (The Great), 1469-1521. King of Portugal.

Emmet, Robert, 1778-1803. Irish patriot and orator; became a leader of the "United Irishmen," and was implicated in the killing of Lord Kilwarden, Chief Justice of Ireland, and others; although defending himself with great eloquence, he was sentenced to death and paid the penalty of his complicity.

Emmet, Thomas Addis, 1764-1827. Brother of Robert Emmet; a leader of the "United Irishmen," and imprisoned from 1798 till 1801; removed to America in 1804, and was in 1812 elected Attorney-General of New York.

Encke (en'ke), Johann Franz, 1791-1865. A German astronomer; born in Hamburg. During the War of Liberation he served as artillery in the German army; after the peace he became assistant in the Observatory of Seeberg, near Gotha; here he calculated the orbit of the comet observed by Mechain, Miss Herschel, and Pons, predicted its return, and detected a gradual acceleration of movement ascribed by him to the presence of a resisting medium. The comet is now known as Encke's comet. The fame of his works, "The Distance of the Sun," and "The Transit of Venus of 1769," led to his appointment as director of the Berlin Observatory, a position which he held till his death.

Endlicher, Stephen Ladislaus, 1804-1849. An Austrian botanist; born in Presburg; in 1840 was appointed Professor of Botany in the University of Vienna, and director of the botanic garden; he sympathized with the popular side in the German revolution of 1848.

Endicott, John, 1589-1665. A colonial governor of Massachusetts; born in Dorchester, England. He landed as manager of the plantation of Naumkeag (Salem) in 1628. Giving place in 1630 to John Winthrop, he headed a sanguinary expedition against the Indians in 1636; was deputy-governor in 1641-1644, 1650, and 1654, and governor in 1644, 1649, 1650-1653 and 1655-1665. Endicott was an austere Puritan, choleric, benevolent, and brave. He died in Boston.

Enghien (on-gan'), Louis de Bourbon, Duc d', 1772-1804. An ill-fated French royalist; born at Chantilly; joined the royalists and took part in the Rhine campaign against the republicans; was suspected of being concerned in a Bourbon plot to assassinate the Emperor Napoleon; was seized, brought to Vincennes, and, after an inconclusive and illegal trial, shot by Napoleon's orders.

Epicurus, 340?-270 B. C. Greek philosopher; founder of the Epicurean school.

Erasmus, Desiderius, 1466-1536. Dutch scholar and printer of the first Greek New Testament.

Erastus, Thomas, 1524-1588. Swiss physician and writer.

Eratosthenes, 276-196? B. C. Greek geometer; considered the founder of the science of astronomy.

Erie the Red, flourished 1000. Scandinavian navigator; discovered Greenland.

Ericsson, John, 1803-1889. Swedish engineer and inventor; constructed the first *Monitor*, with revolving turrets for guns, which destroyed the Confederate ironclad *Merrimac*.

Erigena (erij'ena), Joannes Scotus, 810?-875? An Irish theologian. His writings, denounced by the Roman Catholic Church, are among the most profound of the Middle Ages.

Erskine, Henry, 1746-1817. A famous Scotch lawyer; born at Edinburgh; called to the bar and became lord advocate; a Whig in politics; brought about useful legal reforms; noted as a brilliant wit and orator.

Erskine, Thomas, 1750-1823. A Scotch baron; born in Edinburgh; became a noted forensic orator and jurist, attaining most of his renown as a pleader in support of the accusations of corruption made against Lord Sandwich. He was a member of the House of Commons in 1790-1806. About the latter date he was created Baron Erskine of Restormel, on becoming lord chancellor. He died near Edinburgh.

Escobar, Mendoza Antonio, 1589-1669. A Spanish Jesuit and casuist; born at Valladolid; a preacher and voluminous writer.

Espartaco, Joachim Baldomero, Duke of Vittoria, 1792-1879. A Spanish general and statesman. He refused the crown on the abdication of Isabella, 1870.

Espy, James Follard, 1785-1860. A meteorologist; born in Pennsylvania; did notable work in investigating the causes of storms, and in 1841 published "The Philosophy of Storms"; was appointed to the Washington Observatory, where he carried on experiments in the cooling of gases and atmospheric expansion.

Essex, Robert Devereux, Earl of, 1567-1601. A favorite of Queen Elizabeth; born at Netherwood, Hereford; served in the Netherlands; won the capricious fancy of Elizabeth; lost favor by marrying clandestinely the widow of Sir Philip Sidney, but was restored, and led a life of varying fortune, filling various important offices, till his final quarrel with the Queen and execution.

Estaing (aiz'tahn), Comte d', 1729-1794. A French admiral; "one of the bravest of men;" fought against the English in the Indies and in America; wavered as a royalist at the outbreak of the French Revolution; his loyalty to royalty outweighed. It was thought, his loyalty to his country, and he was guillotined.

Esterházy de Galán'tha. The name of a powerful and famous Hungarian family holding the rank of Princes of the Empire since the seventeenth century. Their estates included upwards of four thousand villages, sixty market towns, many castles and lordships, but they have been heavily mortgaged. Among the more prominent members of the family are: Paul IV., Prince Esterházy, 1635-1713, a general and literary savant. His grandson, Nicholas Joseph, 1714-1790. A great patron of arts and music; founder of the school in which Haydn and Pleyel, among others, were formed. Nicholas, Prince Esterházy, 1765-1833. Distinguished as a field marshal and foreign ambassador. Prince Paul Anthony, 1786-1866. A distinguished and able diplomatist; was successively Austrian ambassador at Dresden, Rome, and Britain.

Ethelbert, 552-616. A king of Kent; through the influence of his Christian wife he received Saint Augustine and a band of missionaries in 597; an event which led to the conversion of Kent to Christianity; drew up the first Saxon law code.

Ethelred II., 968-1016. The Unready; a king of Saxon England; married Emma, daughter of Richard, Duke of Normandy, a step which led in the end to the claim which issued in the Norman Conquest.

Euclid, fl. 300 B. C. A celebrated Greek mathematician, who collected all the fundamental principles of pure mathematics, which had been delivered down by Thales, Pythagoras, Eudoxus, and other mathematicians before him, which he digested into regularity and order, with many others of his own, on which account he is said to have been the first who reduced arithmetic and geometry into the form of a science. He is thought to have taught mathematics in Alexandria.

Eugene (oo-zhain'), Francois, Prince of Savoy, 1663-1736. A renowned general; born at Paris; he renounced his native land, and entered the service of the Austrian Emperor Leopold; first gained distinction against the Turks, whose power in Hungary he crushed in the great victory of Zenta (1697); co-operated with Marlborough in

the war of the Spanish Succession, and shared the glories of his great victories, and again opposed the French in the cause of Poland.

Eugenie (oo-zhay'nee) (Eugenie Maria de Montijo), 1826- . . . Daughter of Comte de Montijo, and wife of Napoleon III.; born in Granada, Spain; crowned empress of the French, 1853; appointed regent while her husband was with the army, 1870; fled to England after the loss of the battle of Sedan.

Euler, Leonard, 1707-1783. A distinguished mathematician; born in Basel; in 1741 he accepted an invitation from Frederick the Great to become Professor of Mathematics in the Berlin Academy, but in 1766 went to St. Petersburg, where he died, in the office of director of the mathematical class of the academy; he applied the analytic method to mechanics and greatly improved the integral and differential calculus.

Eusebius, Pamphili, 260-340? A distinguished early Christian writer, born in Palestine; bishop of Caesarea in 313; headed the moderate Arians at the Council of Nice, who shrank from disputing about a subject so sacred as the nature of the Trinity; wrote a history of the world to 325 A. D.; his "Ecclesiastical History" is the first record of the Christian Church up to 324.

Eustachio (ay-ooz-tah'ke-o), Bartolommeo, 1500?-1574? An Italian physician and anatomist; he devoted himself to medical science and in particular to anatomy, which he much enriched by his researches. Among his discoveries were the Eustachian tube and the Eustachian valve of the heart.

Evans, Oliver, 1758-1819. An American inventor; born in Newport, Del.; in 1777 he invented a machine for making card teeth. Among his other inventions are the automatic flour mill, the high pressure steam engine, a steam dredge, and the boiler known as the "Cornish boiler." He died in New York.

Evarts, William Maxwell, 1818-1901. An American lawyer; born in Boston, Mass.; was the principal counsel for President Johnson in his impeachment trial; Attorney-General of the United States; in 1877 principal counsel for the Republican party before the Electoral Commission on the Hayes-Tilden election returns; in 1877-1881 United States Secretary of State; and in 1885-1891 United States Senator from New York. He also represented the United States in the Alabama claims case, and was the principal counsel for Henry Ward Beecher in his defense against the charges preferred by Theodore Tilton. He died in New York.

Everett, Edward, 1794-1865. An American statesman; born in Dorchester, Mass. After traveling for some years in Germany and England he returned to America in 1819 to occupy the chair of Greek Literature at Harvard; became successively member of Congress, governor of Massachusetts, and Minister Plenipotentiary to England; in 1846 he was appointed President of Harvard College, and in 1852 Secretary of State; shortly after he retired to private life; a graceful and powerful orator, he was chosen to deliver the oration at Gettysburg, when his noble periods were entirely eclipsed by Lincoln's simple, immortal words. He died in Boston.

Ewald (ay-walt), Georg Heinrich August von, 1803-1875. A German Orientalist and Biblical critic; born in Göttingen; in 1827 he became extraordinary, in 1831 ordinary, Professor of Philosophy, and in 1835 Professor of Oriental Languages; in 1837 he lost his chair at Göttingen on account of his protest against the king's abrogation of the liberal constitution, became Professor of Theology at Tübingen, but in 1848 returned to his old chair at Göttingen. He died in Göttingen.

Ewell, Richard Stoddard, 1817-1872. Military officer; born in Washington, D. C.; served during the Mexican War with Scott from Vera Cruz to the City of Mexico, and was promoted captain for gallantry and meritorious conduct at Contreras and Churubusco. At the outbreak of the Civil War he resigned his commission in the National Army and joined the Confederates; he took part in the Maryland campaign and in the battles of Bull Run, Gettysburg, and the Wilderness, and attained the rank of Lieutenant-General. After the war he retired to private life; he died in Springfield, Tenn.

Ewing, Thomas, 1789-1871. An American jurist and statesman; born in Virginia; he was a member of the United States Senate, Secretary of the Treasury, and first Secretary of the Interior.

Exmouth, Edward Fellow, Viscount, 1757-1833. An English admiral. Noted for his expedition to Algiers, 1816, when in a bombardment of nine hours he destroyed the Algerian ships, silenced their forts, shelled the palace, and compelled the Dey's submission and the release of 3,000 Christian prisoners.

Eyck (ite), Jan Van (John of Bruges), 1390-1440. One of the greatest of Flemish painters. His brother Hubert, 1366-1426, was also a noted artist. The brothers have been pronounced the originators of oil painting.

Ezekiel, born about 624 B. C. In Scripture one of the greater Hebrew prophets; son of the priest Bezai, who, with Jehoiakim, king of Judah, was carried captive to Mesopotamia. The date of his death is unknown. The book of Ezekiel contains his prophecies.

Ezra, fl. fifth century B. C. In Scripture a Jewish priest, who led the second expedition of his people home from the Babylonian exile, 458 B. C. A tomb said to be his is still shown on the Tigris, some twenty miles above its junction with the Euphrates. The book of Ezra relates the events connected with the second return, that of Nehemiah (formerly first book of Ezra), the incidents of the first return, twenty-one years before.

Fabius Maximus, Quintus (Cunctator), 203 B. C. Roman consul and general; inaugurated the "Fabian" policy, carrying on only a defensive war against Hannibal.

Faed, John, 1820- . . . A Scottish artist; born at Burley Mill, Kirkcudbright; his paintings are chiefly of humble Scottish life, the "Cottar's Saturday Night" among others.

Faed, Thomas, 1826- . . . Brother of the preceding, born at Burley Mill; distinguished himself in his art studies at Edinburgh; went to London, where his pictures of Scottish life won him a foremost place among those of his contemporaries.

Fahrenheit, (far'en-hite), Gabriel Daniel, 1684-1736. A distinguished German philosopher. He invented the thermometer known by his name.

Fairfax, Thomas, Lord, 1612-1671. An English general who commanded the Parliamentary army at the outbreak of the civil war, 1644, and in 1645. **Thomas, Lord Fairfax, 1691-1782,** his grandson, spent part of his life in Virginia, and was the friend and patron of General Washington.

Fallero, or Falleri, Marino, 1274?-1355. A Venetian noble; succeeded Andrew Dandolo as Doge of Venice, in 1354. When he succeeded to the office of doge, he was eighty years of age, and had a young and beautiful wife. He had enemies among the dominant nobility of Venice; and to avenge himself on them he entered into a conspiracy with the plebeians to overturn the government and massacre the patricians. On the night before it was to be carried into effect, the plot was discovered, and Fallero was beheaded.

Fallopius, Gabriello, 1523-1562. Anatomist, born at Modena; Professor of Anatomy at Pisa and at Padua; the Fallopiian tubes which connect the ovaries with the uterus, first accurately described by him, are called after his name, as also the duct which transmits the facial nerve after it leaves the auditory nerve.

Faneuil (fan'el or fun'el) Peter, 1700-1743. An American merchant; born in New Rochelle, N. Y.; settled in Boston, Mass., where he became a successful merchant. In 1740 he offered to build a market house at his personal expense as a gift to the town, which he completed two years later. He died in Boston.

Faraday, Michael, 1791-1867. English chemist and natural philosopher; founder of science of magnetoelectricity.

Farragut, David Glasgow, 1801-1870. American admiral; passed the New Orleans forts and captured New Orleans in 1862.

Farrar, Frederick William, 1831-1903. An English clergyman, dean of Canterbury; born in Bombay, India; sixteen years master at Harrow; canon and archdeacon of Westminster, and chaplain to the queen. Of his religious and theological writings the most notable are: "The Witness of History to Christ," "The Life of Christ," "Life and Works of St. Paul," "The Early Days of Christianity," and "Eternal Hope." The last has been severely criticised on account of its lax doctrine regarding the question of everlasting punishment.

Faust (foust) or Fust, Johann, . . . 1466. One of the three artists to whom the invention of printing has been ascribed; was the son of a goldsmith at Mentz, Germany. The other two were Gutenberg and Schaffer.

Fawkes, Faux, or Vaux, Guy, 1570-1606. An English conspirator; born in York, England; he enlisted in the Spanish army in the Netherlands, and returned to England in 1604, after agreeing to assist in the Gunpowder Plot; after collecting the necessary combustibles, Fawkes worked his way into the coal cellar under the House of Lords, and after storing it with gunpowder

etc., was appointed to the dangerous duty of firing the mine. The government having had timely information of the detestable plot, the House of Lords and its cellar were searched, and Fawkes found secreted amid some casks of gunpowder, Nov. 5, 1605; he was at once arrested, soon after tried, and suffered death at Westminster with several of the other conspirators.

Ferdinand V., 1452-1516. Founded the Spanish monarchy.

Fergusson, James, 1808-1886. A Scotch writer; born in Ayr, Scotland; his monumental achievement, which constitutes him perhaps the greatest of writers on the subject, is "History of Architecture in all Countries." He died in London.

Ferry (far'ree), Jules Francois Camille, 1832-1893. A French statesman; he was minister to Athens in 1872-1873, and in 1879 became minister of Public Instruction and began an agitation against the Jesuits. Their expulsion was effected, and brought about the dissolution of the ministry in September, 1880; became premier, with a policy of colonial expansion, involving a war in Madagascar and the invasion of Tonquin. He died in Paris.

Feuerbach (foy'er-bok), Paul Johann Anselm von, 1775-1833. A German penalologist; born at Jena; died in Frankfurt-on-the-main.

Fichte (fik'ta), Johann Gottlieb, 1762-1814. A German philosopher; he was appointed Professor of Philosophy in the University of Jena in 1794, and the following year published his "Doctrine of Science," a fundamental departure from Kant. He died in Berlin.

Field, Cyrus West, 1819-1894. Born at Stockbridge, Mass.; founded the Atlantic Telegraph Company in 1856; on the successful laying of the 1866 cable, since which time communication between the Old and New Worlds has never been interrupted, he was awarded a gold medal and the thanks of the nation.

Field, David Dudley, 1805-1884. An eminent American jurist; born in Haddam, Conn.; brought about judicial reforms, and drew up, under Government directions, political, civil, and penal codes; interested himself in the international law, and labored to bring about an international agreement whereby disputes might be settled by arbitration and war done away with.

Field, Stephen Johnson, 1816-1899. An American jurist; born in Haddam, Conn.; brother of Cyrus West and David Dudley Field; studied law and was admitted to the bar; removed to California in 1849; became a justice of the Supreme Court of California in 1857; was appointed its chief justice in 1859; and in 1863 was appointed an associate justice of the United States Supreme Court, which office he resigned in April, 1897; he died in Washington, D. C.

Fildes, S. Luke, 1844- . . . An English artist; born in Lancashire; contributed to various magazines and illustrated books, notably Dickens's "Edwin Drood"; his most noted pictures are "The Poor of London," "The Widower," and "The Doctor."

Fillmore, Millard, 1800-1874. American statesman; thirteenth president of the United States; born in New York; learned fullers' trade; read law and acquired lucrative practice in Buffalo; elected to Congress, 1832, and continued a member till 1843; elected vice-president, 1848; became president on the death of Taylor, 1850; approved the Fugitive Slave Law and the compromise measures of Henry Clay, and made Daniel Webster Secretary of State.

Fischer, Kuno, 1824- . . . A German historian of philosophy; he was interdicted from teaching philosophy at Heidelberg in 1853; but, after filling professorships in Berlin and Jena, he had the satisfaction of being called to the chair of philosophy at Heidelberg in 1872.

Fish, Hamilton, 1803-1893. An American diplomatist; born in New York city; he was elected a congressman in 1842, and governor in 1848. In 1851 he was elected to the United States Senate, where he opposed the repeal of the Missouri Compromise and joined the Republican party on its formation. He was Secretary of State under Grant from 1869 to 1877, signing, as one of the commissioners, the Washington Treaty of 1871, and aided in the settlement of the "Alabama" question.

Fisher, George Park, 1817- . . . An American author and educator; born in Wrentham, Mass.; studied theology at Andover, and in Germany, was Professor of Divinity from 1854-1861, and subsequently of Ecclesiastical History at Yale. Author of many theological and historical works.

Fitch, John, 1743-1798. An American inventor; born in Connecticut; in 1787 he brought out a model steam-

boat with side wheels, and in 1790 constructed a larger vessel, which was for some time employed as a passenger boat; some of his plans are said to have fallen into Robert Fulton's hands and given him the idea of his steamship; disheartened by the ill-success of a trip to France he committed suicide at Bardstown, Kentucky.

Fitzgerald, Edward, Lord, 1768-1798. A noble Irishman, son of the Duke of Leinster. He was an enthusiastic patriot, and joined the society of United Irishmen, and was leader in the "rising" of 1798. Arrested on a charge of treason, he died while awaiting trial.

Flaminius, Caius, . . . -217 B.C. Roman general and consul.

Flaminius, Titus Quintius, 280-174 B.C. Roman general and consul.

Flammariion, Camille, 1842- . . . A French astronomer, writer on descriptive astronomy, and "astronomical novelist"; born in Montigny-le-Roi, Haute Marne, France.

Flandrin (non-dran'), Jean Hippolite, 1809-1864. A French painter; born in Lyons, France. Among his chief works are the fine series of frescoes in the churches of St. Germain-des-Près and St. Vincent de Paul, Paris, which are reckoned among the masterpieces of modern painting. He died in Rome, Italy.

Flaxman, John, 1755-1826. An English sculptor and draughtsman; born in York, England. The monuments to Nelson and Howe, in St. Paul's are by his hand. One of his finest productions is the "Shield of Achilles." He died in London.

Flint, Austin, 1812-1886. An American physician; born in Petersham, Mass.; he was the author of numerous text-books, clinical reports, and medical papers. He died in New York city.

Flotow, Frederick Ferdinand Adolphus von, 1812-1883. German composer of operas; his best known work is "Martha."

Flourens (floo-ron'), Marie Jean Pierre, 1794-1867. A French physiologist; in 1840 he was elected member of the French Academy; in 1846 was made a peer of France and in 1855 professor in the College of France. He was promoted grand officer of the Legion of Honor, and made member of the municipal Council of Paris in 1864. He died in Montgeron, near Paris.

Flugel, Johann Gottfried, 1788-1855. A German lexicographer. He spent many years in the United States in business, diplomatic, and official occupations. He died in Leipzig.

Foley, John Henry, 1818-1874. An Irish sculptor; born in Dublin. The most popular of his works is a statue of Seldon placed in the new palace of Westminster, considered his masterpiece. He died in Hampstead, near London, England.

Fontana, Domenico, 1543-1607. An Italian architect. Under Pope Sixtus V. he erected the Egyptian Obelisk in front of St. Peter's, Rome, 1586, and later built the Lateran palace, the Vatican library, and the Royal palace at Naples.

Footo, Andrew Hull, 1806-1863. An American naval officer; born in New Haven, Conn. At the China station in 1856, when the Chinese and English were at war, he exerted himself to protect American property, and was fired upon by the Celestials. His demand for an apology was refused and he stormed and captured four Chinese forts. In 1861 he commanded the expedition against Forts Henry and Donelson on the Tennessee and Cumberland rivers, and directed the attack on Island No. 10. In 1862 he was promoted rear-admiral, and in 1863 was ordered to take command of the South Atlantic Squadron, but died in New York while preparing to join his flagship.

Forney, John Weiss, 1817-1881. An American journalist; born in Lancaster, Pa.; clerk of the National House of Representatives from 1851 to 1855, and secretary of the United States Senate from 1861 to 1868. He was connected with several papers in Philadelphia and Washington. He died in Philadelphia, Pa.

Forrest, Edwin, 1806-1872. An American actor; born in Philadelphia, Pa. He played with remarkable success in Europe and the United States; in 1871 retired from the stage. He died in Philadelphia.

Foster, John Watson, 1836- . . . An American diplomatist; born in Pike county, Ind.; was graduated at the Indiana State University in 1855; studied law, and was admitted to the bar. After the Civil War, during which he served with distinction, he was editor of the Evansville *Daily Journal* and postmaster of that city; minister to Mexico from 1873-1880, to Russia in 1880-1881, and to Spain from 1883-1885; was special commissioner to

negotiate reciprocity treaties with Spain, Germany, Brazil, and the West Indies, in 1891; United States Secretary of State in 1892-1893. Subsequently he was agent before the Bering Sea Arbitration Tribunal at Paris; participated in the peace negotiations with Japan, and in 1898 served as a member of the Anglo-Canadian Commission.

Foster, Stephen Collins, 1826-1864. An American song writer; born near Pittsburg, Pa. He composed the music and wrote the words of over 175 popular songs and melodies. Died in New York city.

Fouche (foo-shay'), Joseph, Duke of Otranto, 1754-1820. Born at Pellerin; voted for the death of Louis XVI.; advised Napoleon to abdicate in 1814 and again after Waterloo; served under Louis XVIII. for a time but was obliged at length to quit France for good; died at Trieste.

Fouquier-Tinville (foo-ke-ai'tang-veel'), Antoine Quentin, 1747-1795. A bloodthirsty French Jacobin; was public accuser before Robespierre's Revolutionary Tribunal, and gloated over the death of thousands of innocent victims; sentenced to the same fate, he is said to have died bravely.

Fourier (foo'-re-ai), Francois Marie Charles, 1772-1837. A French social economist. At first in trade, then in the army. After seeing a cargo of rice thrown into the sea to raise its price he was led to attempt a reform abolishing the competitive system, by means of associated production and life in "phalansteries." He died in Paris.

Fourier, Jean Baptiste Joseph, Baron, 1768-1830. A French mathematician. He was an active Jacobin during the French Revolution. His later energies were divorced from politics and given up to science. He died in Paris.

Fowler, Orson Squire, 1809-1887. An American phrenologist; born in Cohocton, Steuben county, N. Y.; was graduated at Amherst College in 1834, and opened a phrenological office in New York in 1835. He died near Sharon Station, Conn.

Fox, Charles James, 1749-1806. English orator and statesman; entered Parliament in 1768 as a Tory, but joined the opposition in 1773, and became leader of the Whigs, opposing the policy of Pitt.

Fox, George, 1624-1690. Born in Leicestershire, Eng.; founder of the society of Friends, or Quakers.

Fra Diavolo, 1760-1806. Chief of a band of Italian brigands; born in Calabria; leader in sundry Italian insurrections; was hanged at Naples for treachery, in spite of remonstrances from England; gave name to an opera by Auber, but only the name.

Francesca da Rimini. A beautiful Italian lady of the 13th century, whose pathetic love story finds a place in Dante's "Inferno"; she was betrothed by her father, the Lord of Ravenna, to Giovanni di Rimini, but her affections were engaged by Paolo, his brother; the lovers were found together by Giovanni and murdered by him.

Francis, Jose Gaspar Rodriguez, 1757-1840. Dictator of Paraguay; born in Asuncion; began his public career as a barrister. In 1811, soon after the revolution in the Spanish possessions of South America became general, was appointed secretary to the independent junta of Paraguay; in 1813, he was appointed consul of the republic, with Yegros for his colleague. In 1817 unlimited despotic authority was conferred upon him, which he exercised during the remainder of his life. He died in Asuncion.

Francis I., 1494-1547. King of France; born in Cognac, France; succeeded to the throne in 1515, on the death of Louis XII., who died without male issue. He died at the Chateau de Rambouillet, and was succeeded by his son, Henry II.

Francis II., 1544-1560. King of France; the eldest son of Henry II. and his queen Catherine de Medici, born in Fontainebleau. He succeeded his father in July, 1559, having in the preceding year married Mary Stuart, daughter of James V. of Scotland.

Francis de Borgia, Saint, 1510-1572. Duke of Gandia and viceroy of Catalonia; joined the Society of Jesus and became general of the order.

Francis de Paula, Saint, 1416-1507. Italian Franciscan monk; founded the order Frates Minimi.

Francis de Sales, Saint, 1567-1622. Bishop of Geneva; born of a noble Savoyard family, in the chateau of Sales, near Geneva. In 1610 he founded the Order of the Visitation, of which the first directress was his friend, Madame de Chantal; was canonized by Pope Alexander VII. in 1665.

Francis Saint, or Francis of Assisi, 1182-1226. Founder of the Order of Franciscan friars; born in

Assisi. His proper name was Giovanni Bernardone, but he afterward received the name of Francis. He died in Assisi; was canonized by Pope Gregory IX. in 1228.

Francis, Philip, Sir, 1740-1818. An Irish-English statesman, the best accredited of the candidates for authorship of the "Junius" letters; born in Dublin.

Franklin, Benjamin, 1706-1790. American statesman and philosopher; born in Boston; son of a tallow chandler; youngest of a family of seventeen children; learned the trade of a printer and studied diligently; removed to Philadelphia, where he acquired the *Pennsylvania Gazette*; began the publication of *Poor Richard's Almanac* in 1732; discovered the identity of lightning and electricity in 1752, by means of a kite; Franklin occupied many positions of public trust and was the recipient of many honors.

Franklin, Sir John, 1786-1847. English Arctic explorer.

Frans, Robert, 1815-1892. A German musician; born in Halle, Prussia. He was famous for his songs, which were of a peculiarly lyric beauty. His first published composition appeared in 1843. His later years were spent in editing the works of Bach, Handel, and others.

Fraunhofer (frown-hof-er), Joseph von, 1787-1826. A German optician; born in Bavaria; his name is associated with many discoveries in optical science as well as inventions and improvements in the optician's art; but he is chiefly remembered for his discovery of the dark lines in the solar spectrum, since called after him the Fraunhofer lines.

Frederick I. (Barbarossa), 1121-1190. Emperor of Germany; crowned by Pope Adrian IV.; reduced Milan in 1162, but was defeated by the Lombards near Legnano in 1176; joined the third crusade in 1189 with one hundred thousand men, and defeated the Turks at Iconium; died in the Holy Land. **Frederick II., 1194-1250.** Opposed by the Guelphs and the pope in his project to unite Italy and Germany in one empire; began a crusade against the Moslems in 1227, but turned back, and was excommunicated by Pope Gregory IX.; resumed the crusade in 1229, captured Jerusalem, and made peace with the pope; defeated the Guelphs at Cortenuova, 1237, and renewed war with the pope.

Frederick William (the Great Elector), 1620-1688. Elector of Brandenburg; next to Frederick the Great the chief founder of the Prussian monarchy.

Frederick I., 1657-1713. First king of Prussia. **Frederick II. (Frederick the Great), 1712-1786.** Subjected to inhuman treatment in youth by his father, he gave but little promise of his future greatness; ascended the Prussian throne in 1740, and invaded Silesia, most of which was ceded to him by Maria Theresa in 1742; an alliance having been formed against him by Austria, Russia, France, Saxony, and Sweden, he began the Seven Years' War in 1756 by invading Saxony; gained a great victory at Prague in 1757; but was defeated at Kolin soon afterward; in the same year he defeated a French army twice as large as his own at Rossbach, and won a brilliant and decisive victory over the Austrians at Leuthen; in 1759 he was defeated at Kunersdorf, and in 1760 Berlin was captured by the allies, but he gained the victories of Lignitz and Torgau, and peace was made in 1763, Prussian Poland being added to Frederick's dominions. Frederick was a voluminous writer, and a friend of Voltaire, who spent several years at his court.

Frellinghuysen, Frederick Theodore, 1817-1885. An American statesman; born in Millstone, N. J.; became an eminent lawyer; United States Senator in 1871-1877, and Secretary of State under President Arthur in 1881-1885. He died in Newark, N. J.

Fremont, John Charles, 1830-1890. An American politician, explorer and general; Republican candidate for the presidency, 1856.

French, Daniel Chester, 1850- . . . An American sculptor; born in Exeter, N. H.; was educated in Boston and in Florence, Italy; had studios in Boston and Concord, N. H., and in New York city.

Fresnel (fraz-nail'), Augustin Jean, 1788-1827. A French physicist; born in Broglie, France; investigated the polarization of light; proved by his experiments the wave theory of light. The result of his great discovery is shown in the system of lens lighting apparatus, which has changed the mode of lighthouse illumination over the whole world. He died near Paris.

Frobisher, Martin, Sir, 1535?-1594. An English naval officer and navigator; he sought a northwest passage of North America.

Fröbel (froy-bel'), Friedrich, 1782-1852. A German educator; he was for some time associated with Pestalozzi, but evolved a theory of education of his own. To

explain it he wrote "The Education of Man," a work of deep and original thought; he opened the first kindergarten or children's garden at Blankenburg, Thuringia, in 1830; he died in Marienthal.

Fry, Mrs. Elizabeth, 1780-1845. English philanthropist; born at Earham; third daughter of John Gurney, the Quaker banker; devoted her life to prison reform and the reform of criminals, as well as other benevolent enterprises.

Fulton, Robert, 1765-1815. American engineer and inventor; born in Pennsylvania; after spending some years in London as an artist, he turned his attention to civil engineering and inland navigation; went to Paris, there he invented a submarine torpedo; while in that city in 1803, with the assistance of Robert Livingston, successfully applied steam navigation; in 1806 he built the steamer *Clermont* which made regular trips between Albany and New York at a speed of five miles an hour; although he spent a large amount of money on his invention, the patent did not prove of pecuniary value to him.

Fuseli (fu'-ze-li), John H., 1741-1825. Swiss historical painter.

Gadsden, Christopher, 1724-1805. An American patriot; born in Charleston, S. C.; was a member of the first Colonial Congress, which convened in New York in October, 1765; was also a member of the first Continental Congress, which assembled in Philadelphia in 1774. He joined the American army as colonel at the beginning of the Revolution; was promoted brigadier-general.

Gadsden, James, 1788-1858. An American diplomatist; born in Charleston, S. C.; served with distinction in the War of 1812; and afterward took part in the campaign against the Seminole Indians. He was appointed minister to Mexico in 1853, and negotiated the Gadsden Purchase which fixed a new boundary between Mexico and the United States. He died in Charleston, S. C.

Gage, Thomas, 1721-1787. A British general; he fought with the British troops in America in 1755, 1758, and 1760; was commander-in-chief in North America in 1775, and returned to England the same year; he was promoted general in 1782. The battles of Lexington and Bunker Hill took place during his generalship.

Gagern (gaw-ger-n), Heinrich Wilhelm August, Baron of, 1799-1880. A German statesman; born in Bayreuth, Bavaria; in 1821 entered political life under the government of Grand-ducal Hesse; in 1850 he served as major in the Schleswig-Holstein War; in 1852 he removed to Heidelberg; he died in Darmstadt.

Gainsborough (gainz-bro), Thomas, 1727-1788. An eminent English landscape painter.

Galba, Servius Sulpicius, 3 B. C.-69 A. D. Roman emperor; successor of Nero; after his election he soon made himself unpopular by cruelty and avarice, and was slain in the forum.

Galen, 131-205? Greek physician, medical writer and philosopher; lived at Rome for a few years; his works remained authority until the fifteenth century.

Galilei (gah-le-lai'e), Galileo (Galileo), 1564-1642. Italian astronomer; discovered about 1682 the isochronism of the vibrations of a pendulum, and in 1590 the law by which the velocity of falling bodies is accelerated; adopted in astronomy the system of Copernicus; constructed his wonderful telescope, 1609; through it he discovered the satellites of Jupiter, and was enabled to explore the surface of the moon and view the phases of Venus; he also ascertained that the "Milky Way" is composed of myriads of stars; in 1632 he produced his "Dialogues on the Ptolemaic and Copernican Systems," but was compelled by the Inquisition to abjure the theory of the motion of the earth; he was detained in prison for a brief time, but it does not appear that he was severely treated. Later he was allowed to pursue his studies until prevented by blindness.

Gallitzin, Gallitzin, Galyzin, or Golyzin. One of the most powerful and distinguished Russian families, whose members have been equally prominent in war and diplomacy from the sixteenth century downward. **Prince Dimitri Alexeevitch, 1735-1808.** A Russian diplomat and statesman; was ambassador to the court of France in 1765, and to The Hague in 1773. He was in correspondence with Voltaire and other literary men of his day and was the author of several works relating to geology. He died in Brunswick, Germany. **Dimitri Augustine, 1770-1841.** Son of the foregoing; born in The Hague; became a Roman Catholic in his seventeenth year, and was ordained a priest in the United States by Bishop Carroll of Baltimore in 1796; he declined to

return to Russia on his father's death, and as a Catholic priest was adjudged to have lost his right of inheritance. He wrote various controversial works. He died in Loretta, Pa.

Gall, Franz Joseph, 1758-1823. Founder of phrenology; born in Tiefenbrunn, Baden, Germany. He studied medicine at Strassburg and Vienna and settled in the latter city in 1785 as a physician. With Spurzheim, who became his associate in 1804, he quitted Vienna in 1805, and began a lecturing tour through Germany, Holland, Sweden, and Switzerland. In 1807 he settled as a physician in Paris, where he resided till his death.

Galland (gal-lon'), Antoine, 1646-1715. French Orientalist; professor of Arabic in the College of France; was the first to translate the "Arabian Nights" into any European tongue.

Gallatin, Albert, 1761-1849. American statesman; born in Geneva, Switzerland; in 1793 he was elected to the United States Senate from Pennsylvania, but was declared ineligible. From 1795 to 1801 he served in the House of Representatives, and from 1801 to 1813 he was Secretary of the Treasury, in which post he showed himself one of the first financiers of his day. From 1816 to 1823 he was minister at Paris, and in 1826 he was sent to London as ambassador extraordinary. On his return in 1828 he settled in New York, and devoted much of his time to literature.

Galle (gaul'eh), Johann Gottfried, 1812- . . . A German astronomer; born in Pabsthaus, Prussia; studied natural sciences and mathematics. He was the first to observe the planet Neptune.

Galton, Francis, 1822- . . . An English scientist. Having traveled in North Africa, he explored in 1850 lands hitherto unknown in South Africa, publishing his experiences in his "Narrative of an explorer in Tropical South Africa." Later he specially devoted himself to the problem of heredity.

Galvani, Luigi, 1737-1798. An Italian anatomist; born in Bologna, Italy. He studied theology and subsequently medicine at the university there, and was elected professor of anatomy. Galvani owes the wide celebrity attached to his name to his discoveries in animal electricity. He died in Bologna.

Gama, Vasco, de, 1460-1524. A Portuguese navigator; he was the first to double the Cape of Good Hope, 1497.

Gambetta, Leon, 1838-1882. A French lawyer and statesman; escaped from Paris, 1870, in a balloon, and continued to direct the war with Germany from Tours.

Gambier, James Lord, 1756-1833. British admiral; born in the Bahamas; was made rear-admiral, and in 1799 vice-admiral; for his gallant conduct as commander of the English fleet at the bombardment of Copenhagen he was made a baron; on the accession of William IV. he was made admiral of the fleet.

Garcia (gar-the'ah), Calixto, 1836-1898. A Cuban patriot; born in Holguin, Cuba, and took up the profession of law. In 1893 he organized the revolution which has since been called the "Ten Years' War"; was appointed a brigadier-general and subsequently commander-in-chief of the Cuban army. In 1896 he led an unsuccessful filibustering expedition to Cuba. Later, while planning a second expedition, he was arrested by United States government officers, gave bail, which he forfeited, and again landed in Cuba. When Santiago was taken by the Americans in 1898 he withdrew from the Cuban army. Subsequently, however, he accepted the new conditions. He died in Washington, D. C.

Garcia, Manuel, 1755-1832. A noted singer and composer; born at Seville; he spent his closing years in Paris as a teacher of singing, his voice being greatly impaired by age as well as fatigue; his eldest daughter was the celebrated Madame Malibran.

Garfield, James Abram, 1831-1881. Twentieth president of the United States; born in Ohio; worked on a farm in boyhood, and learned the trade of a carpenter; was also driver and helmsman of a canal boat; graduated at Williams College in 1856; appointed Professor of Latin and Greek at Hiram College, Ohio, and chosen President of that institution in 1858; married Miss Lucretia Randolph, and occasionally acted as a Campbellite minister; elected to the State Senate, 1859, and in 1861 was chosen colonel of an Ohio regiment; promoted to the rank of brigadier-general; elected to Congress, 1863, and remained in that body until 1880, when he was made senator; nominated for the presidency by the Republican party in 1880, and elected; shot by Charles J. Guiteau, in Washington, July 2, 1881, and died on September 19 of same year.

Garibaldi, Giuseppe, Gen., 1807-1881. A distin-

guished Italian patriot; born at Nice; died at Caprera. He was an exile for several years, residing in New York city and vicinity.

Garland, Augustus Hill, 1832-1899. An American lawyer; born near Covington, Tenn. He opposed secession as a policy, but was afterward elected to the Confederate Senate, which office he held till the close of the war; in 1874 was elected Governor under the new constitution of Arkansas. In 1885 he became Attorney-General in the cabinet of President Cleveland. He died in Washington, D. C.

Garrick, David, 1717-1779. A distinguished English tragedian; born at Hereford.

Garrison, William Lloyd, 1806-1879. An eminent American journalist and anti-slavery agitator; born in Massachusetts.

Gassen'di, or Gassend, Pierre, 1592-1655. A French philosopher and mathematician. Kepler and Galileo were numbered among his friends. His "Astronomical Institute" is a clear and connected representation of the state of the science in his own day; in his "Lives of Tycho Brahe, Copernicus, and other Astronomers," he gives not only a masterly account of the lives of these men, but likewise a complete history of astronomy down to his own time. He died in Paris.

Gates, Horatio, 1728-1806. American Revolutionary general; born in England; captured Burgoyne's army at Saratoga.

Gatling, Richard Jordan, 1818-1903. An American inventor; born in Hertford county, N. C. In 1861 he conceived the idea of the revolving battery gun which bears his name. In 1865 he improved his invention, and in the year following, after satisfactory trial, it was adopted into the United States service. It was used by the Canadian government in putting down the half-breed rebellion. It has also been adopted by several European governments.

Gauss (gowss), Carl Friedrich, 1777-1855. A distinguished German mathematician; born at Brunswick.

Gavar'ni, Paul, 1801-1866. The *nom de plume* of Sulpice Guillaume Chevalier, caricaturist, born in Paris; most of his best work appeared in *Le Charivari*, but some of his bitterest and most earnest pictures, the fruit of a visit to London, appeared in *L'Illustration*; he also illustrated Balzac's novels, and Sue's "Wandering Jew."

Gavazzi (ga-vat'zee), Alessandro, 1809-1889. An Italian preacher and reformer; born at Bologna; one of the most energetic supporters of Pius IX. in his liberal policy; he afterwards withdrew his allegiance, joined the Revolution of 1848, and ultimately fled to England on the occupation of Rome by the French.

Gay-Lussac (gay-lu-sak'), Joseph Louis, 1778-1850. French chemist and physicist; employed himself in chemical and physical research, in connection with which he made two balloon ascents; became Professor of Chemistry at the Paris Polytechnic School; was elected to a similar chair at the Jardin des Plantes; created a peer of France; became chief assayer to the Mint; his name is associated with many notable discoveries in chemistry and physics, *e. g.* the law of volumes, isolation of cyanogen, etc.

Gegenbaur, (gay/gen-bower), Karl, 1826- . . . A German anatomist. In 1855 he was called to a medical professorship at Jena, but from 1858 to 1873 he taught principally anatomy. He removed to Heidelberg in 1873. His fame rests on his "Outline of Comparative Anatomy."

Geikie, (gee'ke), Sir Archibald, 1835- . . . A Scottish geologist; born in Edinburgh, Scotland; was Murchison Professor of Geology in Edinburgh University; resigned to become director-general to the survey of the United Kingdom, being at the same time placed at the head of the Museum of Practical Geology, London.

Genghis Khan (jain'gis-kan), 1162-1227. Mogul conqueror; subdued China and Persia.

Gen'serie, 406?-477. King of the Vandals; invaded Africa 429; defeated the Romans in numerous battles; captured Carthage, 439; captured and sacked Rome, 455; defeated the navy of the Emperor Marjorian, 457.

Gentz, Friedrich von, 1764-1832. A German politician and writer; born in Breslau, Prussia; died in Vienna.

Genung, John Franklin, 1850- . . . An American educator; born in Willseyville, N. Y.; was graduated in Union College in 1870 and at the Rochester Theological Seminary in 1875; became Professor of Rhetoric in Amherst College; has written a number of excellent text-books.

Geoffroy (jel'froy), St. Hilaire, Etienne, 1772-1844.

A French naturalist; as a member of the Egyptian expedition in 1798 he founded the Institute of Cairo; in 1807 he was made a member of the Academy, and in 1809 Professor of Zoology at the Faculty of Sciences. He devoted himself especially to the philosophy of natural history; he died in Paris.

George I. (Lewis), 1660-1727. King of Great Britain. **George II. (Augustus), 1683-1760.** Defeated the French at Dettingen in 1743; Charles Edward Stuart was defeated at Culloden, 1746, by the Duke of Cumberland, and the latter part of the reign of George II. was marked by victories over the French in Canada, in India, and on the ocean. **George III. (William Frederick), 1738-1820.** Arbitrary and ignorant, and through his obstinacy lost the American colonies; became insane in 1810. **George IV. (Augustus Frederick), 1762-1830.** "The first gentleman of Europe"; led a dissipated life and incurred an immense debt; married, in 1785, Mrs. Fitzherbert; she being a Roman Catholic, the marriage was illegal; his father refusing to pay his debts unless he contracted a regular marriage, he was induced, 1795, to marry his cousin, whom he regarded with great dislike, a separation being the result; became regent, 1811; took little interest in public affairs; one year before his death an act was passed relieving Roman Catholics from political disabilities.

George, Saint. Flourished third century; bishop of Alexandria; patron saint of England; to him is attributed the destruction of a terrible dragon.

George, Henry, 1839-1886. American author and economist, and advocate of the single tax.

Gexard (zhay-rar') Etienne Maurice, Comte, 1773-1855. Marshal of France; at Austerlitz he won his brigade, and subsequently fought at Jena, Erfurt, and Wagram; he joined Napoleon after his flight from Elba, and was wounded at Wavre; on the downfall of the emperor he quitted France, but returned in 1817; he was War Minister under Louis Philippe.

Gerard, Francois Pascal Simon, Baron, 1770-1837. Painter; born at Rome, of French and Italian parentage; in 1795 his "Blind Belshazzar" brought him to the front, while subsequent work as a portrait painter raised him above all his contemporaries; his masterpiece, "Entry of Henri IV. into Paris," brought him a barony at the hands of Louis XVIII.; his historical paintings, characterized by minute accuracy of detail, include "Napoleon in his Coronation Robes" and "Battle of Austerlitz."

Gerhardt, Karl Friedrich, 1816-1886. Chemist; born at Strasburg; made experiments along with Cahours on essential oils, which bore fruit in an important treatise; he received the chair of Chemistry at Montpellier, but returned to Paris four years later; there he matured and published his theories of types, homologous series, etc., which have greatly influenced the science of chemistry.

Gerome (zhay-rome'), Jean Leon, 1824-1904. Celebrated French painter; born at Vesoul; he studied at Paris under Paul Delaroche, with whom he subsequently traveled in Italy; among his most famous pictures, all characterized by vivid coloring and strong dramatic effect, are "The Age of Augustus and the Birth of Christ," "Roman Gladiators before Caesar," and "Cleopatra and Caesar."

Gerry, Elbridge, 1744-1814. American Revolutionary statesman; signer of the Declaration of Independence; Governor of Massachusetts, 1810; Vice-President, 1813.

Gese'nins, 1786-1842. An eminent German Hebraist and Biblical scholar; his labors form an epoch in the study of the Hebrew Scriptures; was thirty years professor of theology in Halle; produced a Hebrew grammar and lexicon.

Ges'ner, Conrad von, 1516-1565. A Swiss naturalist; born in Zurich, Switzerland. He collected more than 500 plants undescribed by the ancients, and appears to have been the first who made the great step toward a scientific classification of distinguishing genera by the fructification. He died in Zurich, Switzerland.

Ghiberti (ge-bair'te), Lorenzo, 1374-1455. Italian sculptor and designer; born at Florence; his most famous achievement, which immortalized his name, was the execution of two doorways with bas-relief designs, in the baptistery at Florence; he spent fifty years at this work, and so noble were the designs and so perfect the execution that Michael Angelo declared them fit to be the gates of Paradise.

Gibbons, James, 1834- An American clergyman; born in Baltimore, Md.; first appointed assistant in St. Patrick's Cathedral, Baltimore; later he became the private secretary of Archbishop Spalding, and chancellor of the diocese. In 1868 he was made vicar-apostolic of North Carolina, with the rank of bishop; and in 1877 became Archbishop of Baltimore. He was elevated to the cardinalate in 1886, being the second Roman Catho-

lic in the United States to receive that promotion. He went to Rome in the summer of 1903, and took part in the election of Pius X. as successor to Leo XIII.

Gibson, John, 1790-1866. Sculptor; born at Gyffin, near Conway, Wales; he took to carving in wood and stone, and supported by Roscoe became a pupil of Canova and afterwards of Thorwaldsen in Rome; his best works are "Theseus and the Robber," "Amazon Thrown from Her Horse," statues of George Stephenson, Peel, and Queen Victoria.

Giddings, Joshua Reed, 1795-1864. An American statesman; born in Tioga Point, Pa.; elected a member of Congress in 1838, where he was prominent as an opponent of slavery. In 1861 he was appointed Consul-General to British North America. He died in Montreal.

Gifford, Robert Swain, 1840-1905. An American artist; born in Naushon Island, Mass.; studied with Albert Van Beest in Rotterdam, Holland; traveled through California and Oregon in 1869, and in Europe and Africa in 1870-1871.

Gifford, Sanford Robinson, 1823-1880. An American artist; born in Greenfield, N. Y.; died in New York city.

Gilbert, Sir John, 1817-1897. English artist; was for long an illustrator of books, among the number an edition of Shakespeare; he was a Chevalier of the Legion of Honor.

Giotto (got'to), 1266-1337. A great Italian painter; born at a village near Florence; was a shepherd's boy; while tending his flock and drawing pictures of his sheep, it is said he was discovered by Cimabue, who took him home and made a pupil of him. That he was a pupil of Cimabue is now discredited. Ruskin says of him: "His special character among the great painters of Italy was that he was a practical person; what others dreamed of he did; he could work in mosaic, he could work in marble, and paint; he could build. . . . built the Campanile of the Duomo, because he was then the best master of sculpture, painting, and architecture in Florence, and supposed in such business to be without a superior in the world."

Girard, Stephen, 1750-1831. An American philanthropist; born in France; died in Philadelphia; he made a large fortune as a merchant in Philadelphia, and at his death left \$5,260,000 to found a college for orphan boys, to be conducted on strictly secular principles. The building is one of the finest in the country.

Giulio Romano (good'le-o-ro-mah'no) (properly Giulio Pippi di Giannuzzi), 1492-1546. An Italian artist; born in Rome; assisted Raphael in the execution of several of his finest works.

Gladstone, William Ewart, 1809-1898. A British statesman; born in Liverpool; his political career began in 1833, and up to the time of his death he held a prominent, and often leading, place in public affairs. He brought about the gradual enfranchisement of the common people of England, and he almost succeeded in gaining home rule for Ireland. He was lacking in foresight, as he showed in his public assertion that the United States could not subdue the Confederacy, but he always meant well, and his mistakes were never of the heart. He died at Hawarden Castle.

Gluck (glook), Christoph Willibald, 1714-1787. A German composer; he conjoined with himself in his labors the poet Ranieri di Calzabigi, and his opera, "Orpheus and Eurydice," was received with tumults of applause. In 1774 he went to Paris, and presented there successively several masterpieces. He died in Vienna.

Godfrey (god'-fre) of Bouillon (boo-yon'), 1058-1100. The principal chief of the first crusade. He captured Jerusalem, 1099.

Godiva (go-de'va). Flourished 11th century. The wife of Leofric, Earl of Mercia and Lord of Coventry in the reign of Edward the Confessor. Tradition says that, in 1040, she rode on her palfrey naked through the town of Coventry on her husband's promise that if she would do so he would relieve the inhabitants of certain exactions which bore heavily on them. She had first proclaimed that no one should leave his house before noon, that all windows and other apertures in the houses should be closed, and that no one should even look out till noon was past. Only one person, "Peeping Tom," the story says, attempted to look out, and he was immediately struck blind.

Godkin, Edwin Laurence, 1831-1902. An American journalist and essayist; born in Moyné, Ireland; he graduated from Queen's College, and came to the United States in early manhood. After 1865 he was prominent in journalism, and especially as editor of the *Evening Post*; he had a trenchant and even a bitter style, and provoked vigorous antagonism.

Go'mez, Maximo, 1826-1905. A Cuban military officer; born in Baní, San Domingo. In 1868 he joined the Cuban insurrection known as the Ten Years' War. He aided in the capture of Juguani, Bayamo, Tunas, and Holguín, and was a leading actor in many other successful engagements; was promoted major-general and later succeeded General Agramonte as commander-in-chief. At the beginning of the war of 1896-1898 he again took up arms with the Cubans and fought with marked distinction till the Americans occupied Cuba.

Gomez, Sebastiano, 1616-1690. Spanish painter; a slave of Murillo, who liberated him and took him into his studio.

Gonsal'vo, or Gonzalo of Cordova, Hernandez de Aguilár, 1458-1515. A Spanish general, called "The Great Captain"; born near Cordova, Spain. He first distinguished himself in the great war of Ferdinand and Isabella with the Moors, which ended with the conquest of Granada in 1492. When Louis XII. renewed the invasion of Italy, Gonsalvo took command there, expelled the French, established the Spanish rule, and was named viceroy of Naples. Through the jealousy of Ferdinand, and the calumnies of the courtiers, he was deprived of his office in 1507, when he retired to Granada.

Gonzalez, Manuel, 1833-1893. A Mexican military officer; fought with distinction in the war against the French and Maximilian. He participated with Díaz in various revolts; was his secretary of war in 1878-1880, and succeeded him as president in 1880. After his retirement he was governor of Guanajuato. He died in Mexico city.

Goodyear, Charles, 1800-1860. An American inventor; born in New Haven, Conn. He failed as an iron manufacturer in 1830, but in 1834 turned his attention to India-rubber, the manufactured products of which had hitherto proved failures because of their liability to soften in the heat of summer. Amid poverty and ridicule, sometimes in prison for debt, he patiently pursued the experiments which, after he had obtained a fresh idea from use of sulphur, ended, in 1844, in the issue of his patent for vulcanized rubber. This process he afterward perfected, discovering new uses to which his product could be applied, till it required sixty patents to secure his inventions. He died in New York city.

Gordon, Charles George (called "Chinese Gordon" and "Gordon Pasha"), 1833-1885. An English soldier; born in Woolwich, England. From 1877 to 1879 he was governor of the Sudan under the khedive. In 1884 he was sent to withdraw the garrisons shut up in the Sudan by the insurgent Mahdi. He was shut up in Khartum by the rebels, and gallantly held that town for ten months. A British expeditionary force under Lord Wolseley was dispatched for his relief, an advanced corps of which sighted Khartum January 28, 1885, to find that the town had been treacherously betrayed into the hands of the Mahdi two days before, and Gordon had been murdered.

Gortchakoff (*gor-cha-kof*), Prince Alexander Michailovitch, 1798-1883. A Russian statesman; born in St. Petersburg. As Russian minister of Foreign Affairs he declined to associate himself with France and Great Britain in their unfriendly attitude toward the United States. He was appointed Chancellor in July, 1863. From this time till the ascendancy of Bismarck he was the most powerful minister in Europe. After his retirement he left Russia for Baden-Baden, where he died.

Gough, John Bartholomew, 1817-1886. A temperance orator; born in Kent, England; bred a bookbinder; early a victim to intemperance; took the pledge in 1842, and became an eloquent and powerful advocate of the temperance cause both in England and America.

Goujon (*goo-zhon*), Jean, 1515?-1572. A French sculptor and architect; born in Paris; he was the author of what is considered the masterpiece of French sculpture, the "Huntress Diana," now in the Louvre collection.

Gould, Jay, 1836-1892. An American financier; born in Roxbury, N. Y.; was brought up on his father's farm; attended Hobart Academy a short time, acquired a taste for mathematics and surveying; made surveys of Ulster, Albany, and Delaware counties, and began his railroad career directly after the panic of 1857; invested in bonds of the Rutland and Washington Railroad, and became president, treasurer, and superintendent of the road; removed to New York, opened a broker's office, and began dealing in Erie stocks and bonds; invested heavily in the various Pacific railroads, secured control of a number of important lines, built branches, and effected combinations which resulted in the establishment of what is

known as the "Gould System"; he died in New York city, leaving property valued at \$72,000,000.

Gounod (*goo-no*), Charles François, 1818-1893. A French composer; born in Paris; in 1856 he produced "Faust," his chief work, which attained European popularity, and raised its composer to the foremost rank of contemporary musicians; from 1870 to 1875 he resided in England; he died in Paris, France.

Gracchus, Caius Sempronius, 159-121 B.C. Roman statesman.

Gracchus, Tiberius Sempronius, 163-133 B.C. Brother of the preceding. Roman statesman.

Graham, John, Viscount Dundee (Claverhouse), 1650?-1689. Scottish officer; noted for merciless severity toward the Covenanters.

Grant, Ulysses Simpson, 1822-1885. Eighteenth president of the United States; born in Ohio; graduated at West Point, 1843; served in Mexico; became a captain in 1853; resigned in 1854, and after passing some time at St. Louis removed to Galena, Ill., in 1859, and engaged in business; in 1861 he was made mustering officer by the governor of Illinois, but soon after he was chosen colonel of the Twenty-first Illinois Volunteers, and in August of same year was made brigadier-general; made commander-in-chief of the Union armies in March, 1864; elected to the presidency in 1868, and again in 1872, and after the expiration of his second term he traveled extensively in Europe and Asia.

Grattan, Henry, 1746-1820. Irish orator and statesman.

Gray, Asa, 1810-1888. An American botanist; born in Paris, Oneida county, N. Y. In 1842 he became Fisher Professor of Natural History at Harvard. In 1873 he retired from the chair, but still retained charge of the great herbarium he had presented to the university in 1864, and in 1874 he succeeded Agassiz as a regent of the Smithsonian Institution. He ranked among the leading botanists of his age, and became an influential supporter of the Darwinian theories of evolution. He died in Cambridge, Mass.

Greeley, Horace, 1811-1872. American journalist; born in New Hampshire; learned the printers' trade and worked as a journeyman printer in New York for one year; founded the New York Tribune, 1841; a staunch Whig and Republican, he favored Fremont for the presidency in 1856 and Lincoln in 1860; accepted the Democratic nomination in 1872, but was defeated by Grant.

Greene, Nathaniel, General, 1742-1786. An American patriot; born in Rhode Island. He ranked next to General Washington in the Revolutionary struggle.

Greenough (*green-oh*), Horatio, 1805-1852. An American sculptor; born in Boston, Mass. He studied for four years at Harvard, and from 1825 spent the greater part of his life in Italy. His principal work is the colossal statue of Washington in front of the National Capitol. He died in Somerville, Mass.

Gregory VII., Hildebrand, 1020?-1085. Son of a carpenter; born in Soano, Tuscany; he was the friend and counselor of Leo IX. and the four succeeding popes, and on the death of Alexander II. was elected to succeed him in 1073. He obtained confirmation in his election from the Emperor Henry IV., and immediately applied himself zealously to reform simony and the licentiousness of the clergy. In his view, however, marriage, no less than concubinage, was a sin in them. He menaced the Emperor and the King of France, the former without effect. In 1074 he assembled a council, by which it was forbidden the prelates to receive investiture of a layman, and this was the first step in the quarrel with the Emperor, which lasted so many years. Henry, disregarding the papal authority, was summoned to Rome; but he held a diet at Worms and pronounced the deposition of the Pope. To this Gregory replied by procuring the deposition of the Emperor and the election of another, Rudolph of Suabia. Henry now promised submission, and in the early winter of 1077 went with his wife and child to Italy. The Pope was at the castle of Canossa, and there, after keeping the penitent Emperor of Germany three days waiting at the gate, he received him and gave him absolution. The terms imposed on him were intolerable, and he soon broke them, made war on Rudolph, and defeated him, set up a rival pope in Guibert, Archbishop of Ravenna, with the title of Clement III., and after several unsuccessful attempts entered Rome in 1084, had himself crowned emperor by his own pope, and besieged Gregory in San Angelo. Gregory was delivered by Guiscard, and retiring to Salerno died there.

Gregory XIII., Buoncompagni, 1502-1585. A native of Bologna, and succeeded Pope Pius V. in 1572. He was deeply versed in the canon and civil law and had dis-

tinguished himself at the Council of Trent. He ornamented Rome with many fine buildings and fountains; but his pontificate is chiefly memorable for the reformation of the calendar which took place under his auspices and bore his name.

Gregory, Saint, 257-332. Surnamed Illuminator; the founder of the Armenian Church; born in Valarshabad, Armenia. From 302 to 331 he was Patriarch of the Armenian Church, but having resigned the patriarchate in favor of his second son, Aristaces, Gregory in 331 retired to a cave at the foot of Mount Sebu in Upper Armenia, where he died.

Gregory Nazianzen, Saint, 326-390. Bishop of Constantinople; born near Nazianzus, Cappadocia. He excelled all his contemporaries in pulpit eloquence. Many of his works are extant, and consist of orations, letters, and poems.

Gregory of Tours, 538-594. A Frankish historian; born in Arverna (now Clermont), Auvergne, France. He belonged to one of the most distinguished Roman families of Gaul. His fame rests on his "History, or Annals," the chief authority for the history of Gaul in the sixth century. He died in Tours, France.

Gresham, Walter Quinton, 1832-1895. An American jurist; born near Lanesville, Harrison county, Ind.; served in the Civil War, rising to brigadier-general of volunteers; at its close resumed the practice of law, and in 1869 was appointed by President Grant United States District Judge for Indiana; in 1882 was appointed Postmaster-General by President Arthur; in 1884 became Secretary of the Treasury, and later was appointed one of the Judges of the United States Circuit Court. He died in Washington, D. C.

Grevy (Gray-ve), Francois Paul Jules, 1813-1891. A French statesman. Grevy was chosen president of the National Assembly which met in 1871. In 1876, 1877, and 1879 he again represented the Jura in the French Parliament, and in the latter year he was chosen president of the republic by an enormous majority. In 1886 he was re-elected, but on account of a scandal in which his son-in-law was implicated was forced to resign, 1887.

Grey, Lady Jane, 1537-1554. The ill-fated "nine days' queen"; born at Bradgate, Leicestershire; was the daughter of the Duke of Suffolk and the great-granddaughter of Henry VII.; her talents were of a rare order, and sedulously cultivated; she attained to great proficiency in Greek, Latin, and also in modern languages, while she was skilled in all the accomplishments of womanhood; a plot entered into by Suffolk and the Duke of Northumberland, whose son Lady Jane had been forced to espouse at fifteen, brought about her proclamation as Queen in 1553; the attempted usurpation was crushed in ten days, and four months later Lady Jane and her husband were executed.

Grotius (gro'shus), Hugo (De Groot), 1583-1645. A distinguished Dutch jurist and author. His "International Law" is still authority.

Grouchy (groo-she'), Emmanuel, Marquis de, 1766-1847. A French marshal. He refused to march his corps from Wavre to the assistance of Napoleon I. at Waterloo, without orders, and has been charged with treachery.

Guatemozin (gwah-te-mo'zin), 1525. Successor of Montezuma, emperor of Mexico, and the last prince of the Aztec dynasty; was cruelly tortured by order of Cortez, and afterwards put to death.

Gueif, or Guelph. The name of a family which in the eleventh century was well established in Germany. It became the ruling race of several countries. The family still continues in the two lines of Brunswick, the royal in England and the ducal in Germany.

Guido Reni, 1575-1642. Italian painter of the school of Bologna; best known by his masterpiece "Aurora and the Hours" at Rome, painted on a ceiling, and his unfinished "Nativity" at Naples.

Gustavus I. (Gustavus Vasa), 1496-1560. King of Sweden. **Gustavus II. (Gustavus Adolphus), 1594-1632.** Defeated the Polish and Russian armies invading Sweden; became the head of the Protestant league in Germany and defeated Tilly at Leipzig in 1631, and on the banks of the Lech in 1632; at the great battle of Lutzen, Wallenstein now commanding the Imperial army, Gustavus was killed; his troops nevertheless gained a complete victory. **Gustavus III., 1746-1792.** Assassinated. **Gustavus IV., 1778-1837.** Ascended the throne in 1792, but was deposed in 1809.

Gutenberg, Johann (Gansfleisch), 1400-1468. German inventor of movable type and the printing press; first books printed about 1457; died in poverty.

Hachette (ah-sket'), Jeanne, 1454-? A French heroine, born in Beauvais, who took part in the defense of her native town when besieged in 1472 by Charles the Bold.

Hackett, James Henry, 1800-1871. An American actor; born in New York city. He was particularly successful in impersonating Yankees and Westerners, but was best known by his Falstaff, which he played first about 1832. He wrote "Notes and Comments on Shakespeare." Died in Jamaica, N. Y.

Hadley, Arthur Twining, 1856-. An American educator; born in New Haven, Conn.; was graduated at Yale College in 1876; studied at the University of Berlin; was Professor of Political Science at Yale University from 1886-1899 and was then elected its president; has written authoritatively on a number of economic themes.

Hadrian, 76-138. Roman emperor; born in Rome; distinguished himself under Trajan, his kinsman; was governor of Syria, and was proclaimed emperor by the army on Trajan's death in 117 A.D.; visited Gaul in 119, whence he passed over to Britain, where he built the great wall from the Tyne to the Solway; he was a Greek scholar, and had a knowledge of Greek literature, encouraged industry, literature, and the arts, as well as reformed the laws.

Haeckel (hay-ke), Ernest Heinrich, 1834-. A distinguished German naturalist; born in Potsdam, Prussia; he became Professor of Zoology at the University of Jena, in 1865; his purely scientific works have been translated into many languages.

Hahnemann, Samuel Christian Friedrich, 1755-1843. A distinguished German physician and chemist, originator of the homeopathic system of medical practice; died in Paris.

Hale, John Parker, 1806-1873. An American statesman; born in Rochester, N. H.; elected to Congress, in 1842, as a Democrat; his name was afterward removed from the party ticket because he refused to support the annexation of Texas; in 1847 Hale was elected to the United States Senate, where he served for sixteen years; he was minister to Spain from 1865 to 1869, and died in Dover, N. H.

Hale, Sir Matthew, 1609-1676. Lord Chief Justice of England; born in Alderley, Gloucestershire, England; after the restoration in 1660 he was made Chief Baron of the Court of Exchequer, and eleven years later was transferred to the Chief Justiceship of the Court of King's Bench; he resigned his office in February, 1676, and died in Alderley on Christmas day of that year.

Halevy (ah-lay-ve'), Jacques Francois, 1799-1862. A French operatic composer; born at Paris; became a student at the Conservatoire; wrote a large number of operas, of which "La Juive" and "L'Eclair" were the best.

Hall, Marshall, 1790-1857. An English physician and physiologist; specialist in nervous diseases. His name is also associated with a well known method of restoring suspended respiration. He died in Brighton, England.

Halleck, Henry Wager, 1815-1872. An American general; distinguished himself on the side of the North in the Civil War, and was promoted to be commander-in-chief; was author of "Elements of Military Art and Science."

Haller, Albert von, 1706-1777. A celebrated anatomist, physiologist, botanist, physician, and poet; born at Bern; Professor of Medicine at Gottingen; was a voluminous author and writer.

Hals, Frans, 1584-1666. The Elder; a Dutch portrait and genre painter; born probably in Antwerp; he is usually regarded as the founder of the Dutch school of genre painting. He died in Haarlem, Netherlands. His brother, **Dirk Hals** (before 1600-1656), a pupil of Abraham Bloemaert, was also an excellent genre painter. Several of Franz's sons were artists, the most celebrated being **Frans Hals, the Younger**, who flourished from about 1657 to 1669.

Hamilton, Alexander, 1757-1804. American orator, statesman, financier, and general; born in the West Indies; secretary and aide-de-camp to Washington in Revolutionary War; chosen to the Continental Congress, 1782, but resigned in order to practice law; leading member of the convention of 1787; Secretary of the Treasury, 1789-1795; became recognized leader of the Federal party. Hamilton died from a wound received in a duel with Aaron Burr and his death was deeply deplored.

Hamilton, Sir William, 1788-1866. Scotch metaphysician.

Hamilton, Sir William Rowan, 1805-1865. Scotch-Irish mathematician and astronomer; born in Dublin.

Ireland. His fame is chiefly founded on his invention of the calculus of quaternions, a new method in the higher mathematics.

Hamlin, Hannibal, 1809-1891. An American statesman; born in Paris Hill, Me.; was elected to the United States Senate in 1848 to fill an unexpired term; re-elected in 1851 and again in 1857; resigned in 1861, after being elected Vice-President on the ticket with Abraham Lincoln; was again a United States Senator from 1869-1881, and then accepted the post of minister to Spain. He died in Bangor, Me.

Hammond, William Alexander, 1823-1900. An American surgeon; born in Annapolis, Md.; joined the United States army in 1848 as assistant surgeon; became surgeon-general in April, 1862; was found guilty of misdemeanor by court-martial and discharged from the army in 1864; practiced in New York till 1878, when the proceedings of the court-martial were reviewed and he was restored to his former rank in the army and retired. He died in Washington, D. C.

Hampden, John, 1594-1643. An English patriot and Parliamentary leader; killed at Chalgrove Hill. He was a champion of popular rights against the oppressive measures of Charles I., and suffered prosecution and imprisonment.

Hampton, Wade, 1818-1902. An American military officer; born in Columbia, S. C. At the outbreak of the Civil War he was believed to be one of the richest of Southern planters, and owned the greatest number of slaves. He entered the Confederate army; was made major-general and appointed commander-in-chief of the Confederate cavalry in Northern Virginia; was promoted to lieutenant-general in 1864. He greatly distinguished himself in several important actions; was elected governor of South Carolina; held a seat in the United States Senate from 1878-1891, and was appointed Commissioner of Railroads in 1893.

Hancock, John, 1737-1793. American statesman; president of the Continental Congress.

Hancock, Winfield Scott, 1824-1886. American general; second in command at Gettysburg; Democratic candidate for president in 1880.

Handel, George Frederick, 1685-1759. German composer; settled in England in 1712; "The Messiah," the greatest of oratorios, was produced, 1741; Handel was stricken with blindness, 1762, but continued to conduct his oratorios; buried in Westminster Abbey.

Hannibal, 247-183 B. C. Carthaginian general; considered by some the greatest general of the world; sworn by his father, Hamilcar Barca, to eternal enmity toward Rome; became commander of the Carthaginian forces, 221 B. C.; subdued several powerful Spanish tribes, and in 219 captured Saguntum; crossed the Alps, 218; defeated the Romans near the Ticinus and on the banks of the Trebia; routed Flaminius at Lake Trasymene, 217; almost destroyed a superior Roman army near Cannæ, 216; captured Capua; recalled to Carthage to repel a Roman invasion under Scipio Africanus, he was defeated at Zama in 202; fled from Carthage about 194, to escape being surrendered to Rome; finally ended his life by taking poison, to avoid falling into the hands of the Romans.

Harcourt, Sir William Vernon, 1827- . . . English statesman; in 1873 he became Solicitor-General, and received a knighthood; he was a vigorous opponent of the Disraeli government, and on the return of the Liberals to power in 1880 became Home Secretary; under Mr. Gladstone in 1886, and again in 1892, he held the office of Chancellor of the Exchequer; became leader of the Opposition in the House of Commons on Mr. Gladstone's retirement.

Harley, Robert, Earl of Oxford, 1661-1724. A celebrated English politician; entered Parliament shortly after the Revolution (1688) as a Whig, but after a period of vacillation threw in his lot with Tories and in 1701 became Speaker of the House; he became Chancellor of the Exchequer and head of the government; was created Earl of Oxford and Lord High Treasurer; was impeached for intriguing with the Jacobites and sent to the Tower; two years later he was released, and the remainder of his life was spent in the pursuit of letters and in the building up of his famous collection of MSS., now deposited in the British Museum.

Harold. The name of two of England's early kings. **Harold I.**, . . . -1040. Surnamed Harefoot, because of his fleetness; was second son of Canute the Great, and succeeded to the throne, 1037. **Harold II.**, 1021?-1066. Son of Godwin, Earl of Kent; was proclaimed king, 1066, as successor of Edward the Confessor; he defeated an invasion of Norsemen the same year, but was

himself defeated and overthrown by William Duke of Normandy, a few days later.

Haroun-al-Raschid (*hah-roon' al rash-id'*), 766?-809. The most eminent of the Abbasides caliphs.

Harrison, Benjamin, 1833-1901. President of the United States; born at North Bend, Ohio; proved himself a brave and efficient commander during the Civil War; engaging actively in politics, he in 1880 became a United States Senator; as the nominee of the Protectionist or Republican party he won the presidency against Cleveland, but at the election of 1892 the positions were reversed; in 1893 he became a professor in Stanford University, Cal.

Harrison, William Henry, Gen., 1773-1841. Ninth president of the United States; born in Virginia; died one month after the inauguration. He was the hero of the Indian battle of Tippecanoe, in Indiana, 1811, and also defeated a British force on the Thames, Canada, 1813; afterward elected to the United States Senate, and sent as minister to Colombia, 1823-1829.

Hartley, David, 1705-1757. An English philosopher and physician; wrote "Observations on Man, his Frame, his Duty, and his Expectations"; ascribed sensation to vibration in the nerves, and applied the doctrine of the association of ideas to mental phenomena.

Hartmann, Edward von, 1842- . . . A German philosopher; born at Berlin; established his fame by a work entitled the "Philosophy of the Unconscious"; founder of a new school of philosophy, which professes to be a synthesis of that of Hegel and that of Schopenhauer, and to aim at the reconciliation of philosophic results with scientific.

Harvard, John, 1607-1638. An American clergyman; born in England; he was graduated at Emmanuel College, Cambridge, England, and came to the United States in 1637; he was made a citizen of Massachusetts and given a tract of land in Charlestown, where he began preaching as a Congregational minister, and in his will bequeathed \$2,000 and 260 volumes from his library for the aid of the college at "New Towne" afterwards called Harvard. A granite monument was erected over his remains in Charlestown in 1823, and a memorial statue on the Delta at Harvard University was unveiled in 1884.

Harvey, William, 1578-1657. English physician and anatomist, and the greatest of physiologists; discovered the circulation of the blood.

Hasdrubal, -207 B. C. Punic general; brother of Hannibal; defeated the Scipios; slain at the Metaurus.

Hastings, Warren, 1732-1818. British general and statesman; president of the Council of Bengal, and governor-general of India; defeated Hyder Ali, king of Mysore; after using questionable methods in order to replenish the treasury, he resigned in 1775 and returned to England; impeached soon afterward, and opposed in his trial by Burke, Sheridan, and Fox, but acquitted.

Hausmann (*oe-mahn'*), **George Eugene, Baron**, 1809-1891. Celebrated French Prefect of the Seine, who carried through extensive architectural improvements in Paris, which transformed it into one of the handsomest cities of Europe.

Havelock, Sir Henry, 1795-1857. An English general. In 1857, upon the breaking out of the Sepoy mutiny, he made a forced march from Allahabad to Cawnpur, but reached the latter city too late to prevent the massacre which occurred there; continued his march toward Lucknow, then beleaguered by a formidable force of mutineers. After victoriously fighting a number of battles with the enemy he accomplished the relief of its exhausted garrison. For this service he received rank of general, was created a baronet, and decorated with the cross of the Bath.

Hawke, Edward, Lord, 1705-1781. An English admiral; born in London; defeated a French fleet off the isle of Aix and captured six ships of the line in 1747; defeated Admiral Conflans off Belleisle; was made a peer in 1776.

Hawkins, Sir John, 1593-1595. An English navigator and admiral; born at Plymouth; was rear admiral of the fleet sent against the Armada and contributed to its defeat; has the unenviable distinction of having been the first Englishman to traffic in slaves, which he carried off from Africa and imported into the West Indies.

Haydn, Joseph, 1732-1809. German musical composer; his masterpiece, the oratorio of "The Creation," was produced in 1798.

Haydon, Benjamin Robert, 1766-1846. English painter.

Hayes, Isaac Israel, 1832-1881. American Arctic explorer.

Hayes, Rutherford Birchard, 1822-1893. Nineteenth president of the United States; born in Delaware, Ohio; admitted to the bar, 1845; brigadier-general in Civil War; in Congress, 1866-1868; governor of Ohio, 1868-1876; Republican candidate for the presidency, 1876; inaugurated president, 1877, the electoral commission to determine the result of the election of 1876 having decided, by a vote of eight to seven, that Hayes had received 185 electoral votes as against 184 for Samuel J. Tilden, the Democratic candidate.

Hayne, Robert Young, 1791-1839. American orator and statesman; opponent of Webster in discussing the Constitution; governor of South Carolina.

Hearst, William Randolph, 1865-. . . Son of the late Senator George F. Hearst and of Phebe Hearst; born in San Francisco. He has been a successful journalist from early life, and owns the *Chicago American*, the *New York American* and *Journal*, and *San Francisco Examiner*; all newspapers of great influence and circulation. Prominently mentioned in 1904, especially by the labor element, as Democratic candidate for president of the United States.

Hebert (a-bair'), Jacques Rene, 1755-1794. Commonly called *Père Duchesne* as editor of a journal of that name, a violent revolutionary organ; took part in the September massacre; brutally insulted the queen at her trial, to the disgust of Robespierre; was arrested by his colleagues, whom he dared to oppose, and guillotined.

Hegel (hay-geh), Georg Wilhelm Friedrich, 1770-1831. German philosopher; one of the greatest of all; born in Stuttgart; first announced himself in 1807 by his work, "*Phenomenology of the Spirit*"; became rector of the Academy at Nuremberg, where in 1812-1816 he composed his "*Logic*"; was in 1816 appointed professor of philosophy at Heidelberg, whence he was removed to Berlin in 1818, where, his philosophy being now matured, he began to apply it with intense earnestness to every subject of human interest; he was the last of a line of thinkers beginning with Kant, with whom, however, he affiliated directly. His system may be grouped under three heads, the "*Science of Logic*," the "*Philosophy of Nature*," and the "*Philosophy of Spirit*."

Heilprin, Michael, 1823-1888. An American scholar; born in Poland; came to the United States in 1856, and contributed to various literary journals. He published "*The Historical Poetry of the Ancient Hebrews*." He died in Summit, N. J.

Heinsius, Anthony, 1641-1720. A noted Dutch statesman; born at Delft; became Grand Pensionary of Holland; was the intimate friend and correspondent of William III. of England, who left the guidance of Dutch affairs largely in his hands.

Hein'ler, Stephan, 1814-1888. A distinguished pianist and composer; born at Budapest; in 1838 he settled in Paris, and gave himself to teaching and composition; he ranks beside Chopin as a master of technique.

Helmholtz, Hermann Ludwig Ferdinand von, 1821-1894. A German physicist; born in Potsdam; his work has been chiefly in acoustics and optics; he was ennobled by the German emperor in 1883.

Hel'mont, Jan Baptist van, 1577-1644. A celebrated Belgian chemist; born at Brussels; his early years were divided between the study of medicine and the practice of a religious mysticism; mixed up a good deal of mysticism and alchemy with his scientific discoveries, and made a special study of gases; he applied the word gas to water vapor and other elastic fluids to distinguish them from air; first used the melting-point of ice and the boiling-point of water as limits of a thermometric scale.

Heloise (ay-to-ze'), 1101-1164. Niece of Canon Fulbert; born at Paris; celebrated for her amour with Abelard; became prioress of the convent of Argenteuil and abbess of the Paraclete, where she founded a new convent and lived a pious life.

Helst, Bartholomeus van de, 1618-1670. One of the greatest of the Dutch portrait painters; born at Haarlem, but spent his life in Amsterdam; his "*Banquet of the Civic Guard*" was considered by Sir Joshua Reynolds to be "the first picture of portraits in the world."

Helvetius (hel-ve'shus), Claude Adrien, 1715-1771. A French philosopher; born in Paris, of Swiss origin; author of a book entitled "*De l'Esprit*," which was condemned by the Parliament of Paris for views advocated in it that were considered derogatory to the dignity of man, and which exposed him to much bitter hostility, especially at the hands of the priests; man he reduced to a mere animal, made self-love the only motive of his actions, and the satisfaction of our sensuous desires the

principle of morals, notwithstanding which he was a man of estimable character and of kindly disposition.

Hendricks, Thomas Andrews, 1819-1885. American statesman.

Hengist, ?-488. Traditional Jutish chief; founded kingdom of Kent about 450 A. D.

Hennepin, Louis, 1640-1706. Belgian Catholic missionary and explorer of the Mississippi.

Henry I. (Beauclore), 1068-1135. King of England; defeated his brother Robert and usurped the throne.

Henry II., 1133-1189. First of the Plantagenets; issued constitutions of Clarendon, which were reinforced by the assize of Clarendon; conquered Ireland; during his reign Thomas à Becket was killed.

Henry VI., 1421-1471. His reign was made memorable by the War of the Roses.

Henry VII., 1457-1509. Founded the Tudor dynasty.

Henry VIII., 1491-1547. Defeated the French at Guinegate and the Scotch at Flodden, 1513; made Thomas Wolsey prime minister; applied unsuccessfully to the pope for a divorce from Catherine of Aragon, his wife; favored the Reformation; deposed Wolsey and elevated Thomas Cromwell; had himself declared head of the church; married Anne Boleyn after the convocations of York and Canterbury had declared his marriage with Catherine invalid; declared the English church independent of the papal see and abolished the monasteries; had Anne Boleyn executed in 1536, and married Jane Seymour ten days after the execution; excommunicated by the pope, 1538; his third wife having died in 1537, he married Anne of Cleves in 1540; was divorced from her the same year and married Catherine Howard, who was executed on a charge of adultery in 1542; married Catherine Parr in 1543; she survived him.

Henry, Joseph, 1797-1878. An American physicist; born in Albany, N. Y.; discovered how to produce the electro-magnet about 1827, and afterward greatly improved it. He built the first electro-magnetic telegraph, about a mile long, in 1831; designed the first electro-magnetic engine in 1832; was connected with the Smithsonian Institution from 1846-1878; was twice offered the presidency of Princeton College. He died in Washington, D. C.

Henry, Patrick, 1736-1799. American patriot and orator; member of the Continental Congress; governor of Virginia.

Heracitus, fl. fifth century, B. C. A Greek philosopher; born at Ephesus; was the first to note how everything throughout the universe is in constant flux, and nothing permanent but in transition. He declared Becoming to be the only reality.

Herbart, Johann Friedrich, 1776-1841. German philosopher; born at Oldenburg; Kant's successor at Konigsberg, professor also at Gottingen; founded his philosophy like Kant on the criticism of subjective experience, but arrived at different results, and his philosophy was finally arrayed against the whole post-Kantian philosophy of Germany.

Herkimer, Nicholas, 1715-1777. An American military officer; born in New York of German parents. He joined the patriots of the Revolutionary War, and was a powerful element in his own state in determining the success of the Revolution. His most noteworthy feat was the relief of Fort Stanwix when invested by Colonel St. Leger after the battle of Ticonderoga. He died in Danube, N. Y.

Herod the Great, B. C. 72-4 A. D. King of the Jews by favor of the Romans; made away with all his rivals, caused his own children to be strangled on suspicion of their conspiring against him, and died a painful death.

Herod Antipas. Son of the preceding; tetrarch of Galilee; beheaded John the Baptist; Christ was remitted to him by Pilate for examination; died in exile at Lyons.

Herrera (er-ray'rah), Francisco de, 1576-1656. A distinguished Spanish painter, founder of the Seville, or new Spanish, school; born at Seville; his finest paintings include "*The Last Judgment*" and a "*Saint Peter*," both in churches at Seville; others are in the Louvre, Paris; they exhibit boldness of execution with faultless technique.

Herschel, Sir John, 1792-1871. Astronomer, only son of Sir William; prosecuted with great diligence and success the same researches as his father; spent four years at the Cape of Good Hope, and added much to our knowledge of the stars and meteorology.

Herschel, Lucretia, 1750-1848. Sister of the succeeding; was his assistant, and made important observations of her own, which were published; retired after her brother's death to Hanover, where she died.

Herschel, Sir William, 1738-1822. A distinguished

astronomer; born at Hanover, Germany; went to England in 1757, and had sundry appointments as an organist; gave his leisure time to the study of astronomy and survey of the heavens; discovered the planet Uranus in 1781, which he called *Georgium sidus* in honor of George III.; discovered also the six satellites of Uranus, and drew up a catalogue of 5000 heavenly bodies or clusters of them.

Hertz, Henrik, 1798-1870. Danish poet; born in Copenhagen of Jewish parents; his best known work is "King Rene's Daughter," which has been translated into English for the fourth time; he is considered one of the greatest of modern Danish lyrists and dramatists.

Hesekiah. A king of Judah; reigned from 725 to 697 B.C.; distinguished for his zeal in the celebration of the worship of Jehovah and for his weakness in making a parade of his wealth; reigned in the golden age of Hebrew prophecy, Isaiah and Micah being his contemporaries.

Hicks, Elias, 1748-1830. An American preacher of the Quaker connection, who adopted Unitarian views and caused a split in the body.

Hill, Sir Rowland, 1736-1879. The author of the penny-postage system; born in England; he was also the originator of the money-order system, and of post office savings banks; he died in Hampstead, near London.

Hippocrates, 460?-377? B.C. The greatest physician of ancient times, usually designated the "Father of Medicine"; born in the Island of Cos; among his authentic writings are: "Prognosis," "Aphorisms," "On Epidemics," "On Diet in Acute Diseases," "On Air, Water, and Place," "On Wounds of the Head"; he was distinguished for his remarkable skill in diagnosis, and his accurate and vivid description of morbid symptoms; he died in Larissa, Thessaly.

Hitchcock, Edward, 1799-1864. An American geologist; born in Deerfield, Mass.; he was made president of Amherst College in 1845, but resigned in 1854, continuing his professorship there till his death. Amherst College owes to him the founding of its Museum of Natural History, and his writings were among the earliest to call attention in the United States to the study of geology; his "Religion of Geology and its Connected Sciences" marks a distinct epoch in scientific study in this country; he died in Amherst, Mass.

Hobbeema, Melindert, 1638-1709. A famous Dutch landscape painter; born at Amsterdam; his fine, subdued pictures of woodland life and scenery are ranked among the masterpieces of Dutch landscape painting.

Hobbes (*hob*), Thomas, 1588-1679. An English philosopher, psychologist, and moralist, born at Malmesbury; translated Thucydides, wrote a number of works, "De Cive" among others, and the "Leviathan," all more or less leading up to the doctrine that the absolute sovereign power in all matters of right and wrong is vested in the state as the achieved fact of the emancipation of the race from savagery.

Hoe, Richard March, 1812-1886. An American inventor; born in New York city. In 1846 he perfected a rotary printing press which was called "Hoe's lightning press." Subsequently he invented the Hoe web-perfecting press. These were especially adapted to newspaper printing, and made a revolution in that art. He died in Florence, Italy.

Hofer, Andreas, 1767-1810. A Tyrolean patriot; born in St. Leonhard, in the valley of Passer. When the Tyrol, long a part of the Austrian dominions, was given by the treaty of Presburg to the King of Bavaria, then the ally of Napoleon, the Tyrolese revolted, and Andreas Hofer became their leader. Within a week from the outbreak of the insurrection, early in April, 1809, the Bavarian forces were everywhere defeated and the Tyrol freed. Three French armies then invaded the province, and after temporary success on their part, Hofer won the victory of Innsbruck, and again freed his country. A second French invasion ended in defeat for Hofer, who took refuge in the mountains. For a few weeks Hofer was safe; but two months later, Jan. 28, 1810, he was betrayed to his enemies, condemned by a court-martial at Mantua, and shot.

Hogarth, William, 1697-1764. A truly great and original painter of life and manners; born in London, England; in 1718 commenced engraving arms and making designs and bookplates for the booksellers; his "Industry and Idleness," and "Marriage à la Mode" attracted universal attention.

Holbach (*G., hol/bok, F., ole-bakh'*), Baron von, 1723-1789. A French philosopher; born in Heidelberg, in

the Palatinate, of wealthy parents; lived in Paris, kept a good table, and entertained all the "Encyclopedie" notabilities at his board; wrote "Systeme de la Nature"; was a materialist in philosophy and an atheist in religion, but a kindhearted man.

Holbein (*hol/bine*) **Hans**, 1497-1548. A German painter; born at Augsburg; attracted the attention of Erasmus, who took a great interest in him, and persuaded him to go to England, and introduced him to Sir Thomas More, who in turn introduced him to Henry VIII.; here under Henry's patronage he remained, executing numerous portraits of his courtiers, till his death of the plague; his "Last Supper" and "Dance of Death" are well known.

Holden, Sir Isaac, 1807-1897. English inventor; discovered the principle of the lucifer match; became established near Paris, where he carried out elaborate experiments, which resulted in improvements in wool-combing machinery that brought him fame and fortune; in 1859 he transferred his works to the vicinity of Bradford; entered Parliament, and was created a baronet.

Holley, Alexander Lyman, 1832-1882. An American metallurgist; born in Lakeville, Conn. About 1868 he went to England and purchased for Corning, Winslow & Company the Bessemer patents for the manufacture of steel. The first Bessemer works were built by him in Troy, N. Y., in 1865, and the second plant in Harrisburg, Pa., in 1867. He was lecturer on the manufacture of iron and steel at Columbia University from 1879-1882.

Hopkins, Johns, 1796-1873. An American philanthropist; born in Anne Arundel county, Md. In 1873 he gave property worth \$4,500,000 to found a free hospital; he presented Baltimore with a public park, and he also gave over \$3,000,000 to found the Johns Hopkins University in Baltimore.

Hopkinson, Francis, 1737-1791. An American political writer; born in Philadelphia. His humorous ballad, "The Battle of the Kegs," was widely known. He was one of the signers of the Declaration of Independence.

Houdon (*oo-don'*) **Jean Antoine**, 1741-1828. A French sculptor; born in Versailles; after studying in Italy, he returned to Paris, and executed the busts of Voltaire, Rousseau, Mollere, Franklin, Buffon, Catherine II., *et al.* He was invited to the United States and carved the statue of Washington now at the Virginia State Capitol in Richmond, which is considered the most authentic likeness of "the father of our country." Died in Paris.

Houston, Sam, 1793-1863. American general and statesman; governor of Tennessee, 1827-1829; passed a number of years with the Cherokee Indians; commander-in-chief of the Texan forces in revolt against Mexico, and defeated and captured Santa Ana in 1836; elected president of Texas same year, and re-elected 1841; elected senator from Texas after its admission to the Union, in 1845, and governor in 1859.

Howard, John, 1726-1790. An English philanthropist. When about nineteen years of age, on the death of his father, he was left an independent fortune. Devoted his time to the investigation of the means of correcting abuses in the management of prisons; visited most of the English county jails and houses of correction, and laid the result of his inquiries before the House of Commons. In 1789 he published an "Account of the Principal Lazarettos in Europe." In the same year he made a final journey through Germany and Russia. He died of fever in Cherson in South Russia.

Howe, Elias, 1819-1867. An American inventor; born in Spencer, Mass. He patented the first sewing machine.

Hudson, Hendrik,-1611. An English navigator; discovered the river in New York state which bears his name, while in the service of the Dutch East India Company, 1609; in 1610 discovered Hudson's Bay.

Humboldt, Friedrich Heinrich Alexander, Baron von, 1769-1859. A distinguished German traveler, scientist, and author.

Humboldt, Karl Wilhelm, Baron von, 1767-1835. Brother of the preceding; was an eminent statesman and philologist, styled "the creator of comparative philology."

Huss (*hoo*) **Johann**, 1373-1415. A distinguished religious reformer; born in Bohemia; burned at the stake by order of the Council of Constance. His followers, called Hussites, inaugurated a war for religious freedom, 1419, and continued with such success that the Emperor Sigismund granted them acceptable terms and peace was restored.

Huxley, Thomas Henry, 1825-1895. Eminent English scientist; born at Ealing, Middlesex; was professor of Natural History in the Royal School of Mines; distin-

guished by his studies and discoveries in different sections of the animal kingdom; was a zealous advocate of evolution, in particular the views of Darwin; he was a man of eminent literary ability as well as scientific, and of the greatest in that regard among scientific men.

Hypatia, fl. fourth century. A far-famed lady teacher of Greek philosophy in Alexandria, distinguished for her beauty and purity of life, who, one day in 415, on her return home from her lecture room, was massacred in the streets of the city, at the instance of both Jews and Christians, as a propagator of paganism.

Iberville (*e-bayr-veel'*), **Pierre le Moine**, **Sieur d'**, 1661-1706. A French-Canadian naval and military commander; born in Montreal. In 1699, by order of the French government he built Fort Biloxi at the head of Biloxi bay, the first post on the Mississippi river. He afterward established other posts in the same region. Fort Biloxi afterwards became Mobile. Iberville left Canada in 1702 and died in France.

Ibrahim (*ib-rah-heem'*) **Pasha**, 1789-1848. A viceroy of Egypt; born in Cavalla, Albania; Ibrahim crossed the Egyptian border with an army in 1831, took Acre by storm, and quickly made himself master of the whole of Syria; the interference of the great powers eventually compelled him to relinquish all his Syrian conquests, and to return to Egypt; in 1848 he went to Constantinople, and was installed by the Porte as viceroy of Egypt; he died in Cairo.

Ignatius, **Malint** (surnamed Theophorus), 327-107. Bishop of Antioch; martyred in Rome; his writings are still held in high esteem.

Ingersoll, **Robert Green**, 1833-1899. An American lawyer; born in Dresden, N. Y.; was admitted to the bar in 1854; soon became distinguished in the courts and in Democratic politics as an orator; recruited the 11th Illinois Cavalry in 1862, and entered the army as its colonel. On Nov. 28, 1862, while trying with a force of 600 men to intercept a Confederate raiding body, he was captured by a force of 10,000 men, but was soon paroled and given command of a camp in St. Louis. He soon afterward resigned. After the war he became a Republican; was made attorney general of Illinois in 1868; was a delegate to the Republican National Convention in 1876 and there nominated for president James G. Blaine, whom he termed, "the plumed knight." He was prominent in politics for several years, and had he not given strong expression to his views as an agnostic he would doubtless have been honored with high offices. He settled in New York city in 1882, and practiced law there till his death; he died in Dobbs Ferry, N. Y.

Ingres (*angr*), **Jean Dominique Auguste**, 1780-1867. A French historical painter; born in Montauban; Ingres occupies a middle place between the classical and romantic schools, and is chiefly remarkable for correct design, ideal composition, and sober painting.

Inman, **Henry**, 1801-1846. An eminent American artist; born in New York; died while at work on a large order from Congress for the historical embellishment of the Capitol.

Inness, **George**, 1825-1894. An American painter; born in Newburg, N. Y.; resided in Italy from 1871-1875. His pictures are noted for the accuracy with which they represent the American climate and the aspects of American scenery.

Innocent I. (**Saint**), -417. Pope, ruling 402-417; during his reign Rome was sacked by Alaric.

Innocent III. (**Lotharius**), 1161-1216. Chosen pope, 1198; put France under the ban, 1199, because Philip Augustus repudiated his wife; promoted the Fourth Crusade, the result of which was the capture of Constantinople; deposed Otho, emperor of Germany, transferring the crown to Frederick of Sicily; subjected John of England to the Papal see, compelling him to pay an annual tribute; crushed the Albigenses in 1214, and died two years later.

Irenaeus, **Saint**, fl. second century. One of the fathers of the church; was Bishop of Lyons, and suffered martyrdom about 202; wrote against the Gnostics in a work in Greek, of which all but a few fragments in Latin is lost.

Irving, **Sir Henry**, 1838-1905. An English actor; born in Keinton, England. His family name was Brodribb, which was changed to Irving by royal patent. His roles include Mephistopheles, Hamlet, Coriolanus, King Lear, and a repertory that has been presented not only in England, but in the United States, Australia, and France. He was knighted in 1895.

Isabella I. (the Catholic), 1451-1504. Queen of Castile; wife of Ferdinand of Aragon; patroness of Columbus.

Isabelle of France, 1292-1358. Queen of England, wife of Edward II., whom her adherents deposed, and with whose assassination she is charged; her son, Edward III., ascended the throne and ordered her arrest, and she died after twenty years' incarceration.

Isaiah, 760?-700? B. C. One of the great Hebrew prophets, the son of one Amoz; was a citizen of Jerusalem, evidently of some standing; like Amos, he foresaw the judgment that was coming on the nation for its unfaithfulness, but felt assured that God would not altogether forsake his people, and that "a remnant," God's elect among them, would be saved.

Iturbide (*e-toor-be-day*), **Augustine de**, 1783-1824. A Mexican general; emancipated Mexico from the yoke of Spain; seized the crown and was proclaimed emperor in 1822; was obliged to abdicate next year and leave the country, but returning, was immediately arrested and shot.

Ivan III. (*e-rahn'*) (surnamed The Great), -1505. Freed Russia from the yoke of the Tartars, who had held it tributary for two centuries; gained victories over the Tartars and the Poles, and was the first to receive at Moscow ambassadors from other powers of Europe; reigned from 1462 to 1505.

Ivan IV. (surnamed The Terrible), 1529-1584. Grandson of the preceding; assumed the sovereignty at fourteen, had himself crowned in 1547, and took the title of Czar; his first great ambition was to destroy the Tartar power, which he did at Kasan and Astrakhan, receiving homage thereafter from almost all the Tartar chiefs; on the death of his wife in 1563 he lost all self-restraint, and by the ferocity of his wars provoked hostility. Ivan was defeated by the Poles in 1582, and lost Polotsk, and Russia was cut off from the Baltic. In a fit of passion he killed his eldest son, whom he loved, remorse for which embittered his last days and hastened his end.

Jackson, **Andrew**, 1767-1845. Seventh president of the United States; born in South Carolina; son of an Irishman; received but little education; served against the British in 1781; began the practice of law at Nashville, 1788; Congress, 1796; United States Senate, 1797; Judge Tennessee Supreme Court, 1798-1804; fought several duels, killing Charles Dickinson in 1806; defeated the Creek Indians, 1813, and was commissioned major-general; defeated the British at New Orleans, 1815; successfully carried on war against the Seminoles, 1817-1818; Senate, 1823; and nominated for the presidency, the opposing candidates being Clay, J. Q. Adams, and W. H. Crawford; Jackson had the highest number of votes, but not a majority, and Adams was elected by the House of Representatives; Jackson was elected to the presidency, however, in 1828; he was the first president to remove many public officers on account of their politics; re-elected in 1832; in that year, the convention of South Carolina having declared the tariff laws of 1828 null and void, Jackson issued a proclamation declaring his intention to check by force of arms all movements tending to disunion.

Jackson, **Thomas Jonathan** (Stonewall), 1824-1863. Confederate general; native of Virginia; defeated General Banks at Cedar Mountain, and captured Harper's Ferry with 11,500 prisoners, 1862; killed by a company of his own men, mistaking him and his staff for Federal cavalry.

Jacobi (*yah-ko-be*), **Friedrich Heinrich**, 1743-1819. A German philosopher and romanticist, born in Düsseldorf. His expositions are distinguished by acuteness, and adorned by so remarkable a grace that his disciples have named him the modern Plato.

Jacquard (*yah-kahr'*), **Joseph Marie**, 1752-1834. A French inventor; born in Lyons. After a long period of hardship he made his name famous by the invention of his new loom, which was publicly exhibited in 1801.

James I. of England and **VI.** of Scotland, 1566-1625; born in Edinburgh Castle; was the only child of Mary Queen of Scots, by her cousin Henry Stuart, Lord Darnley. In the following year, Mary being forced to resign the crown, he was solemnly crowned at Stirling, and from that time all public acts ran in his name. In 1603 James having succeeded to the crown of England on the death of Queen Elizabeth proceeded amid the acclamations of his new subjects to London. Urged by national feelings for the Protestant cause he was induced to declare war against Spain and the Emperor, and subsidies were sent over to Denmark for the aid of King Christian IV. against the Emperor. The defeat of this enterprise hastened the king's death.

Jameson, **Leander Starr**, 1853- . A British physician and soldier; born in Edinburgh; he was edu-

cated at London University. Having become associated with Rhodes in the development of South Africa, he was appointed administrator of Rhodesia in 1891, and held the position with distinction till the raid on the Transvaal in 1895, when he was defeated at Krugersdorp. Became premier of Cape Colony in 1904.

Jannaschek (*gah'-no'-shak*). **Francesca Romana Magdalena**, 1830-1904. A Polish actress; born in Prague, Bohemia; in 1852 she was married to Capt. Frederick Pillot, of the German navy; she made her first tour in America in 1867-1869, and at once secured favorable notice; returning to Germany she studied English, and in 1873 made her second visit to the United States, when she played in English the most exacting Shakespearean roles; she retired from the stage in 1898.

Jansenius, Cornelius, 1585-1638. A Flemish theologian; he founded the body of sectaries in the Roman Catholic Church known as Jansenists; he was made Bishop of Ypres.

Jay, John, 1745-1829. American statesman, born in New York; took a part in the struggle for independence and had the chief share in negotiating the treaty of 1783; represented his country subsequently in Madrid and London; was first chief-justice of the United States.

Jefferson, Joseph, 1829-1905. An American comedian; born in Philadelphia, Pa. Jefferson was on the stage from his very infancy, appearing as Cora's child in "Pizarro" when only three years of age; in 1865 he visited London, and at the Adelphi Theater played for the first time his world famous part of Rip Van Winkle, Sept. 4, 1865. With this character his name is identified, and though he has shown himself an admirable comedian in many characters, to the English speaking world he is always Rip Van Winkle.

Jefferson, Thomas, 1743-1826. American statesman; third president of the United States; born in Virginia; admitted to the bar, 1767; elected to Virginia House of Burgesses, 1769; Continental Congress, 1775; drafted the Declaration of Independence; governor of Virginia, 1779-1781; minister plenipotentiary, 1784, to negotiate treaties with European powers; minister at Paris, 1785-1789; secretary of state, 1789-1793; elected vice-president, 1796, and president in 1800, holding that office from 1801 to 1809.

Jeffrey, Francis, 1773-1850. A British critic and essayist; born in Edinburgh. After graduating at the universities of Glasgow and Oxford, Jeffrey, in 1794, was admitted to the Scottish bar. From 1816 till he ceased to practice Jeffrey was the acknowledged leader of the Scottish bar. First editor *Edinburgh Review*.

Jeffreys, or Jefferies, George, Lord, 1648-1689. An English jurist; born in Acton, England. In 1683 he was appointed chief justice of the King's Bench, and, in 1685, lord chancellor. His cruelties on the western circuit toward the deluded followers of the Duke of Monmouth were excessive; yet they gave great satisfaction to James II., who, with a grim pleasantry, called this "Jeffreys' Campaign." He died a prisoner in the Tower of London.

Jenner, Edward, 1749-1823. An English physician; born in Berkeley, Gloucestershire. After many years devoted to the consideration of, and experiments made with, vaccine lymph as a specific for smallpox, Jenner was for the first time, in 1796, enabled to satisfy many medical men of the valid properties of this new agent as a preventive of the disease known as smallpox.

Jerome, or Hieronymus, 340-420. One of the fathers of the church; born at Stridon, on the frontiers of Dacia.

Jerome of Prague, 1360?-1416. A Bohemian reformer; was in faith and sufferings the companion of the famous John Huss; was burned at the stake, and his ashes thrown into the Rhine.

Jervis, Sir John, 1735-1823. An English admiral; born in Staffordshire; rose to be Rear-Admiral in 1787; he defeated the Spanish fleet of twenty-seven ships with one of fifteen ships off St. Vincent in 1797, in consequence of which he was raised to the peerage as Earl St. Vincent; was buried in St. Paul's, London.

Joan of Arc (*Jeanne d' Arc*), 1412-1431. French heroine ("the Maid of Orleans"); born in Domremy of an humble peasant family; believing herself commissioned by heaven to liberate France, and convincing Charles VII. of her divine authority, she was given command of a considerable force, and by the victories she gained enabled Charles to be crowned at Rheims; although she wished to return home, and resume her former humble life, she was induced to retain her command in the army; she was captured in 1430 by the Burgundians,

delivered to the English, and burned at the stake after a mock trial.

John (surnamed Lackland), 1167-1216. King of England; born in Oxford; was the youngest son of Henry II. by Eleanor of Guienne. He gave up his kingdom to the pope, receiving it again as a vassal. He rendered himself the object of such universal contempt and hatred that his nobles combined to limit his power and establish their privileges; thus was obtained that basis of English constitutional freedom known as "Magna Charta," which not only protected the nobles against the crown, but secured important privileges to every class of freemen. Died in Newark castle.

John III. (John Sobieski), 1624?-1696. King of Poland; was youngest son of James Sobieski, governor of Cracow. In 1665 he was made grand marshal and general of the Polish armies. He retook several cities from the rebellious Cossacks. In 1673 he gained the memorable battle of Khotin, near the Dniester, in which the Turks lost 20,000 men. On the death of Michael in the same year he was elected King of Poland, and shortly afterward compelled the Turks to sue for peace. He died in Warsaw.

John of Austria, or Don John, 1545-1578. A Spanish soldier; the natural son of the Emperor Charles V.; born in Ratisbon, Bavaria. He was brought up in such ignorance of his birth that, till summoned by Philip II., his brother, to Spain, and there acknowledged as the emperor's son, he had been in total darkness as to whom his parents were. His first triumph was a victory over the Turkish galleys in the Gulf of Lepanto, in which the Ottomans lost 30,000 men, 1571; he next invaded Tunis, and in 1576 was sent by Philip as governor of the Low Countries; here he won the victory of Gembloux, and with proper support from Philip he might have so reduced his antagonists that the country must soon have submitted and returned to its allegiance, had he not been suddenly carried off by death, near Namur, Belgium.

John of Gaunt, Duke of Lancaster, 1340-1399. Fourth son of Edward III.; born in Ghent. He was a noted character in English history. He died in London, England.

Johnson, Andrew, 1808-1875. American statesman; seventeenth president of the United States; born in North Carolina; learned the trade of a tailor in Tennessee; in Congress, 1843-1853; governor, 1853-1857; senator, 1857; military governor, 1862; elected vice-president, 1864, and succeeded to the presidency on the death of Lincoln, 1865; became involved in a bitter quarrel with the leaders of the Republican party, and was impeached in 1868, but acquitted, although thirty-five senators voted for conviction to only nineteen against, a two-thirds majority being necessary; he was subsequently elected to the Senate from Tennessee as a Democrat.

Johnson, Eastman, 1824- . . . An American painter; born in Lovell, Me.; went to Düsseldorf, where he studied two years, and afterward resided for four years at The Hague. He returned to New York in 1856. His favorite subjects, besides portraits, are the American rustic and negro, and glimpses of domestic life.

Johnson, Reverdy, 1796-1876. An American lawyer and statesman; born in Annapolis, Md.; in 1845 was chosen United States senator, and in 1849 was appointed, by President Taylor, attorney-general. In 1863, he was appointed United States minister to the Court of St. James, where he negotiated a treaty for the settlement of the *Alabama* claims, which the United States rejected. He died in Annapolis.

Johnston, Albert Sidney, 1803-1862. An American military officer; born at Washington, Ky.; resigned his commission in the United States army in 1834, and enlisted in the army of Texas, of which he became commander-in-chief; made secretary of war of the Republic of Texas in 1838. He used all his influence in bringing about the annexation of Texas to the United States, and served in the Mexican War with marked distinction. When the Civil War broke out he was in command of the Department of the Pacific, but promptly resigned; was made a general in the Confederate army and assigned to the command of the Department of Kentucky. He was killed at Pittsburg Landing.

Johnston, Joseph Eggleston, 1807-1891. An American military officer; born in Prince Edward Co., Va.; greatly distinguished himself in the Florida and Mexican wars; made brigadier-general of Virginia volunteers and later full general in the Confederate service; took an active part in the first battle of Bull Run, where he personally led a charge with the colors of the Fourth Alabama Regiment in his hands; took command of Bragg's army at Dalton, Ga.; was succeeded in this command by General Hood;

after the war he engaged in business; was member of Congress in 1876-1878, and United States commissioner of railways in 1885-1889; he died in Washington, D. C.

Jones, Inigo, 1578-1652. Architect; born in London; studied in Italy, and, returning to England, obtained the patronage of James I., and became chief architect in the country; the banqueting hall at Whitehall is reckoned his masterpiece; he the Church of St. Paul, London, is from his design; his style follows Palladio of Venice.

Jones, John Paul, 1747-1792. A naval adventurer, whose real name was John Paul; born in Kirkcudbrightshire, Scotland; took to the sea, engaged in the slave trade, settled in Virginia, threw in his lot with the colonists and against the mother country, and offered his services as a sea captain; in 1778 he infested the British coast, and made a descent on the shores of his native country; his sympathies were with the French in their struggles for liberty, and he fought in their service as well; he died in Paris, where he languished in poverty, but the National Assembly granted him a "ceremonial funeral," attended by a deputation.

Jones, Sir William, 1746-1794. English Orientalist; born in London; early devoted to Eastern languages and literature, he published numerous translations and other works, concluding with "Sakuntala" and "The Laws of Manu"; he founded the Asiatic Society at Calcutta, where he died.

Jordaens (yordahnz), Jakob, 1598-1678. A Dutch painter and engraver; born at Antwerp; was a friend of Rubens, and ranks next him among the Flemings.

Jordan, David Starr, 1851- . . . An American educator; born in Gainesville, N. Y.; he studied at Cornell; after holding important professorships he served as president of the University of Indiana from 1885 to 1891; in the latter year he was made president of Leland Stanford Jr. University; served on a number of important government commissions, especially in connection with the fisheries; he wrote "Care and Culture of Men," and many other educational and scientific books.

Joseph I., 1678-1711. Emperor of Germany. **Joseph II., 1741-1790.** Abolished feudal serfdom.

Josephine, 1763-1814. Empress of the French; wife of Napoleon Bonaparte.

Josephus, Flavius, 87?-96? Jewish historian.

Joshua. A Jewish military leader, born of the tribe of Ephraim, the minister and successor of Moses, under whose leadership the Jews obtained a footing in the Land of Canaan.

Joubert, Petrus Jacobus, 1834-1900. A Boer military officer; born in Cango, Cape Colony; was elected to the Transvaal Volksraad in 1863; acting president of the republic in 1874; appointed a member of the triumvirate of 1880 to conduct war against Great Britain. On February 27, 1881, he surprised the British encampment with a small force and won a decisive victory, which soon resulted in terms of peace. He was acting president of the republic again in 1883-1884, trained the Boer army in the tactics which proved so successful against the vastly superior British army sent against the Transvaal and Orange Free State in 1898. He died in Pretoria.

Jouffroy d'Arbans (zhoo-frwah' dar-bon), Claude, Marquis de, 1751-1832. Claimed by the French as the inventor of steam navigation; in 1783 made a small paddle-wheel steamboat sail up the Saône—the connection between piston and paddle-wheel axle being rack-and-pinion. Compelled to emigrate by the Revolution, he failed, on account of financial ruin, to float a company till after Fulton had made his successful experiments on the Seine in 1803.

Juarez (hoo-ah'reta), Benito Pablo, 1806-1872. President of Mexico; born in Oajaca, of Indian extraction; was twice elected to the presidency, in 1861 and 1867.

Judson, Adoniram, 1783-1850. An American missionary; born in Malden, Mass.; in February, 1812, he sailed with his wife for Asia. During the voyage he was converted from the Congregational faith to that of the Baptist church. In 1814, when the Baptists of the United States organized a missionary union, he was taken under its care. He settled in Burma; mastered the language, and labored there for nearly forty years. He died at sea.

Justin (surnamed the Martyr), 103?-165? An early Christian apologist; born in Flavia Neapolis, Samaria; studied philosophy in the Stoic and Platonic schools, and was converted to Christianity; was the author of two "Apologies" for the Christians, rather than for Christianity or its dogmas, and a "Dialogue with Tryphon the Jew"; suffered martyrdom.

Justinian I. (Flavius Anicetus Justinianus), 483?-565. A Byzantine emperor; born in Tauresium, Dar-

danía, Illyricum. The glory of his reign is the famous Justinian Code.

Kane, Ellisha Kent, 1820-1857. An American explorer; born in Philadelphia; accompanied, in 1850, the first Grinnell expedition to the Arctic seas, and commanded the second in 1853, returning after two years with many discoveries; he wrote accounts of both expeditions.

Kant (kahn't), Immanuel, 1724-1804. German philosopher; born in Königsberg, Prussia. His three great works were: "Critique of Pure Reason," which attempts to define the nature of those of our ideas which lie outside of experience, and to establish the basis of valid knowledge; "Critique of the Practical Reason," which bases the ideas of God, freedom, and immortality on the ethical consciousness alone, denying that we have any right to hold them otherwise; and "Critique of the Power of Judgment." He died in Königsberg.

Kean, Edmund, 1787-1833. Distinguished English tragedian; born in London; his first success was Shylock in the "Merchant of Venice," in 1814, and the representation of it was followed by equally famous representations of Richard III., Othello, and Sir Giles Overreach; he led a very dissipated life, and under the effect of it his constitution gave way; he broke down one evening beside his son as Iago, as he was playing the part of Othello; was carried off the stage, and never appeared on the boards again.

Kearney, Philip, 1815-1862. An American military officer; born in New York city. After entering the cavalry school at Saumur and serving as a volunteer in the ranks of the Chasseurs d'Afrique in an Algerine campaign, Kearney returned to the United States in 1840; served throughout the Mexican campaign, and was brevetted major for his distinguished gallantry at Contreras, Churubusco, and the city of Mexico. On the outbreak of the Civil War in 1861, Kearney was appointed brigadier-general of volunteers, and exhibited his dashing courage in all the battles of the Chickahominy campaign. In 1862 he was commissioned major-general of volunteers, and was killed while making a personal reconnaissance within the Confederate lines at Chantilly.

Kellermann, Francois Christophe, 1736-1820. A marshal of France; born in Bavaria; gained great distinction in the Seven Years' War; on the breaking out of the Revolution, he was given the command of the army of the Center, and in 1792 gained the splendid victory of Valmy over the Prussians, and was, in 1798, intrusted with the command of the armies of Italy and the Alps; Napoleon superseded Kellermann.

Kemble, Charles, 1775-1854. English actor; born at Brecon; appeared first at Sheffield as Orlando, in 1792, and two years later went to London, where he continued playing till 1840, when he was appointed examiner of plays.

Kemble, Frances Anne, 1809-1883. Daughter of Charles; born in London; made her debut in 1829, and proved a queen of tragedy; in 1832 came to America, where, in 1834, she married a planter, from whom she was divorced in 1849; resuming her maiden name, Fanny Kemble, she gave Shakespearean readings for twenty years.

Kemble, John Philip, 1757-1823. English actor; born at Prescott, Lancashire; appeared first at Wolverhampton in 1776; after touring in Yorkshire and Ireland he went to London in 1783, playing Hamlet at Drury Lane; became manager of that theater in 1788; in 1802 transferred himself to Covent Garden; he retired in 1817, and lived at Lausanne, Switzerland, till his death.

Kempis, Thomas a, 1380-1471. A German mystic; born in Kempen (whence his name, "Thomas from Kempen"), near Cologne; his true name was Hamerken; he was author of the "Imitation of Christ," one of the most famous of books.

Kent, James, 1763-1847. An American jurist; born in Fredericksburg, N. Y.; author of the famous "Commentaries on American Law," which holds in this country a position similar to that occupied by Blackstone's "Commentaries" in Great Britain; he was chief-justice and chancellor of the state of New York.

Kepler, John, 1571-1630. Illustrious German astronomer; born in Wurttemberg; studied at Tübingen, chiefly theology and the classics; joined Tycho Brahe at Prague as assistant; removed to Linz; lived in a *camera obscura* tent, doing ingenious things, photographing the heavens, "inventing toys, writing almanacs . . . busy discovering the system of the world—grandest conquest ever made, or to be made," adds Carlyle, "by the sons of Adam"; he was long occupied in-

studying the "motions of the star' Mars, with calculations repeated seventy times, and with the discovery of the planetary laws of the Universe"; these last are called from the discovery of them Kepler's Laws. Poverty pursued Kepler all his days, and he died of fever at Ratibon.

Kidd, William, . . . -1701. A British pirate; born probably in Greenock, Scotland. A ship of thirty guns and fitted out by a private company in London, was given to Kidd, who was to seize pirates. In January, 1697, he reached Madagascar, but ere long reports reached England that Captain Kidd was playing the game of pirate himself. After a two years' cruise he returned to the West Indies and later went to Boston. He was arrested and sent to England, where he was tried for piracy and murder. Of both charges he was found guilty, and hanged.

Kilpatrick, Hugh Judson, 1836-1881. An American military officer; born in Deckertown, N. J.; served through the Civil War with credit; was minister to Chile from 1866 to 1868, and reappointed in 1881. He died in Santiago.

King, Rufus, 1755-1827. An American statesman; born in Scarborough, Me.; elected to the United States Senate four times and was appointed twice as minister to England. He was the Federalist candidate for the vice-presidency in 1804 and 1808. He died in Jamaica, Long Island.

King, Thomas Starr, 1824-1864. An American clergyman; born in New York city. During the Civil War he was the chief factor in raising the large sums of money which enabled the United States Sanitary Commission to carry on its work. He was a brilliant preacher and writer.

King, William Rufus, 1786-1853. An American statesman; born in Sampson county, N. C. He was United States senator from Alabama; minister to France; presiding officer in the United States Senate. In 1852 he was elected vice-president of the United States; died near Cahawba, Ala.

Kitchener, Horatio Herbert, Viscount and Baron Kitchener of Khartum, 1850- . . . A British military officer. From 1888 till 1892 he was adjutant-general and second in command of the Egyptian army, and in 1892 he became Sirdar. He commanded the Anglo-Egyptian force which recovered Dongola for Egypt in 1896. Soon after he led another expeditionary force up the Nile valley. He was appointed governor-general and commander-in-chief of the Egyptian Sudan in 1899, but he resigned this post to accompany Lord Roberts to South Africa as chief of his staff in the war with the Boers. When Lord Roberts left South Africa toward the end of 1900 Lord Kitchener succeeded him as commander-in-chief. On the termination of the war in 1902, Lord Kitchener was created a Viscount by King Edward and voted a grant of \$250,000 by Parliament.

Kleber (klay-bar), Jean Baptiste, 1759-1800. French general; born at Strasburg; accompanied Bonaparte to Egypt, and was left by him in command, where, after a bold attempt to regain lost ground, and while in the act of concluding a treaty with the Turks, he was assassinated by an Arab fanatic.

Knox, Henry, 1750-1806. An American military officer; born in Boston. For his signal service at Yorktown he was made major-general. In 1785 he was appointed by Congress secretary of war. He resigned from the cabinet in 1796, retiring to private life. He died in Thomaston, Me.

Knox, John, 1505-1572. A Scotch religious reformer; born in Giffordgate, near Haddington, Scotland. A pioneer of Puritanism; prisoner of war, for nineteen months confined in the French galleys; friend of Calvin and Beza; a preacher of sermons that moved their hearers to demolish convents; with a price on his head, yet never faltering; arrested for treason, an armed "congregation" at his heels; burned in effigy; for years a dictator—he spent his life forwarding the Reformation in Scotland. His great work distinguished in Scottish prose was his "History of the Reformation of Religion within the Realm of Scotland." He died in Edinburgh.

Kosciusko, Thaddeus, 1746?-1817. Polish patriot and general; commanded the Polish insurgent army; bravely defended Warsaw, but was defeated.

Kossuth (kosh'oot), Louis, 1802-1894. Hungarian patriot, orator, and statesman; leading spirit in the insurrection of 1848-1849.

Krapotkin, Peter Alexievich, Prince, 1842- . . . A Russian scientist; born in Moscow. He was in the Russian army for a time, and made extensive journeys

in Siberia and Manchuria. Charged with anarchist affiliations, he was imprisoned two years in Russia; escaped, founded the anarchist paper *La Revolté* in Geneva, and after being expelled from Switzerland in 1881, commenced a crusade against the Russian government in the English and French press; is the author of various works on nihilistic subjects.

Kruger (kres'her), Stephanus Johannes Paulus, 1825-1904. A Boer statesman; born near Cousesberg, Cape Colony; in 1883 he was elected president of the Transvaal for five years, and in 1888, after a contest with General Joubert, he was again chosen president, being re-elected in 1893 and 1896; on the breaking out of dissensions between the Uitlanders and the Boers in 1896, and the raid of Dr. Jameson in aid of the former, vigorous measures were adopted by President Kruger, resulting in the capture of Jameson and his 600 men and the suppression of the rebellion; in 1899 his policy led to war with England; the Boer reverses led to his departure for Europe, where he established himself in Holland.

Krupp, Alfred, 1812-1887. A German metal founder and steel gun manufacturer; born in Essen, Prussia; discovered the method of casting steel in very large masses. His world-wide fame was made by the production of the enormous steel siege guns with which the Germans did such terrible execution when they invested Paris. Krupp made his first steel cannon in 1847.

Kublai Khan (koo-bles kan'). Flourished thirteenth century; the founder of the twenty-third Chinese dynasty, that of the Mongols or Yuen; he was the grandson of Genghis Khan; he reigned, at first, only in Mongolia and the countries conquered by Genghis Khan; but he invaded China in 1260; captured the Chinese emperor in 1279, and thus overthrew the Sung dynasty, which had ruled for 319 years; he extended his conquests over Tibet, Pegu, Cochín China, and formed the greatest empire known in history, embracing the whole of Asia and part of Europe, from the Duleiper to Japan. He patronized letters, and encouraged agriculture, industry, and commerce; Marco Polo passed seventeen years at his court.

Kyrie (kuri), John, 1637-1724. Philanthropist; born in Gloucestershire; was distinguished for his beneficent actions; has given name to a society founded, among other things, for the betterment of the homes of the people.

Labouchere (lah-boo-sheer), Henry, 1831- . . . An English journalist and politician; born in London; was in the diplomatic service in the United States; established the London Truth.

Lacépède (lah-say-pad'), Bernard de la Ville, Count de, 1756-1825. A French naturalist; professor of Natural History in the Jardin des Plantes and in the university; senator in 1799; minister of state in 1809; peer of France in 1814. Besides continuing Buffon's "Natural History" at Buffon's own request, he wrote "Natural History of Reptiles." He died of smallpox in Epinay, near St. Denis.

Lacordaire (la-kor-dare'), Jean Baptiste Henri Dominique, 1802-1861. One of the greatest of modern pulpit orators; born in Recey-sur-Ource, Cote-d'Or, France. He distinguished himself greatly as a preacher, and was offered the post of vicar-general by the Bishop of New York. The Revolution of 1830 alone prevented him from leaving for the United States. In 1860 he was elected to the Académie Française, in succession to De Tocqueville. Of his numerous works his "Lettres à un jeune Homme sur la Vie Chrétienne," have been much admired.

Lactantius, Lucius Coelius Firmianus, 290-325? The most eloquent and learned of the Christian fathers; born in Africa.

Laennec (la-en-nek'), Rene Theophile Hyacinthe, 1781-1826. A distinguished French physician. In 1816 he became chief physician to the Hospital Necker, where he soon after made the discovery of "mediate" auscultation, i. e., of the use of the stethoscope. In 1819 he published his "Treatise on Mediate Auscultation," which has undoubtedly produced a greater effect, in so far as the advance of diagnosis is concerned, than any other single book.

La Fayette, Marie Jean Paul Roch Yves Gilbert Motier, Marquis de, 1757-1834. French general and patriot; came to America in 1777 to aid the Americans in their struggle for independence, and was commissioned major-general; fought at Brandywine, where he was wounded, and in numerous other engagements; visited France and obtained supplies and munitions, returning 1779; commanded the advance guard at Yorktown, 1781;

returned again to France; chosen commandant of the French National Guard, 1789, visited America, 1824, and was enthusiastically received; took a prominent part in the revolution of 1830.

Lagrange, Joseph Louis, Comte, 1736-1813. Famous mathematician; born at Turin, of French parentage; appointed director of Berlin Academy in 1766, he pursued his researches there for twenty years; in 1787 he removed to Paris, where he received a pension of 6000 francs from the Court, and remained till his death.

Lamar, Lucius Quintus Cincinnatus, 1826-1893. An American jurist; born in Putnam county, Ga. He entered the Confederate army and achieved distinction; after the downfall of the rebellion was Law Professor in the University of Mississippi, and afterward served in both Houses of Congress; in 1885 was appointed Secretary of the Interior, and in 1888 became an Associate Justice of the United States Supreme Court. He died in Macon, Ga.

Lamarck, Jean Baptiste Pierre Antoine de Monet, Chevalier de, 1744-1829. A French naturalist; born in Bazantin, Picardy, France. His great and excellent work, the "History of Invertebrate Animals," will ever entitle him to take his place in the very first rank of zoologists. As a conchologist his name stands pre-eminent, and the Lamarckian arrangement of shells is still that of the present day. In his latter days he became blind and comparatively poor. He died in Paris.

Landseer, Sir Edwin, 1802-1875. An English painter; born in London, England. He began to draw animals when a mere child; exhibited regularly at the Academy; took the very highest rank among animal painters, and though he was criticised for introducing too human a sentiment and expression into some of his animals, the humor and pathos of animal nature has had no finer exponent.

Lannes (Lahn), Jean, Duc de Montebello, 1769-1809. Marshal of France; was much esteemed by Napoleon, whom he zealously supported; went with him to Egypt, was with him at Marengo, distinguished himself at Austerlitz and in Spain, and fell mortally wounded at Essling, Austria.

Laplace (lah-plahs'), **Pierre Simon, Marquis de**, 1749-1827. A celebrated French mathematician; becoming member of the Academie des Sciences in 1785, he attained a position among mathematicians and astronomers almost equal to Newton's; his "Three Laws" demonstrated the stability of the solar system; he published many treatises on lunar and planetary problems, electricity, magnetism, and a nebular hypothesis; his "Mecanique Celeste" is unrivaled in that class of work.

Larousse (lah-roos'), **Pierre**, 1817-1875. A celebrated French grammarian and lexicographer; best known by his "Grand Dictionnaire Universel du dixieme Siecle."

La Salle (lah sal'), **Robert Cavelier, Sieur de**, 1643-1687. A French explorer; born in Rouen, France. Settling in Canada at the age of twenty-three, he began his travels with an attempt to reach China by descending the Ohio river, which he supposed to empty into the Pacific. Formed the project of descending the Mississippi to the sea. After many and severe hardships this long voyage was concluded, and the arms of France set up at the mouth of the great river on April 9, 1682. Two years later an expedition was fitted out to establish a permanent French settlement on the Gulf, which should secure France's claims to the Mississippi valley. But La Salle's bad fortune pursued him; he mistook Matagorda bay for a mouth of the Mississippi, landed there and then spent two years in unsuccessful journeys to discover the great river, while his colonists and soldiers gradually dwindled away. His harshness of manner, more than his want of success, embittered his followers, and he was assassinated by some of them.

Latimer, Hugh, 1472-1555. An English reformer and martyr; made Bishop of Worcester 1535; burned at the stake with Bishop Ridley.

Latour (lah-tur'), **d' Auvergne, Theophile Malo Corret de**, 1743-1800. French officer; called by Napoleon, "The First Grenadier of France."

Latreille (lah-tree-el'), **Pierre Andre**, 1762-1833. French zoologist; one of the founders of the science of entomology; succeeded Lamarck as Professor of Zoology in the Jardin des Plantes; wrote several works on entomology.

Laud, William, 1573-1645. An English prelate; Archbishop of Canterbury in the reign of Charles I.; born in Reading, Berkshire, England. His endeavors to introduce the liturgy into Scotland created him numerous enemies; therefore, he was impeached by the Commons, and sent to the Tower. After lying there nearly three

years he was declared guilty of treason, and the archbishop was accordingly beheaded on Tower Hill. He was in the seventy-second year of his age and met his fate with great fortitude.

Laurens, Henry, 1724-1792. An American statesman; born in South Carolina; he was sent on a mission to The Hague, 1779, and en route was captured by the English and kept a prisoner in the Tower of London for fifteen months.

Laurens, John, 1753-1782. An American military officer; son of the preceding; born in South Carolina; joined the American Continental Army in 1777, becoming aid-de-camp and secretary to Washington. Laurens so highly distinguished himself in the battles of Germantown and Monmouth, and in other operations of the War of Independence, as to earn for himself the title of the "Bayard of the Revolution"; he was killed in action at the Combahee river, S. C.

Laurier, Sir Wilfred, 1841-. . . A Canadian statesman; born in St. Lin, Quebec. In 1871 he entered the Federal Assembly, and his high personal character, his undoubted loyalty and attachment to the connection of the colony with Great Britain, together with his great oratorical powers, soon gave him high rank in the Liberal party; on the retirement of Mr. Blake in 1891 he was chosen as leader of the Liberal party, and at the general election of 1896 he led his followers to a notable victory, becoming premier of the Dominion; this office he has filled with signal ability.

Lavater (lah-kah-tur'), **Johann Caspar**, 1741-1801. Swiss physiognomist.

Lavoisier (lah-vow-zeay'), **Antoine Laurent**, 1743-1794. French chemist; founder of modern chemistry; guillotined by French revolutionary tribunal.

Law, John, 1671-1729. Scotch financier in France; promoted the South Sea Bubble.

Lawrence, Abbott, 1792-1855. An American diplomatist; born in Groton, Mass.; was a commissioner in 1842 to settle the Northeastern Boundary question, and arranged a basis for settlement with Lord Ashburton which was satisfactory to both the United States and England; was minister to Great Britain, 1849-1852; founded the Lawrence Scientific School of Harvard University, to which he gave \$100,000. He died in Boston, Mass.

Lawrence, James, 1781-1813. American naval hero; as commander of the *Cheapeake*, he engaged the British frigate *Shannon* off Boston and was killed in the action; his last words were: "Don't give up the ship."

Lawton, Henry Ware, 1843-1899. An American military officer; born in Manhattan, O. He was conspicuous as an Indian fighter. At the beginning of the American-Spanish war Lawton was a lieutenant-colonel, and was made a major-general of volunteers, July 8, 1898. He was in command of the 2d Division of the 5th Army Corps before Santiago, and was in the thick of the fighting preceding the capture of San Juan hill, and will go down in history as the "hero of El Caney." At the close of the war with Spain General Lawton was transferred to the Philippines, where he began active operations against the insurgents; captured Santa Cruz, a Filipino stronghold, April 10, 1899, and San Isidro, May 15; was placed in command of Manila, June 1; while on the firing lines at San Mateo, he was killed by insurgent sharpshooters.

Layard, Sir Austen Henry, 1817-1894. An English archaeologist; born in Paris, France. He is best known by his books: "Nineveh and its Remains," and "Discoveries in the Ruins of Nineveh and Babylon." He died in London, England.

Le Brun, Charles, 1619-1690. A celebrated French painter; born in Paris; studied in Rome, settled in Paris; he exercised for about forty years a great influence on the art of the period; he decorated Versailles, and has many works in the Louvre.

Le Brun, Marie, 1755-1842. A French painter; born in Paris, France.

Le Conte, Joseph, 1823-1901. An American scientist; born in Liberty county, Ga.; studied natural history under Agassiz. He subsequently held several professorships, and after 1869 occupied the chair of geology in the University of California. He died in the Yosemite valley, California.

Ledru-Rollin, Alexandre Auguste, 1807-1874. A French agitator; born near Paris, France; died in Fontenay.

Ledyard, John, 1751-1788. An American traveler; born in Groton, Conn. He was a companion of Captain Cook in his third voyage round the world. He planned a journey through Northern Europe and Asia in the

early part of 1786 but reached no farther than Irkutsk, Russia, where he was arrested on suspicion of being a spy, and was compelled to abandon his enterprise. In June of 1788 he started on a voyage of exploration to Central Africa, under direction of the African Association, which was cut short by his death, in Cairo, Egypt.

Lee, Ann, 1736-1784. Founder of the Society of Shakers in America; born in Manchester, England. She was poor and uneducated, and in 1758 joined the Shakers, a sect allied in their belief to the Friends, but who were peculiar in their form of worship. She believed herself inspired, and was imprisoned in 1770 for preaching the new doctrine of celibacy. In 1774 she emigrated to America and founded the Society of Shakers in 1776. She was greatly revered by her followers, and by them was called "Mother Ann." She died in Watervliet, N. Y.

Lee, Fitzhugh, 1835-1905. An American military officer; born in Clermont, Fairfax county, Va.; entered the Confederate army, rising through its grades to that of major-general. He was governor of Virginia from 1886 to 1890. Appointed consul-general at Havana in 1896 he served there till 1898, and was at the head of affairs in Cuba during the period immediately preceding the outbreak of the war with Spain. During the ensuing war with Spain he was a major-general of volunteers, serving in Cuba, and becoming at the close of hostilities military governor of Havana. In 1900 he was made commander of the Department of the Missouri.

Lee, Henry, 1756-1818. An American soldier; born in Leesylvania, Va.; on the outbreak of the Revolutionary War joined Washington's army; he speedily won distinction for his dash and daring, being styled "Light-horse Harry Lee." He led the army of 15,000 men that put down the "whisky insurrection" in Pennsylvania in 1794. Statesman; governor of Virginia.

Lee, Robert Edward, 1807-1870. American general; commander-in-chief of the Confederate army; son of Henry Lee; born in Virginia; graduate of West Point; a chief engineer of General Scott's army in Mexico; Confederate brigadier-general, 1861, and took chief command, 1862; surrendered at Appomattox, April 9, 1865; subsequently chosen president of Washington College, at Lexington, Va., where he died; he was a man of devout religious faith, a high sense of duty, and great courage and ability as a soldier.

Leech, John, 1817-1864. An English artist and humorist; born in London, England; he died suddenly in London.

Leibnitz (Líbenítz), Gottfried Wilhelm Freiherr von, 1646-1716. One of the most celebrated scholars and philosophers that Germany has ever produced; born in Lelpsic; early directed his attention to mathematics, and attained great eminence in this science. Authorities seem generally agreed that he discovered the differential calculus independent of any knowledge of Newton's method of fluxions, so that each of these great men in reality attained the same result for himself.

Leicester (les'ter), Robert Dudley, Earl of, 1532?-1588. An English noble and favorite of Queen Elizabeth; in 1588, on the threatened invasion of the Spanish Armada, Leicester was appointed lieutenant-general of the kingdom.

Leighton (lay'ton), Sir Frederick, 1830-1896. An English artist; born in Scarborough, England; died in London.

Lely, Sir Peter, 1618-1680. An Anglo-Dutch painter; born in Soest, Westphalia; died in London, England.

Leo XIII. (Gleonehino Pecci), 1810-1903. Pope; born in Capri, Italy. Was elected pope in 1878, on the death of Pius IX.; he died at Rome after a short illness, due to old age; he was noted for his personal good qualities, and his abilities as a statesman, and sought to bring the Roman Church into line with modern progress.

Leonidas. Flourished fifth century B.C.; king of Sparta from 491 to 480 B.C.; opposed Xerxes, the Persian, who threatened Greece with a large army, and kept him at bay at the Pass of Thermopylae with 300 Spartans and 5,000 auxiliaries till he was betrayed by Ephialtes, when he and his 300 threw themselves valiantly on the large host, and perished, fighting, to the last man.

Leopold II., 1835- . . . King of the Belgians. He early manifested an interest in Africa, and in 1885 he became sovereign of the Kongo Free State. During his reign there has been an extension of the suffrage and a spread of advanced ideas in Belgium; he is very wealthy, and is regarded as one of the best business men in Europe.

Lesseps (les'eps), Ferdinand, Vicomte de, 1805-1894.

A French diplomat and engineer; born in Versailles; in 1854, on the invitation of Said Pasha, he visited Egypt to study the problem of canalizing the Isthmus of Suez; the results of his studies were stated in a memoir, "Piercing the Isthmus of Suez." He was made chief director of the works. The canal was opened to traffic August 15, 1869. His attempt to pierce the Isthmus of Panama resulted in failure and a great political scandal.

Leutze, Emanuel, 1816-1868. An American artist; born in Gmund, Wurtemberg; was brought to the United States in infancy. He died in Washington, D. C.

Leverrier (lay-vair-re-ai'), Urbain Jean Joseph, 1811-1877. French astronomer, distinguished in chemistry before he devoted himself to astronomy; rose to eminence in the latter science by a paper on the variations in the orbits of the planets; discovered Neptune.

Lewes, George Henry, 1817-1878. An English critic and man of letters; born in London; Lewes was married unhappily and had children when his connection with George Eliot began in July, 1854; it ended only with his death at their house in Kent's Park.

Lewis, Meriwether, 1774-1809. An American explorer; born in Virginia. Lewis, in company with Clarke, explored the then unknown region in which the Missouri rises, and traced the Columbia to its mouth.

Lick, James, 1796-1876. An American philanthropist; born in Fredericksburg, Pa. In 1847 he emigrated to California, taking with him \$30,000, which he invested in real estate in San Francisco, and its rapid advance in value made him wealthy. In 1874 he placed his entire property in the hands of trustees, to be devoted to public and charitable purposes. The total amount thus given was \$13,000,000, of which \$700,000 was for Lick Observatory, to be connected with the University of California; \$150,000 for free public baths in San Francisco, and \$540,000 for an institution to be called the California School of Mechanical Arts. He died in San Francisco, Cal.

Liddon, Henry Parry, 1829-1890. Canon of St. Paul's, London; eminent both as a scholar and a preacher; author of an eloquent course of lectures, the Bampton, "On the Divinity of Jesus Christ"; belonged to the Liberal section of the High-Church party.

Liebig (lee'big) Justus, Baron von, 1803-1873. A German chemist; born in Darmstadt; no other chemist of great rank has so sedulously striven to make the science a tender to practical utilities.

Li Hung Chang, 1823-1901. A Chinese statesman and diplomatist; born in Lu Chow Nguhwi province, China; he was a friend to foreigners and to Western civilization and culture; in 1896 he made a tour of the world, traveling overland, and was everywhere received with eclat as a highly distinguished guest; he acted a prominent part in adjusting the relations of China with foreign powers after the suppressing of the uprisings of 1900-1901; he died in Peking, China.

Liliuokalani, 1838- . . . Queen of Hawaii; she was a sister of King Kalakaua, whom she succeeded as queen. She married John O. Dominis, an American, who became governor of Oahu; he died in 1891 and in the same year she ascended the throne; in 1893 she was deposed, the islanders adopting a republican form of government; she used every effort to regain her supremacy and endeavored to secure assistance from the United States, visiting Washington in 1896 for that purpose, but was unsuccessful in interesting the government in her behalf; on the annexation of Hawaii to the United States, in 1898, she returned to the island.

Lincoln, Abraham, 1809-1865. Sixteenth president of the United States; "with malice toward none, with charity to all;" born in Kentucky; removed to Indiana when eight years old; captain in the Black Hawk War, 1832; elected to the Illinois legislature, 1834; admitted to the bar 1837, and removed to Springfield, Ill.; elected to Congress in 1846; Republican candidate for United States senator in 1854, his opponent being Stephen A. Douglas; nominated for the presidency and elected, 1860; re-elected, 1864, but assassinated April 14, 1865, by John Wilkes Booth; his death was universally deplored, for his wise administration of affairs during the Civil War had won for him the regard of both factions of the bloody controversy.

Lincoln, Benjamin, 1738-1810. An American military officer; born in Hingham, Mass.; appointed by Washington to the command of the central division at the siege of Yorktown. On the surrender of Cornwallis he was deputed to receive the sword of Cornwallis. In 1781 he was chosen by Congress secretary of war, and served in that office for three years; in 1789 was

commissioner to treat with the Creek Indians; and in 1798 again, to make peace with the Western tribes. He was the author of various papers, historical, agricultural, etc. He died in Hingham, Mass.

Lind, Jenny, 1821-1887. A distinguished vocalist. She retired from the stage on her marriage to Otto Goldschmidt, 1851, and resided in London.

Linne (lin-neh'), Karl von, 1707-1775. Commonly called *Linnaeus*; the greatest botanist of his age; born in Rasmhult, Sweden; died in Upsala.

Lippi, Fra Filippo, 1406-1469. Commonly known as *Lippo Lippi*; a Florentine painter; born in Florence; died in Spoleto, Italy.

Lister, Sir Joseph, 1827- . . . An English surgeon. In addition to important observations on the coagulation of the blood, the early stages of inflammation, and other matters, his great work is known as the antiseptic system of surgery. Lister was awarded many foreign honors, and received the medal of the Royal Society in 1880, the prize of the Academy of Paris in 1881. He was made baronet in 1883 and a peer in 1897.

Listst (list), Franz, 1811-1886. An eminent Hungarian pianist and musician; he entered a convent in 1865.

Littleton, or Lyttleton, Sir Thomas, 1402?-1481. An English jurist; born in Frankley, Worcestershire, England. Littleton's reputation rests on his work on "Tenures," which was originally written in Norman-French, or rather law French. It treats of the English law relating to feudal rights over land, and was the first scientific attempt to classify the subject. He died in Frankley.

Littre (let-tr), Maximilien Paul Emile, 1801-1881. A French philologist; born in Paris. He was one of the greatest linguists and scientists of the century, best known for his celebrated "Dictionary of the French Language." In addition to his labors as a philologist he contributed to various scientific and philosophical journals, was active in politics, translated the works of Hippocrates, which admitted him to the Academy of Inscriptions, and Pliny's "Natural History," and wrote a "History of the French Language," etc. In 1871 he was elected to the French Academy. He died in Paris.

Livermore, Mary Ashton (Rice), 1821-1906. An American reformer and lecturer; born in Boston, Mass.; conspicuous in her efforts to promote the woman suffrage and temperance movements. Among her popular lectures are: "What Shall We Do with Our Daughters?" "Women of the War," "The Moral Heroism of the Temperance Reform."

Livingston, Edward, 1764-1836. An eminent American statesman and jurist; born in New York.

Livingston, Robert, 1746-1813. An American statesman; born in New York. He was one of the committee to prepare the Declaration of Independence; was appointed secretary of foreign affairs in 1790; and throughout the War of the Revolution signalized himself by his zeal and efficiency in the cause; in 1801 was appointed by Jefferson minister plenipotentiary to France.

Livingstone, David, 1813-1873. A distinguished Scotch explorer; died at Fshitambo, Africa.

Lloyd, Henry Demarest, 1847-1903. An American writer on economics; born in New York. His chief work is the notable book "Wealth Against Commonwealth." He died at his home in Winnetka, Ill.

Locke, John, 1682-1704. English philosopher; founded the modern sensational school of philosophy, claiming that all knowledge comes through the senses.

Lodge, Henry Cabot, 1850- . . . American statesman and author; born in Boston, Mass.; was editor of the *North American Review* in 1878-1876, and lecturer on History at Harvard College in 1876-1879; he then entered political life, and in 1893 was elected United States senator from Massachusetts and re-elected in 1899; he is the author of a "Life of Daniel Webster," and of lives of Alexander Hamilton and George Washington; also of a "Boston" in the series of "Historic Towns"; of a "Short History of the English Colonies in America," etc.

Logan, John Alexander, 1826-1886. An American soldier and statesman; born in Jackson county, Ill.; rose to the rank of major-general of volunteers in the civil war, being distinguished throughout the struggle for valor and patriotism; elected United States senator from Illinois; nominated for the vice-presidency on the ticket headed by James G. Blaine, 1884, but was defeated; he died in Washington, D. C.

Longstreet, James, 1821-1904. An American military officer; born in Edgefield district, S. C.; he served with distinction in the Mexican war; after the battle of Fredericksburg, General Longstreet was given the command of a corps, with the rank of lieutenant-general; the gal-

lanty and skillful generalship he displayed on all occasions caused him to be regarded as one of the leading generals in the Confederate army; was made minister to Turkey, and United States marshal for the District of Georgia; in 1898 he was appointed United States commissioner of railroads.

Loubet (loo-bay'), Emile, 1838- . . . President of the French Republic; born in Marsanne, Drôme, France; in 1876 he was elected to a seat in the Chamber of Deputies; was re-elected in 1877, and again in 1881, but in 1885 he moved up to the senate; was minister of public works in the short-lived Tirard Cabinet; on the refusal of M. de Freycinet to reassume the presidency of the cabinet, was intrusted by President Sadi-Carnot with the task of organizing the ministry with the larger part of its former constituents, himself assuming the portfolio of the Interior and the presidency of the cabinet. M. Loubet was elected president of the senate in 1896, to which position he was re-elected in January, 1898; he succeeded Félix Faure as president, February 18, 1899.

Louis I. (le Debonnaire), 778-840. Emperor of the West and King of France; divided the empire among his sons. **Louis VI. (the Fat), 1078?-1137.** King of France. **Louis IX. (Saint), 1215-1270.** Led a large army against the Saracens in 1248; defeated and taken prisoner in Egypt, but effected his ransom; led another crusade in 1270, but died the same year near Tunis; a wise ruler, and noted for many virtues.

Louis XIV., 1638-1715. The "Grand Monarque," eldest son of Louis XIII.; was only five when his father died, and the government was in the hands of his mother, Anne of Austria, and Cardinal Mazarin, her minister; under the regency the glory of France was maintained in the field, but her internal peace was disturbed by the insubordination of the parliament and the troubles of the Fronde; by a compact on the part of Mazarin with Spain, before he died, Louis was married to the Infanta Maria Theresa in 1660, and in 1661 he announced his intention to rule the kingdom alone, which he did for fifty-four years with a decision and energy no one gave him credit for, in fulfillment of his famous protestation *L'état c'est moi*, choosing Colbert to control finance, Louvois to reorganize the army, and Vauban to fortify the frontier towns; he sought to be as absolute in his foreign relations as in his internal administration, and hence the long succession of wars which, while they brought glory to France, ended in exhausting her; at home he suffered no one in religious matters to think otherwise than himself; he revoked the Edict of Nantes, sanctioned the dragonnades in the Cevennes, and to extirpate heresy encouraged every form of cruelty. When we look at the men who adorned it, the reign of Louis XIV. was one of the most illustrious in letters and the arts in the history of France: Corneille, Racine, and Molière, eminent in the drama; La Fontaine and Boileau in poetry; Bossuet in oratory; Bruyère and Rochefoucauld in morals; Pascal in philosophy; Saint-Simon and Retz in history, and Poussin, Lorrain, Lebrun, Persault, *et al.*, in art.

Louis XV., 1710-1774. King of France; born in Versailles, France; came to the throne in 1715. The beginning of his reign was rendered disastrous by the Mississippi scheme of John Law, which ruined thousands of people. In his foreign wars he was at first successful, but was ultimately defeated both by Prussia and England, and his reign witnessed the loss of the French possessions in North America. His personal conduct was unspeakably immoral, the French people groaned under the exactions made necessary by his lavish and licentious expenditures, and he himself is said to have foreseen the upheaval that followed in the next reign, without seeking to prevent it. He died in Versailles, France.

Louis XVI., 1754-1793. The grandson of the preceding and his successor; had in 1770 married Marie Antoinette, the youngest daughter of Maria Theresa of Austria, and a woman young, beautiful, and accomplished, in high esteem for the purity of her character; his accession was hailed with enthusiasm, and he set himself to restore the ruined finances of the country by taking into his counsel those who could best advise him in her straitened state, but these one and all found the problem an impossible one, owing to the unwillingness of the nobility, especially the court, to sacrifice any of their privileges for the public good; this led to the summoning of the States-General in 1789, and the outbreak of the Revolution by the fall of the Bastille in July of that year; in the midst of this Louis, well-intentioned but without strength of character, was submissive to the wishes of his court and the queen, lost his popularity by

his hesitating conduct, the secret support he gave to the Emigrants, his attempt at flight, and by his negotiations with foreign enemies, and subjected himself to persecution at the hands of the nation; he was therefore suspended from his functions, shut up in the Temple, arraigned before the convention, and condemned to death as "guilty of conspiracy against the liberty of the nation and a crime against the general safety of the State"; he was accordingly guillotined on the 21st of January.

Louis Philippe, 1778-1860. King of the French from 1830 till 1848; born in Paris. In 1798, during the Revolution, he fled to Austria and Switzerland and supported himself by teaching; after three years in the United States he went to London, in 1800; on the fall of Napoleon repaired to Paris and recovered his estates; he gained popularity with the *bourgeoisie*, and when the revolution of July, 1830, overthrew Charles X. he succeeded to the throne as the elected sovereign of the people; under the "citizen king" France prospered; but his government gradually became reactionary and violent; he used his great wealth in giving bribes, tampered with trial by jury and the freedom of the press, and so raised against him both the old aristocracy and the working classes; political agitation culminated in the revolution of February, 1848; he was forced to abdicate and escaped with his queen to England, where he died.

Louisa, 1776-1810. Queen of Prussia; born in Hanover. Her father, Duke Karl of Mecklenburg-Strelitz, was then commandant. She was married to the Crown-prince of Prussia, afterward Frederick William III. December 24, 1793, and was the mother of Frederick William IV. and William III. afterward emperor. After her husband's accession to the throne she became exceedingly popular, her great beauty being united with dignity and grace of manners, and with much gentleness of character and active benevolence. She died in Strelitz.

Louvois (*loo-mwah*). Francois Michel le Tellier, Marquis de, 1641-1691. The war-minister of Louis XIV.; born in Paris, France. Louvois took a leading part in the persecution of the Protestants through the dragonnades after the revocation of the Edict of Nantes.

Loyola, Ignatius de (Saint Ignatius), 1491-1566. Spanish founder of the Society of Jesus, or Jesuits; entered the army at an early age; crippled by a wound in 1520, he turned his attention to religion; made a pilgrimage to Jerusalem in 1523, and subsequently studied at the University of Paris, where he met Francis Xavier and James Lainez, in conjunction with whom, in 1543, he formed the society which has since become so celebrated.

Luini, or Luvino, Bernardino, 1470?-1531? The best painter of the Milan school; is supposed to have been born in the village of Luino near Lake Maggiore; but it is only known for certain that his works were mostly executed between 1520 and 1530.

Luther, Martin, 1483-1546. Leader of the Protestant Reformation; born at Eisleben, Germany, the son of a miner; educated at the University of Erfurt, and in 1505 entered the Augustine convent at that place; ordained a priest, 1507; became professor of philosophy at Wittenberg, 1508; visited Rome, 1511; denounced the sale of indulgences, 1517, and became involved in numerous controversies; cited to appear before Leo X., he refused to comply; burned the papal bull containing an order to destroy certain of his works, and denied the authority of the pope; excommunicated; enjoyed the support of the elector of Saxony; attended the Diet of Worms, convened for his trial, in 1521; laid aside his monastic dress in 1524, and married Catherine von Bora, an ex-nun, in 1525; enjoyed, during the latter part of his life, the greatest distinction from the princes of Germany. Luther completed, in 1522, his translation of the New Testament, and in 1534 that of the Old Testament; the central point of his theology is justification by faith.

Luxembourg (*look-som-door*). Francois Henri de Montmorenci, 1623-1695. One of the greatest of French generals; he successfully defeated the Spanish in the Low Countries, and the combined forces of Austria, Holland, and Spain, and the English.

Lycurgus. Flourished ninth century, B.C. The law-giver of Sparta; traveled over Crete, Ionia, and Egypt, and on his return, finding his country in complete anarchy, made a new division of property, and remodeled the whole constitution, military and civil; next he bound the citizens by oath not to change his laws till he came back, and then left Sparta to be no more seen; his memory was honored as that of a god with a temple and yearly sacrifices. Accounts of him are legendary.

Lyell, Sir Charles, 1797-1875. A British geologist; born in Kinnordy, Forfarshire, Scotland; resolved to de-

vote his time and fortune to geological research; for this purpose he visited the United States and the continent of Europe; in his "Antiquity of Man" he summarized the evidence in favor of the theory that the race of man was much older than was currently believed; he died in London, England.

McAdam, John London, 1756-1836. A Scotch engineer; inventor of the system of road making known as "macadamizing"; born in Ayr, Scotland; he went to New York in 1770, entered his uncle's counting house, became a successful merchant, and on his return to Scotland in 1783 bought the estate of Sauchrie, Ayrshire; he began in 1810 to make experiments in the construction of roads, which became a passion with him, and in gaining experience he traveled 80,000 miles, and spent \$25,000; in 1815 he was appointed surveyor to the Bristol Turnpike Trust, and remade the roads there cheaply and well; his methods formed the subject of a select committee of the House of Commons in 1819. He was voted \$50,000 and appointed surveyor-general of metropolitan roads in 1827; he declined knighthood. Died in Moffat, Dumfriesshire.

Macbeth, . . . -1056. A thane of the north of Scotland who, by assassination of King Duncan, became king; reigned seventeen years, but his right was disputed by Malcolm, Duncan's son, and he was defeated by him and fell at Lumphannan.

McClellan, George Brinton, 1826-1885. American general; born in Philadelphia; served in the Mexican war. Became commander of the armies of the United States, 1861; dilatory in Peninsular campaign, was superseded but recalled to command and defeated Lee at Antietam; soon relieved of command; was defeated for the presidency, 1864; retired to private life.

McClelland, John Alexander, 1812-1900. An American lawyer and soldier; born in Breckenridge county, Ky.; member of Congress, 1843-1851; joined the Union forces and was made a brigadier-general of volunteers, and later promoted major-general. He died in Springfield, Ill.

McCook, Alexander McDowell, 1831-1908. An American military officer; born in Columbiana county, O.; was made brigadier-general of volunteers in September, 1861, major-general in 1862, and was brevetted brigadier-general, U. S. A., in 1865. He was promoted brigadier-general, U. S. A., in 1890, major-general in 1894, and was retired April 22, 1895. He represented the United States at the coronation of the Czar of Russia in 1896.

McCormick, Cyrus Hall, 1809-1884. An American inventor; born in Walnut Grove, Va. The reaping machine invented by him won him many gold medals and distinctions. He established the Presbyterian Theological Seminary of the Northwest in Chicago, 1859. He died in Chicago, Ill.

McCosh, James, 1811-1894. A Scotch-American theologian; born in Carkeoch, Ayrshire, Scotland. In 1868, at the solicitation of the faculty and trustees of Princeton College, N. J., he came to the United States and became president of that institution. Under his guidance and the influence of his name Princeton advanced to a higher place than ever before among the universities of the United States. He resigned the presidency of Princeton in 1888. He died in Princeton, N. J.

Macdonald, 1765-1840. Marshal of France; born at Sedan, of Scotch descent; entered the army in 1785 and rapidly rose in rank; served with distinction under Napoleon, especially at Wagram, when he was made Duke of Taranto; supported the Bourbons on their restoration.

Maceo, Antonio, 1848-1896. A Cuban patriot; born in Santiago de Cuba. In 1890 he was formally banished from Cuban soil by the Spanish government, but at the outbreak of the war of 1895-1898 he returned to Cuba and took command of 7,000 insurgents in his native province, and was thereafter engaged in various battles and skirmishes with the Spanish armies. Early in December, 1896, while attempting to penetrate the Spanish lines with a skirmishing troop, he was killed.

Machiavelli (*mak-ah-ai'le*). Niccolo, 1469-1527. Statesman and historian; born in Florence, Italy; was secretary of the Florentine Republic from 1498 to 1512, and during that time conducted its diplomatic affairs with a skill which led to his being sent on a number of foreign embassies; he was opposed to the restoration of the Medici family, and on the return of it to power was subjected to imprisonment and torture as a conspirator, but was set at liberty; he spent the remainder of his life chiefly in literary labors, producing among other

works a treatise on government, entitled "The Prince," the principles of which have established for him a notoriety wide as the civilized world.

McKinley, William, 1843-1901. Twenty-fifth president of the United States; born in Ohio. He enlisted as a private in the Twenty-third Ohio Volunteer Infantry, when but eighteen years of age. Passed rapidly to captain and was brevetted major when only twenty-two years of age for gallantry on the field of battle. Later he studied law, was admitted to the bar in 1867, elected member of Congress, 1876-1891. He was elected governor of Ohio in 1891 and re-elected in 1893. Elected president in 1896 by 603,854 popular plurality; re-elected in 1900 by 849,455. As president he proved unusually able and enjoyed in a remarkable degree the confidence of the people. Shot by Leon Czolgosz at Buffalo, September 6, 1901, and died September 14.

Macmahon, Marie Edme Patrice Maurice de, Duke of Magenta, 1808-1893. A marshal of France; born in Sully, near Autun, France. Entering the army, he saw much active service in Algeria, and in the Italian campaign of 1859, winning a marshal's baton and the dignity of Duke of Magenta for the decisive part he took in the battle of that name. In 1873 he was elected president of the republic for a period of seven years. He resigned on January 30, 1879, and afterward lived in retirement; died in Paris.

Macpherson, James Birdseye, 1828-1864. An American military officer; born in Sandusky, O.; entered service in the Civil War, and was chief engineer on the staff of General Grant in 1862; was distinguished for brilliant services at Champion Hill and at Vicksburg, and was commander of the Army of the Tennessee when he was killed at Atlanta, Ga.

Macready, William Charles, 1798-1873. An English tragedian; born in London, England; in 1826 he made his first visit to America, and in 1828 played in Paris, with great success in both countries; he did much to reform the stage and cultivate the public taste for Shakespearean drama; revisited the United States in 1849; returned to England; gave a series of farewell performances, and finally retired from the stage in 1851; he died in Cheltenham, England.

Madison, James, 1751-1836. American statesman and fourth president of the United States; born at Port Conway, Virginia; devoted himself to politics in 1776; he took part in framing the Virginia constitution, and subsequently, together with Jefferson, secured religious liberty in the state; with Jay and Hamilton he collaborated to establish the federation of the states and to frame the Federal Constitution; the "three fifths" rule, which won the adhesion of the slave-holding states, was his suggestion; elected to the first Congress, he attached himself to Jefferson's party, and was secretary of state during Jefferson's presidency, 1801-1809; he succeeded his former leader and held office for two terms, during which the war of 1812-1814 with England was waged; his public life closed with his term of office, 1817.

Mæcenas (mæ-senās), Caius Cilnius, 70?-8 B.C. A man whose name is imperishably associated with the Augustan literature of Rome; his great glory was the happy influence that he exercised over the emperor as a patron of learning, and his own munificence and taste in the same direction.

Magellan, the incorrect but generally received name of **Magalhães**, Fernando, 1480?-1521. A celebrated Portuguese navigator; born in Saboroso, Portugal; in 1520 he discovered and passed the straits which have since been called by his name, and was the first to circumnavigate the world; he was slain in a skirmish with the natives on Mactan, one of the Philippine Islands.

Magruder, John Bankhead, 1810-1871. An American military officer; born in Winchester county, Va.; served in the Mexican War; at the outbreak of the Civil War entered the Confederate army; afterward served under the Emperor Maximilian of Mexico, and died in Houston, Tex.

Mahmud, 979?-1030. Sultan of Ghazna, the founder of the Mohammedan empire in India; born in Ghazna, Afghanistan. His father, Sabaktagin, governor of Ghazna, owed a nominal allegiance to Persia, but was really independent. On his death Mahmud put aside his younger brother. Recognized by the Caliph of Bagdad as independent, he began to lay the foundation of an extensive empire in Central Asia. He then turned his attention to India, and in a series of twelve invasions secured a great amount of treasure and vastly extended his power. A patron of literature, and brought many men of learning about his court. He died in Ghazna.

Maimonides (my-mon'-a-dee), Moses, 1135-1204. A

Jewish philosopher; born in Cordova, Spain. He attempted to harmonize Judaism and philosophy. Driven with his family from Spain, he resided in Fez; then traveled by way of Palestine to Cairo, becoming there chief rabbi and the caliph's physician. His chief work, written in Hebrew, is "Mishne Thora," a masterly exposition of the whole of the Jewish law as contained in the Pentateuch and the voluminous Talmudic literature. He died in Cairo, Egypt.

Maintenon (mahnt'-non), **Françoise d'Aubigne, Marchioness de**, 1635-1719. Born in Niort, France. She was first the mistress, and later the second wife, of King Louis XVI. of France.

Maitland, William, 1525-1573. Scottish politician and reformer; played a prominent part in the various movements of his time, but gained the confidence of no party; he adhered to the party of Moray as against the extreme measures of Knox, and proved a highly astute ambassador at the English Court; he connived at Rizzio's murder, but regained Mary's favor, and when she fled to England he acted in her interest; he died in Leith prison.

Malcolm. The name of various Scottish rulers. **Malcolm III.**, surnamed Canmore (Great Head), 1024?-1093. After the murder of his father, Duncan, by Macbeth, he sought aid from Siward of Northumbria; his cause was also espoused by Edward the Confessor. On the defeat and death of Macbeth he was crowned at Scone in 1054. In 1068 he granted asylum to Edgar Atheling, his mother, and two sisters (one of whom, Margaret, he married in 1070), with a number of Saxon exiles. His reign, which was mostly taken up with wars with England, had nevertheless an important bearing on the civilization and consolidation of Scotland.

Malesherbes (mah'-zahrb), **Lamoignon de**, 1721-1794. French statesman; born in Paris; a good and upright man; was twice called to be one of Louis XVI.'s advisers; defended Louis at his trial; was guillotined.

Malibran, Marie Felicità (née Garcia), 1806-1836. French vocalist and actress; made her debut in London in 1825, and soon her reputation extended over Europe. She married M. Malibran, a French merchant, who soon became bankrupt; she then returned to the stage, and was received with great enthusiasm in France, England, Germany, and Italy. Her first marriage having been dissolved, she married M. Beriot, a famous violinist, in 1836. She was one of the greatest of operatic singers. Died in Manchester, England.

Malpighi (mal'-pee), **Marcello**, 1628-1694. Italian anatomist and professor of medicine; noted for his discovery of the corpuscles of the kidney and the spleen, named after him.

Malthus, Thomas Robert, 1766-1834. An English clergyman and political economist. He held that population increased faster than the necessities of life, and opposed early marriages.

Mandeville, Sir John, fl. fourteenth century. An English traveler; he was the author of a popular book of travels.

Manfred, 1231-1266. King of the two Sicilies; had to struggle for his birthright with three popes, Innocent IV., Alexander IV., and Urban IV.; the last excommunicated him, and bestowed his dominions on Charles of Anjou.

Mann, Horace, 1796-1859. An American educator; born in Franklin, Mass. He was member of Congress from Massachusetts, 1848-1853; president of Antioch College, 1852-1859. He died in Yellow Springs, O.

Manning, Henry Edward, 1807-1892. An English clergyman and writer; born in Totteridge, Hertfordshire. Originally a clergyman of the Church of England, he became a Roman Catholic priest in 1851; Archbishop of Westminster in 1865; cardinal in 1875; founded the Roman Catholic University in Kensington in 1874. He died in Westminster.

Mansard. The name of two French architects, born in Paris—**François**, 1598-1666, who constructed Hotel Toulouse, now the Bank of France, and **Jules Hardouin**, 1645-1708, his grand-nephew; architect of the dome of the Invalides and of the palace and chapel of Versailles.

Mansfield, William Murray, Earl of, 1705-1793. A British jurist; in 1754 he was attorney-general, and in 1756 he was appointed chief-justice of the King's Bench, and made Baron Mansfield; in 1776 he was advanced to the dignity of earl; he frequently refused high office, notably that of chancellor; in 1788 he resigned his office of chief-justice, and the remainder of his life was spent in retirement; he died in London, England.

Mantegna (man-tan'-yah), **Andrea**, 1431-1506. An Italian painter; born in Vicenza, Italy; Mantegna ex-

celled in perspective, which was then a rare merit; he introduced the art of engraving on copper into Upper Italy.

Manteuffel (*man'toi-tel*), **Edwin Hans Karl Freiherr von**, 1809-1885. A Prussian soldier; born in Dresden; he entered the war of 1870 as commander of the First Corps, but was soon promoted to the command of the Army of the North, which fought successfully at Amiens and other places. When peace was proclaimed he was placed at the head of the army of occupation in France, and in 1879 was appointed imperial viceroy of the newly organized province, Alsace-Lorraine; he died in Karlsbad, Bohemia.

Marat (*ma-rah*), **Jean Paul**, 1744-1793. A French revolutionist; born in Baudry, Neuchâtel, Switzerland; established the journal, "Friend of the People." The fall of the Girondists was a triumph for him and his friends, but it led quickly to his own end; it was at this time that Charlotte Corday resolved to rid the world of him, and he was stabbed by her in Paris.

Marcellus, **M. Claudius**, . . . -208 B.C. A Roman general and member of one of the most eminent plebeian families; in his first consulship (222 B. C.) he defeated the Insubrian Gauls; in the second Punic war Marcellus took command after the disaster of Cannæ, and put a check on the victorious Hannibal at Nola, in Campania (216 B. C.). Again consul in 214 B. C., he gave a fresh impulse to the war in Sicily; in his fifth consulship, 208 B. C., he fell in a skirmish against Hannibal.

Marconi, **William**, 1875- . . . An Anglo-Italian electrician; born in Grifone, near Bologna, Italy. His mother was an Irishwoman. He began experimenting in wireless telegraphy in 1895. His first English exhibition was given in 1896, and was private. After that public interest was aroused and experiments were tried with varying degrees of success. He visited the United States to induce the government to buy the right to use his system, but did not succeed, as what was regarded as a superior system had been perfected by the Signal Service. Various European navies, however, adopted it.

Marcy, **William L.**, 1796-1857. A distinguished American statesman; born in Massachusetts. His mature life was spent in New York, of which state he was governor three times; was also secretary of war in President Polk's cabinet, 1845, and secretary of state in President Pierce's cabinet, 1853-1857.

Margaret (Semiramis of the North), 1353-1412. Queen of Norway, Sweden, and Denmark.

Margaret of Anjou, 1430-1482. Queen of Henry VI. of England.

Margaret of Angoulême, 1492-1549. Queen of Navarre and authoress.

Margaret of Austria, 1480-1530. Regent of the Netherlands.

Margaret of Valois, 1553-1615. Queen of France.

Maria de' Medici, 1573-1642. Queen of France.

Maria Louisa, 1791-1847. Empress of the French.

Maria Theresa, 1717-1780. Queen of Hungary and Bohemia, Archduchess of Austria, and Empress of Germany; daughter of the Emperor Charles VI.; born in Vienna. In 1736 she married Duke Francis Stephen of Lorraine, who in 1737 became Grand Duke of Tuscany. The day after her father's death, in 1740, she ascended the throne of Hungary, Bohemia, and Austria, and declared her husband joint ruler. Assailed by powerful foes she maintained long and costly wars in successful defense of her dominions. She died in Vienna.

Marie Antoinette (*ma-hé-on-tueh-net*), 1755-1793. Queen of France; born in Vienna, Austria. She was the daughter of the Emperor Francis I. and the celebrated Maria Theresa. She left Vienna for Versailles in 1770, when only fifteen years of age, to give her hand to the young Duke of Berri, afterward Louis XVI. of France. When her husband ascended the throne in 1774, she gained the ill will of the people by repeated ill-advised conduct. It was the queen who advised the flight of the royal family from Paris in June, 1791, which ended in their capture and return. At length came the fatal 10th of August, 1792. Prepared for the worst, the queen exerted all her power to induce the king to meet death sword in hand; but he thought resistance was in vain, and was led with his consort before the Legislative Assembly, where she heard his deposition announced, and then accompanied him to the prison of the Temple. There, though separated from her children and deprived of every semblance of royalty, she had every material comfort and was well treated up to the day of her trial. In January, 1793, she had a parting interview with her husband, on whom sentence of death had been passed by the Convention. In August following she was re-

moved to the Conciergerie, and in October she was brought before the revolutionary tribunal, and finally perished under the guillotine.

Marion, **Francis**, 1782-1795. An American military officer; born near Georgetown, S. C. At the outbreak of the Revolutionary War, in 1775, he was elected to Congress from South Carolina, but afterward obtained various commands in the Continental army. He died in Pond Bluff, S. C.

Marius, **Calus**, 157-86 B. C. Roman general and consul.

Mariborough, **John Churchill**, Duke of, 1660-1722. English commander; commanded the English forces in Ireland, 1689; accused of treason, deposed, and confined in the Tower, 1692; reinstated; commanded the allied armies in Holland, 1702; won the battle of Blenheim, 1704; Ramillies, 1706; Oudenarde, 1708; Malplaquet, 1709.

Marmont, 1774-1852. Duke of Ragusa and marshal of France; served under Napoleon, and distinguished himself on many a battlefield; received the title of Duke for his successful defense of Ragusa against the Russians; was present at Wagram, Lützen, Bautzen, and Dresden, but came to terms with the allies after the taking of Paris, which led to Napoleon's abdication in 1814; obliged to flee on Napoleon's return, he came back to France and gave his support to the Bourbons.

Marochetti, **Baron**, 1805-1868. Italian sculptor; born in Turin; after working in Paris, went to England in 1848, and executed several public statues, one of Queen Victoria among others.

Marquette (*mar-ket*), **James**, 1637-1675. A French missionary and explorer; born in Laon, France. He became a Jesuit priest in 1666 and went to Canada as a missionary; in 1673-1674 he made an extensive missionary journey through the Lake Superior and Green Bay region, traveling, exploring, and preaching; was one of the early voyagers down the Mississippi river, of which he wrote an interesting account; he died near Marquette river, Mich.

Marshall, **John**, 1755-1835. An American jurist; born in Fauquier county, Va.; an officer in the Colonial army from 1775 to 1779, where he won distinction, especially on courts-martial, in which he acted frequently as judge-advocate; he went as an envoy to France in 1797, but was superseded on account of his Federalistic views; in 1799 he entered Congress, and in 1800 was appointed secretary of war but declined; a little later he became secretary of state; in 1801 he was nominated chief justice of the United States by President John Adams, and confirmed unanimously by the Senate; this office he held thirty-four years, during which his decisions on constitutional questions established precedents in the interpretation of the Constitution that have been accepted ever since; he died in Philadelphia.

Marshman, **Joshua**, 1768-1837. An English missionary; born in Westbury Leigh, England; was sent in 1799 by the Baptist Missionary Society to Serampore, where he had Carey, Ward, and others as fellow laborers; translated the Bible into Chinese; he died in Serampore, India. His son, John Clark Marshman, founded the first English weekly newspaper in India.

Martel, **Charles**, Duke of Austrasia (the Hammer), 689-741. Conquered the Saracens in the great battle of Tours, or Poitiers, 732. See CHARLES MARTEL.

Marx, **Karl**, 1818-1883. German socialist; born at Treves, of Jewish descent; was at first a student of philosophy and a disciple of Hegel, but soon abandoned philosophy for social economy; early adopted socialistic opinions, for his zeal in which he was driven from Germany and France, to settle in London, where he spent the last thirty years of his life; one of the founders of the "Internationale," and wrote a work, "Das Kapital," which has become the text-book of Socialism.

Mary I. (Bloody Mary), 1516-1558. Queen of England; married Philip II. of Spain; persecuted the Protestants.

Mary Stuart, 1542-1587. Queen of Scots; daughter of James V. and Mary of Guise; educated in France, where she was married to the Dauphin in 1558, who the following year ascended the French throne as Francis II., but died childless, 1560; invited to the throne of Scotland, and married her cousin, Lord Darnley; suppressed, 1566, a revolt of the Protestants instigated by Queen Elizabeth; joined, 1566, a league to extirpate heresy, and, wearying of the arrogance and dissoluteness of Lord Darnley, bestowed her confidence on David Rizzio, an Italian musician, whose murder was instigated the same year by Mary's jealous husband; Lord Darnley was killed in 1567, and Queen Mary married the Earl of Bothwell the same year; public sentiment in Scotland against her became

so intense that she was compelled to fly to England, where she was finally beheaded on an unproved charge of conspiracy.

Masanello (*mah-sa-nel'lo*), 1623-1647. The commonly received name of Tommaso Aniello, a fisherman of Naples; born in Amalfi; he headed the populace in their revolt against the Spanish viceroy in 1647, when only twenty-four years of age. His career lasted but nine days, in which time he had 150,000 men under his orders, and was elevated to sovereign authority. He was murdered by four assassins at Naples. He has since been venerated as the liberator of his country.

Mascagni (*mas-kan'ye*), Pietro, 1863- . . . An Italian composer; born in Leghorn, Tuscany. He produced a one-act opera, "Cavalleria Rusticana," in competition for a prize.

Maspero, Gaston Camille Charles, 1846- . . . A French Egyptologist; born of Italian parents, in Paris, France. As an explorer he excavated or opened the pyramids of the kings belonging to the fifth and sixth dynasties, and the burial fields of Sakkara and Dashur, and discovered new sepulchral sites of great value at Delf el-Bahari, near the entrance to the Valley of the Tombs of the Kings, at Eckmin, 130 miles south of Thebes, and at other places.

Massasoit, 1580?-1661. Indian chief; born in Massachusetts; in March, 1621, three months after the landing of the Pilgrims, he sent a warrior named Samoset to Plymouth, who shouted in English, which he had learned from Penobscot fishermen, "Welcome, Englishmen!" Later Massasoit visited the Pilgrims in person and arranged a treaty of friendship. This is the oldest diplomatic act recorded in the history of New England, and was faithfully kept for fifty-four years.

Mathew, Cotton, 1663-1728. An American theologian and writer; born in Boston; author of 382 works. He believed in witchcraft and became notorious for his zeal in persecuting those against whom it was charged.

Mathew, Theobald, 1790-1856. An Irish reformer; born in Thomastown, near Cashel, Ireland; was ordained in the Franciscan order. On April 10, 1838, he signed a total abstinence pledge and began a temperance crusade. He traveled over all parts of Great Britain and Ireland, and in the United States. The immediate result of his preaching was a marked decrease in crime and intoxication. Thousands of Father Mathew Total Abstinence Societies have been organized throughout the world in his honor. Died in Queenstown.

Maupeirtuis, Pierre Louis Moreau de, 1698-1759. French mathematician and astronomer; born at St. Malo; went to Lapland to measure a degree of longitude, to ascertain the figure of the earth; wrote a book "On the Figure of the Earth."

Maurice of Nassau, 1567-1625. Prince of Orange; one of the most famous generals of modern times; son of William the Silent, on whose assassination he was elected stadtholder, and became by his prowess the liberator of the United Provinces from the yoke of Spain. His name is stained by his treatment of Barneveldt, who saw and opposed his personal ambitions.

Maxim, Hiram S., 1840- . . . American inventor; born at Sangerville, Me.; showed early a decided mechanical talent, and is best known in connection with the invention of the gun named after him; among his other inventions are the smokeless powder and the incandescent lamp carbons.

Maximilian (Ferdinand Maximilian Joseph), 1832-1867. Archduke of Austria and emperor of Mexico; executed by the Mexicans.

Mazarin (*maz-a-ran*), Jules, 1602-1661. An Italian ecclesiastic; born in Piccina, Italy; he became a cardinal, and succeeded the great Richelieu as prime minister of France. He was very niggardly and avaricious, and had acquired in various ways, fair and foul, an immense fortune, amounting to \$6,000,000, which he offered to the king, Louis XIV., shortly before he died. He died in Vincennes, France.

Masop'pa, Ivan, 1640-1709. Hetman of the Cossacks; born in Kiev; became page to John Casimir, king of Poland; he won the confidence of Peter the Great, who made him a prince under his suzerainty, but in an evil hour he allied himself with Charles XII. of Sweden, and lost his principality; fled to Bender on the defeat of the Swedish king at Poltava in 1709.

Massini (*mat-ze'ne*), Giuseppe, 1808-1872. An Italian patriot; born in Genoa; joined the Carbonari; was arrested by the authorities of Piedmont on the charge of conspiring against the government, but, after being imprisoned for six months, was released for lack of evidence. Founded the famous secret revolutionary

society "Young Italy." After the revolution of 1848 he became a member of the triumvirate in the republic of Rome, but was exiled at the restoration of the papal power. In 1870 he engaged in an insurrection at Palermo, and was captured, but afterward released at the general amnesty after the occupation of Rome. Died in Pisa, Italy.

Meade, George Gordon, 1815-1872. An American general; born at Cadiz, Spain; died in Pennsylvania. He commanded the Federal forces at the important battle of Gettysburg, Penn., and was second in command in General Grant's Richmond campaign.

Medici (*med'e-che*), A noble Florentine family, founded by Giovanni de' Medici in the fourteenth century, and became extinct in the male line 1737. Several of its members were distinguished as soldiers, others as statesmen and patrons of the arts.

Medici, Alessandro de', 1510-1537. First duke of Florence; assassinated.

Medici, Cosimo de' (the Great), 1519-1574. First grand duke of Tuscany.

Medici, Lorenzo de' (the Magnificent), 1448-1492. Prince of Florence; scholar and patron of literature and art.

Melissolier (*may-so-ne-a'*), Jean Louis Ernest, 1815-1891. A French painter; born in Lyons, France. All his works were painted with Flemish care and finish but were thoroughly original in their treatment. His pictures, though of small size, sold for large sums. He died in Paris.

Melanch'thon, Philip (real name P. Schwarziedt), 1497-1560. An eminent German theologian and reformer; he was the contemporary, friend, and the successor of Luther as the head of the German Reformation.

Mencius or Meng-tze, 372-289 B. C. A celebrated Chinese sage; a disciple, some say a grandson, of Confucius; his teachings are collected in a book entitled the "Book of Meng-tze," which is full of practical instruction.

Men'delssohn-Barthol'dy, Felix, 1809-1847. Celebrated German composer; born in Hamburg; his compositions consist of symphonies, operas, oratorios, and church music; his oratorios of "St. Paul" and "Elijah" are enduring monuments of his genius.

Men'delssohn, Moses, 1729-1786. A German philosopher, born at Dessau, of Jewish descent; was author of "Phædon, a Discourse on the Immortality of the Soul," and did a great deal in his day to do away with the prejudices of the Jews and the prejudices against them.

Men'elek, or Menelik, II., 1844- . . . King or Negus of Abyssinia; son of Hailo Menelik, King of Shoa; succeeded Johannes II. in 1889, and was crowned in 1890; he is of negro blood with a strain of Jew, Arab, and Galla, and claims descent from Solomon and the Queen of Sheba; at the battle of Adowa, in the spring of 1896, his troops inflicted an overwhelming defeat on the Italian army, thus securing the independence of his territories.

Menzel, Adolph, 1815- . . . German painter; born at Breslau; best known for his historical pictures and drawings.

Mergenthaler, Ottmar, 1854-1899. An American inventor; born in Württemberg, Germany; came to the United States in 1872 and received a government position in Washington to care for the mechanism of bells, clocks, and signal service apparatus, became connected with a mechanical engineering firm in Baltimore, Md., in 1876; subsequently, while still engaged with that company, he began experiments which resulted in the invention of the typesetting machine bearing his name; he died in Baltimore, Md.

Mesmer, Friedrich Anton, 1733-1815. A German physician; born near Lake Constance; was the founder of animal magnetism, called mesmerism after him, his experiments in connection with which created a great sensation, particularly in Paris, until the quackery of it was discovered by scientific investigation.

Met'ternich, Clemens Wenzel Nepomuk Lothar von, 1773-1859. Austrian statesman.

Meyerbeer, Giacomo (Jakob Meyer-Beer), 1791-1864. German musical composer.

Michael Angelo (Michelangelo Buonarroti), 1475-1564. Italian painter, sculptor, architect, and poet; "the Dante of the arts;" patronized by Lorenzo the Magnificent; went to Rome, where he designed the decorations for the church of St. Peter; became architect of that magnificent structure in 1547, and devoted the rest of his life almost exclusively to its completion.

Miffin, Thomas, 1744-1800. An American statesman and general; born in Pennsylvania. He was a member

of the Continental Congress, and governor of his native state nine years.

Mill, John Stuart, 1806-1873. An English philosopher and political economist; born in London, England. From 1835 to 1840 he was editor and part proprietor of the *London and Westminster Review*, in which many of his own articles appeared. His "System of Logic, Ratiocinative and Inductive," appeared in 1843 and was followed by a long list of standard works. His "Autobiography" was published after his death, which occurred in Avignon, France.

Millais, Sir John Everett, 1829-1896. An English painter; born in Southampton, England. In portraiture he held the foremost rank, and painted a number of the most distinguished men of his day. Many of the works of Millais are well known by engravings. He died in London.

Miller, Hugh, 1802-1856. Scotch journalist and geologist; self-taught; born in Cromarty, of sailor ancestry; began life as a stone mason; editor of the *Witness* newspaper from 1840, with the exception of one year, till his death; wrote the "Old Red Sandstone," "Footprints of the Creator," and the "Testimony of the Rocks," besides being the author of an account of his life, "My Schools and Schoolmasters"; died by his own hand at Portobello.

Millet (mil-lay'), Jean Francois, 1814-1875. A French painter. In 1849 he settled among the peasants of Barbizon, on the edge of Fontainebleau forest, and devoted himself to transferring their simple everyday life to his canvases, which he did with great truth of sentiment and subdued poetic charm. Of his paintings may be mentioned "The Angelus," which was sold by auction in Paris, in 1889, for about \$115,000. He died in Barbizon, France.

Miltiades. Flourished 500 B. C. An Athenian general; famous for his decisive defeat of the Persians at Marathon, 490 B. C.

Milton, John, 1608-1674. Poet of the Puritans; educated at Cambridge; passed several years in travel; advocated the popular party, opposing prelacy and the established church; wrote many political and controversial works in prose; was appointed in 1649 Latin secretary of the Council of State; in 1652 he had become entirely blind; his "Paradise Lost" was completed in 1666, and sold for £10, half of which was not to be paid until the sale of 1,300 copies.

Minie, Claude Etienne, 1814-1879. A French military officer; born in Paris, France. He devoted his principal thought to the perfecting of firearms, and in 1849 invented the Minie rifle. In 1858 the Khedive of Egypt appointed him director of a small arms factory and military school in Cairo.

Mirabeau (meer-uh-bo'), Honore Gabriel de Riquetti, Comte de, 1749-1791. French orator and statesman; exiled and imprisoned for debt; separating from his wife, he eloped with a young woman in 1776, for which offense he was condemned to death; escaped, however, with four years' imprisonment; led a wandering life for several years, engaging in numerous intrigues; sent to Berlin on a secret mission in 1786, and elected to the States-General in 1789, and later to the National Assembly, of which he became president in 1791.

Mitchell, Ormsby Macknight, 1810-1862. American general and astronomer.

Mitchell, John, 1869- . . . An American labor executive; born in Braidwood, Ill.; received a common school education; later studied law; worked in coal mines in 1882; joined the Knights of Labor in 1885, and went West, where he worked in coal mines till 1890; became secretary-treasurer of the sub-district of the United Mine Workers of America in 1895; president of the United Mine Workers of America in 1898; and was vice-president of the American Federation of Labor in 1898 and 1900. President Mitchell had personal charge of the great strike in the anthracite coal mines in the summer and autumn of 1902.

Mithridates the Great, 135?-63 B. C. King of Pontus, who overran all Asia Minor, but was defeated by Pompey, and committed suicide; reigned from 120 to 63 B. C.

Mivart, St. George, 1827-1901. French naturalist; a Roman Catholic professor at Louvain; distinguished for his opposition to Darwinianism.

Modjeska, Helena, 1844- . . . A Polish actress; born in Cracow, Poland. She began to act in a traveling company in 1861. Four years later she made a great name at Cracow; she settled with her second husband, near Los Angeles, Cal., to try farming; but the enterprise not succeeding, she returned to the stage, and won a complete triumph at San Francisco in 1877.

Mohammed (or Mahomet), 569-632. Conqueror and prophet, and founder of the Moslem religion, which threatened to subdue the Christian world; pretended, at the age of forty, to have received a revelation from Allah, and thenceforth devoted himself to the propagation of his new religion; previous to this time he had been an idolater; his new faith, which included the unity of God, was rejected at Mecca, where a conspiracy was formed against him, but was warmly embraced in Medina, to which place the prophet fled in 622; from this flight, called the Hegira, the Mussulmans compute their time; after this event Mohammed propagated the faith of Islam by the sword, gaining numerous victories, and spreading his religion over a large portion of Western Asia.

Moltke (molt'ka), Count von (surnamed the Silent), 1800-1891. Great German field marshal; born in Mecklenburg-Schwerin, of an old family; was pre-eminent as a military strategist, planned and conducted the Prussian campaign against Austria in 1866, and the German campaign against France in 1870-1872; was in the service of Denmark before he entered the Prussian service.

Monk, George, Duke of Albemarle, 1608-1670. English general; restored the monarchy.

Monmouth, James Scott, Duke of, 1649?-1685. Natural son of Charles II.; rebelled, but was defeated and executed.

Monroe, James, 1758-1831. Fifth president of the United States; born in Virginia; captain in the Revolutionary War; studied law under Jefferson; in Congress, 1783; opposed the Constitution; governor of Virginia, 1799; envoy extraordinary to France, 1802; re-elected governor, 1811; appointed secretary of state same year by Madison; elected president, 1816, and re-elected 1820.

Montalembert (mon-tal-aim-bair'), Comte de, 1810-1870. A French politician; born in London; son of a French emigrant; spent his life in advocating the cause of a free unfettered system of national education; wrote the "Monks of the West," his chief work.

Montcalm de St. Veran, Louis Joseph, Marquis de, 1712-1759. A French general; killed simultaneously with his gallant antagonist, General Wolfe, on Quebec Heights.

Montefiore, Sir Moses, 1784-1885. A philanthropic Jewish banker; born in Leghorn; a friend to the emancipation not only of the oppressed among his own race, but of the slaves in all lands; lived to a great age.

Montezuma II., 1466-1520. The last of the Mexican emperors; submitted to Cortez when he landed; died of a wound he received as he pleaded with his subjects to submit to the conqueror, aggravated by grief over the failure of his efforts in bringing about a reconciliation.

Montfort, Simon de, 1208-1265. A leader of the English barons in rebellion against Henry III.; De Montfort, when in almost absolute power, was the first to summon representatives of the boroughs to Parliament and thereby originated the House of Commons. Killed in the battle of Evesham.

Montgolfier (mon-golf'ey'), Joseph Michel, 1740-1810, and Jacques Etienne, 1745-1799. Joint inventors of the balloon; were born in Vidalon-les-Annonay, in the department of Ardeche, in France. Their first balloon, inflated with heated atmosphere, ascended from Annonay in 1783, and the invention soon brought them fame and honors. Joseph was also the inventor of the water-ram.

Montgomery, Richard, 1736-1775. An American military officer; born near Feltrim, Ireland; was with Wolfe at the taking of Louisburg in 1758. On his return to England he sold his commission and emigrated to America. On the breaking out of the Revolutionary War, the command of the Continental forces in the northern department fell to him. He reduced Fort Cherokee and took Montreal. He fell in an attempt on Quebec, being struck by a ball from the only gun fired by the enemy.

Montrose, James Graham, Marquis of, 1612-1650. A Scotch noble, and a distinguished royalist leader under Charles I.; born in Edinburgh, Scotland. He took a very active part on the side of the king, was created a marquis, and in a few months gained the battles of Perth, Aberdeen, and Inverlochy. In 1645 his fortune changed, and he was obliged to leave the kingdom; in 1648 he landed in Bergen. Invaded Scotland again in 1649 but was defeated, captured, and conveyed to Edinburgh, and there decapitated and quartered.

Moody, Dwight Lyman, 1837-1899. An American evangelist; born in Northfield, Mass.; received a common school education; united with the Mount Vernon Congregational Church in Boston in 1850; settled in
